Sub-No. 537, Chautauqua County, NY (Dunkirk, NY), Ashtabula County, OH (Saybrook, OH); and Sub-No. 538, Comal County, TX (New Braunfels, TX); (5) replace one-way service with authority to provide radial service between points located throughout the US wherever one-way service appears in each of the above-numbered certificates; (6) remove the exclusion of AK and HI from authority to otherwise serve points in the US or a significant portion thereof wherever such exclusion appears in each of the above-numbered certificates; (7) remove the exclusion of cities from authority to otherwise serve the entire state such as Springfield, Carthage, and Neosho, MO in Sub-Nos. 7 and 10, Great Bend, Liberal, and Wichita, KS in Sub-No. 97, Beaumont and Houston, TX in Sub-No. 97, Ogden and Clearfield, UT in Sub-No. 133, Davenport, Clinton, and Council Bluffs, IA in Sub-No. 162, Topeka, KS in Sub-No. 162, Kansas City, MO Sub-Nos. 162 and 249, Omaha, Lincoln, and Hastings, NE in Sub-No. 162 and Milwaukee, WI in Sub-No. 162, and (8) remove restrictions to traffic originating at or destined to named facilities or points in Sub-Nos. 7, 10, 31, 36, 39, 69, 73, 78, 81, 89, 91, 95, 97, 98, 104, 109, 111, 113, 119, 124, 130, 133, 144, 151, 155, 156, 165, 181, 183, 184, 186, 187, 195, 202, 221, 235, 238, 242, 246, 251, 253, 254, 255, 256, 257, 263, 265, 266, 267, 284, 287, 293, 303, 308, 316, 317, 320, 333, 334, 335, 338, 342, 346, 350, 354, 355, 358, 363, 368, 375, 379, 380, 381, 383, 385, 387, 395, 396, 397, 405, 406, 407, 410, 411, 420, 422, 425, 427, 428, 429, 431, 439, 441, 443, 444, 450, 457, 458, 459, 464, 467, 468, 481, 484, 502, 503, 520, 521, 522, 528, and 534.

MC 143512 (Sub-6)X, filed May 18, 1981. Applicant: ALL CORPS, 838 Hutchison St., Vista, CA 92083. Representative: Milton W. Flack, 8383 Wilshire Blvd., Suite 900, Beverly Hills, CA 90211. Applicant seeks to remove restrictions in its Sub-Nos. 3F and 4F permits to (1) broaden its commodity descriptions: in Sub-Nos. 3F and 4F part (1), from bakery goods and frozen bread, to "food and related products"; and (2) broaden the territorial description to between points in the United States, under continuing contract(s) with a named shipper, in both permits.

MC 144953 (Sub-11)X, filed May 15, 1981. Applicant: MULLEN TRUCKING, LTD., P.O. Box 8009, Station F, Calgary, Alberta, Canada T2J 4B4. Representative: Steven K. Kuhlman, 717 17th Street, Denver, CO 80202. Applicant seeks to remove restrictions in its Sub-Nos. 1, 4, 5, 6, and 8 certificates to (1) broaden the commodity descriptions from bentonite, barite, lignite, and drilling mud additives to "ores and minerals, coal and coal products, and chemicals and related products" in Sub-Nos. 1 and 6; from railroad ties, lumber and wood products, roofing materials, and fibreboard sheathing to "forest products, lumber and wood products, and building materials" in Sub-Nos. 4, 5, and 8; (2) delete the restrictions against the transportation of bulk commodities in Sub-Nos. 1 and 6, and concerning the transportation of traffic moving in foreign commerce in Sub-Nos. 1 and 8; (3) authorize radial service in lieu of existing one-way authority between the ports of entry on the International Boundary line between the US and CN in named States and several western and mid-western states in Sub-Nos. 1, 4, 5, and 8; and (4) delete the "in bulk" restrictions in Sub-Nos. 1 and 6.

MC 145468 (Sub-46)X, filed May 13, 1981. Applicant: KSS TRANSPORTATION CORP., Route 1 and Adams Station, P.O. Box 3052, North Brunswick, NJ 08902. Representative: Arlyn L. Westergren, Westergren & Hauptman, P.C., Suite 201, 9202 W. Dodge Rd., Omaha, NE 68114. Applicant seeks to remove restrictions in its Sub-No. 13F certificate to (1) broaden commodity description from marshmallows to "food and related products"; and (2) replace one-way authority with radial authority between Chicago, IL and points in the U.S., and eliminate restrictions against service to AK and HI.

MC 146166 (Sub-5)X, filed May 18, 1981. Applicant: TRIANGLE TRANSPORT CO., INC., 74 Sulyma Street, Cumberland, RI 02864. Representative: William F. Poole, 41 Bea Drive, North Kingstown, RI 02852. Applicant seeks to remove restrictions in its Sub-No. 1F permit to (1) broaden the commodity descriptions from cushions, pads, webbing, hammocks, grill covers, decorations, and ornaments, materials, equipment, supplies, parts and accessories to "textile mill products, rubber and plastic products, and furniture and fixtures"; (2) delete the exceptions of service to AK and HI, and (3) authorize service between points in the U.S., under continuing contract(s) with a named shipper.

MC 146176 (Sub-11)X, filed May 8, 1981. Applicant: J & L TRANSPORTS, INC., Route 1, Box 306, Almond, WI 54909. Representative: Wayne W. Wilson, 150 East Gilman Street, Madison, WI 53703. Applicant seeks to remove restrictions in its Sub-Nos. 3F, 5F, 6F, 8F, and 9F certificates to (1) broaden the commodity descriptions in Sub-Nos. 3F and 5F from paper and paper products to "pulp, paper, and related products," (2) remove bulk restrictions in Sub-Nos. 6F, 8F and 9F; (3) replace facilities with county-wide authority as follows: in Sub-No. 3F, Outagamie, Winnebago, and Calumet Counties for Appleton and Combined Locks, WI; in Sub-No. 5F Outagamie, Winnebago, and Calumet Counties for Appleton, WI; in Sub-No. 8F Winnebago County for Neenah and Oshkosh, WI; and in Sub-No. 9F Winnebago County for Menasha, WI; (4) remove restrictions in Sub-Nos. 3F, 5F, 8F and 9F limiting transportation to traffic originating at or destined to named facilities; and (5) in all subs replace one way with radial authority.

MC 147013 (Sub-5)X, filed May 14, 1981. Applicant: RDL, INC., P.O. Box 286, Gambrills, MD 21054. Representative: Chester A. Zyblut, 366 Executive Building, 1030 Fifteenth St., N.W., Washington, D.C. 20005. Applicant seeks to remove restrictions in its Sub-Nos. 2F and 4 certificates to (1) broaden the commodity description from canned and preserved foodstuffs and confectionery to "food and related products" in each certificate; (2) eliminate the facilities limitations in Sub-No. 4; (3) change city to county-wide authority from Timberville to Rockingham County, VA, Martinsburg to Berkeley County, WV, and Lincolnton to Lincoln County, NC, in Sub-No. 2F, and Hackettstown to Warrent County, NJ, Cockeysvill to Baltimore County, MD, Elizabethtown to Lancaster County, PA, and Waco to McLennan County, TX, in Sub-No. 4; and (4) expand one-way to radial authority between (a) Winchester, VA, Rockingham County, VA, Berkeley County, WV, and Lincoln County, NC, and, points in TX, LA, AL, AR, GA, OK, TN, MS, and FL in Sub-No. 2F; and (b) Warren County, NJ, Chicago, IL, Baltimore County, MD, Lancaster County, PA, and McLennan County, TX, and, points in NJ, IL, PA, LA, OK, AR, TX, CA, OR, MO, CO, OH and GA in Sub-No. 4.

MC 147196 (Sub-14)X, filed May 11, 1981. Applicant: ECONOMY TRANSPORT, INC., P.O. Box 50262, New Orleans, LA 70150. Representative: Donald A. Larousse (same address as applicant). Applicant seeks to remove restrictions in its Sub-Nos. 2F, 7F, 8F, 9F, 10F, 11F amd 12F permits to (1) broaden the commodity description from paper and paper products to "pulp, paper and related products" in Sub-Nos. 2F and 7F; from bread crumbs, breading, batter, and cake mixes in Sub-No. 8F, non-alcoholic carbonated beverages in Sub-No. 9F, and sugar in Sub-No. 11F, to "food and related products"; from lignosulfonate in Sub-No. 10F to "chemicals and related products" and from iron and steel pipe, casings, fittings, and accessories in Sub-No. 12F, to "metal products" and (2) broaden the territorial description to points in the U.S., under continuing contract(s) with named shippers.

MC 149307 (Sub-1)X, filed May 13, 1981. Applicant: FREIGHT EXPRESS, INC., One North LaSalle Street, Suite 2225, Chicago, IL 60602. Representative: David R. Kugler (same address as applicant). Applicant seeks to remove restrictions in its lead certificate by removing facilities limitations at Troy, MI and Hot Springs, AR and replacing those base points with county-wide authority to authorize service between points in Oakland County (Troy), MI and Garland County (Hot Springs), AR and points in the U.S. and by removing the HI exception in connection with its authority to transport general commodities, with exceptions.

MC 150865 (Sub-6)X, filed May 11, 1981. Applicant: ATLANTIC & WESTERN TRANSPORTATION CO., INC. and RICHARDS & ASSOCIATES, INC., 3934 Thurman Road, Forest Park, GA 30051. Representative: Ronald J. Turner (same as applicants). Applicants seek to remove restrictions in MC-108467 (Sub-No. 1) permit to (1) broaden the commodity description from materials and equipment used in or in connection with the construction, operation, repair, maintenance, or dismantling of telephones and telegraph lines to "ores and minerals, coal and coal products, petroleum, natural gas and their products, lumber and wood products, furniture and fixtures,

chemicals and related products, paints and related materials, rubber and plastic products, clay, concrete, glass, or stone products, metal products, machinery, transportation equipment, instruments and photographic goods, and those commodities which because of their size and weight require special handling or equipment, and (2) broaden the territorial description to between points in the United States.

[FR Doc. 81-16130 Filed 5-2-81; 8:45 am]
BILLING CODE 7035-01-M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

The following applications, filed on or after February 9, 1981, are governed by Special Rule of the Commission's Rules of Practices, see 49 CFR 1100.251. Special Rule 251 was published in the **Federal Register** of December 31, 1980, at 45 FR 86771. For compliance procedures, refer to the **Federal Register** issue of December 3, 1980, at 45 FR 80109.

Persons wishing to oppose an application must follow the rules under 49 CFR 1100.252. A copy of any application, including all supporting evidence, can be obtained from applicant's representative upon request and payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated its proposed service warrants a grant of the application under the governing section of the Interstate Commerce Act. Each applicant is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as longs as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate in applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor cantract carrier authority are those where service is for a named shipper "under contract".

Volume No. OPY-4-149

Decided: May 20, 1981.

By the Commission, Review Board No. 2, Members Carleton, Fisher and Williams.

MC 33807 (Sub-7), filed May 6, 1981. Applicant: NASHUA MOTOR EXPRESS, INC., 270 Amherst St., Nashua, NH 03063. Representative: Mary E. Kelley, 22 Stearns Ave., Medford, MA 02155, (617) 396-4090. Transporting *general commodities* (except classes A and B explosives), (1) serving points in MA and NH as intermediate and off-route points in connection with carrier's existing regular route operations, and (2) between points in MA and NH, on the one hand, and, on the other, points in RI, CT, and VT.

MC 128927 (Sub-7), filed May 8, 1981. Applicant: MARTIN TRUCKING COMPANY, INC., Box 406, Tomah, WI 54660. Representative: James A. Spiegel, Olde Towne Office Part, 6333 Odana Rd., Madison, WI 53719, (608) 273-1003. Transporting *malt beverages*, between points in Waukesha County, WI, on the one hand, and, on the other, points in St. Clair County, IL, Vanderburgh County, IN, Campbell County, KY, and Saginaw County, MI.

MC 154607, filed May 8, 1981. Applicant: NIXON TRANSPORTATION, INC., 206 N. Hull, Fort Branch, IN 47648. Representative: Norman A. Cooper, 145 W. Wisconsin Ave., Neenah, WI 54956, (414) 722-2848. Transporting *general commodities* (except classes A and B explosives), between points in the U.S., under continuing contract(s) with Red Spot Paint & Varnish Co., Inc., of Evansville, IN.

MC 155577, filed May 5, 1981. Applicant: CAMELOT DISTRIBUTING COMPANY, a corporation, 400 Fisk Dr. S.W., Atlanta, GA 30336. Representative: Clifford G. McGehee III (same address as applicant), (404) 349-7680. Transporting *pulp, paper and related products*, between points in the U.S., under continuing contract(s) with Sonoco Products Co., of Hartsville, SC.

MC 155807, filed May 5, 1981. Applicant: ELITE MOVING & STORAGE, INC., 11 New Plant Court, Owings Mills, MD 21117. Representative: Robert J. Gallagher, 100 Connecticut Ave., N.W., Suite 1200, Washington, DC 20036, (202) 463-6044. Transporting *household goods*, (1) between points in MA, RI, CT, NY, NJ, PA, MD, DE, VA, WV, NC, SC, GA, FL, and DC, and (2) between points in (1) above, on the one hand, and, on the other, those points in the U.S. in and east of MN, IA, NE, CO, OK, and TX.

MC 155817, filed May 7, 1981. Applicant: SPATARO MOVING & STORAGE, INC., 1848 No. 4th St., Milwaukee, WI 53212. Representative: Lawrence P. Kahn, 161 W. Wisconsin Ave., Suite 5170, Milwaukee, WI 53203, (414) 271-9958. Transporting *general commodities* (except classes A and B explosives), between points in Racine, Kenosha, Milwaukee, Waukesha, and Ozaukee Counties, WI, on the one hand, and, on the other, Chicago, IL.

MC 155837, filed May 8, 1981. Applicant: MARVIN AND ROGER EINCK, d.b.a. EINCK TRUCKING, 850-16th St., Primghar, IA 51245. Representative: Marvin Einck (same address as applicant), (712) 757-6225. Transporting *food and related products*, between points in O'Brien County, IA, on the one hand, and, on the other, points in the U.S.

Volume No. OPY-4-150

Decided: May 20, 1981.

By the Commission, Review Board No. 2, Members Carleton, Fisher, and Williams.

MC 136087 (Sub-9), filed May 11, 1981. Applicant: J. C. TRUCKING, INC., 5085 Harlan, Denver, CO 80212. Representative: Leslie R. Kehl, 1660 Lincoln St., Suite 1600, Denver, CO 80264, (303) 861-4028. Transporting *iron and steel articles*, between points in CO, on the one hand, and, on the other, points in CO, KS, NM, MT, UT, and WY.

MC 139587 (Sub-26), filed May 12, 1981. Applicant: BROWN REFRIGERATED EXPRESS, INC., P.O. Box 603, Fort Scott, KS 66701. Representative: Wilburn L. Williamson, Suite 615-East, The Oil Center, 2601 Northwest Expressway, Oklahoma City, OK 73112, (405) 848–7946. [Volume No. 426]

Republications of Grants of Operating Rights; Authority Prior to Certification

The following grants of operating rights authorities are republished by order of the Commission to indicate a broader grant of authority over that previously noticed in the Federal Register.

An original and one copy of a petition for leave to intervene in the proceeding must be filed with the Commission within 30 days after the date of this Federal Register notice. Such pleading shall comply with Special Rule 247(e) of the Commission's *General Rules of Practice* (49 CFR 1100.247) addressing specifically the issue(s) indicated as the purpose for republication, and including copies of intervenor's conflicting authorities and a concise statement of intervenor's interest in the proceeding setting forth in detail the precise manner in which it has been prejudiced by lack of notice of the authority granted. A copy of the pleading shall be served concurrently upon the carrier's representative, or carrier if no representative is named.

MC 138144 (Sub-56F) (republication), filed January 14, 1980, published in the Federal Register issue of April 17, 1980, and republished this issue. Applicant: FRED OLSON CO., INC., 6022 West State Street, Milwaukee, WI 53213. Representative: William D. Brejcha, 10 S. LaSalle St., Suite 1600, Chicago, IL 60603. A decision of the Commission, Review Board Number 2, decided April 13, 1981, and served April 22, 1981, finds that the performance by applicant of the service described will serve a useful public purpose, responsive to a public demand or need to operate as a *common carrier,* by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *hides and pelts,* between points in CO, KS, MN, MO, NV, IA, IL, ND, and SD, on the one hand, and, on the other, points in IL, and WI; that applicant is fit, willing and able properly to perform the granted service and to conform to statutory and administrative regulations. The purpose of this republication is to reflect applicant's actual grant of authority.

MC 138415 (Sub-22) (republication), filed June 24, 1980, published in the Federal Register issue of August 7, 1980, and republished this issue. Applicant: TRAILER EXPRESS, INC., Box #327, Topeka, IN 46571. Representative: Michael M. Yoder, Box #157, Topeka, IN 46571. A decision of the Commission, Review Board Number 3, decided April 1, 1981, and served April 30, 1981, finds that the performance by applicant of the service described will serve a useful public purpose, responsive to a public demand or need to operate as a *contract carrier,* by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting (1) *mobile homes* and *buildings in sections,* from the facilities of Redman Homes, Inc., at Topeka, IN, to points in OH, WV, KY, WI, MI, IL, MO, and PA; and (2) *materials* used in the manufacture of mobile homes, from points in GA, NC, MN, and IA, to the facilities in (1) above, under continuing contract(s) in (1) and (2) with Redman Homes, Inc., of Topeka, IN; that applicant is fit, willing, and able properly to perform the granted service and to conform to statutory and administrative requirements. The purpose of this republication is to include buildings in sections in the commodity description in (1) above.

By the Commission.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

[Docket No. AB-52 (Sub 14F)]

Atchison, Topeka & Santa Fe Railway Co.—Abandonment—Between Williams and Grand Canyon, AZ; Findings

Notice is hereby given pursuant to 49 U.S.C. 10903 that by a Certificate and Decision decided May 22, 1981, a finding, which is administratively final, was made by the Commission, Review Board Number 3, stating that, subject to the conditions for (1) the protection of railway employees prescribed by the Commission in *Oregon Short Line R. Co.—Abandonment Goshen,* 360 I.C.C. 91 (1979); (2) the public use condition; and (3) historic resources condition, the present and future public convenience and necessity permit the abandonment by the Atchison, Topeka and Santa Fe Railway Company of a line of railroad known as the Grand Canyon District of the Albuquerque Division, extending from milepost 0.0 at Williams to milepost 63.79 at Grand Canyon, all in Coconino County, AZ. A certificate of public convenience and necessity permitting abandonment was issued to the Atchison, Topeka and Santa Fe

Railway Company. Since no investigation was instituted, the requirement of § 1121.38(b) of the Regulations that publication of notice of abandonment decisions in the **Federal Register** be made only after such a decision becomes administratively final was waived.

Upon receipt by the carrier of an actual offer of financial assistance, the carrier shall make available to the offeror the records, accounts, appraisals, working papers, and other documents used in preparing Exhibit I (§ 1121.45 of the Regulations). Such documents shall be made available during regular business hours at a time and place mutually agreeable to the parties.

The offer must be filed with the Commission and served concurrently on Santa Fe with copies to Ms. Ellen Hanson, Room 5417, Interstate Commerce Commission, Washington, DC 20423, no later than 10 days from publication of this Notice. The offer, as filed, shall contain information required pursuant to § 1121.38(b)(2) and (3) of the Regulations. If no such offer is received, the certificate of public convenience and necessity authorizing abandonment shall become effective 30 days from the service date of the certificate.

Agatha L. Mergenovich,

Secretary.

[FR Doc. 81-16124 Filed 5-28-81; 8:45 am]

BILLING CODE 7035-01-M

[Docket No. AB-18 (Sub-30F)]

Chesapeake & Ohio Railway Co.—Abandonment—Between Malden and Hy Tower, in and Discontinuance of Service Over Erie-Lackawanna Railroad at Griffith, IN; Findings

Notice is hereby given pursuant to 49 U.S.C. 10903 that by a decision decided May 21, 1981, an administratively final decision was made by the Commission, Division 2, Acting as an Appellate Division, that the public convenience and necessity permit the abandonment of a segment of rail line known as the Wabash Subdivision between milepost 230.95 near Malden, IN, and milepost 260.62 at Hy Tower, IN, a distance of 29.67 miles, including .04 mile of trackage rights over property owned by Thomas F. Patton and Ralph S. Tyler, Jr., Trustees of the property of Erie-Lackawanna Railway Company, Debtor, all in Porter and Lake Counties, IN, subject to the conditions for the protection of employees discussed in *Oregon Short Line R. Co.—Abandonment Goshen*, 360 I.C.C. 91 (1979). A certificate of abandonment will be issued to the Chesapeake and Ohio Railway Company based on this finding unless within 15 days from the date of publication, the Commission further finds that:

(1) A financially responsible person (including a government entity) has offered financial assistance (in the form of a rail service continuation payment) to enable the rail service involved to be continued. The offer must be filed with the Commission and served concurrently on the applicant, with copies to Ms. Ellen Hanson, Room 5417, Interstate Commerce Commission, Washington, DC 20423, no later than 10 days from publication of this Notice; and

(2) It is likely that such proffered assistance would:

(a) Cover the difference between the revenues which are attributable to such line of railroad and the avoidable cost of providing rail freight service on such line, together with a reasonable return on the value of such line, or

(b) Cover the acquisition cost of all or any portion of such line of railroad.

If the Commisssion so finds, the effectiveness of the certificate of abandonment will be postponed. An offeror may request the Commission to set conditions and amount of compensation within 30 days after an offer is made. If no agreement is reached within 30 days of an offer, and no request is made on the Commission to set conditions or amount of compensation, a certificate of abandonment will be effective on the 50th day after this notice is published. Upon notification to the Commission of the execution of an assistance of acquisition and operating agreement, the Commission shall postpone the effectiveness of the certificate for such a period of time as such an agreement (including any extensions or modifications) is in effect. Information and procedures regarding the financial assistance for continued rail service or the acquisition of the involved rail line are contained in 49 U.S.C. 10905 (as amended by the Staggers Rail Act of 1980, Pub. L. 96-448, effective October 1, 1980). All interested persons are advised to follow the instructions contained therein as well as the instructions contained in the above-referenced decision.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

[Docket No. AB-18 (Sub-36F)]

Chesapeake and Ohio Railway Co.; Abandonment in Mason County, MI and Manitowoc County, WI; Findings

Notice is hereby given pursuant to 49 U.S.C. 10903 that by a decision decided May 22, 1981, a finding, which is administratively final, was made by the Administrative Law Judge stating that, the public convenience and necessity permit the abandonment by the Chesapeake and Ohio Railway Company or car ferry operations between Ludington, Michigan and Manitowoc, Wisconsin and abandonment of 3.56 miles of yard and terminal tracks, and one (1) slip used in support of the car ferry route and operation in Ludington, Mason County, Michigan. Abandonment is subject to the conditions for the protection of employees discussed in *Oregon Short Line Railroad Co.—Abandoment—Goshen*, 360 I.C.C. 91 (1979). A certificate of abandonment will be issued to the Chesapeake Ohio Railway Company based on the above-described finding, 30 days after publication of this notice, unless within 15 days from the date of publication, the Commission further finds:

(1) A financially responsible person (including a government entity) has offered financial assistance (in the form of a rail service continuation payment) to enable the rail service involved to be continued. The offer must be filed with the Commission and served concurrently on the applicant, with copies to Mrs. Ellen Hanson, Room 5417, Interstate Commerce Commission, Washington, DC 20423, not later than 10 days from publication or this Notice; and

(2) It is likely that such proffered assistance would:

(a) Cover the difference between the revenues which are attributable to such line of railroad and the avoidable cost of providing rail freight service on such line, together with a reasonable return on the value of such line, or

(b) Cover the acquisition cost of all of any portion of such line of railroad.

If the Commission so finds, the issuance of a certificate of abandonment will be postponed. An offer may request the Commission to set conditions and amount of compensation within 30 days after an offer is made. If no agreement is reached within 30 days of any offer, and no request is make of the Commission to set conditions or amount of compensation, a certificate of abandonment will be issued no later than 50 days after notice is published. Upon notification to the Commission of the execution of an assistance or acquisition and operating agreement, the Commission shall postpone the issuance

of such a certificate for such period of time as such an agreement (including any extensions or modifications) is in effect. Information and procedures regarding the financial assistance for continued rail service or the acquisition of the involved rail line are contained in 49 CFR 1121 as revised by Ex Parte No. 274 (Sub-No. 6), *Abandonment of Railroad Lines and Discontinuance of Service*, 45 FR 75144 (November 25, 1980). All interested persons are advised to follow the instructions contained therein as well as the instructions contained in the above-referenced decision.

BILLING CODE 7035-01-M

[Docket No. AB-18 (Sub-35F)]

Chesapeake and Ohio Railway Co.; Abandonment—Near South Haven and Hartford in Van Buren County, MI; Findings

Notice is hereby given pursuant to 49 U.S.C. 10903 that by a decision decided May 8, 1981, a finding, which is administratively final, was made by the Administrative Law Judge, stating that, the public convenience and necessity permit the abandonment by the Chesapeake and Ohio Railway Company of the portion of a line of railroad between Milepost 0.78 at or near South Haven and Milepost 15.07 at or near Hartford in Van Buren County, MI, a distance of 14.29 miles. Abandonment is subject to the conditions for the protection of employees discussed in *Oregon Short Line Railroad Co.—Abandonment—Goshen*, 360 I.C.C. 91 (1979). A certificate of abandonment will be issued to the Chesapeake and Ohio Railway Company based on the above-described finding, 30 days after publication of this notice, unless within 15 days from the date of publication, the Commission further finds:

(1) A financially responsible person (including a government entity) has offered financial assistance (in the form of a rail service continuation payment) to enable the rail service involved to be continued. The offer must be filed with the Commission and served concurrently on the applicant, with copies to Ms. Ellen Hanson, Room 5417, Interstate Commerce Commission, Washington, DC 20423, no later than 10 days from publication of this Notice; and

(2) It is likely that such proffered assistance would:

(a) cover the difference between the revenues which are attributable to such line of railroad and the avoidable cost of providing rail freight service on such line, together with a reasonable return on the value of such line, or

(b) cover the acquisition cost of all or any portion of such line of railroad.

If the Commission so finds, the issuance of a certificate of abandonment will be postponed. An offer may request the Commission to set conditions and amount of compensation within 30 days after an offer is made. If no agreement is reached within 30 days of any offer, and no request is made of the Commission to set conditions or amount of compensation, a certificate of abandonment will be issued no later than 50 days after notice is published. Upon notification to the Commission of the execution of an assistance or acquisition and operating agreement, the Commission shall postpone the issuance of such a certificate for such period of time as such an agreement (including any extensions or modifications) is in effect. Information and procedures regarding the financial assistance for continued rail service or the acquisition of the involved rail line are contained in 49 CFR 1121 as revised by Ex Parte No. 274 (Sub-No. 6), *Abandonment of Railroad Lines and Discontinuance of Service*, 45 FR 75144 (November 25, 1980). All interested persons are advised to follow the instructions contained therein as well as the instructions contained in the above-referenced decision.

BILLING CODE 7035-01-M

[No. 37064]

OKC Corp. v. Missouri-Kansas-Texas Railroad Co., et al.

AGENCY: Interstate Commerce Commission.

ACTION: Notice of exemption.

SUMMARY: Exemption from the application of Subtitle IV of Title 49 of the United States Code is granted under 49 U.S.C. 10505 to permit waiver of undercharges on iron ore movements by complainant between February 6, 1976 and June 11, 1978.

EFFECTIVE DATE: The exemption was effective May 26, 1981.

FOR FURTHER INFORMATION CONTACT: Richard B. Felder or Jane F. Mackall, (202) 275-7656.

SUPPLEMENTARY INFORMATION: By notice published March 27, 1981 (46 FR 19109), the Commission sought comments on its proposal to use its exemption powers under 49 U.S.C. 10505 to permit waiver of undercharges on iron ore movements by complainant, OKC Corporation, between February 6, 1976 and June 11, 1978. Defendant railroads requested that they be permitted to waive collection of charges they agree are unreasonably high. Absent use of section 10505, this relief would be unavailable because market dominance (49 U.S.C. 10709) was not proven.

In the notice, we indicated our belief that use of 49 U.S.C. 10505 was appropriate in the special circumstances presented. However, because this was the first time our authority under that section has been used in this manner, the exemption was made provisional. The exemption was to become effective in 60 days (May 26, 1981) unless we issued an order before that day disapproving the exemption in light of the filed comments. We issued no such order.

No adverse comments were filed on behalf of any shippers or carriers. The Section of Enforcement of the Commission's Office of Consumer Protection expressed concern as to whether Congress intended the exemption authority to be applied retroactively. However, we found

nothing in the Staggers Rail Act to preclude exemptive relief in these limited special circumstances.

As emphasized in the notice, the carriers would not be taking advantage of OKC or any other shipper by not assessing the published rate. In fact, the shipper would be granted relief from what the parties consider to be an unreasonably high rate. Application of contrary provisions in the Act would be an unreasonable burden on the parties. More importantly, the issue is of extremely limited scope, and it is obvious that in this situation regulation is not necessary to protect OKC from an abuse of market power.

An exemption from the application of Subtitle IV will apply on OKC shipments moving from Cushing, TX to Pryor, OK between February 5, 1976 and June 11, 1978. Under the terms of our notice defendants were authorized to waive collection of undercharges after May 26, 1981.

This decision will not significantly affect the quality of the human environment or conservation of energy resources.

(49 U.S.C. 10505)

Decided: May 21, 1981.

By the Commission, Acting Chairman Alexis, Commissioners Gresham, Clapp, Trantum, and Gilliam. Commissioner Gresham dissented. Acting Chairman Alexis and Commissioner Gilliam were absent and did not participate in the disposition of this proceeding.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

[Finance Docket No. 29615]

Mt. Vernon Terminal Railway Inc.; Construction and Operation of a Line of Railroad in Whatcom County, WA

AGENCY: Interstate Commerce Commission (ICC), Office of Policy and Analysis, Energy and Environment Branch.

ACTION: Notice of Intent to Prepare an Environmental Impact Statement.

Notice is hereby given that, in accordance with the National Environmental Policy Act (NEPA) of 1969, the Interstate Commerce Commission's Energy and Environment Branch, acting as joint lead agency in cooperation with the State of Washington Department of Ecology, intends to prepare an Environmental Impact Statement (EIS) addressing the proposed construction of a rail line for which Commission authorization is required. The purpose of the rail line is to transport bulk commodities between the port and industrial complex of Cherry Point and an interconnect with the Canadian Pacific Railway Co. at Sumas, in Whatcom County, WA. Applicant, the Mt. Vernon Terminal Railway Company Inc., is giving initial consideration to selection of its proposed alignment.

The EIS will identify and examine the potential environmental impacts of the rail line proposed by the applicant and of all feasible alternative rail routes. The potential impact area as presently defined includes western Whatcom Co. from the City of Bellingham north to the Canadian Border. Alternatives tentatively identified include:

Construction of a completely new line of railroad north of the Nooksack River connecting Sumas to Cherry Point.

Construction of a new line of railroad paralleling the former Milwaukee Road line to a point south of the Nooksack River and then westerly to Cherry Point.

Utilization of existing and/or abandoned railroads to the extent practicable coupled with segments of rail rehabilitation and new construction.

Upon completion of the Draft EIS, its availability will be announced in the **Federal Register** and local newspaper, at which time public comments will be invited.

The Energy and Environment Branch's preparation of an EIS is preliminary to the Commission's adjudication process, at which time other substantive issues will be addressed. Additional opportunities for public input are anticipated. Notice of such opportunities will be provided.

The Commission has taken steps to initiate the scoping process as defined in the current Council on Environmental Quality (CEQ) regulations. Pursuant to this, a public scoping meeting will be held at 7:00 p.m. on Tuesday, June 16, at Fisher Elementary School, 501 North 14th Street, Lynden, Washington. All interested agencies, organizations, and indivudials are invited to attend this meeting, the purpose of which is to determine the scope of issues to be addressed in the EIS, to identify the significant environmental issues related to the proposed action, and to set forth the role of cooperating agencies in the preparation of the EIS.

FOR FURTHER INFORMATION CONTACT: Mr. Paul S. Mushovic, Energy and Environment Branch, Room 5380, Interstate Commerce Commission, 12th and Constitution Avenue, NW Washington, D.C. 20423, Telephone: (202) 275-7916.

BILLING CODE 7035-01-M

[Docket No. AB-55 (Sub-50F)]

Seaboard Coast Line Railroad Co.—Abandonment—Between Palatka and Interlachen, FL; Findings

Notice is hereby given pursuant to 49 U.S.C. 10903 that by a Certificate and Decision decided May 22, 1981, a finding, which is administratively final, was made by the Commission, Review Board Number 3, stating that, subject to the conditions for the protection of railway employees prescribed by the Commission in *Oregon Short Line R. Co.—Abandonment—Goshen*, 360 I.C.C. 91 (1979), the present and future public convenience and necessity permit the abandonment by the Seaboard Coast Line Railroad Company of a portion of a line of railroad known as the Palatka Subdivision extending from railroad milepost AS-701.0 near Palatka, FL to milepost AS-715.4 at Interlachen, FL, a distance of 14.4 miles, in Putnam County, FL. A certificate of public convenience and necessity permitting abandonment was issued to the Seaboard Coast Line Railroad Company. Since no investigation was instituted, the requirement of § 1121.38(b) of the Regulations that publication of notice of abandonment decisions in the **Federal Register** be made only after such a decision becomes administratively final was waived.

Upon receipt by the carrier of an actual offer of financial assistance, the carrier shall make available to offeror the records, accounts, appraisals, working papers, and other documents used in preparing Exhibit I (§ 1121.45 of the Regulations). Such documents shall be made available during regular business hours at a time and place mutually agreeable to the parties.

The offer must be filed with the Commission and served concurrently on SCL, with copies to Ms. Ellen Hanson, Room 5417, Interstate Commerce Commission, Washington, DC 20423, no later than 10 days from publication of this Notice. The offer, as filed, shall contain information required pursuant to § 1121.38(b)(2) and (3) of the Regulations. If no such offer is received, the certificate of public convenience and necessity authorizing abandonment

shall become effective 30 days from the service date of the certificate.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

[Docket No. AB-55 (Sub-45F)]

Seaboard Coast Line Railroad Co.—Abandonment—Between Scotland Neck and Parmele, NC; Findings

Notice is hereby given pursuant to 49 U.S.C. 10903 that by a decision decided May 11, 1981 a finding which is administratively final, was made by the Commission, Review Board Number 3, stating that the public convenience and necessity permit the abandonment by the Seaboard Coast Line Railroad Company of the portion of a line of railroad which extends from milepost AA-110.50 near Scotland Neck, NC to milepost AA-134.77 at Parmele, NC in Halifax and Martin Counties, NC, a total distance of 24.27 miles, subject to the conditions for the protection of employees discussed in *Oregon Short Line R. Co.—Abandonment—Goshen*, 360 I.C.C. 91 (1979).

A certificate of abandonment will be issued to Seaboard Coast Line Railroad Company based on the above-described finding of abandonment, 30 days after publication, unless within 15 days from the date of publication, the Commission further finds that:

(1) A financially responsible person (including a government entity) has offered financial assistance (in the form of a rail service continuation payment) to enable the rail service involved to be continued. The offer must be filed with the Commission and served concurrently on the applicant, with copies of Ms. Ellen Hanson, Room 5417, Interstate Commerce Commission, Washington, DC 20423, no later than 10 days from publication of this notice; and

(2) It is likely that such proffered assistance would:

(a) Cover the difference between the revenues which are attributable to such line of railroad and the avoidable cost of providing rail freight service on such line, together with a reasonable return on the value of such line, or

(b) Cover the acquisition cost of all or any portion of such line of railroad.

If the Commission so finds, the issuance of a certificate of abandonment will be postponed. An offer may request the Commission to set conditions and amount of compensation within 30 days after an offer is made. If no agreement is reached within 30 days of an offer, and no request is made on the Commission to set conditions or amount of compensation, a certificate of abandonment will be issued no later than 50 days after notice is published. Upon notification to the Commission of the execution of an assistance or acquisition and operating agreement, the Commission shall postpone the issuance of such a certificate for such period of time as such an agreement (including any extensions or modifications) is in effect. Information and procedures regarding the financial assistance for continued rail service or the acquisition of the involved rail line are contained in 49 U.S.C. 10905 (as amended by the Staggers Rail Act of 1980, Pub. L. 96-448, effective October 1, 1980). All interested persons are advised to follow the instructions contained therein as well as the instructions contained in the above-referenced decision.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

[Section 5b Application No. 2[1]]

Western Railroads—Agreement; Decision

AGENCY: Interstate Commerce Commission.

ACTION: Notice of acceptance of implementation plans.

SUMMARY: In a decision served January 21, 1981 and noticed in the **Federal Register** January 25, 1981 (46 R 9218) the Commission ordered the rate bureaus to comply with its decision by filing, by March 7, 1981, amended agreements and plans phasing in the direct connectors definition of practicable participation in a joint-line movement (49 U.S.C. 10706(a)(3)(iii)). In a decision served March 2, 1981 and noticed in the **Federal Register** March 11, 1981 (46 FR 16150) the carriers were given an extension until April 6, 1981.

The implementation plans were filed in a timely fashion and have been found to conform with our January 21 decision. Therefore, the Commission finds the plans acceptable. This decision approves the implementation plans only; action on the newly-filed agreements will be by separate decision.

FOR FURTHER INFORMATION CONTACT: Richard B. Felder or Jane F. Mackall, (202) 275-7656.

This action will not significantly affect the quality of the human environment or the conservation of energy resources.

[1] This proceeding also embraces Section 5b Application No. 3, Eastern Railroads—Agreement, and Section 5b Application No. 6, Southern Railroads—Agreement.

By the Commission, Acting Chairman Alexis, Commissioners Gresham, Clapp, Trantum, and Gilliam. Acting Chairman Alexis was absent and did not participate.

Dated: May 19, 1981.

James H. Bayne,

Acting Secretary.

BILLING CODE 1505-01-M

DEPARTMENT OF JUSTICE

Antitrust Division

United States v. National Finance Adjusters, Inc.; Proposed Final Judgment and Competitive Impact Statement

Notice is hereby given pursuant to the Antitrust Procedures and Penalties Act, 15 U.S.C. Section 16 (b) through (h), that a proposed Final Judgment, Stipulation and Competitive Impact Statement (CIS) have been filed with the United States District Court for the Eastern District of Michigan in *United States* v. *National Finance Adjusters, Inc.*, Civil Action No. 81-70005. The Complaint in this case alleged that National Finance Adjusters ("NFA"), a national association of repossessors, and its co-conspirators engaged in a combination and conspiracy to fix prices, restrict territories and limit membership in violation of Section 1 of the Sherman Act, 15 U.S.C. § 1. The proposed Consent Judgment enjoins the defendant from fixing, advertising and publishing any prices for repossession services; participating in any communications with representatives of other repossessor associations that relate to prices for repossession services; engaging in any conduct the effect of which is to influence the formulation of prices for repossession services; and expelling any NFA member or denying or delaying any NFA applicant membership on the basis of population or other demographic information, or on the basis of the number of NFA members who operate or may operate in that service area. Further, the proposed

Judgment enjoins the defendant from any activity the purpose or foreseeable effect of which is to allocate, restrict or otherwise influence the service area or territory in which any of its members operate, and from establishing or maintaining unreasonable fees for NFA membership. The defendant is required to publish certain information in its publications; to eliminate any restrictions on NFA members concerning the manner or extent of advertising their service area; to eliminate certain NFA membership requirements; and to admit any applicant for NFA membership who meets certain requirements. The defendant also is required to establish an antitrust compliance program which must include annual reporting to the Department of Justice and notification of this Judgment to each of its officers, directors, employees and members.

Public comment is invited within the statutory 60-day comment period. Such comments, and responses thereto, will be published in the **Federal Register** and filed with the Court. Comments should be directed to John W. Poole, Jr., Chief, Special Litigation Section, Room 7216, Antitrust Division, Department of Justice, Washington, D.C. 20530, (Telephone: (202) 633–2426).

Joseph H. Widmar,

Director of Operations.

United States District Court, Eastern District of Michigan

United States of America, *Plaintiff,* v. National Finance Adjusters, Inc., *Defendant;* Civil No. 81–70005, file: May 19, 1981.

Stipulation

It is stipulated by the undersigned parties, by their respective attorneys, that:

1. The parties consent that a Final Judgment in the form attached may be filed and entered by the Court's own motion, at any time after compliance with the requirements of the Antitrust Procedures and Penalties Act (15 U.S.C. § 16), and without further notice to any party or other proceedings, provided that the plaintiff has not withdrawn its consent, which it may do any time before the entry of the proposed Final Judgment by serving notice on defendant and by filing that notice with the Court.

2. If the plaintiff withdraws its consent or if the proposed Final Judgment is not entered pursuant to this Stipulation, this Stipulation shall be of no effect whatever and the making of this Stipulation shall be without prejudice to any party in this or any other proceeding.

For the Plaintiff:
William F. Baxter,
Assistant Attorney General.
Mark Leddy,
John W. Poole, Jr.,
Judy Whalley,
Catherine G. O'Sullivan,
Attorney, U.S. Department of Justice.
Charles Jerome Ware,
Terrence F. McDonald,
Steven B. Kramer,
Attorneys, Antitrust Division, U.S. Department of Justice, 10th & Pennsylvania Ave., N.W., Washington, D.C. 20530, Telephone: (202) 633–2438.

For the Defendant:
E. Thomas W. Stahl,
Ralph C. Schwartz,
Phillip M. Sutley.

National Finance Adjusters, Inc.:
By: Derrell Biddy,
President.

Final Judgment

The plaintiff, United States of America, having filed its complaint on January 5, 1981, and the plaintiff and the defendant, by their respective attorneys, having consented to the entry of this Final Judgment without trial or adjudication of any issue of fact or law, and without this Final Judgment constituting any evidence against or admission by any party with respect to any issue;

Now, therefore, before the taking of any testimony and without trial or adjudication of any issue of fact or law, and upon consent of the parties, it is

Ordered, adjudged and decreed, as follows:

I

This Court has jurisdiction over the subject matter of this action and over each of the parties. The complaint states a claim upon which relief may be granted against the defendant under Section 1 of the Sherman Act (15 U.S.C. § 1).

II

As used in this Final Judgment:

(A) "Repossessor" or "adjuster" means any individual, partnership, corporation, association, firm, or any other business or legal entity which provides repossession services for banks, credit unions or other lenders that seek to recover merchandise sold under security agreements where the debtor has forfeited possessory rights by defaulting on loan terms.

(B) "Repossession services" includes, but is not limited to, tracing of property, collection and adjustment of loans, as well as repossession, sale or return of collateral.

III

This final Judgment applies to the defendant National Finance Adjusters, Inc. ("NFA") and to its officers, directors, members, agents, employees, subsidiaries, successors and assigns, and to all other persons in active concert or participation with the defendant who shall have received actual notice of this Final Judgment by personal service or otherwise.

IV

The defendant, whether acting unilaterally or in concert with any other person, is enjoined from, directly or indirectly:

(1) Fixing, establishing, or maintaining any price schedule or list for repossession services;

(2) Advocating, urging, recommending or suggesting any price schedule or list for repossession services;

(3) Publishing or distributing any price schedule or list for repossession services;

(4) Participating in any conversations, discussions or other communications with representatives of other repossessor associations that in any way relate to any price, price schedule or list for repossession services; or

(5) Engaging in any other conduct the purpose or foreseeable effect of which is to influence the formulation of any price schedule or list for repossession services.

V

The defendant is ordered to publish in a prominent manner in the prefatory section of each NFA membership directory or other similar publication, the following statement:

In conformity with a consent decree entered into with the United States Department of Justice, National Finance Adjusters, Inc., has discontinued publishing and disseminating fee schedules. All schedules contained in prior editions are, in their entirety, null and void. National finance Adjusters makes no suggestion whatsoever concerning fees or prices for repossession services and does not restrict or limit the right of any of its members to determine, in accordance with his or her individual business judgment, the fees to charge for repossession services.

VI

The defendant is prohibited from publishing any other reference to prices or fees for repossession services in its directory or other publications; *provided however,* that nothing in this Judgment shall:

(1) Limit the ability of NFA to urge prospective purchasers of repossession services to negotiate in advance with members as to prices or fees; or

(2) Limit the ability of NFA to allow individual NFA members to advertise in the NFA directory, or other NFA listings, his or her individual prices or fees for repossession services.

VII

The defendant is enjoined from expelling any member from NFA membership or from denying or delaying any application for NFA membership, in whole or in part, on the basis of:

(1) The population or other demographic information of a member's or an applicant's service area; or

(2) The number of other NFA members or applicants who operate or may operate in that service area.

VIII

The defendant is ordered and directed to eliminate any restrictions on NFA members

concerning the manner or extent of advertising their service area in any advertisement, directory or other publication.

IX

The defendant, whether acting unilaterally or in concert with any other person, is enjoined from any activity the purpose or foreseeable effect of which is to allocate, protect, limit, or otherwise influence the service area or territory in which any of its members operate or advertise that they operate.

X

Defendant is ordered and directed to eliminate the following NFA membership requirements:

(a) Any time period of experience in the repossession business that is greater than one year.

(b) Full-time repossession business;

(c) United States citizenship; or

(d) Any requirements based on any evaluation or determination of an applicant's financial condition, personal character or morals, or local referral business.

XI

Defendant is ordered and directed to admit any applicant for NFA membership who meets the following requirements:

(1) Ability to obtain and retain, in the commercial market, reasonable fidelity bonds;

(2) Applicant is licensed under all applicable state and local licensing laws;

(3) Certification that he or she has not been convicted of a felony within a period of up to ten years prior to his or her application for membership;

(4) One year of experience as an active repossessor; and

(5) Maintains a principal office location specifically for his or her repossession business during NFA membership.

XII

The defendant is enjoined from establishing or maintaining unreasonable fees for NFA membership.

XIII

The defendant is ordered to publish in the prefatory section of each NFA membership directory, or other similar publication, the address to which applications for NFA memberships should be forwarded. Within fifteen (15) days of receiving any application for membership, the defendant shall furnish to each applicant a written response stating when the application will be reviewed, whether the applicant is complete, and if the application is not complete, a written itemization of any document or information necessary to complete the application. NFA shall convene at least two meetings per yaer at which membership applications shall be reviewed. All applications completed before any NFA meeting shall be reviewed at that meeting. Within ten (10) days after reviewing any membership application, the defendant shall furnish a written notice to each applicant indicating whether the applicant was accepted for NFA membership, and, if the applicant was not accepted, a written statement of reasons why the applicant was not accepted for membership.

XIV

The defendant is ordered and directed:

(A) To furnish within sixty (60) days after entry of this Final Judgment a copy thereof to each of its officers, directors, employees and members engaged in the repossession business;

(B) To furnish a copy of this Final Judgment to each person who in the ten (10) years after entry of this Final Judgment, becomes an officer, director, employee or member engaged in the repossession business within thirty (30) days after such person is employed by or becomes associated with the defendant;

(C) To direct each person to whom a copy of this Final Judgment is furnished pursuant to subparagraphs XIV(A) and XIV(B) hereof to retain such copy as long as he or she is employed by or associated with the defendant;

(D) To require each person to whom a copy of this Final Judgment is furnished pursuant to subparagraphs XIV(A) and XIV(B) hereof to sign and submit to the defendant a certificate in substantially the following form; and the defendant shall retain such certificates as long as this Final Judgment is in effect and for one year thereafter:

The undersigned hereby (1) acknowledges receipt of a copy of the 1981 antitrust Final Judgment, (2) represents that the undersigned has read and understands such Final Judgment, and (3) acknowledges that the undersigned has been advised and understands that non-compliance with the Final Judgment may result in conviction for contempt of court and imprisonment and/or fine.

(E) At least once each year, during the ten (10) years after entry of this Judgment, to call to the attention of each of its officers, directors, employees and members engaged in the repossession or finance adjustment business the limitations imposed upon them by this Final Judgment, and of the sanction that may be imposed for non-compliance therewith;

(F) To file with the court and serve upon the plaintiff, within ninety (90) days from the date of entry of this Final Judgment, an affidavit as to the fact and manner of its compliance with subsection XIV(A) hereof; and

(G) To furnish the plaintiff within thirty (30) days after each anniversary date of the entry of this Final Judgment, for a period of ten (10) years, an affidavit as to the fact of and manner of securing and ascertaining compliance with, the provisions of Sections IV, V, VI, VII, VIII, IX, X, XI, XII, XIII and subsections XIV(B), XIV(C), XIV(D), and XIV(E) of this Final Judgment.

XV

For the purpose of determining or securing compliance with this Final Judgment, and subject to any legally recognized privilege, from time to time:

(A) Any duly authorized representative of the Department of Justice shall, upon written request of the Attorney General or the Assistant Attorney General in charge of the Antitrust Division, and on reasonable notice to the defendant made to its principal office, be permitted:

(1) Access during the office hours of the defendant to inspect and copy all books, ledgers, account, correspondence, memoranda, and other records and documents in the possession or under the control of the defendant, who may have counsel present, relating to any matters contained in this Final Judgment; and

(2) Subject to the reasonable convenience of the defendant and without restraint or interference from it, to interview officers, directors, employees, agents, or members of the defendant, who may have counsel present, regarding any such matters.

(B) Upon written request of the Attorney General or the Assistant Attorney General in charge of the Antitrust Division made to the defendant's principal office, the defendant shall submit such written reports, under oath if required, with resepct to any of the matters contained in this Final Judgment as may be requested. No information or documents obtained by the means provided in this Section XIV shall be divulged by any representative of the Department of Justice to any person other than a duly authorized representative of the Executive Branch of the United States, except in the course of legal proceedings to which the United States is a party, or for the purpose of securing compliance with this Final Judgment, or as otherwise required by law.

(C) If at the time information or documents are furnished by the defendant to plaintiff, the defendant represents and identifies in writing the material in any such information or documents for which a claim of protection may be asserted under Rule 26(c)(7) of the Federal Rules of Civil Procedure, and the defendant markes each pertinent page of such material, "Subject to Claim of Protection under Rule 26(c)(7) of the Federal Rules of Civil Procedure," then ten (10) days notice shall be given by plaintiff to the defendant prior to divulging such material in any legal proceeding (other than a grand jury proceeding) to which the defendant is not a party.

XVI

Jurisdiction is retained by the Court for purposes of enabling any of the parties to this Final Judgment to apply to this Court at any time for such further orders and directions as may be necessary or appropriate for the construction or implementation of this Final Judgment, for the modification of any of the provisions thereof, for the enforcement or compliance therewith, and the punishment of violations hereof.

XVII

This Final Judgment shall remain in effect until ten (10) years from date of entry.

XVIII

Entry of this Final Judgment is in the public interest.

———— ————,

United States District Judge.

Competitive Impact Statement

This competitive impact statement, relating to the proposed consent judgment submitted for entry in this civil antitrust proceeding, is filed by the United States pursuant to Section 2(b) of the Antitrust Procedures and Penalties Act, 15 U.S.C. § 16(b) (1976).

I Nature and Purpose of the Proceeding

On January 5, 1981, the United States filed a civil antitrust Complaint alleging that National Finance Adjusters, Inc. ("NFA"), a national association of repossessors located in Detroit, Michigan, and its co-conspirators had conspired to fix prices, restrict territories and limit membership in violation of Section 1 of the Sherman Act, 15 U.S.C. 1 (1976).

The Complaint alleges that, beginning at least as early as 1975, and continuing to the date of the filing of the complaint in the action, the defendant and various co-conspirators engaged in a nationwide combination and conspiracy to agree on, prepare, publish in defendant's directory, disseminate and encourage members to adhere to, fee schedules for repossession services; to restrict membership to one or few members in certain geographic areas; to restrict the area in which each of defendant's members could advertise its repossession services; and to establish arbitrary and unreasonable membership restrictions.

The Complaint asks the Court to enjoin and restrain the defendant from such activities in the future.

Entry by the Court of the proposed Final Judgment will terminate this litigation. The Court will retain jurisdiction for possible future proceedings which might be required to interpret, modify or enforce the provisions of the proposed Final Judgment.

II Nature of the Alleged Violation

Repossessors, or adjusters as they are sometimes called, provide services for banks, credit unions and other lenders that seek to recover merchandise sold under a security agreement. During the period covered by the Complaint the defendant had member-repossessors located throughout the United States.

The Complaint alleges that the defendant and co-conspirators agreed to eliminate price and other forms of competition in the trade and commerce of providing repossession services. The Complaint alleges further that they did, among other things, the following: (a) agreed to, prepared, published in the NFA directory, disseminated and encouraged members to adhere to fee schedules for repossession services; (b) restricted membership in NFA to one or few members in certain geographic areas; (c) restricted the area for which each NFA member could advertise its services; and (d) established arbitrary and unreasonable membership restrictions.

III Explanation of the Proposed Final Judgment

The United States and the defendant have stipulated that the proposed Final Judgment may be entered by the Court at any time after compliance with the Antitrust Procedures and Penalties Act, 15 U.S.C. 16(b)–(h) (1976). The proposed Final Judgment states that it constitutes no admission by any party with respect to any issue of fact or law.

Under the provisions of the Antitrust Procedures and Penalties Act, entry of the proposed Final Judgment is conditioned upon a determination by the Court that the proposed Final Judgment is in the public interest. Accordingly, Section XVIII of the proposed Final Judgment states that entry of this Final Judgment is in the public interest.

The proposed Final Judgment contains two principal forms of relief. First, the defendant is enjoined from engaging in the behavior that constituted the conspiracy alleged in the Complaint. Second, the proposed Final Judgment places affirmative burdens on the defendant directed toward preventing such behavior.

A. Prohibited Conduct

Under Section IV of the proposed Final Judgment the defendant is restrained from (1) fixing any price schedule or list for repossession services; (2) advertising any price schedule or list for repossession services; (3) publishing any price schedule or list for repossession services; (4) participating in any communications with representatives of other repossessor associations that relate to any price schedule or list for repossession services; or (5) engaging in any conduct the effect of which is to influence the formulation of any price schedule or list for repossession services.

Under Section VI of the proposed Final Judgment the defendant is prohibited, with two exceptions, from publishing any other reference to prices or fees for repossession services in its directory or other publications.

Under Section VII of the proposed Final Judgment the defendant is enjoined from expelling any member from NFA membership or from denying or delaying any application for NFA membership on the basis of (1) the population or other demographic information of a member's or an applicant's service area, or (2) the number of other NFA members or applicants who operate or may operate in that service area.

Under Section IX of the proposed Final Judgment the defendant is enjoined from any activity the purpose or foreseeable effect of which is to allocate, protect, limit or otherwise influence the service area or territory in which any of its members operate or advertise that they operate.

Under Section XII of the proposed Final Judgment the defendant is enjoined from establishing or maintaining unreasonable fees for NFA membership.

B. Defendant's Affirmative Obligations

Under Section V of the proposed Final Judgment the defendant is required to publish in a prominent manner in the prefatory section of each NFA membership directory or other similar publication, a statement of conformity with the prices or fees provisions of the consent decree.

Under Section VIII of the proposed Final Judgment the defendant is required to eliminate any restrictions on NFA members concerning the manner or extent of advertising their service area in any advertisement publication.

Under Section X of the proposed Final Judgment the defendant is required to eliminate certain prior NFA membership requirements.

Under Section XI of the proposed Final Judgment the defendant is ordered to admit any applicant for NFA membership who meets the following requirements: (1) ability to obtain and retain, in the commercial market, reasonable fidelity bonds; (2) licensure under all applicable state and local licensing laws; (3) certification that he or she has not been convicted of a felony within a period of up to ten years prior to his or her application for membership; (4) one year of experience as an active repossessor; and (5) a principal office location specifically for his or her repossession business during NFA membership.

Under Section XIII of the proposed Final Judgment the defendant is ordered to publish in the prefatory section of each NFA membership directory or other similar publication, certain information regarding the membership application process.

Sections XIV and XV of the proposed Final Judgment require the defendant to establish an antitrust compliance program which must include annual reporting to the Department of Justice and notification of this Judgment to each of its officers, directors, employees and members.

Under Section XVI of the proposed Final Judgment, jurisdiction is retained by the Court for purposes of enabling either of the parties to this Final Judgment to apply to this Court at any time for such further orders and directions as may be necessary or appropriate for the construction or implementation of this Final Judgment, for the modification of any of the provisions, for the enforcement or compliance, and the punishment of violations. Further, under Section XVII, the proposed Final Judgment shall remain in effect until ten (10) years from the date of entry.

C. Scope of the Proposed Judgment

The proposed Final Judgment applies to the defendant and to its officers, directors, members, agents, employees, subsidiaries, successors and assigns, and to all other persons in active concert or participation with the defendant who have received actual notice of this Final Judgment by personal service or otherwise.

D. Effect of the Proposed Judgment on Competition

The terms of Sections IV and VI of the Judgment are designed to ensure that the defendant's members will act independently in determining the prices or fees to charge for repossession services. Accordingly, the affirmative obligations of Sections V and XIV are directed toward informing the defendant's clients, members, employees and others of this Final Judgment and their obligations under the decree not to engage in the type of behavior alleged in the Complaint.

The terms of Sections VII and IX of the Judgment are designed to ensure that the defendant will not unfairly or unreasonably restrict NFA memberships and geographic territories in which any of its members operate or advertise that they operate. Accordingly, the affirmative obligations of Sections VIII, X, XI, XIII, and XIV are directed toward the establishment of fair, reasonable and objective criteria for admission to membership in any geographic area, and advertising by members.

Compliance with the proposed Final Judgment should prevent collusion among the defendant, its members and competitors in determining the prices or fees to charge for repossession services and in unreasonably restricting NFA memberships and geographic territories in which NFA members operate or advertise that they operate.

IV Remedies Available to Potential Private Plaintiffs

After entry of the proposed Final Judgment, any potential private plaintiff that might have been damaged by the alleged violation will retain the same right to sue for monetary damages and any other legal or equitable relief that it may have had if the Final Judgment had not been entered. The Final Judgment may not be used, however, as *prima facie* evidence in private litigation, pursuant to Section 5(a) of the Clayton Act, as amended, 15 U.S.C. 16(b).

V Procedures Available for Modification of the Proposed Consent Judgment

The proposed Final Judgment is subject to a stipulation between the Government and the defendant which provides that the Government may withdraw its consent to the proposed Judgment any time before the Court has found that entry of the proposed Judgment is in the public interest. By its terms, the proposed Judgment provides for the Court's retention of jurisdiction of this action in order to permit any of the parties to apply to the Court for such orders as may be necessary for the modification of the Final Judgment.

As provided by the Antitrust Procedures and Penalties Act (15 U.S.C. 16), any person wishing to comment upon the proposed Judgment may, for a sixty-day period subsequent to the publishing of this document in the **Federal Register**, submit written comments to the United States Department of Justice, Attention: John W. Poole, Jr., Chief, Special Litigation Section, Antitrust Division, Washington, D.C. 20530. Such comments and the Government's response to them will be filed with the Court and published in the **Federal Register**. The Government will evaluate all such comments to determine whether there is any reason for withdrawal of its consent to the proposed Judgment.

VI Alternatives to the Proposed Final Judgment

The alternative to the proposed Final Judgment considered by the Antitrust Division was a full trial on the merits and on relief. The Division considers the proposed Final Judgment to be of sufficient scope and effectiveness to make a trial unnecessary because it provides for all the relief prayed for in the Complaint.

VII Determinative Materials and Documents

No materials or documents were considered determinative by the United States in formulating the proposed Final Judgment. Consequently, none are being filed pursuant to the Antitrust Procedures and Penalties Act, 15 U.S.C. 16(b).

Respectfully submitted,

Charles Jerome Ware,

Terrence F. McDonald,

Steven B. Kramer,

Attorneys, Antitrust Division, Department of Justice, Washington, D.C. 20530, (Telephone: (202) 633-2438).

BILLING CODE 4410-01-M

DEPARTMENT OF LABOR

Employment and Training Administration

Employment Transfer and Business Competition Determinations Under the Rural Development Act; Applications

The organizations listed in the attachment have applied to the Secretary of Agriculture for financial assistance in the form of grants, loans, or loan guarantees in order to establish or improve facilities at the locations listed. The financial assistance would be authorized by the Consolidated Farm and Rural Development Act, as amended, 7 U.S.C. 1924(b), 1932, or 1942(b).

The Act requires the Secretary of Labor to determine whether such Federal assistance is calculated to or is likely to result in the transfer from one area to another of any employment or business activity provided by operations of the applicant. It is permissible to assist the establishment of a new branch, affiliate or subsidiary, only if this will not result in increased unemployment in the place of present operations and there is no reason to believe the new facility is being established with the intention of closing down an operating facility.

The Act also prohibits such assistance if the Secretary of Labor determines that it is calculated to or is likely to result in an increase in the production of goods, materials, or commodities, or the availability of services or facilities in the area, when there is not sufficient demand for such goods, materials, commodities, services, or facilities to employ the efficient capacity of existing competitive Commercial or industrial enterprises, unless such financial or other assistance will not have an adverse effect upon existing competitive enterprises in the area.

The Secretary of Labor's review and certification procedures are set forth at 29 CFR Part 75. In determining whether the applications should be approved or denied, the Secretary will take into consideration the following factors:

1. The overall employment and unemployment situation in the local area in which the proposed facility will be located.

2. Employment trends in the same industry in the local area.

3. The potential effect of the new facility upon the local labor market, with particular emphasis upon its potential impact upon competitive enterprises in the same areas.

4. The competitive effect upon other facilities in the same industry located in other areas (where such competition is a factor).

5. In the case of applications involving the establishment of branch plants or facilities, the potential effect of such new facilities on other existing plants or facilities operated by the applicant.

All persons wishing to bring to the attention of the Secretary of Labor any information pertinent to the determinations which must be made regarding these applications are invited to submit such information in writing within two weeks of publication of this notice. Comments received after the two-week period may not be considered. Send comments to: Administrator, Employment and Training Administration, 601 D Street, N.W., Washington, D.C. 20213.

Signed at Washington, D.C. this 26th day of May 1981.

Luis Sepulveda,

Acting Director, Office of Program Services.

Applications Received During the Week Ending May 30, 1981

BILLING CODE 4510-30-M

Job Corps; Determination of Negative Environment Impact

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice-finding of negative environmental impact.

SUMMARY: The purpose of this notice is to announce a determination by the Department under the National Environmental Policy Act (NEPA) that the establishment of a Job Corps center at the Ada Merritt Junior High School in Miami, Florida does not constitute a

major Federal action which will significantly affect the environment.

FOR FURTHER INFORMATION CONTACT: Richard A. Jaffe, Director, Office of Job Corps and Young Adult Conservation Corps, Room 6100, Patrick Henry Building, 601 D Street NW., Washington, D.C. 20213. Telephone (202) 376–6995.

SUPPLEMENTARY INFORMATION: Title IV, Part B of the Comprehensive Employment and Training Act (CETA), as amended, Pub. L. 95–524, 29 U.S.C. 923 *et seq.* directs the Secretary of Labor to establish Job Corps centers to provide occupational training to disadvantaged youths ages 16 through 21. The Secretary has issued regulations published at 20 CFR Part 684, implementing Title IV, Part B of CETA. Pursuant to his authority, the Secretary is planning to establish a Job Corps center provided an agreement can be reached on acquisition of the facilities.

Pursuant to the NEPA Regulations at 40 CFR 1501.3 and 1501.4(b) and the Department's NEPA Regulations at 29 CFR 11.10(b), the Department of Labor conducted an environmental assessment as part of a site utilization study and has determined that preparation of an environmental impact statement is not required since the establishment of this Job Corps center is not a major Federal action which will significantly affect the quality of the human environment within the meaning of 40 CFR Part 1508. The proposed Job Corps center will be a training center with residential, nonresidential and educational facilities for approximately 210 disadvantaged youth, men and women, ages 16 through 21, who need and can benefit from intensive employment-related services. The function of the center and the staff of approximately 70 will be to provide skill training in selected vocational courses and continuing and/or remedial education in academic subjects.

The proposed use of the facility is intended for residential living and education.

The center will be a self-contained facility except for Medical/Dental Services which will be contracted for off-center. The center will be located one mile from the heart of downtown Miami: at 550 S.W. Third Street, Miami, between S.W. Seventh and S.W. Sixth Avenues. The site surveyed for use by Job Corps consists of three buildings on 2 to 2½ acres of land. These buildings will be renovated in order to make them suitable for housing the Job Corps center.

Water and sanitary services are provided by the Miami-Dade Water and Sewer Authority. Electric power is supplied by the Florida Power and Light Company. Natural gas is provided by Florida Gas. With regard to fire protection, fire hydrants are located at the end of every block in this section of the city. There are two fire hydrants directly adjacent to the site. The nearest fire department is located at N.W. 20th Street and 12th Avenue, N.W. with an estimated response time of ten minutes.

The proposed Job Corps center will be operated in compliance with the Job Corps Environmental Standards published at 20 CFR 684.125 and with applicable Federal, State and local regulations concerning environmental health. The proposed Job Corps center will comply with the water quality and related standards of the State and local government, and with the standards established pursuant to the Federal Water Pollution Control Act, 33 U.S.C. 1251 *et seq.*, with Executive Order 11752, and with regulations and guidelines of the United States Environmental Protection Agency.

The center installation will be designed, operated, and maintained so as to conform to Federal air quality standards, including those found in Executive Order 11752.

My determination is that the establishment and operation of the Center will have no adverse impact upon traffic, transportation systems, pedestrian or vehicular congestion, police protection services, public safety, legal services, or upon the aesthetics or residential quality of the nearby area. I further determine that the establishment and operation of the Center will have no adverse effects upon ecological systems, population distribution, air or water pollution, municipal services, or health or life support systems. Accordingly, I hereby determine that the establishment of the Job Corps center will not have a significant adverse impact upon the quality of the human environment of the nearby area, or the greater Miami community.

The Job Corps center will be operated with the pass-leave procedures required by Job Corps regulations and operational procedures. I find that in light of the enrollment level and utilization of the pass-leave procedures, that congestion in the area will not increase.

There will be no material impact upon transportation or traffic within the area.

It is further determined that the establishment and operation of the Center is not likely to have a significant adverse impact upon use of police services or the public safety. Adequate provisions are planned to carefully screen prospective enrollees so as to minimize the possibility of disciplinary problems, or problems with possible Center related public safety.

Adequate staffing personnel and protection will be provided at the Miami Job Corps Center in accordance with Job Corps' operating procedures and regulations.

I further find that fire protection services in the area will not be adversely affected and that systems in the facilities will be upgraded to further reduce risk of fire from the present risk level.

In conclusion, it is my determination, after careful review and consideration of the nature of Job Corps' proposed action, in light of Job Corps' purposes, objectives and operational procedures, that the impact of the establishment of the center at the site upon the surrounding community, will not be significant and that the environmental assessment conducted by the Department of Labor clearly indicates that preparation of an environmental impact statement is not required because the establishment of the Job Corps Center is not a major Federal action which will significantly affect the quality of the human environment within the meaning of 40 CFR Part 1508.

Signed at Washington, D.C., this 13th day of May 1981.

Richard A. Jaffe,

Director, Office of Job Corps and Young Adult Conservation Corps.

BILLING CODE 4510-30-M

Mine Safety and Health Administration

[Docket No. M-81-3-M]

AMAX Lead Company of Missouri; Petition for Modification of Application of Mandatory Safety Standard

AMAX Lead Company of Missouri, Boss, Missouri 65440 has filed a petition to modify the application of 30 CFR 57.4–61A (installation of ventilation doors) to its Buick Mine located in Iron County, Missouri. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that ventilation doors be installed at or near shaft stations or intake shafts.

2. The mine's intake ventilation shafts are 18 feet in diameter and concrete lined.

3. Petitioner states that the absence of combustible materials within the intake ventilation shaft negates the need for ventilation doors and further states that

installation of such doors would not provide any increase in safety for the miners affected.

4. For these reasons, petitioner requests a modification of the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before June 29, 1981. Copies of the petition are available for inspection at that address.

Dated: May 21, 1981.

Frank A. White,

Director, Office of Standards, Regulations and Variances.

[FR Doc. 81-16137 Filed 5-28-81; 8:45 am]

BILLING CODE 4510-43-M

[Docket No. M-81-114-C]

Consolidation Coal Co.; Petition for Modification of Application of Mandatory Safety Standard

Consolidation Coal Company, Consol Plaza, Pittsburgh, Pennsylvania 15241 has filed a petition to modify the application of 30 CFR 75.305 (weekly examinations for hazardous conditions) to its Renton Mine located in Allegheny County, Pennsylvania. The petition is filed under Section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that intake and return air courses be examined in their entirety on a weekly basis.

2. The roofs of the return entries have deteriorated and fallen in some areas; these entries have also experienced water accumulation.

3. Petitioner states that examinations of these air courses would expose miners to hazardous conditions.

4. As an alternate method, petitioner proposes to establish and maintain specified air monitoring stations and record the results of examinations in a book at each location. Weekly air readings and methane testings will be made by a certified person at each location; any increase in methane content of 0.5 percent over the last reading will be immediately investigated. In addition, a 10 percent reduction in the air quantity will be immediately investigated.

5. Petitioner states that the proposed alternate method will provide the same degree of safety to the miners affected as that afforded by the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before June 29, 1981. Copies of the petition are available for inspection at that address.

Dated: May 20, 1981.

Frank A. White,

Director, Office of Standards, Regulations and Variances.

BILLING CODE 4510-43-M

[Docket No. M-81-24-M]

Occidental Oil Shale, Inc.; Petition for Modification of Application of Mandatory Safety Standard

Occidental Oil Shale, Inc., Post Office Box 2687, Grand Junction, Colorado 81502 has filed a petition to modify the application of 30 CFR 57.4-58 (underground fires; requirements) to its Logan Wash Operations located in Garfield County, Colorado. The petition is filed under Section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that fires shall not be built underground.

2. Petitioner is under contract with the U.S. Department of Energy (DOE) for engineering development and technical feasibility demonstration of a vertical modified in situ oil shale retorting process (MIS process) at the mine.

3. As an alternate method, petitioner proposes to operate Mini Retort No. 1 using a number of safeguards, including monitoring for various gases such as nitrogen, hydrogen and methane; ventilation proposals; rescue equipment and training; and evacuation and contingency plans.

4. Based on extensive experience over the years, petitioner states that all anticipated relevant factors have been taken into account to guarantee the greatest degree of safety during retort operations and that these will provide miners the same degree of safety as that afforded by the standard.

Occupational Safety and Health Administration

[V-78-5]

Interlake Stamping Corp.; Experimental Variance Extension

AGENCY: Occupational Safety and Health Administration, Department of Labor.

ACTION: Extension of variance.

SUMMARY: This notice announces the extension of an experimental variance to Interlake Stamping Corporation from the standards prescribed in 29 CFR 1910.217 concerning mechanical power presses.

DATES: The effective date of the extension is May 29, 1981.

FOR FURTHER INFORMATION CONTACT: James J. Concannon, Director, Office of Variance Determination, U.S. Department of Labor—OSHA, Third Street and Constitution Avenue, N.W., Room N-3662 Washington, D.C. 20210, Telephone: (202) 523-7144; or the following Regional and Area Offices:

U.S. Department of Labor—OSHA, 32nd Street-Room 3263, 230 South Dearborn Street, Chicago, Illinois 60604

U.S. Department of Labor—OSHA, Federal Office Building, Room 847, 1240 East Ninth Street, Cleveland, Ohio 44199

I. Background

The experimental variance granted to Interlake Stamping Corporation under section 6(b)(6)(C) of the Occupational Safety and Health Act of 1970 (84 Stat. 1594; 29 U.S.C. 655), was previously extended for six months on September 9, 1977 (42 FR 45389) and for two years on March 6, 1979 (44 FR 12288). The experimental variance was originally granted on August 31, 1976 (41 FR 36702) from the standards prescribed in 29 CFR 1910.217(c)(3)(iii)(*b*) which prohibits the

use of a presence sensing device for tripping a mechanical power press.

The facility affected by this application is: Interlake Stamping Corporation, 4732 East 355th Street, Willoughby, Ohio 44094.

The initial purpose of this experiment was to collect information to aid in determining whether the OSHA standard should be modified to permit the tripping of mechanical power presses with presence sensing devices.

To date, the comparison record for malfunctions and productivity between the pressses using automatic tripping and those using conventional tripping means show that the presses with automatic tripping have fewer malfunctions and higher productivity.

As information has been collected from Interlake and other sources during this experimental period, it has become apparent that additional information is needed before a final decision can be made on whether to modify the standard and, if so, what requirements and/or restrictions should be included in the new standard.

In order to obtain the necessary information the National Institute for Occupational Safety and Health awarded a contract to Purdue Research Foundation in West Lafayette, Indiana for a fafety study of OSHA's experimental variance on self-tripping of mechanical power pressesl specifically Purdue shall;

1. Observe and evaluate the self tripping experiment at Interlake Stamping Corporation;

2. Research the design and application practices which would probably develop if the experiment were expanded or if § 1910.217(c)(3)(iii)(*b*) was modified; and

3. Develop design and performance criteria approval procedures, and continuing research strategies.

II. Decision

The Purdue study of OSHA's experimental variance on self-tripping of power presses will provide the data and evidence necessary to make a determination on whether to modify the standard. Moreover, the continuing use of the presses in an automatic trip mode will provide continuing comparison data on different methods of actuating presses. This information provides a base against which to evaluate the information obtained through other means. Continuation of the experimental variance will provide an opportunity for Purdue Research Foundation to complete its safety study of the presence sensing device while it is being used under the terms of the experimental variance. In addition, while the experiment may later be expanded to other worksites, it is valuble to have a location in which to observe the system in use.

Therefore, for the above reasons, it has been determined that is is essential that the experimental variance be extended for a period not to exceed one year.

III. Order

Pursuant to authority in section 6(b)(6)(C) of the Occupational Safety and Health Act of 1970, and in Secretary of Labor's Order No. 8–76 (41 FR 25059) it is ordered that Interlake Stamping corporation be, and it is hereby, authorized to continue its experiment for up to one year under the terms of the order granting the experimental variance of August 31, 1976 (41 FR 36702). In addition, Interlake shall obtain, within two weeks of the date of this extension, new statements from all operators as required under item 5(b) of the original order granting the variance. In addition, item 17 of the original order shall be modified to read;

17. This variance shall continue in effect for a period not to exceed one year.

As soon as possible Interlake Stamping Corporation shall give notice to affected employees of the terms of this order by the same means required to be used to inform them of the application for variance.

Effective date. this order shall become effective on May 29, 1981 and shall remain in effect until modified or revoked in accordance with section 6(b)(6)(C) of the Occupational Safety and Health Act of 1970.

Signed at Washington, D.C. this 21st day of May 1981.

Thorne G. Auchter,

Assistant Secretary of Labor.

BILLING CODE 4510–28–M

Office of Pension and Welfare Benefit Programs

Advisory Council on Employee Welfare and Pension Benefit Plans; Meeting

Pursuant to Section 512 of the Employee Retirement Income Security Act of 1974 (ERISA) 29 U.S.C. 1142, a meeting of the Advisory Council on Employee Welfare and Pension Benefit Plans will be held at 9:30 a.m. on Tuesday, June 30, 1981, in Room S–4215C, U.S. Department of Labor, Third and Constitution Avenue, N.W., Washington, D.C.

The purpose of the meeting is to discuss the items listed below and to invite public comment on any aspect of the administration of ERISA.

1. Department of Labor Progress Report.

2. Council Work Group Reports:

Portability Work Group
Communications Work Group
Legislative Work Group
Reporting, Disclosure and Recordkeeping Work Group
Collective Bargaining Work Group

3. Statements from the Public.

Members of the public are encouraged to file a written statement pertaining to any topic concerning ERISA, by submitting 30 copies on or before June 29, 1981, to the Administrator, Pension and Welfare Benefit Programs, U.S. Department of Labor, Room S–4522, Third and Constitution Avenue, N.W., Washington, D.C. 20216.

Persons desiring to address the Council should notify Edward F. Lysczek, Executive Secretary of the Advisory Council, in care of the above address or by calling (202) 523–8753.

Signed at Washington, D.C., this 26th day of May 1981.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice (81-52)]

NASA Wage Committee; Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the NASA Wage Committee.

DATE AND TIME: June 26, 1981, 1:30 p.m. to 4:30 p.m.

ADDRESS: National Aeronautics and Space Administration, Room 226B, Federal Building 10B, 600 Independence Avenue SW, Washington, DC 20546.

FOR FURTHER INFORMATION CONTACT: Ms. Deborah C. Green, Code NPM-28, National Aeronautics and Space Administration, Washington, DC 20546 (202/755-8520).

SUPPLEMENTARY INFORMATION: The Committee's primary responsibility is to consider and make recommendations to the NASA Director of Personnel on all matters involved in the development and authorization of a Wage Schedule for the Cleveland, Ohio, wage area, pursuant to Pub. L. 92-392. The Committee, Chaired by Mr. William Dey, consists of 11 members. During this meeting the Committee will consider wage survey data, local reports, recommendations, and statistical analyses and proposed wage schedules reviewed therefrom. Discussions of these matters in a public session would constitute release of confidential commercial and financial information obtained from private industry. Since this session will be concerned with matters listed in 5 U.S.C. 552b(c)(4), it has been determined that this meeting will be entirely closed to the public. However, members of the public who may wish to do so, are invited to submit material in writing to the Chairperson concerning matters felt to be deserving of the Committee's attention.

TYPE OF MEETING: Closed.

PURPOSE OF MEETING: The NASA Wage Committee will recommend to the NASA Wage Fixing Authority the proposed wage schedule to be adopted.

May 22, 1981.

Gerald D. Griffin,

Acting Associate Administrator for External Relations.

BILLING CODE 7510-01-M

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-445, 50-446]

Availability of Draft Environmental Statement for Comanche Peak Steam Electric Station, Units 1 and 2

Notice is hereby given that a Draft Environmental Statement (NUREG-0775) has been prepared by the Commission's Office of Nuclear Reactor Regulation related to the proposed operation of the Comanche Peak Steam Electric Station, Units 1 and 2, by the Texas Utilities Generating Company. The station is located in Somervell County, Texas.

This Draft Environmental Statement (DES) addresses the aquatic, terrestrial, radiological, social and economic costs and benefits associated with normal station operation. Also considered are station accidents, their likelihood of occurrence and their consequences. Finally, the statement presents an updated discussion of a need for the facility based on information available in 1980.

This DES is available for inspection by the public in the Commission's Public Document Room at 1717 H Street, NW., Washington, D.C., and in the Somervell County Public Library, On the Square, P.O. Box 1417, Glen Rose, Texas 76043. The Draft Environmental Statement is also being made available at the North Central Texas Council of Governments, P.O. Drawer COG, Arlington, Texas 76011. Requests for copies of the DES (NUREG-0775) should be addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Technical Information and Document Control.

Interested persons may submit comments on this DES for the Commission's consideration. Federal, State, and specified local agencies are being provided with copies of the DES (local agencies may obtain these documents upon request).

Comments by Federal, State and local officials, or other members of the public received by the Commission will be made available for public inspection at the Commission's Public Document Room in Washington, D.C. and the Somervell County Public Library. After consideration of comments submitted with respect to the DES, the Commission's staff will prepare a Final Environmental Statement, the availability of which will be published in the Federal Register. Comments are due by July 13, 1981.

Comments on this report from interested members of the public should be addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Md., this 22d day of May 1981.

For the Nuclear Regulatory Commission.

B. J. Youngblood,

Chief, Licensing Branch No. 1, Division of Licensing.

BILLING CODE 7590-01-M

[Docket No. 50-261]

Carolina Power and Light Co.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 57 to Facility Operating License No. DPR-23 issued to Carolina Power and Light Company (the licensee), which revised Technical Specifications for operation of the H. B. Robinson Steam Electric Plant, Unit No. 2 (the facility), located in Darlington County, South Carolina. The amendment is effective as of the date of issuance.

The amendment revises the Technical Specifications to incorporate additional fire protection Limiting Conditions for Operation and Surveillance requirements.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The

Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since this amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated May 17, 1979, as supplemented June 7, 1979, October 15, 1980 and December 3, 1980, (2) Amendment No. 57 to License No. DPR-23, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. 20555 and at the Hartsville Memorial Library, Home and Fifth Avenues, Hartsville, South Carolina 29550. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Md., this 15th day of May 1981.

For the Nuclear Regulatory Commission.

Steven A. Varga,

Chief, Operating Reactors Branch No. 1, Division of Licensing.

[FR Doc. 81-16114 Filed 5-28-81; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-70]

General Electric Co. and General Electric Test Reactor; Availability of Applicant's Environmental Report and Notice of Intent To Publish an Environmental Impact Statement

Pursuant to the National Environmental Policy Act of 1969 and the regulations of the Commission in 10 CFR Part 51, General Electric has filed an environmental report as part of their application for renewal of the operating license for General Electric Test Reactor located at the Vallecitos Nuclear Center near Pleasanton, California. The original request for renewal was submitted on October 21, 1975, and notice of Proposed Renewal of Facility License was published in the **Federal Register** on September 15, 1977 (42 FR 46427). The report, which discusses environmental considerations related to the continued operation of the facility is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. 20555. Copies of the report are also being made available at the Office of the Governor, Office of Planning and Research, 400 Tenth Street, Sacramento, CA 95814 and Association of Bay Area Governments, Hotel Claremont, Berkeley, CA 94705.

In order to determine the scope of the issues to be addressed in the EIS and to identify the significant issues related to the proposed license renewal, an open scoping meeting will be held in the Little Theatre at the Granada High School, 685 Las Positas Boulevard, Livermore, CA 94550 at 9:30 AM on June 13, 1981.

After the environmental report has been analyzed by the staff, a draft environmental statement will be prepared. Upon preparation of the draft environmental statement, the Commission will, among other things, cause to be published in the **Federal Register** a summary notice of availability of the draft statement, with a request for comments from interested persons on the draft statement. The summary notice will also contain a statement to the effect that comments of Federal agencies and State and Local officials will be made available when received. Upon consideration of comments submitted with respect to the draft environmental statement, the staff will issue a final environmental statement, the availability of which will be published in the **Federal Register.**

Any questions regarding the proposed license renewal or the environmental impact statement should be addressed to James R. Miller, Chief, Standardization & Special Projects Branch, Division of Licensing, Office of Nuclear Reactor Regulation, Washington, D.C. 20555, (301) 492-7014.

Dated at Bethesda, Md., this 22d day of May 1981.

For the Nuclear Regulatory Commission.

James R. Miller,

Chief, Standardization and Special Projects Branch, Division of Licensing.

[FR Doc. 81-16115 Filed 5-28-81; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-261]

Carolina Power and Light Co.; Issuance of Amendment To Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 56 to Facility Operating License No. DPR-23 issued to Carolina Power and Light Company (the licensee), which revised Technical Specifications for operation of the H. B. Robinson Steam Electric Plant, Unit No. 2, (the facility) located in Darlington County, South Carolina. The amendment is effective as of the date of issuance.

The amendment revises the Technical Specifications to clarify certain specifications related to testing Primary Coolant System check valves. This change is an administrative change.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since this amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated May 5, 1981, (2) Amendment No. 56 to License No. DPR-23, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. and at the Hartsville Memorial Library, Home and Fifth Avenues, Hartsville, South Carolina 29550. A copy of items (2) and (3) may be obtained upon request addressed to the Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Md., this 14th day of May 1981.

For the Nuclear Regulatory Commission.

Steven A. Varga,

Chief, Operating Reactors Branch No. 1, Division of Licensing.

[FR Doc. 81-16113 Filed 5-28-81; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 30-0000]

Order To Incorporate a Radiological Contingency Plan in Materials License No. 24-04206-01, Mallinckrodt, Inc.

AGENCY: United States Nuclear Regulatory Commission.

ACTION: Order to Mallinckrodt, Inc., to Modify License To Incorporate a New or Upgraded Radiological Contingency Plan.

Order To Modify License

I

Mallinckrodt Incorporated of St. Louis, Missouri ("the licensee"), with facilities located at 2703 Wagner Place, Maryland Heights, Missouri, is the holder of Materials License No. 24–04206–01 issued by the Nuclear Regulatory Commission ("the Commission"). The license authorizes the possession of any byproduct materials, in any form, having atomic numbers 1–83, inclusive. The license authorizes the use of the materials for the development and production of radiopharmaceuticals, radiochemicals and sources, and distribution to authorize recipients. The current license was issued on January 13, 1981, and is due to expire on December 31, 1985.

II

Before the issuance of this license, the staff reviewed the application and determined that the licensee could operate the facility in a safe manner. Nonetheless, based on the lessons learned from the accident at Three Mile Island and new perspectives on emergency preparedness and planning, the Commission has reevaluated the emergency preparedness requirements for its fuel cycle and materials licensees. The Commission has decided that significant improvements need to be made promptly to ensure that adequate onsite emergency response actions will be taken by licensees with major operations in cases where, even though unlikely, potentially serious radiation accidents could occur. The operations licensed to be carried our pursuant to Materials License No. 24–04206–01 appear to fall in this category and require the development of a comprehensive onsite radiological contingency plan. Specifically, considerations are needed to ensure: (1) That the plant contains adequate engineered safety features and is otherwise designed to limit releases of radioactive materials and radiation exposures in the event of an accident; (2) that a capability exists for measuring and assessing the significance of accidental releases of radioactive materials; (3) that appropriate emergency equipment and planning are provided onsite to protect workers against radiation hazards that might be encountered following an accident; (4) that notifications are made promptly to federal, state, and local government agencies; and (5) that necessary recovery actions are taken in a timely fashion to return the plant to a safe condition following an accident.

The information to be developed and documented is described in the enclosed "Standard Format and Content for Radiological Contingency Plans for Fuel Cycle and Materials Facilities" (Enclosure 1). In summary, the information to be submitted to NRC for review includes a: (1) Description of plant systems important to safety; (2) characterization of classes of credible emergencies that might occur; (3) description of radiological contingency measures for each class of emergency; (4) designation of authorities and responsibilities of key individuals and groups employed by the licensee; and (5) a description of equipment and facilities designated for use during radiation emergencies. The plan is to be directed toward mitigating the consequences of radiological emergencies and providing reasonable assurance that appropriate measures will be taken during an emergency to assure protection of the public and minimize adverse environmental impacts. In preparing the plan, consideration should be given to a set of credible accidents ranging from almost everyday occurrences of small consequence through highly improbable, but not impossible, accidents such as those resulting from severe natural phenomena, human error, multiple equipment failures, and sabotage.

III

In addition to onsite radiological contingency planning, as discussed in Section II above, offsite emergency response planning is also highly important. Offsite planning requirements for fuel cycle and materials facilities are being developed separately and will be considered in a proposed rulemaking to be published in the coming months. Within the framework of that rulemaking, NRC will carry out extensive coordination with state governments and the Federal Emergency Management Agency (FEMA) concerning applicable requirements.

The Commission believes that it is prudent and necessary to require the licensee to develop and submit within 120 days of the effective date of this Order, an onsite radiological contingency plan, as discussed in Section II above, applicable to operations licensed pursuant to Materials License No. 24–04206–01. Such a plan can be developed and effectively implemented apart from offsite emergency response planning, which necessarily involves state and local government emergency planning actions. The onsite radiological contingency plan is a necessary extension of protective actions taken by the licensee during normal operations. Such planning is essential to ensure that proper plans are made by the licensee to protect the public from accidents that could result from the licensed operations. A less learned from the Three Mile Island accident is that accidents thought to be highly improbable can and will occur, and that proper emergency preparedness is required to mitigate radiological consequences.

The reporting and recordkeeping requirements contained in this Order affect fewer than 10 persons and are required by law an therefore, are not subject to Office of Management and Budget clearance as required by Pub. L. 96–511.

V

Accordingly, pursuant to sections 81, 161b and 161o of the Atomic Energy Act of 1954, as amended, § 30.34(e) of 10 CFR Part 30, and § 2.204 of 10 CFR Part 2, it is hereby ordered that within 120 days of the effective date of this Order, the licensee shall submit:

1. A radiological contingency plan in accordance with Enclosure 1 of this Order, "Standard Format and Content for Radiological Contingency Plans for Fuel Cycle and Materials Facilities," and an application for license amendment to incorporate such plan as approved as a condition of the license; *or alternatively,*

2. An application for license amendment to reduce the possession limits for radioactive materials below those specified in Enclosure 2 of this Order.

VI

The licensee or any other person who has an interest affected by this Order may request a hearing on this Order within 20 days of its issuance. A request for a hearing shall be submitted to the Director, Division of Fuel Cycle and Material Safety, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. Copies of the request shall also be sent to the Secretary of the Commission and the Executive Legal Director at the same address. If a hearing is requested by a person other than the licensee, that person shall describe, in accordance with 10 CFR 2.714(a)(2), the nature of the person's interest and the manner in which that interest is affected by this Order.

If a hearing is requested by the licensee or other person who has an interest affected by this Order, the Commission will issue an order

designating the time and place of the hearing.

This Order shall become effective upon expiration of the period within which a hearing may be requested or, if a hearing is requested, on the date specified in an order issued following further proceedings on this Order.

VII

If a hearing is held, the issue to be considered at the hearing shall be whether the licensee (1) shall submit a radiological contingency plan which complies with Enclosure 1 of this Order, "Standard Format and Content for Radiological Contingency Plans for Fuel Cycle and Materials Facilities," or (2) if a plan is not submitted as required in Section V(1) of the Order, should an application for a license amendment to reduce its possession limits for radiaactive materials below those specified in Enclosure 2 of this Order be submitted.

FOR FURTHER INFORMATION CONTACT: Dr. Fred D. Fisher, or Mr. Ralph G. Page, Nuclear Materials Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, (301) 427–4135 or 427–4309.

SUPPLEMENTARY INFORMATION: Enclosures 1 and 2 to the Order may be found at 46 FR 12569 and 12576 (February 17, 1981).

Signed in Silver Spring, Md., this 22d day of May 1981.

For the Nuclear Regulatory Commission.

Richard E. Cunningham,

Director Division of Fuel Cycle and Material Safety.

BILLING CODE 7590-01-M

[Docket Nos. 50-387, 50-388]

Pennsylvania Power and Light Co. and Allegheny Electric Cooperative, Inc.; Finding of no Significant Antitrust Changes and Time for Filing of Requests for Reevaluation

The Director of Nuclear Reactor Regulation has made an initial finding in accordance with Section 105c(2) of the Atomic Energy Act of 1954, as amended, that no significant (antitrust) changes in the licensee's activities or proposed activities have occurred subsequent to the previous construction permit review of the Susquehanna Nuclear Units 1 and 2 by the Attorney General and the Commission. The finding is as follows:

Section 105c(2) of the Atomic Energy Act of 1954, as amended, provides for an antitrust review of an application for an operating license if the Commision determines that significant changes in the licensee's activities or proposed activities have occurred subsequent to the previous construction permit review. The Commission has delegated the authority to make the "significant change" determination with respect to nuclear reactors to the Director, Office of Nuclear Reactor Regulation. Based upon examination of events that have transpired since issuance of the Susquehanna 1 and 2 construction permits to the Pennsylvania Power & Light Company and the Allegheny Electric Power Cooperative, Inc., the staffs of the Office of Nuclear Reactor Regulation and the Office of the Executive Legal Director, hereafter referred to as the "staff," have jointly concluded, after consulting with the Department of Justice, that the changes that have occurred since the antitrust construction permit review are not "significant" in an antitrust context to require a second antitrust review at the operating license stage of the application for licenses; i.e., the changes which have occurred either are not reasonably attributable to the licensees or do not have antitrust implications that would likely warrant some Commission remedy.

In reaching this conclusion, the staff considered the structure of the electric utility industry in Central and Eastern Pennsylvania, the events relevant to the Susquehanna 1 and 2 construction permit antitrust review, and the events that have occurred subsequent to that permit review.

The conclusion of the staff's analysis is as follows:

Staff has reviewed the changes and proposed changes in the activities of the Applicants (i.e., PP&L and AE) of the Susquehanna plant since their respective construction permit antitrust reviews.

In order to conduct this operating license review, staff has obtained information from PP&L, FERC, SEC, and from other electric utilities that deal with the Applicants. The information received was evaluated using the criteria that the Commission set forth in its June 30, 1980 Memorandum and Order in *summer* upon which to base a significant change determination.

As a result of the analysis of the information obtained, staff finds that the activities and proposed activities of PP&L and AE since the CP review, taken individually and collectively, do not warrant a significant change determination.

The Department of Justice has reviewed a draft analysis by the staff along with other material and has concurred in the staff's finding.

Based on the staff's analysis, it is my finding that an operating license antitrust review of the Pennsylvania Power and Light Company and the Allegheny Electric Power Cooperative, Inc., with respect to the Susquehanna Nuclear Units 1 and 2 is not required.

Signed on May 18, 1981 by Harold R. Denton, Director Office of Nuclear Reactor Regulation.

Any person whose interest may be affected pursuant to this initial determination may file with full particulars a request for reevaluation with the Director of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555 by July 28, 1981.

For the Nuclear Regulatory Commission.

Argil Toalston,

Acting Chief, Utility Finance Branch, Division of Engineering, Office of Nuclear Reactor Regulation.

PRESIDENT'S ECONOMIC POLICY ADVISORY BOARD

Meeting

May 27, 1981.

The President's Economic Policy Advisory Board will meet on June 11, 1981 at The White House, Washington, D.C. from 10 a.m. to 3:30 p.m. The purpose of this meeting is to review the current state of the national and international economy.

The meeting concerns matters listed in Section 552b(c) of Title 5, United States Code, specifically subparagraphs (1), (4), (8) and (9) thereof, and will be closed to the public.

For further information please contact the Office of Policy Development, The White House at (202) 456–6515.

Martin Anderson,

Assistant to the President for Policy Development.

BILLING CODE 3115-01-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 22062; 70-6603]

American Electric Power Service Corp. and American Electric Power Company, Inc.; Proposed Issuance of Note to Bank by Service Corporation and Guaranty by Holding Company

May 22, 1981.

American Electric Power Company, Inc. ("American"), a registered holding company, and its subsidiary service company, American Electric Power Service Corporation ("Service Corporation"), 2 Broadway, New York, New York 10004, have filed a declaration with this Commission pursuant to Sections 6(a), 7, and 12(b) of the Public Utility Holding Company Act of 1935 ("Act") and Rule 45 promulgated thereunder.

Pursuant to a building loan agreement between Service Corporation and Irving Trust Company, Service Corporation proposes to issue a building loan note

maturing December 31, 1987, to evidence advances of up to $100,000,000 from Irving Trust Company. The principal amount of the advances will bear interest at Irving Trust Company's published prime rate. American proposes to guarantee repayment of such loan and interest thereon and performance of certain other obligations of Service Corporation in connection with such loan. The proceeds will be used by Service Corporation to acquire land and construct a 31-story office building in Columbus, Ohio, to serve as a new headquarters for American and Service Corporation. It is anticipated that the loan will be repaid with the proceeds of a sale-leaseback transaction.

The fees and expenses related to the proposed transactions are estimated not to exceed $60,000. It is stated that no state or federal commission, other than this Commission has jurisdiction over the proposed transactions.

The declaration and any amendments thereto are available for public inspection through the Commission's Office of Public Reference. Interested persons wishing to comment or request a hearing should submit their views in writing by June 19, 1981, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549, and serve a copy on the declarants at the address specified above. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for a hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in this matter. After said date, the declaration, as filed or as it may be amended, may be permitted to become effective.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 81-16090 Filed 5-28-81; 8:45 am]

BILLING CODE 8010-01-M

Cincinnati Stock Exchange; Applications for Unlisted Trading Privileges and of Opportunity for Hearing

May 22, 1981.

The above named national securities exchange has filed applications with the Securities and Exchange Commission pursuant to Section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f-1 thereunder, for unlisted trading privileges in the following stocks:

Allied Corporation, Common Stock, $1 Par Value (File No. 7-5931).

Signal Companies, Inc., Common Stock, $2 Par Value (File No. 7-5932).

These securities are listed and registered on one or more other national securities exchanges and are reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before June 15, 1981 written data, views and arguments concerning the above-referenced applications. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, Washington, D.C. 20549. Following this opportunity for hearing, the Commission will approve the applications if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such applications are consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 81-16131 Filed 5-28-81; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 22063; 70-6598]

Connecticut Yankee Atomic Power Co.; Proposed Issuance and Sale of Notes to Banks

Connecticut Yankee Atomic Power Company ("Yankee"), P.O. Box 270, Hartford, Connecticut 06101, a subsidiary of Northeast Utilities and the New England Electric System, registered holding companies, has filed an application-declaration and an amendment thereto with this Commission pursuant to Sections 6(a) and 7 of the Public Utility Holding Company Act of 1935 ("Act") and Rule 50 (a)(2) thereunder.

Yankee proposes to issue and sell notes to banks from time to time through June 30, 1982. The aggregate principal amount of notes outstanding at any one time would not exceed $25,000,000. The notes would be dated as of the date of issue, would have maximum maturity dates of nine months, and would bear interest at the prime rate. The notes would be prepayable at any time without premium. Under the lines of credit yankee must maintain compensatory balances of 5% of the line of credit and 15% of actual borrowings. Assuming an 18% prime rate and full usage of the line of credit, the effective interest cost of borrowings under such balance requirements would be 21.60%.

The funds to be derived from the borrowing would be used to repay outstanding notes, to finance construction and to purchase nuclear fuel. Yankee estimates construction expenditures of $29,000,000 in 1981 and $27,000,000, in 1982, as well as nuclear fuel costs of $20,000,000 in 1981 and $41,000,000 in 1982.

The application-declaration and any amendments thereto are available for public inspection through the Commission's Office of Public Reference. Interested persons wishing to comment or request a hearing should submit their views in writing by June 15, 1981, to the Secretary, Securities and exchange Commission, Washington, D.C. 20549, and serve a copy on the applicant-declarant at the address specified above. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for a hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in this matter. After said date, the application-declaration, as amended or as it may be further amended, may be granted and permitted to become effective.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 34-17813; File No. SR-MSRB-81-5]

Municipal Securities Rulemaking Board; Self-Regulatory Organizations; Proposed Rule Changes

Proposed Rule Changes By Municipal Securities Rulemaking Board, relating to proposed rule changes to Rule G-7 relating to information concerning associated persons, Rule G-8 concerning recordkeeping, Rule G-26 concerning administration of accounts, and Rule G-27 concerning supervision. Comments requested on or before June 19, 1981.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on May 13, 1981, the Municipal Securities Rulemaking Board filed with the Securities and Exchange

Commission the proposed rule changes as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule changes from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Changes

The Municipal Securities Rulemaking Board is filing herewith amendments to rule G–7 relating to information concerning associated persons, rule G–8 concerning recordkeeping, rule G–26 concerning administration of accounts, and rule G–27 concerning supervision (hereafter referred to as the "proposed rule changes.") The text of the proposed rule changes is as follows: [1]

Rule G–7. Information Concerning Associated Persons

(a) No associated person (as hereinafter defined) of a municipal securities broker or municipal securities dealer shall be qualified for purposes of rule G–2 of the Board unless such associated person meets the requirements of this rule. The term "associated person" as used in this rule means (i) a municipal securities principal, (ii) *a municipal securities sales principal,* [(ii)] *(iii)* a financial and operations principal and *(iv)* a municipal securities representative.

(b) through (e) No change.

(f) Every municipal securities broker and municipal securities dealer shall maintain and preserve a record of the name and residence address of each associated person, designated by the category of function performed (whether municipal securities principal, *municipal securities sales principal,* municipal securities representative, or financial and operations principal) and indicating whether such person has taken and passed the qualification examination for municipal securities principals or *municipal securities sales principals* or municipal securities representatives or financial and operations principals presecribed by the Board or was exempt from the requirement to take and pass such examination, indicating the basis for such exemption, until at least three years after the association person's employment or other associated with such municipal securities broker or municipal securities dealer has terminated.

(g) through (i) No change.

[1] Italics indicate new language; [brackets] indicate deletions.

Rule G–8. Books and Records To Be Made by Municipal Securities Brokers and Municipal Securities Dealers

(a) Description of Books and Records Required To Be Made. Except as otherwise specifically indicated in this rule, every municipal securities broker and municipal securities dealer shall make and keep current the following books and records, to the extent applicable to the business of the municipal securities broker or municipal securities dealer:

(i) through (x) No change.

(xi) Customer Account Information. A record for each customer, other than an institutional account, setting forth the following information to the extent applicable to such customer:

(A) through (F) No change.

(G) Signature of municipal securities representative or general securities representative introducing the account and signature of a municipal securities principal, *municipal securities sales principal* or general securities principal indicating acceptance of the account;

(H) with respect to discretionary accounts, customer's written authorization to exercise discretionary power or authority with respect to the account, written approval of municipal securities principal *or municipal securities sales principal* who supervises the account, and written approval of municipal securities principal *or municipal securities sales principal* with respect to each transaction in the account, indicating the time and date of approval;

(I) through (J) No change.

(xii) No change.

(b) through (g) No change.

Rule G–26. Administration of Discretionary and Other Accounts

(a) No change.

(b) Discretionary Account Authorization. No broker, dealer, or municipal securities dealer shall effect a transaction in municipal securities with or for a discretionary account except to the extent clearly permitted by the prior written authorization of the customer and accepted in writing by a municipal securities principal *or municipal securities sales principal* on behalf of the broker, dealer, or municipal securities dealer.

(c) Review of Transactions. A municipal securities principal *or municipal securities sales principal* shall promptly review and approve in writing each transaction in municipal securities effected with or for a discretionary account introduced or carried by the broker, dealer or municipal securities dealer, and shall review at regular and frequent intervals all customer accounts introduced or carried by the broker, dealer, or municipal securities dealer in which transactions in municipal securities are effected, in order to detect and prevent irregularities and abuses.

Rule G–27. Supervision

(a) No change.

(b) Designation of Supervisors. Each municipal securities broker and municipal securities dealer shall designate one or more municipal securities principals and financial and operations principals as responsible for supervising the activities and business referred to in section (a) of this rule and for enforcing the supervisory procedures referred to in section (c) of this rule. Nothing contained in this rule shall require municipal securities brokers and municipal securities dealers to designate or have associated with them a financial and operations principal unless required by rule G–3 of the Board. A financial and operations principal shall not be designated to supervise non-financial activities. *Each municipal securities broker and municipal securities dealer (other than a bank dealer) may also designate a duly qualified municipal securities sales principal as responsible for the direct supervision of sales to and purchases from customers of municipal securities.*

(c) Written Procedures. Each municipal securities broker and municipal securities dealer shall establish, maintain, and enforce written supervisory procedures adopted by the municipal securities broker or municipal securities dealer to assure compliance with the rules and regulations thereunder. Such procedures shall provide, at a minimum, for

(i) the designation of at least one duly qualified municipal securities principal as responsible for supervising the activities with respect to municipal securities of the associated persons of the municipal securities broker or municipal securities dealer and at least one duly qualified municipal securities principal as responsible for supervising the activities with respect to municipal securities of each branch office or other location or unit in which an associated person engages in any of the activities set forth in rule G–3(a)(iii) of the Board, [;] *provided, however, that a duly qualified municipal securities sales principal may be designated as responsible for the direct supervision of sales to and purchases from customers of municipal securities;*

(ii) the prompt review and written approval by the designated municipal

securities principal (or by a general securities principal if specifically authorized by rule of the Board) *or (to the extent that the following relate to sales and purchases from customers) by the designated municipal securities sales principal,* of:

(A) through (D) No change.

(E) other matters required by rule of the Board to be reviewed or approved by a municipal securities principal or general securities principal *or a municipal securities sales principal;* and

(iii) the regular and frequent examination by the designated municipal securities principal *or the designated municipal securities sales principal* of customer accounts introduced or carried by the municipal securities borker or municipal securities dealer, in which transactions in municipal securities are effected, in order to detect and prevent irregularities and abuses.

No change in remainder of text.

II. Self-Regulatory Organization's Statement on the Purpose of, and Statutory Basis for, the Proposed Rule Changes

A. Self-Regulatory Organization's Statement on the Purpose of, and Statutory Basis for, the Proposed Rule Changes

On March 19, 1981, the Board filed with the Commission proposed amendments to rule G–3 concerning professional qualifications. If approved, the proposed amendments will, in part, establish a new professional qualification category of municipal securities sales principal. As defined under the proposed amendments to rule G–3, a municipal securities sales principal would be a person associated with a securities firm whose activities as they relate to municipal securities are limited to supervising customer sales and purchases.

The adoption of the municipal securities sales principal classification would require a conforming amendment to Board rule G–7. Rule G–7 requires municipal securities brokers and municipal securities dealers to record certain background information concerning their associated persons. The proposed rule changes would expand the definition of "associated person" in rule G–7(a) to include a municipal securities sales principal, in order to insure that municipal securities brokers and municipal securities dealers maintain adequate records regarding such persons. In addition, the proposed rule changes amend rule G–7(f) requiring municipal securities brokers and municipal securities dealers to maintain a record of each associated person's professional qualification examination status and any examination exemptions accorded such person by extending this requirement to include the professional qualification records of municipal securities sales principals.

As discussed in the Board's October 15, 1980 notice concerning the draft amendments to rule G–3, in developing the municipal securities sales principal category the Board contemplated that the full municipal securities principal would continue to have general supervisory responsibility for customer sales and purchases but that certain direct supervisory functions could be delegated to municipal securitieds sales principals.

The proposed rule changes are intended to permit municipal securities sales principals to perform certain supervisory functions which Board rules currently require full municipal securities principals to perform, as follows:

Rule G–8

Rule G–8 enumerates the specific records to be made and maintained by municipal securities brokers and municipal securities dealers. Rule G–8(a)(xi) lists the customer account information to be recorded for each customer. Rule G–8(a)(xi)(G) requires that each customer account information record shall set forth, among other information, the signature of the municipal securities principal or general securities principal indicating acceptance of the account. The purpose of the proposed rule change to this is to permit municipal securities sales principals to record acceptance of customer accounts as part of the customer account information record required by rule G–8.

Rule G–8(a)(xi)(H) provides that customer account information records shall include, with respect to discretionary accounts, the written approval of the municipal securities principal who supervises the account and the written approval of the municipal securities principal with respect to each transaction in the account. The purpose of the proposed rule change to this section of rule G–8 is to make explicit the municipal securities sales principal's authorization to approve discretionary accounts and discretionary account transaction.

Rule G–26

Rule G–26(b) concerning the administration of discretionary accounts provides that no broker, dealer, or municipal securities dealer shall effect a transaction in municipal securities with or for a discretionary account except to the extent clearly permitted by the prior written authorization of the customer and accepted in writing by a municipal securities principal on behalf of the broker, dealer, or municipal securities dealer.

Insofar as rule G–26(b) reflects the requirement of rule G–8(a)(xi)(H) that written acceptance of discretionary accounts be retained in the customer account information records, the proposed change to rule G–8(a)(xi)(H) permitting municipal securities sales principals to provide written acceptance of such accounts will require a conforming change to rule G–26(b).

Rule G–26(c) relating to review of transactions provides that a municipal securities principal shall promptly review and approve in writing each transaction in municipal securities effected with or for a discretionary account, and shall review at regular and frequent intervals all customer accounts in which transactions in municipal securities are effected, in other to detect and prevent irregularities and abuses. The purpose of the proposed change to rule G–26(c) is to make explicit that a municipal securities sales principal's supervisory authority with respect to customer sales and purchases of municipal securities may include the performance of required reviews of transactions in discretionary and other customer accounts.

Rule G–27

Rule G–27 concerning supervision requires all municipal securities brokers and municipal securities dealers to supervise the activities of their associated persons and the conduct of their municipal securities business. Rule G–27(b) requires that each municipal securities broker or municipal securities dealer shall designate one or more municipal securities principals and financial and operations principals as responsible for supervising such activities. The proposed rule change will, if approved, amend rule G–27(b) to permit municipal securities brokers and municipal securities dealers to designate a duly qualified municipal securities sales principal as responsible for the direct supervision of sales to and purchases from customers of municipal securities.

Rule G–27(c) requires that the written supervisory procedures required by the rule provide for the designation of at least one municipal securities principal as responsible for supervising the municipal securities activities of the associated persons of the municipal securities broker or municipal securities

dealer and at least one municipal securities principal as responsible for supervising the municipal securities activities of each branch office or other location or unit in which an associated person performs municipal securities activities.

The purpose of the proposed rule change to rule G–27(c)(i) is to permit designation of a municipal securities sales principal as responsible for directly supervising customer sales and purchase activities in each branch office or other unit in which any associated person engages in such activities. Rule G–27(c)(ii) currently provides for the prompt review and written approval by the designated municipal securities principal (or by a general securities principal if specifically authorized by rule of the Board) of:

(A) The opening of each customer account introduced or carried by the municipal securities broker or municipal securities dealer, in which transactions in municipal securities may be effected,

(B) Each transaction in municipal securities,

(C) The handling of all written customer complaints pertaining to transactions in municipal securities,

(D) All correspondence pertaining to the solicitation or execution of transactions in municipal securities, and

(E) Other matters required by rule of the Board to be reviewed or approved by a municipal securities principal or general securities principal.

The purpose of the proposed change to rule G–27(c)(ii) is to establish the authority of a municipal securities sales principal to review and approve the items and activities described as they relate to customer sales and purchases of municipal securities.

Rule G–27(c)(iii) requires written supervisory procedures for the regular and frequent examination by the designated municipal securities principal of customer accounts in which municipal securities transactions are effected. The purpose of the proposed change to rule G–27(c)(iii) is to permit the municipal securities sales principal, rather than the full principal, to perform the regular review of customer accounts. This proposed rule change is also intended to conform rule G–27(c) to rule G–26(c) concerning review of transactions as it is proposed to be amended.

The Board has adopted the proposed rule changes pursuant to Section 15B(b)(2)(A) of the Securities Exchange Act which directs the Board to adopt rules to

> * * * provide that no municipal securities broker or municipal securities dealer shall effect any transaction in, or induce or attempt to induce the purchase or sale of, any municipal security unless such municipal securities broker or municipal securities dealer * * * and every natural person associated with [it] meets such standards of training, experience, competence, and such other qualifications as the Board finds necessary or appropriate in the public interest or for the protection of investors * * *

and pursuant to Section 15B(b)(2)(G) of the Securities Exchange Act which directs the Board to adopt rules to

> * * * prescribe records to be made and kept by muinicipal securities brokers and municipal securities dealers * * *

As indicated above, the Board believes that the proposed rule changes would clarify the authority of a municipal securities sales principal to perform certain supervisory functions, and would insure adequate recordkeeping relating to the background and designated functions of such persons.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Board believes that the proposed rule changes will have no significant impact on competition. The proposed rule changes merely adjust the recordkeeping and supervisory procedures with which all municipal securities brokers and municipal securities dealers are required to comply to reflect the newly-proposed qualification category of municipal securities sales principal.

C. Self-Regulatory Organization's Statement of Comments on the Proposed Rule Changes Received from Members, Participants, or Others

The Board neither solicited nor received comments on the proposed rule changes.

III. Date of Effectiveness of the Proposed Rule Changes and Timing for Commission Action

On or before July 6, 1981, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule changes, or

(B) Institute proceedings to determine whether the proposed rule changes should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule changes that are filed with the Commission, and all written communications relating to the proposed rule changes between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 1100 L Street, NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted on or before June 19, 1981.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: May 21, 1981.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010–01–M

Philadelphia Stock Exchange, Inc.; Application for Unlisted Trading Privileges and of Opportunity for Hearing

May 22, 1981.

The above named national securities exchange has filed an application with the Securities and Exchange Commisison pursuant to Section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f–1 thereunder, for unlimited trading privileges in the common stock of:

National Medical Enterprises, Inc. Common Stock, $.05 Par Value (File No. 7–5930)

This security is listed and registered on one or more other national securities exchanges and is reported on the consolidated transaction reporting system.

Interested persons are invited to sumit on or before June 15, 1981 written data, views and arguments concerning the above-referenced application. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, Washington, D.C. 20549. Following this opportunity for hearing, the commission will approve

the application if it finds, based upon all the information available to it, that the extension of unlisted trading privileges pursuant to such application is consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 22061; 70-6605]

West Texas Utilities Co.; Proposed Issuance and Sale of First Mortgage Bonds at Competitive Bidding

May 22, 1981.

West Texas Utilities Company ("West Texas"), 301 Cypress, Abilene, Texas 79604, an electric utility subsidiary of Central and South West Corporation, Inc., a registered holding company, has filed a declaration with this Commission pursuant to Sections 6(a) and 7 of the Public Utility Holding Company Act of 1935 ("Act") and Rule 50 thereunder.

West Texas proposes to issue and sell up to $25,000,000 principal amount of its first mortgage bonds. The terms will be determined by competitive bidding. The bonds will be issued under West Texas' Mortgage dated August 1, 1943, as amended and as to be further amended. The proceeds will be used to repay short-term borrowings incurred or expected to be incurred to finance construction expenditures.

The declaration and any amendments thereto are available for public inspection through the Commission's Office of Public Reference. Interested persons wishing to comment or request a hearing should submit their views in writing by June 19, 1981, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549, and serve a copy on the declarant at the address specified above. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for a hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in this matter. After said date, the declaration, as filed or as it may be amended, may be permitted to become effective.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

SMALL BUSINESS ADMINISTRATION

[License No. 09/09-0184]

Grocers Capital Company, Inc.; Application for Approval of Conflict of Interest Transaction Between Associates

Notice is hereby given that Grocers Capital Company (Grocers) 2601 S. Eastern Avenue, Los Angeles, California 90040, a Federal Licensee under the Small Business Investment Act of 1958, as amended, has filed an application with the Small Business Administration pursuant to Section 107.1004 of the Regulations governing small business investment companies (13 CFR 107.1004(1981)) for approval of several conflict of interest transactions.

Grocers proposed to loan $40,000 to Emil and Lee De Angelis, 19009 Laurel Park Road, Dominguez Hills, California 90220; $28,000 to Freedman & Smith, d.b.a. Best Foods Market, 5425 Long Beach Boulevard, Long Beach, California 90805; $260,000 to K. V. Mart, Inc., d.b.a. Top Value Market, 15870 E. Amar Road, City of Industry, California 91744; and $140,000 to McCowan's Foods, Inc., d.b.a. McCowan's Market, 1932 Walker Street, San Pedro, California 90731.

The proceeds of these loans will be used to purchase either capital goods or inventory from Grocers Equipment Company (GEC). All of Grocers' stock is owned by subsidiaries of Certified Grocers of California, Ltd. (certified), a retailer owned grocery cooperative. GEC, a subsidiary of Certified, is a 41 percent shareholder of Grocers and is defined as an Associate by Section 107.3 of the SBA Rules and Regulations. As a result, Grocers financing of Emil and Lee De Angelis, Best Foods Market, Top Value Market, and McCowan's Market fall within the purview of Section 107.1004(b)(5) of the SBA Regulations.

Grocers' loans to these concerns require the prior written approval of SBA.

Notice is hereby given that any person may not later than 15 days from the date of publication of this Notice, submit written comments to the Associate Adminstrator for Investment, Small Business Administration, 1441 "L" Street, N.W. Washington, D.C. 20416.

A similar Notice concerning the transactions shall be published in a newspaper of general circulation in the Los Angeles, California area.

(Catalog of Federal Domestic Assistance Programs No. 95.001, Small Business Administration)

Dated: May 20, 1981.

Peter F. McNeish,

Acting Associate Administrator for Investment.

BILLING CODE 8025-01-M

Small Business Investment Co.; Maximum Annual Cost of Money to Small Business Concerns

13 CFR Section 107.301(c) sets forth the SBA Regulation governing the maximum annual cost of money to small business concerns for Financing by small business investment companies.

Section 107.31(c)(2) requires that SBA publish from time to time in the **Federal Register** the current Federal Financing Bank (FFB) rate for use in computing the maximum annual cost of money pursuant to Section 107.301(c)(1). It is anticipated that a rate notice will be published each month.

13 CFR Section 107.301(c) does not supersede or preempt any applicable law that imposes an interest ceiling lower than the ceiling imposed by that regulation. Attention is directed to new subsection 308(i) of the Small Business Investment Act, added by section 524 of Pub. L. 96-221, March 31, 1980 (94 Stat. 161), to that law's Federal override of State usury ceilings, and to its forfeiture and penalty provisions.

Effective June 1, 1981, and until further notice, the FFB rate to be used for purposes of computing the maximum cost of money pusuant to 13 CFR Section 107.301(c) is 13.925% per annum.

Dated: May 26, 1981.

Peter F. McNeish,

Deputy Associate Administrator for Investment.

VETERANS ADMINISTRATION

Rehabilitation Engineering and Outpatient Clinic; New York, N.Y.; Availability of Draft Environmental Impact Statement

Notice is hereby given that a document entitled "Draft Environmental Impact Statement, for the Rehabilitation Engineering and Outpatient Clinic, Veterans Administration Medical Center New York, New York," dated May 1981, has been prepared as

required by Section 102(2)(C) of the National Environmental Policy Act of 1969.

The preferred alternative proposes to construct a multilevel addition to the existing Veterans Administration Medical Center (VAMC) in New York (Manhattan). The new structure would contain space for the VA Rehabilitation Engineering Center and consolidate outpatient facilities at the VAMC from their satellite location at 252 7th Avenue, New York. Some functions would stay at the 7th Avenue location to include the VA Department of Veterans Benefits, the prosthetics manufacturing center and the metadone drug program. The VA investigated alternative project actions, but through examination concluded that the only other viable alternate was a No Action Alternative. This alternative leaves existing facilities in place with no significant changes.

The Draft Environmental Impact Statement Discusses the potential environmental impacts that may be associated with the Construction Alternative. The No Action Alternative would not alter the existing physical conditions. The document is being placed for public examination at the Veterans Administration, Washington, D.C. Persons wishing to examine a copy of the document may do so at the following office: Mr. Willard Sitler, P.E., Director, Office of Environmental Affairs (003A), Room 950, Veterans Administration, 1425 K Street, NW, Washington, DC (202) 389–2526. Single copies of the Draft Statement may be obtained on request to: Director, Office of Environmental Affairs (003A), 810 Vermont Avenue, NW, Washington, DC 20420.

Dated: May 21, 1981.

Rufus H. Wilson,

Acting Administrator.

FEDERAL DEPOSIT INSURANCE CORPORATION.

Notice of agency meeting.

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that the Board of Directors of the Federal Deposit Insurance Corporation will meet in partially open/partially closed session at 11:30 a.m. on Thursday, May 28, 1981.

The following matter will be considered in open session:

Memorandum and resolution proposing the adoption of a policy statement on the disposition of income from the sale of credit life insurance.

The following matters will be considered in closed session pursuant to subsections (c)(4), (c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(4), (c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9)(B)):

Recommendations regarding the liquidation of assets acquired by the Corporation in its capacity as receiver, liquidator, or liquidating agent of those assests:
Case No. 44,816-L—Livingston State Bank, Livington, New Jersey
Case No. 44,816-L—Livinston State Bank, Livingston, New Jersey
Case No. 44,819-L—Franklin National Bank, New York, New York

Recommendations with respect to the initiation, termination, or conduct of administrative enforcement proceedings (cease-and-desist proceedings, termination-of-insurance proceedings, suspension or removal proceedings, or assessment of civil money penalties) against certain insured banks or officers, directors, employees, agents, or other persons participating in the conduct of the affairs thereof:

Names of persons and names and locations of banks authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(6), (c)(8), and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(6), (c)(8), and (c)(9)(A)(ii).

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550 17th Street, N.W., Washington, D.C.

Requests for information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation, at (202) 389-4425.

Dated: May 27, 1981.

Environmental Protection Agency

Solid Waste Disposal; Inventory of Open Dumps

ENVIRONMENTAL PROTECTION AGENCY

[WH-FRL 1799-2]

Solid Waste Disposal; Inventory of Open Dumps

AGENCY: Environmental Protection Agency.

ACTION: Publication of inventory of open dumps.

SUMMARY: This notice provides the first annual installment of the inventory of open dumps. The Resource Conservation and Recovery Act (RCRA or the Act) requires that the Administrator of the Environmental Protection Agency (EPA) publish an inventory of open dumps.

For purposes of the inventory, the Act defines "open dumps" as facilities which do not comply with "Criteria for Classification of Solid Waste Disposal Facilities" (40 CFR 257). This inventory resulted from the evaluation of disposal facilities by State solid waste management agencies. Facilities were evaluated against the Criteria, and those found to fail one or more of the Criteria are included in the inventory.

The facility evaluations were conducted by State agencies as part of their effort to develop and implement State solid waste management plans in accordance with the Act. The inclusion of a facility in the inventory is not an administrative determination by EPA that any particular party is engaging in prohibited acts of open dumping.

ADDRESSES: See Appendix I for persons from State solid waste management agencies. Single copies of the Open Dump Inventory are available from Ed Cox, Solid Waste Information, U.S. Environmental Protection Agency, 26 West St. Clair Street, Cincinnati, Ohio 45268 (513)684–5362.

FOR FURTHER INFORMATION CONTACT: Martha A. Madison, Office of Solid Waste, U.S. Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460 (202)382–2210.

SUPPLEMENTARY INFORMATION:

Structure of Subtitle D Planning Program

Subtitle D of the Resource Conservation and Recovery Act (RCRA or the Act) provides for a voluntary program through which participating States receive Federal financial support to develop and implement solid waste management plans. EPA's role in the program is to publish guidelines for States to follow in developing their plans, provide funds for the States, and approve those State plans which meet the requirements of the Act.

On July 31, 1979, EPA published "Guidelines for Development and Implementation of State Solid Waste Management Plans" (40 CFR 256, 44 *FR* 45066–45086). The Guidelines are based on Section 4003 of the Act, which lists the requirements with which State plans must comply. Section 4007 of the Act provides for EPA approval of State plans meeting the requirements.

Role of the Inventory

One requirement listed in the Act and addressed in the Guidelines is that "The plan shall provide for the closing or upgrading of all existing open dumps within the State * * *." To aid the States in satisfying this requirement, EPA has funded State efforts to identify all open dumps so that they can plan to provide for their closure or upgrading.

In furtherance of this planning effort, the act requires that EPA publish an inventory of all open dumps. Publication of the inventory will serve to inform the Congress and the public of those facilities which the States have found to be open dumps. The true pervasiveness of open dumps could be known only after evaluation of the entire universe of all disposal facilities to determine which are, indeed, open dumps. However, this first publication of the inventory reflects the initial efforts of the States in evaluating a small portion of that total universe of facilities, and the first list represents only a fraction of the total number of open dumps likely to exist.

Classification Criteria

For purposes of state planning and the inventory, the act defines the term open dump to mean "* * * any facility or site where solid waste is disposed of which is not a sanitary landfill which meets the criteria promulgated under section 4004 and which is not a facility for disposal of hazardous waste."

As required by Section 4004 of the Act, EPA has published "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257). The Criteria appeared in the **Federal Register** on September 13, 1979 (44 FR 53438–53464) and consist of eight major elements: Floodplains; Endangered Species; Surface Water; Ground Water; Application to Land Used for the Production of Food Chain Crops; Disease; Air; and Safety. In accordance with the Act's definition, open dumps are those solid waste disposal facilities which do not meet the Criteria. Thus, for purposes of the State plans and the inventory, any facility which fails to comply with any one element of the Criteria is an open dump.

Open Dumping

In addition to establishing a mechanism whereby States, with EPA assistance, provide control over *facilities* which are found to be open dumps, RCRA prohibits the *practice* of open dumping of solid waste as matter of Federal law.

The Federal prohibition may be enforced in Federal District court through the citizen suit provisions in Section 7002 of RCRA. The Act does not give EPA authority to take legal action against parties that may violate the open dumping prohibition. Whether specific acts of specific individuals constitute the prohibited practice is a matter for the Federal courts to determine in the context of particular cases after *de novo* review of the facts in each case.

The open dumping prohibition is a provision of Federal law which stands on its own, separate from the State planning program. The inventory of oper dumps is a publication of State findings from State planning efforts to satisfy the requirement of Section 4003 of the Act. The inclusion of a facility in the list of open dumps is not an administrative determination by EPA that any particular parties are engaging in the prohibited act of open dumping.

A determination for purposes of the open dump inventory need not precede an open dumping suit. However, before the results of the inventory may be used to support a legal determination that open dumping has occurred, the court would have to determine that the classification was a correct application of the criteria and that the defendant was responsible for actions violating the criteria. The court would be obliged to review the sufficiency of the State's classification of a facility and not simply defer to the State's decision.

Development of the Inventory

State/Federal Role

The identification of open dumps is an adjunct of the State planning process of Subtitle D of RCRA. The statutory inten of Subtitle D of RCRA is that the States, rather than the Federal Government, plan for and manage the disposal of solid wastes. The States, not EPA, have authority to inspect facilities in order to determine whether they are open dumps. Also, it is the States' role, Not EPA's, to plan for the closure or upgrading of open dumps. An active EPA role in identifying open dumps would undermine the "State" nature of Subtitle D. Therefore, EPA's role in the inventory process has been to develop the Criteria which are to be used by the

States to determine which facilities are open dumps and to provide funds to the States for their efforts.

In order to identify which facilities are open dumps and are to be listed in the inventory, the States must evaluate the entire universe of disposal facilities to determine which facilities fail any element of the Criteria. The Act defines open dump on the basis of the Federal Criteria, rather than State facility standards or criteria. Thus, it is the Federal Criteria against which States must evaluate facilities. Based on their evaluations of the facilities, the States identify to EPA those facilities which fail any element(s) of the Criteria. EPA then lists these facilities in the inventory of open dumps which it publishes.

Time-Phasing

EPA has estimated that there may be as many as 360,000 disposal facilities in the United States. In order to develop and publish a complete inventory of all open dumps in the nation, each of these many facilities will have to be evaluated against the Federal Criteria to identify those facilities which do not comply. Depending on facility-specific conditions, the facility evaluations are likely to be technically complex, costly, and time-consuming. Due to the large number of facilities to be evaluated and the effort involved in the evaluations, it will be some time before the States can evaluate all facilities.

In order to accommodate these complexities while providing for publication of the inventory, EPA intends to publish the inventory in annual installments. Each year, beginning with Fiscal Year 1980, the States will conduct evaluations to the extent of their ability. Those facilities found during the year to be open dumps will be included in the next installment of the inventory which EPA publishes. Thus, States will be time-phasing their facility evaluation efforts. EPA's planning Guidelines (40 CFR 256.23) provide that phasing is to be based on :

(1) The potential health and environmental impact of the facility;

(2) The availability of State regulatory powers; and

(3) The availability of Federal and State resources for this purpose.

This time-phasing is likely to vary among States and is to be addressed in the solid waste management plans which participating States will be submitting to EPA. The States will be identifying open dumps at different time rates and through various approaches described in their plans. However, in all cases open dumps will be identified on the basis of the Federal Criteria.

Actions on Facilities

Because the inventory lists facilities which pose a reasonable probability of adverse effects on health or the environment, participating States will be planning for the closure or upgrading of these facilities pursuant to State authority. Specific actions may vary, including issuance of a State administrative order or the gathering of additional data. In some cases, States already have placed listed open dumps on compliance schedules for closure or upgrading prior to publication of this list. Interested parties may wish to contact the State solid waste management agencies concerning the current status of any of these open dumps and the responsibilities they have under State law.

All such actions are to be taken under State law and through State regulatory and administrative procedures. RCRA does not provide States with authority which they would not otherwise have.

Open Dump Reporting

For each facility found to fail any element(s) of the Criteria, the State completed an Open Dump Inventory Report form. This form is shown in Appendix II. The form identifies the facility, its location, and the element(s) of the Criteria with which it does not comply. The States mailed their forms to the U.S. Bureau of the Census for data processing. Near the end of the fiscal year, the Bureau of the Census provided each State with a summary of data which has been submitted by the State over the year. The summaries were provided to allow the States opportunity to verify the information which would be published in the inventory.

Following verification, the States returned the corrected summaries to the Bureau of the Census. The Bureau then used the State-verified summaries to prepare the inventory which EPA is today publishing.

Description of Inventory

State Approaches

As required by EPA's planning Guidelines, the plans of participating States are to provide for an orderly time-phasing of the evaluation of disposal facilities to determine which facilities are open dumps. Thus, there is considerable flexibility for the States to structure their programs to evaluate facilities over time. This flexibility is tempered by the three factors identified in 40 CFR 256.23 as discussed under "Time-Phasing", above. The structuring of these State programs is part of the State plans subject to the public participation provisions of 40 CR 256.60. Also, each year's facility evaluation plans are part of the States' annual work programs, and consultation with the public is required by 40 CFR 256.61.

Reflecting variables resources, authorities, and knowledge of facilities, the States have taken differing approaches in prioritizing facilities for evaluation and in conducting evaluations. For example, where States had at hand extensive, previously-gathered data on facilities, prioritizations or noncompliance determinations could more readily be made. Otherwise, resources had to be expended in locating facilities and gathering information, and fewer determinations would be likely over the year. Also, some States, pursuant to eisting State authority, have already proceeded to establish compliance schedules for facilities found to be open dumps. Such schedules can provide for development of additional data on the facilities, for facility closure, or for facility upgrading.

Most participating States provided the Agency with brief descriptions of actions and approaches they have taken in evaluating facilities, as an adjunct of their planning process, for this first installment of the inventory. Those descriptions are summarized in Appendix III.

Explanation of Inventory Tables

The first installment of the inventory of open dumps is presented below in tabular form. The table displays information which was provided by the State agencies on Open Dump Inventory Report forms. A form was completed and submitted for each facility which the State found to fail one or more elements of the Federal Criteria. Appendix IV provides summary tabulations of forms submitted by the States.

Open dumps are identified in the table by political subdivision (State, county, and city where applicable), common name, location (mailing address or description of location), and geographic coordinates or survey grid description. Open dumps listed under "Balance of County" are those which are not located in cities or city-equivalents within the county.

For each open dump, the table indicates "Noncompliance Category Codes". These codes identify the particular part or parts of the Federal Criteria which the State agency found the facility to fail. Not all facilities reported were evaluated for all parts of the Criteria; failure to comply with any part of the Criteria results in

classification of the facility as an open dump as defined by the Act.

Subsequent installments of the inventory will include additions to and deletions from the table. As the State agencies evaluate additional facilities, those which are found to fail the Criteria will be added. Where State agencies subsequently find that listed facilities no longer fail the Criteria, those facilities will be deleted. This latter situation may arise from (1) proper closing or upgrading of the facility, or (2) further examination of the facility or new information on the facility.

Compliance With Executive Order 12291

Under Executive Order 12291, EPA must judge whether a regulation is "major" and therefore subject to the requirement of a Regulatory Impact Analysis. The inventory is not a "major" rule because it is not a rule at all. The inventory is essentially an EPA report to Congress and the public about State decisions made in applying the Criteria to particular facilities. EPA does not have authority under RCRA to add or remove particular facilities from the inventory on its own initiative.

This inventory was submitted to the Office of Management and Budget for review under Executive Order 12291. Since the inventory does not reflect an EPA decision, no public comments are being sought on it.

Dated: May 20, 1981.

Walter C. Barber, Jr.,

Acting Administrator.

Appendix I—State Contacts For Open Dump Inventory

Alabama

Alfred S. Chipley, Director, Division of Solid and Hazardous Waste, State Department of Public Health, State Office Building, Montgomery, Alabama 36104, (205) 832–6728

Alaska

Dick Williams, Alaska Department of Environmental Conservation, Pouch O, Juneau, Alaska 99811, (907) 465–2672

Arizona

James Angell, Arizona Department of Health Services, 1740 West Adams Street, Phoenix, Arizona 85007, (602) 255–1130

Arkansas

Paul Means, Manager, Enforcement Branch, Arkansas Department of Pollution Control & Ecology, P.O. Box 9583, Little Rock, Arkansas 72215, (501) 371–1701

California

John Boss, Chief, Open Dump Inventory Branch, Solid Waste Management Board, 1020 Ninth Street, Sacramento, California 95814, (916) 322–1769

Colorado

Barbara Bogema, Radiation & Hazardous Waste Control Div., Colorado Department of Health, 4210 E. 11th Avenue, Denver, Colorado 80220, (303) 320–8333

Connecticut

Thomas Pregman, Principal Environmental Analyst, Solid Waste Management, Conn. Dept. of Environmental Protection, 165 Capitol Avenue, Hartford, Connecticut 06115, (203) 566–3672

Delaware

Kenneth Weiss, Supervisor, Solid Waste Management Branch, Department of Natural Resources and Environmental Control, Division of Environmental Control, P.O. Box 1401, Edward Tatnall Building, Dover, Delaware 19901, (302) 678–4764

Florida

John Reece, Florida Department of Environmental Regulations, Twin Towers Office Building, 2600 Blair Stone Road, Tallahassee, Florida 32301, (904) 488–0300

Georgia

Moses N. McCall III, Chief, Land Protection Branch, Environmental Protection Division, 270 Washington Street, SW., Atlanta, Georgia 30334, (404) 656–2833

Hawaii

Melvin K. Koizumi, Deputy Director for Enviromental Health, Hawaii State Department of Health, P.O. Box 3378, Honolulu, Hawaii 96801, (808) 548–4139

Idaho

Jerome Jankowski, Idaho Department of Health and Welfare, Division of Environment, Statehouse, Boise, Idaho 83720, (208) 384–4108

Illinois

Mike Nechvatal, Division of Land/Noise Pollution Control, 2200 Churchill Road, Springfield, Illinois 62706, (217) 782–6760

Indiana

George Oliver, Solid Waste Management Section, Indiana State Board of Health, 1330 West Michigan Street, Indianapolis, Indiana 46206, (317) 633–0176

Iowa

Charles C. Miller, Director, Air and Land Quality Division, Department of Environmental Quality, Henry A. Wallace Building, 900 East Grand Street, 3rd Floor, Des Moines, Iowa 50319 (515) 281–8853

Kansas

Charles H. Linn, Chief, Solid Waste Management Section, Department of Health and Environment, Forbes Field, Building 321, Topeka, Kansas 66620, (913) 862–9390 Ext. 297

Kentucky

Carolyn Patrick Haight, Division of Hazardous Materials and Waste Management, Department for Natural Resources and Environmental Protection, Pine Hill Plaza, Frankfort, Kentucky 40610, (502) 564–6716

Louisiana

Gerald Healy, Acting Administrator, Solid Waste Management Division, Office of Environmental Affairs, Louisiana Department of Natural Resources, P.O. Box 44066, Baton Rouge, Louisiana 70805, (504) 342–1227

Maine

Ron Howes, Division of Solid Waste Management Control, Bureau of Land Quality, Department of Environmental Protection, State House, Augusta, Maine 04333, (207) 289–2111

Maryland

Arthur N. Caple, Acting Chief, Municipal Waste Division, Waste Management Administration, Office of Environmental Programs, Department of Health and Mental Hygiene, 201 Preston Street, Baltimore, Maryland 21201, (301) 383–3123

Massachusetts

Mr. Ken Morton, Division of Air and Hazardous Materials, Department of Environmental Quality Engineering, 600 Washington Street, Room 320, Boston, Massachusetts 02111 (617) 727–2658

Michigan

Tim Wright, Environmental Protection Bureau, Michigan Department of Natural Resources, P.O. Box 30028, Lansing, Michigan 48909, (517) 373–1818

Minnesota

Tom Clark, Division of Solid Waste, Minnesota Pollution Control Agency, 1935 West County Road B–2, Roseville, Minnesota 55113, (612) 297–2710

Mississippi

Johnny Biggert, Division of Solid Waste Management, Mississippi State Board of Health, Post Office Box 1700, Jackson, Mississippi 39205, (601) 982–6317

Missouri

Robert M. Robinson, Director, Solid Waste Management Program, Department of Natural Resources, State Office Building, P.O. Box 1368, 1915 South Ridge, Jefferson City, Missouri 65102, (314) 751–3241

Montana

John Geach, Montana Solid Waste Management Bureau, Cogswell Building, Room A201, Helena, Montana 59620, (406) 449–2821

Nebraska

Jay Ringenberg, Chief, Permit and Enforcement Division, Department of Environmental Control, P.O. Box 94877, Lincoln, Nebraska 68509, (402) 471–2186

Nevada

H. LaVerne Rosse, P.E., Program Director, Waste Management, Division of Environmental Protection, 201 S. Fall Street, Capitol Complex, Room 120, Carson City, Nevada 89710, (702) 885–4670

New Hampshire

Paul Sanborn, Bureau of Solid Waste, Department of Health and Welfare, State Laboratory Building, Hazen Drive, Concord, New Hampshire 03301, (603) 271–4610

New Jersey

Lino F. Pereira, Director, Solid Waste Administration, New Jersey Department of Environmental Protection, P.O. Box 1390, Trenton, New Jersey 08625, (609) 292–9120

New York

Norman H. Nosenchuck, P.E., Director, Division of Solid Waste Management, New York State Department of Environmental Conservation, 50 Wolf Road, Albany, New York 12233, (518) 457–6603

North Carolina

O. W. Strickland, Head, Solid and Hazardous Waste Management Branch, Department of Human Resources, Division of Health Services, P.O. Box 2091, Raleigh, North Carolina 27602, (919) 733–2178

North Dakota

Jay Crawford, Director, Division of Environmental Waste Management and Research, North Dakota State Department of Health, 1200 Missouri Avenue, Bismarck, North Dakota 58505, (701) 224–2366

Ohio

Tim Krichbaum, Ohio EPA, Office of Land Pollution Control, P.O. Box 1049, Columbus, Ohio 43216, (614) 466–8934

Oklahoma

Richard Thompson, Director, Solid Waste Division, Oklahoma Department of Health, P.O. Box 53551, 1000 Northeast 10th Street, Oklahoma City, Oklahoma 73152, (405) 271–7053

Oregon

Mark Hope, Oregon Department of Environmental Quality, Solid Waste Division, P.O. Box 1760, Portland, Oregon 97207, (503) 299–5060

Pennsylvania

William F. Pounds, Chief, Surveillance and Monitoring Section, Division of Operations, Bureau of Solid Waste Management, P.O. Box 2063, Harrisburg, Pennsylvania 17120, (717) 787–9870

Rhode Island

Frank Stevenson, Solid Waste Management Program, Department of Environmental Management, 204 Cannon Building, 75 Davis Street, Providence, Rhode Island 02908, (401) 277–2802

South Carolina

Earl Williams, Jr., P.E., Director, Division of Compliance and Evaluation, Bureau of Solid and Haz. Waste Management, Department of Health Environmental Control, J. Marion Sims Building, 2600 Bull Street, Columbia, South Carolina 29201

Appendix III—State Actions and Approaches to the Inventory

The following summaries are based on information provided to EPA by the States:

Alabama

A total of 20 landfills were inventoried in FY 80. These 20 sites were selected as having been listed in the Eckardt Report or having a known leachate problem. Of the 20 sites inventoried, six were classified as open dumps. The groundwater criterion was only addressed on two of the 20 sites. The groundwater criterion on the 18 remaining sites will be included in FY 81.

Alaska

The Alaska Department of Environmental Conservation is conducting the open dump inventory through its three regional offices. Due extreme weather conditions and the vast size of the State, most of the site visits can be done only in the summer months. Priority sites have been established as those facilities in population centers with greater than 1,000 people and those situated on the Alaskan road system. The Alaska Department of Environmental Conservation has found the inventory process beneficial in promoting and shaping their solid waste disposal program.

Arizona

Arizona's open dump inventory activities were coordinated by a Bureau of Waste Control staff team consisting of a coordinator, a landfill inspector and planning, administration, and technical support. This team accomplished data collection, assessment, field investigations and analysis, and recommended appropriate actions to be taken. For FY 80, the State focused on land disposal facilities receiving municipal waste.

A preliminary assessment of all land disposal facilities receiving municipal wastes was conducted to determine the areas that posed the greatest potential health risk. In general, the approach used to conduct the inventory was organized on a county-priority basis. Factors which ranked counties were: greatest number of problem sites, population size, and sites involved in legal action.

A series of public workshops was presented at various locations around the State for the purpose of orienting landfill owners/operators to the inventory. Following inspections, if a facility was classified as an open dump, a classification form was completed and the facility was notified by letter of their status. The State intends to enter into negotiations with these noncompliant parties in an effort to close or upgrade the facility through a compliance schedule mechanism.

It is anticipated that all open dump facilities receiving municipal waste will be operating under a compliance schedule by early FY 82.

In FY 81 reinspections for all facilities will be accomplished. The remaining disposal facilities receiving municipal wastes and industrial landfills will be inventoried.

Arkansas

The Arkansas Department of Pollution Control & Ecology (ADPC&E) focused on sites with a history of operational problems. Sites with numerous citizens' complaints and/or ADPC&E enforcement actions were chosen to be inventoried. Twenty-seven of these sites were evaluated and classified as open dumps.

California

California has developed an extensive program for the conduct of the open dump inventory based on two staff units: one specializing in data gathering and record searches, and an engineering unit conducting field inspections. Operators are notified at least 14 days before the field visits are made. Within 21 days of the field visit, the operator is notified of any deficiencies. The operator has up to three months to correct the deficiencies. If the operator claims that the facility has come into compliance, a re-inspection of the site is made. If the operator has not corrected the deficiencies and not come into compliance, the facility's name is referred to the Board, in open session, for inclusion on the list of open dumps which are forwarded to EPA.

Colorado

The Colorado inventory is conducted at two levels. The State agency conducts its inventory in accordance with a set of priorities based on the potential hazard a facility has on public health and the environment. Local Health Officers maintain a closer watch on all disposal sites in their jurisdictions. When a local official thinks it is warranted, he requests the State to inspect a site with the intention of action being taken. When the State receives a local request, they may alter their priority to include the local site in the State inventory procedure.

A special Colorado problem which influences their inventory is caused by the extreme cold of the Rocky Mountain climate. Inclement weather prevents ready access to inspectors because of closing of both the local roadway and the highways leading to the area. Some facilities require a one-way trip of over 300 miles.

A second aspect of winter conditions is the inability to cover the working face on a daily basis. Severe season-long freezing to depths of several feet make the storage of cover material impossible. Inventory of these sites provides some allowance for these conditions.

Spring thaws add to the difficulty of inventory judgement. Inspection of a facility during the typical dry conditions will not detect the surface or underground water pollution which exists during that short period of spring thaw when the water table is high. Shallow soils increase the briefness of this period.

In fiscal year 1980, the State conducted 47 detailed site inspections of which 19 were listed as open dumps and 28 were found in compliance to those Federal criteria for which inspected. Five sites were closed during the year, including some of which are in the listing.

Connecticut

The inventory started in July following State Attorney General and EPA approval of an implementation plan on file with the DEP in Hartford. Due process as per State Administrative Procedures Act will be followed on any enforcement action. All mixed waste community disposal site operators were notified of the program prior to initiation and all parties—owner, operator, town administration, and health officials are invited to attend each field review. Monthly staff meetings of all responsible State agencies make final decisions on findings, violators are notified, enforcement schedules are drafted and open dumps reported.

Enforcement actions through orders, agreements, notices, permits hearings or legal actions will be taken at the time decisions are made on each site. Most sites listed are already on one such compliance schedule for upgrading or closure. Priority on inventory has been set for mixed and bulky waste sites with available data, long life and worst cases given priority. Prioritization recommendations in EPA's classification manual are also considered.

Florida

During fiscal year 1980 46 solid waste disposal facilities and two surface impoundments were investigated with respect to the open dump inventory. Of those facilities investigated, 18 were

classified as Open Dumps with a total of 46 violations of State criteria which are equivalent to Federal standards. Twenty facilities were only partially evaluated due to the absence of groundwater monitoring wells. Of these facilities, 12 were classified as open dumps for reasons other than groundwater violations. Only one facility was classified as an open dump due to groundwater contamination. Impending laboratory analysis and/or field resampling will be accomplished to make a determination. Two industrial surface impoundments were also subjected to preliminary field investigation. Both facilities show high potential to be classified as open dumps.

Sixteen of the facilities classified as open dumps are under enforcement proceedings. Two are not on a formal compliance schedule but they are taking voluntary corrective measures.

Georgia

Georgia used the Eckardt report to establish the 41 priority sites evaluated in fiscal year 1980. Some were on-site industrial facilities. A total of seven open dumps were found. All facilities were not evaluated for the groundwater and gas; however, these criteria will be completed at some of these facilities in fiscal year 1981.

Georiga will evaluate approximately 75 facilities in fiscal year 1981, including some on-site industrial facilities. The groundwater and gas criteria will be evaluated at some of these facilities.

Hawaii

Hawaii has developed its open dump inventory through the use of a multi-agency Technical Advisory Committee. The Committee, which is composed of the United States Corps of Engineers, Fish and Wildlife Service, Federal Aviation Administration, and Geological Survey and the Hawaii Departments of Health and Land and Natural Resources, has completed its assessment of 29 sites for nine of the 11 criteria. Disease and explosive gases are still being evaluated and should be completed by February 1981. One site, the Schofield Barracks facility, was officially classified as an open dump in October 1980.

Hawaii's Department of Health has been utilizing the public participation process as part of the open dump inventory and has held public meetings at all sites including a 30-day comment period for the benefit of owners and operators of the facilities.

Idaho

The Idaho Department of Health and Welfare has contracted out the field inspecting responsibilities of the open dump inventory to Idaho's seven health districts. Under the direction of the Department, the health districts have focused their attention on the municipal facilities, with the major ones having priority. Industrial disposal facilities are being located and sites will be inventoried beginning in 1981. The Department is using the inventory as a planning tool and has found it to be beneficial in locating significant hazards associated with land disposal.

Illinois

The 1980 Illinois open dump inventory efforts were primarily directed towards evaluating permitted operating facilities. However, a significant proportion of the efforts were expended in evaluating unpermitted operating sites and unpermitted non-operating sites. Not all waste disposal facilities were evaluated with respect to all criteria; no explosive gas monitoring was performed at any facility and the groundwater criterion remains unevaluated at many sites. The Illinois open dump inventory list is viewed as a changing list that may grow or diminish with subsequent publication.

Indiana

FY 80 was primarily a year of planning and data gathering for State Board of Health (ISBOH). A contract was signed with Indiana University to identify unpermitted dump sites throughout the State, and prioritize them according to size, waste type, and frequency of use. Despite very limited resources during the early part of their FY 80 inventory, ISBOH evaluated 33 solid waste disposal facilities. Ten of these sites were unpermitted and found to be open dumps; all of the Federal criteria were applied to 23 licensed facilities, and these were classified as "sanitary landfills". During FY 81, ISBOH will be evaluating 5–10% of those unpermitted sites identified through the study as being a high priority, and 50 additional licensed landfills.

Iowa

In the years since the State's program was implemented, all major municipal dumps have been closed in Iowa. Through regionalization the number of facilities in the State has also been reduced. As a result, the inventory in the State of Iowa concentrated on large permitted facilities and non-permitted facilities at which surveillance and enforcement actions were required. Small promiscuous dumps were not included in the inventory but remained a part of the State's enforcement program. Iowa places particular importance on the groundwater criteria. Information gathered through the inventory will also play a role in permit renewal.

Kansas

The State of Kansas used available information to rank sites according to potential health and environmental need. Many of the State's open dumps have been closed in the last few years; as a result, the number of sites in Kansas has been reduced and the inventory concentrated on evaluation of currently permitted facilities. Small promiscuous dumps were not included in the inventory. Results have been generally successful as only four open dumps were found in 1980.

Kentucky

The Kentucky Department for Natural Resources and Environmental Protection has performed 15 complete partial evaluations during FY 80 and ten complete partial evaluations in the first quarter of FY 81. Groundwater monitoring will be completed during FY 81 for these sites. So far 14 sites have met requirements. In the remainder of FY 81 55 complete full evaluations, 76 complete partial evaluations, and 21 completions will be performed. Eighty sites are required to submit a plan by January 1, 1981, detailing how the groundwater determination will be achieved on their respective sites.

The Department for Natural Resources and Environmental Protection notifies each site operator prior to being inventoried, obtains a release for monitoring, notifies each operator of the preliminary decision, and notifies the operator that the site will be published in the **Federal Register** by EPA.

Louisiana

Field investigations for the open dump inventory were conducted by Department of Natural Resources (DNR) personnel and a consulting firm. Actual classifications were made by DNR.

Initial site inspections were made at about 1,500 solid waste disposal sites; 42 of these were classified as open dumps. The information gathered in this initial survey will be used to evaluate and classify sites in succeeding years.

Maine

Maine is dealing with over 300 solid waste sites that need to be inventoried. To facilitate the process the State inventoried those sites with the worst environmental impact first. This year the State had a formal prioritization workshop where points were assigned to each facility based on expected or documented environmental impact. The top 24 sites on the list were inventoried

by the State of Maine. Based on State inspections and geohydrologic impacts recommendations were made to the Board of Environmental Protection. After due notice the board made official determination of the 24 facilities inventoried this year.

In that the worst sites were dealt with, all were found to be open dumps. Following formal designation, the Board directed the State staff to enter negotiations with towns for upgrading and/or closing of these sites. The same procedures will be followed for the next four years.

Massachusetts

Massachusetts plans to incorporate the open dump inventory into its on-going enforcement program. During the Spring of 1980, all solid waste disposal facilities were prioritized by evaluating them for compliance with both State regulations and new Federal guidelines. Past history of enforcement actions coupled with current status of the facility were used in selecting priority facilities for final open dump inventory inspections.

These priority facilities were then inspected to determine compliance with floodplain, disease, air, fire, and access criteria. Inspections to assure compliance with regulations pertaining to groundwater, surface water, and all other criteria will be performed when the State sanitary landfill regulations are revised to conform with Federal guidelines.

Michigan

The Resource Recovery Division of the Michigan Department of Natural Resources is the Agency responsible for conducting the open dump inventory. In FY 80, 225 general refuse sites were evaluated; 137 were determined to be open dumps, 79 facilities were classified as "indeterminant", and 9 were found to be in compliance. Emphasis was placed on inventorying facilities which had known environmental problems and where enforcement action to close or upgrade a site had already been initiated. In FY 81, the remaining general refuse sites will be inventoried, and evaluation of industrial sites will begin.

Minnesota

The Minnesota Pollution Control Agency (MPCA) submitted the names of 84 solid waste disposal sites to the U.S. Bureau of Census for publication as open dumps in the **Federal Register**. These sites were submitted because it is believed that they are locationally unsound for the disposal of solid wastes or have operational problems as defined by Federal Criteria and Minnesota's Solid Waste Rules. In addition, many of the listed sites present either documented cases of pollution of an environmental resource or a high potential for such pollution. Most of these sites are located in rural, low-population areas of the State where solid waste management is not well developed. Names of eight Agency-permitted sanitary landfills are included among those on the Minnesota list. Improved operational practices and proper engineering design may adequately minimize pollution potential at some of these sites to the point where they may be permitted to upgrade and continue operation, but others will probably have to close as alternative solid waste disposal sites are provided.

Mississippi

During FY 80 all designated dumps in the State were evaluated against all criteria except air and groundwater. One hundred and seventy-four sites in 42 counties were identified as open dumps.

In August 1980 owners/operators of these sites were notified in person or by certified mail that their site would be included in the January 1981 inventory and that they should propose (for State Board of Health approval) compliance schedules to close or upgrade their site. Follow-up action by the State will be conducted in January 1981.

Missouri

Since 1972, Missouri has closed the majority of its open dumps. Consequently, the inventory concentrated on surveillance of existing permitted facilities. The small number of open dumps found in Missouri reinforces the effectiveness of the existing permitting and enforcement program. Through consolidation and regionalization the total number of disposal facilities has been reduced in the State. With respect to the criteria, emphasis was placed on groundwater contamination, methane migration and general overall operations.

Montana

The Montana Solid Waste Management Bureau conducts a State inventory for State purposes. The additional Federally supported inventory uses the Federal Criteria in addition to the State regulations for waste disposal.

Fifty-one sites were inventoried in FY 80, of which 17 were found to be open dumps.

Nebraska

In conducting the inventory, the Department of Environmental Control concentrated on permitted facilities in cities of the first class. The groundwater criterion was given first priority in Nebraska.

Nevada

Initially, Nevada's open dump inventory activities began with a review of the criteria and data obtained from past site inspections.

Next, the State conducted field inspections of over 109 sites throughout Nevada. After an analysis of the criteria and data collected, the State initially classified over 60 sites as open dumps. Operators were notified of the classifications and given 30 days to correct the deficiency. If the site operator did not come into compliance within the 30-day period, the facility was classified and referred to EPA as an open dump.

New Hampshire

The State of New Hampshire has prioritized for open dump inventory purposes over 300 solid waste disposal facilities based upon data gathered from field inspections. The open dump inventory process is being integrated with the State's enforcement program. Failure to comply with one or more Federal criteria implies a concurrent violation of one or more State rules which will result in an enforcement action to upgrade a facility in deficient areas so that it will comply with State rules or in an action to close out a facility where compliance cannot be achieved.

New Jersey

The Department of Environmental Protection identified 33 priority disposal sites within the State to be evaluated in FY 80. New Jersey elected to evaluate these sites for all eight Environmental Protection Agency (EPA) Criteria, as promulgated in the **Federal Register** of September 13, 1979.

Each site was placed in an "indeterminate" status for its surface water criterion evaluation, pending the putting into place of New Jersey Pollution Discharge Elimination System (NJPDES) regulations. As such, no sites were classified as open dumps which failed to meet the EPA surface water criterion as of September 30, 1980.

Once the NJPDES regulations are put into place—in early to mid-1981—these sites will be taken out of the "indeterminate" category and classified one way or the other. The State will then be in a better position to enforce closures or compliance schedules for sites classified as "open dumps" in FY

V 46 M 29 8 1 UMI

80 and thereafter under RCRA Section 4005(c) provisions.

New Mexico

(Did not participate in the Subtitle D RCRA program)

New York

Facilities were examined for open-dumping violations of 40 CFR Part 257 in all eight Criteria categories, and 33 sites Statewide were the subjects of a one-year groundwater study by an independent geotechnical consulting firm. Further, to ensure a current but representative data base for judging compliance, review of a facility's performance record was limited to its most recent two years of operation. Also, file data was corroborated in all cases by on-site inspection and testing. Lastly, because New York State feels strongly that citation as an open dump nears legal implications, the owners of each non-complying site were notified of the fact in a face-to-face meeting and invited to upgrade or close under a State-issued compliance schedule in accordance with Section 4005(c) of RCRA. Negotiation of such schedules is currently underway for most of the 21 open dumps listed in the initial printing of the inventory.

North Carolina

North Carolina has programmed the open dump classification work for its 170 permitted solid waste disposal sites over the 4-year period of 1980–1983. The largest number of sites (64) will be visited and evaluated during FY 81. Landfills were visited and evaluated for all criteria with the exception of groundwater because those sites permitted prior to 1979 were not required to include monitoring wells. Surface water samples are taken annually at all sites. Classification procedures followed EPA's *Guidance Manual for the Classification of Solid Waste Disposal Facilities.*

A help to the North Carolina survey was that quarterly inspections now being made under State rules and new permitting procedures cover most evaluation criteria (i.e., floodplains, ground water, etc.) outlined in the EPA Guidance Manual. The only criterion not covered is that of endangered species. The Department of Human Resources has coordinated with the Department of Natural Resources and Community Development to cover the endangered species criterion.

North Dakota

The North Dakota Division of Environmental Health conducts a State survey of waste disposal sites in two stages. Aerial photographs are taken of each significant site twice annually; priority sites are photographed four times annually. Evidence of violations of a State standard is highlighted on the photograph and sent to the operator with instructions that it be corrected. Follow up visits verify the violation or its correction.

The Federal inventory is conducted according to priorities for sites which have been adopted by the State. This priority listing may be changed by a visit to a site as a follow-up to the evidence in an aerial photo. Also, information from either local officials or private citizens can result in an inspection and inventory visit not in conformance with the established priorities. Federal inventory information was considered valid only after an on-site inspection.

A severe winter climate causes a frost line several feet deep. Storage of cover material is impractical in these conditions, the use of compacted snow to cover the working face may be judged as acceptable, except where methane generation problems may result due to increased moisture.

A total of 464 site reviews resulted in the inventory of 139 facilities. Six facilities were listed as open dumps, 84 showed no violations of the criteria as reviewed, 38 additional classifications are pending and 11 sites have been closed or upgraded.

Ohio

Ohio open dump inventory activities in FY 80 involved evaluation and classification of 230 licensed solid waste disposal facilities against all but two of the Federal criteria. Many facilities could only be ranked according to the potential for methane migration and groundwater contamination. For this reason, 180 facilities were given an indeterminant status. These sites will be further classified when gas and groundwater can be monitored. Initially, 41 sites were in noncompliance with one or more of the criteria; ten of these sites have subsequently been closed or upgraded, and removed from the list. The FY 81 inventory will center on evaluating industrial facilities, and bringing the remaining 31 facilities into conformance.

Oklahoma

The Oklahoma State Department of Health (OSDH) classified 27 sites as open dumps and 5 as sanitary landfills. The sites inventoried serve approximately 60% of Oklahoma's population.

Oregon

The Oregon Department of Environmental Quality is the lead agency in conducting the open dump inventory in Oregon. Field inspections have been carried out by personnel in the ten DEQ regional offices. Other government agencies have also been cooperative in their respective areas of expertise. Oregon has found the inventory useful in conjunction with their existing program to upgrade land disposal facilities. Specifically, Oregon had viewed the inventory as a planning tool and an opportunity to gather necessary information.

Pennsylvania

Pennsylvania began its evaluation process in the late spring of 1980, shortly after the EPA-sponsored training session in Baltimore, Maryland. As a result, only 70 solid waste disposal sites were evaluated by the September 30, 1980 deadline. Of the 70 disposal sites evaluated, 25 sites were determined to be "open dumps" (failed at least one criterion). The remaining sites were found to be in compliance with all the criteria evaluated with the exception of the groundwater criterion. Although groundwater monitoring systems are required for all permitted facilities, the ground water evaluations have not been totally completed due to a lack of sampling data and are pending further analysis since most of the parameters in Appendix I of the groundwater criterion are not routinely monitored. However, one site has been listed as non-compliance for ground water. This was due to a more extensive sampling program at this site.

Pennsylvania has notified the responsible officials of all the facilities listed as open dumps. Pennsylvania is currently in the process of developing compliance schedules for these sites. The Commonwealth is developing these schedules based on its general statutory authority to issue the kind of compliance schedules anticipated under Section 4005(c) of RCRA.

Rhode Island

The State of Rhode Island is conducting the Open Dump Inventory in three phases.The facilities included in this first publication of the open dump inventory are the result of the completed portion of phase I activities. The State's 22 refuse landfills were the only facilities investigated during this phase and in most cases were not investigated for the groundwater or gas criteria.

Investigation of the refuse landfills will be completed along with complete investigations of the State's 12 sewage

sludge disposal facilities (phase II) prior to the second publication of the open dump inventory.

All other solid waste facilities will be investigated thereafter (phase III).

South Carolina

The South Carolina approach to the open dump inventory was to first develop a prioritized listing of sites to be examined and evaluated. The sites to be evaluated first were those sites listed in the Eckardt Report and any known problem sites in the State where a high potential of groundwater contamination existed. The permitted sites in the State would hold the next priority. All sites visited were evaluated against all the criteria listed in EPA's Guidance Manual. Additionally, some preliminary review and evaluation was accomplished on a number of the lower priority sites.

Prior to an examination, the owner/operator was notified in writing concerning the site evaluation. If it was determined that the site did not meet the criteria, then the owner/operator was given the opportunity to rebut the finding. If the rebuttal was unfounded, the owner/operator had the opportunity to enter into a compliance schedule.

South Dakota

The South Dakota inventory is conducted in accordance with a priority system based on State and Federal needs. Approximately 40 visits at 21 sites resulted in the listing of five sites as open dumps, and the finding of ten sites as in compliance to Federal Criteria, with six sites pending further evaluation. Completion of groundwater monitoring wells is one cause for placing a site in the pending category. Seven additional sites upgraded or closed in FY 80 are not included in the 21 sites inventoried in FY 80.

In the past year additional on-site disposal facilities were found by use of colored and infrared aerial photos. Findings from the photos may cause revisions in the priority assigned to a disposal site.

Tennessee

The strategy utilized by Tennessee in conducting the open dump inventory differed somewhat from that listed in EPA's *Guidance Manual for the Classification of Solid Waste Disposal Facilities*. The strategy consisted of looking at every permitted facility that was listed in the Eckardt Report as having received hazardous waste and all permitted sites having monitoring wells to allow an evaluation using all the inventory criteria.

Sixteen sites were evaluated under the above strategy; incomplete evaluations were done on two obvious open dump sites for a total of 18 sites evaluated.

Texas

In Texas, the open dump inventory was conducted jointly by the Texas Department of Health (TDH) and the Texas Department of Water Resources (TDWR). Municipal solid waste sites were classified by TDH; industrial (non-hazardous) sites were classified by TDWR. Although only five sites were classified as open dumps, approximately 150 sites were evaluated, and the majority classified as sanitary landfills. Also, deficiencies at several sites were corrected immediately, and the sites were classified as sanitary landfills rather than open dumps.

Factors used to determine which sites would be inventoried were (1) the population served, (2) the type of waste received, (3) whether the site was in an environmentally sensitive area, (4) location in relation to aquifers, (5) safety, (6) the annual rainfall, and (7) the remaining life of the site. A site inventoried was evaluated for all eight EPA Criteria before being classified as an open dump or a sanitary landfill. Groundwater compliance was determined using a soil resistivity survey, a process where electrical resistance of the soil is used to determine potential for leachate movement. This method will eliminate the need for monitoring wells in instances where there is low potential for groundwater contamination by leachate.

Utah

The review of solid waste disposal sites in Utah is conducted at two levels. The local health official is responsible for the condition of solid waste facilities and in this capacity serves as an early warning method for the State agency. The Bureau of Solid Waste Management conducts the inventory in accordance with a set of priorities which meet State and Federal needs. Reports from the local level can alter these priorities. Distance between sites and remoteness of sites from the offices of the Bureau limit the number of sites which can be reviewed. Depths of 300 feet to groundwater have reduced the urgency of hydrologic information in some locations.

Inclusion of local efforts in the inspection process resulted in a total of 220 inventory visits to landfills. Because only the Bureau can classify, only 23 existing sites were officially inventoried. Two sites are listed as open dumps, six sites were classified as landfills and two sites have decisions pending. In addition to these sites, four sites have been upgraded and nine have been closed after an inventory visit. These latter 13 sites are not listed in the inventory.

Virginia

The State of Virginia inventoried a total of 93 facilities. Of the 93 inventoried, seven received complete evaluations. The remaining sites were not evaluated for gas and/or groundwater monitoring. The State intends to complete the gas monitoring determinations during the spring of 1981.

Washington

The Washington State Department of Ecology is conducting the open dump inventory through their four regional offices. A priority for site inspections has been established based on the severity of threat to public health and safety. The inventory of municipal solid waste facilities will be completed in 1981 with the industrial disposal facility inventory progress running close behind.

West Virginia

Thirty disposal sites were inventoried between July and October of 1980. Sites were chosen on the basis of waste volume received, suspected problems and the local resources available to correct these problems. Only three of these sites met all of the criteria. Twenty-five of the inventoried sites have received compliance schedules ranging from 10 days to one year. Several of the sites inventoried are expected to comply with the criteria with little difficulty due to the easily correctible nature of the violations.

The surface water criterion was the most complicated violation with 26 citations while inadequate daily cover accounted for 14 citations. Thirty-two additional sites are scheduled to be inventoried in FY 81.

Wisconsin

Wisconsin views the open dump inventory as an administrative planning tool, and an opportunity to look at the State program, assess its needs and define what directions should be taken to improve the State's waste management practices. During FY 80, 1,200 licensed disposal facilities were inspected and worksheets completed. Only a few sites with obvious violations were actually classified during FY 80. The problems at the remaining sites are being compiled to develop a prioritized list for completion of the inventory. This time-phased approach will result in many more classifications for FY 81 and

FY 82, and will meet the State's planning needs.

Wyoming

The State of Wyoming is characterized by the remoteness of many of its inhabitants. The remoteness necessitates a high cost per site inspection because of distances between facilities. One-way travel from the State office may be 500 miles or more. Influencing the judging of sites is the extremely low water table in certain areas of the State. Depths of over 1,300 feet may be found. The possibility of pollution compared to the cost to monitor combine to reduce the priority of the sites in regions of low rainfall to very low levels. A third factor affecting the Wyoming inventory is the large number of sites on Federally-managed lands. State control of these sites is indirect. Because a site on private land is more directly controlled by the State, these sites will give quicker results and are placed higher on the priority list.

Approximately 63 site visits were made at 30 waste facility sites. Six facilities have been upgraded or closed and two facilities were classified as open dumps. Of those remaining, six classifications are pending results from groundwater monitoring wells.

American Samoa

The inventory was conducted by local sanitarians of sites that have traditionally been used by the islanders over long periods of time. Little hazardous waste exists in American Samoa due to a very small industrial presence and no military installations. Clean-up of present facilities and site selection of new facilities is being incorporated into the Territories Solid Waste Management Plan.

Commonwealth of the Northern Marianna Islands

CNMI has one facility located on each of the three major islands of the island chain. Facility upgrading and, if necessary, new site selection is being accomplished through the development of the Commonwealth Solid Waste Management Plan.

District of Columbia

The District of Columbia does not possess a serious problem of open dumping or unregulated land disposal of solid waste. The District is a largely developed and urban area with limited sites available for landfill activities. In 1980 the District government examined the three known active land disposal sites located in the District of Columbia. Two of the site received complete evaluations and the third, a partial evaluation. All the EPA criteria applied to the sites were met.

In 1981 the District of Columbia intends to complete the classification of the remaining facilities and begin assessments of five land disposal facilities which have been closed for eight to ten years

Guam

Guam Environmental Protection Agency developed its inventory in two sections. The first section analyzed waste management facilities presently in operation and satisfied the requirements of RCRA. Three of the five facilities on Guam failed the criteria. The second section will identify the location and characteristics of illegal and promiscuous dumps on Guam. A strategy for cleanup of these areas will be part of Guam's Solid Waste Management Plan.

Puerto Rico

Puerto Rico performed the open dump inventory by adopting EPA forms related to the criteria under the RCRA guidelines. Contacts were made with each municipality and with appropriate public officials to prepare them for the inspection. After compilation of the data, a final decision was made and a classification made for each facility. The classification was provided to the owner of each facility and then submitted to the Department of Interior.

Virgin Islands

All disposal facilities, sewage treatment plants with sludge drying beds or polishing ponds were identified from the Department of Public Works records. The Guidance Manual for Classifying Solid Waste Disposal Facilities and the criteria in **Federal Register** on September 13, 1979 (Vol. 44 No. 179 pp. 53438–53468) were used for on-site field evaluation which reflects the current operational and physical condition of the facility.

This work was done by the Civil Engineer and/or Environmental Specialist. Where necessary, air pollution agency, water agency and FAA personnel were contacted.

Part III

Department of Labor

Employment Standards Administration, Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

DEPARTMENT OF LABOR

Employment Standards Administration, Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General wage determination decisions of the Secretary of Labor specify, in accordance with applicable law and on the basis of information available to the Department of Labor from its study of local wage conditions and from other sources, the basic hourly wage rates and fringe benefit payments which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of the character and in the localities specified therein.

The determinations in these decisions of such prevailing rates and fringe benefits have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of part 1 of subtitle A of title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138) and of Secretary of Labor's Orders 12–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in effective date as prescribed in that section, because the necessity to issue construction industry wage determination frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions are effective from their date of publication in the **Federal Register** without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision together with any modifications issued subsequent to its publication date shall be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR, Part 5. The wage rates contained therein shall be the minimum paid under such contract by contractors and subcontractors on the work.

Modifications and Supersedeas Decisions to General Wage Determination Decisions

Modifications and supersedeas decisions to general wage determination decisions are based upon information obtained concerning changes in prevailing hourly wage rates and fringe benefit payments since the decisions were issued.

The determinations of prevailing rates and fringe benefits made in the modifications and supersedeas decisions have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of part 1 of subtitle A of title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138) and of Secretary of Labor's orders 13–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in foregoing general wage determination decisions, as hereby modified, and/or superseded shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged in contract work of the character and in the localities described therein.

Modifications and supersedeas decisions are effective from their date of publication in the **Federal Register** without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5.

Any person, organization, or governmental agency having an interest in the wages determined as prevailing is encouraged to submit wage rate information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Office of Government Contract Wage Standards, Division of Government Contract Wage Determinations, Washington, D.C. 20210. The cause for not utilizing the rulemaking procedures prescribed in 5 U.S.C. 553 has been set forth in the original General Determination Decision.

New General Wage Determination Decisions

None.

Modifications to General Wage Determination Decisions

The numbers of the decisions being modified and their dates of publication in the **Federal Register** are listed with each State.

POWER EQUIPMENT OPERATORS CLASSIFICATION DEFINITIONS

CLASS I - Autograder (C.M.I. & similar); Backfiller; Backhoe - 360° Swing; Cableway; Caisson Drill (similar to Hugh Williams); Central Mix Plant; Cooling Plant; Concrete Paving Mixer; Concrete Pump (self-propelled); Cranes; Cranes (Boom or mast 101 ft. or over up to & including 150 ft. inclusive of jib + $.25 ; Boom or mast over 150 ft. up to & including 200 ft. inclusive of jib + $.50; Boom or mast over 200 ft. inclusive of jib + $.75; Tower-Stationary-Climbing Tower Crane); Derrick; Derrick Boat; Dozer (D-6 & over); Dragline; Dredge; Dredge Hydraulic; Elevating Grader; Franki Pile Machine; Gradall (Remote control or otherwise); Grader (Power-Fine Grade); Helicopter; Hilift (4 cy. and over); Hoist 2 Drums or more (in one unit); Hydraulic Boom Truck (with pivotal cab) (single motor-Pitman or similar); Kocal; Locomotive (Std. Gauge); Metro-chip Harvester or similar; Milling Machine (Roto Mill or Similar); Mix Mobile; Mucking Machine (Tunnel); Pile Driver Machine; Pipe Extrusion Machine; Prespliter Drill (Self contained); Refrigeration Plant (Soil Stabilization) Rough Terrain Crane; Scrapers; Shovel-Power; Slip Form Paver (C. M. I. and similar); Trenching Machine; Tunnel Machine (Mark XXI Jarva or similar)l Whirley

CLASS III - Broom Finisher (C. M. I. or similar); Compactors/Rollers (Static or Vibratory (Self-propelled); Curb Builder; Minor Equipment Operator (two to three units); Multi-head Tie Tamper, Pavement Breaker (Self-Propelled or ridden); Soil Stabilizer Machine; Tire Repairman; Tractor (Snaking and hauling); Well Driller and Horizontal; Winch or "A" Frame Truck (when hoisting and lowering)

CLASS V - Deck Hand, Farm Tractor; Fireman on Boiler; Mechanic's Helper; Oiler, Power Broom, Side Delivery Shoulder Spreader (Attachment)

AREA and ZONE DEFINITIONS

ASBESTOS WORKERS:

DECISION NO. A281-5124 Page 3

AREA and ZONE DEFINITIONS

ASBESTOS WORKERS:
Zone 1: Area lying within 15 miles radius from the City Hall in Phoenix or Tucson
Zone 2: Area lying beyond the limits of Zone 1 and within 30 miles radius from the City Hall in Phoenix or Tucson
Zone 3: Area lying beyond the limits of Zone 2 and within 40 miles radius from the City Hall in Phoenix or Tucson
Zone 4: Area lying beyond the limits of Zone 3 and within 50 miles radius from the City Hall in Phoenix or Tucson
Zone 5: Area lying beyond the limits of Zone 4

BRICKLAYERS; STONEMASONS:
Northern Area: Apache, Coconino and Gila Counties; Graham County (west and north of the San Francisco River to the Gila River); Greenlee County (west and north of the San Francisco River to the Gila River); Maricopa, Mohave, and Navajo Counties; Pinal County (north of a boundary line drawn west along the Gila River to the western city limits of Florence, a straight line from the extreme southwestern city limits of Florence to the extreme southern city limits of Coolidge, then a straight line to the extreme southern city limits of Casa Granda, with the line extending to the Maricopa/Pinal County Line); Yavapai, and Yuma Counties:

ZONE A: 0-35 road miles from the City Hall in Phoenix
ZONE B: 35-50 road miles from the City Hall in Phoenix
ZONE C: 50-75 road miles from the City Hall in Phoenix
ZONE D: 75-100 road miles from the City Hall in Phoenix
ZONE E: 100-200 road miles from the City Hall in Phoenix
ZONE F: 200 road miles and over from the City Hall in Phoenix

Southern Area: Cochise County; Graham County (east and south of the San Francisco River to the Gila River); Greenlee County (east and south of the San Francisco River to the Gila River); Pima County; Pinal County (south of a boundary line drawn west along the Gila River to the western city limits of Florence, a straight line from the extreme southwestern city limits of Florence to the extreme southern city limits of Coolidge, then a striaght line to the extreme southern city limits of Casa Grande, with the line extending to the Maricopa/Pinal County Line); Santa Cruz Counties:

Zone A: 0-15 road miles from Tucson City limits
Zone B: 15-30 road miles from Tucson City limits
Zone C: 30-40 road miles from Tucson City limits
Zone D: Over 40 road miles from Tucson City limits

AREA and ZONE DEFINITIONS

CARPENTERS:
Northern Area: Area north of a straight line drawn between a point 35 miles due north of the City Hall in Flagstaff and a point 35 miles due north of the City Hall in Kingman, extending to the Arizona/Nevada State Line on the west; and connecting to a point 35 miles due north of the City Hall in Holbrook, thence due east to the intersection of the Arizona/New Mexico State Line

Central and Southern Areas: All areas not included in the Northern Area

CEMENT MASONS:
Zone 1: Apache, Coconino, and Gila Counties; Graham County (north of Sentinel-Casa Grande-Safford Line); Greenlee County (north of Sentinel-Casa Grande-Safford Line); Maricopa County (north of Sentinel-Casa Grande-Safford Line); Mohave, and Navajo Counties; Pinal County (north of Sentinel-Casa Grande-Safford Line); Yavapai and Yuma Counties

Northern Area: Area north of a straight line drawn between a point 35 miles due north of the City Hall in Flagstaff and a point 35 miles due north of the City Hall in Kingman, extending to the Arizona/Nevada State Line on the west and connecting to a point 35 miles due north of the City Hall in Holbrook, thence due east to the intersection of the Arizona/New Mexico State Line.

Central and Southern Areas: All Areas not included in the Northern Area.

Zone 2: Southern parts of Cochise, Graham, Greenlee, Maricopa, and Pinal Counties; Pima and Santa Cruz Counties

DRYWALL TAPERS:
Zone A: 0-40 road miles from Courthouse in Phoenix; Also Luke and William Air Force Bases
Zone B: 41-60 road miles from Courthouse in Phoenix
Zone C: 61 road miles and over from Courthouse in Phoenix

AREA and ZONE DEFINITIONS (Cont'd)

AREA and ZONE DEFINITIONS

ELECTRICIANS:
Area 1: Apache County (north of Highway #66)

Area 2: Coconino County; Navajo County (north and west of a boundary line beginning at a point where Clear Creek crosses the Coconino/Navajo County Line and then extending in a northeasterly direction along Clear Creek and northeasterly to Cottonwood Wash, along Cottonwood Wash extending northeasterly to where it intersects the Navajo Indian Reservation, then easterly along the Navajo Indian Reservation boundary line to a point where it intersects the Navajo/Apache County Line):

Zone A: 5 miles north-south, east and west of the Post Offices of Williams, Sedona, and Winslow
Zone B: Remainder of Area 2 not covered by Zone A

Area 3: Apache County (south of Highway #66); Gila County; Navajo County (south and east of a boundary beginning at a point where Clear Creek crosses the Coconino/Navajo County Line, then extending in a northeasterly direction along Clear Creek and northeasterly to Cottonwood Wash, along Cottonwood Wash extending northeasterly to where it intersects the Navajo Indian Reservation, then easterly along the Navajo Indian Reservation boundary line to a point where it intersects the Navajo/Apache County Line); Pinal County (north of the line, "First Standard Parallel South" and east of the line "Second Guide Meridian East"):

Zone A: Area within 16 road miles beginning where the Southern Pacific Railroad intersects Highway 60-70 at Kaiser Crossing; Area within 12 miles radius from the school in Lakeside, Arizona
Zone B: Area within 16-28 road miles from point where the Southern Pacific Railroad intersects Highway 60-70 at Kaiser Crossing
Zone C: Area within 28-46 road miles from point where the Southern Pacific Railroad intersects Highway 60-70 at Kaiser Crossing
Zone D: Area 46 road miles and over from point where the Southern Pacific Railroad intersects Highway 60-70 at Kaiser Crossing; Area over 12 miles radius from school in Lakeside, Arizona

AREA and ZONE DEFINITIONS (Cont'd)

ELECTRICIANS: (Cont'd)
Area 4: Maricopa and Mohave Counties; Pinal County (north and west of the boundary line beginning at a point where the Papago Indian Reservation Road #15 crosses the Pima/Pinal County Line, then extending in a northeasterly direction on the Papago Indian Reservation Road #15 to the intersection with the Florence Canal, north and east on the Florence Canal to the intersection with the line, "Second Guide Meridian East", then north to the Pinal/Maricopa County Line); Yavapai County

Area 5: Cochise, Graham, Greenlee, and Pima Counties, Pinal County (south and east of the boundary line beginning at a point where the Papago Indian Reservation Road #15 crosses the Pima/Pinal County Line, then extending in a northeasterly direction on the Papago Indian Reservation Road #15 to the intersection with the Florence Canal, north and east on the Florence Canal to the intersection with the line, "Second Guide Meridian East", then north to the line, "First Standard Parallel South", and along that line to the Graham/Pinal County Line); Santa Cruz and Yuma Counties:

Zone A: Area within 16 miles radius from the City Hall in Tucson or Yuma; Area within 16 road miles from center of Town in Douglas, Nogales or Sierra Vista; Area within the boundaries of the incorporated city limits of Parker, plus an area extending from the south city limits of Parker in a northeasterly direction to Milepost No. 150 located on State Highway #95, northeast of Parker from the Colorado River on the west, an area 1 mile wide paralleling the Colorado River
Zone B: Area lying beyond the limits of Zone A extending to and including 12 road miles excluding area near Douglas, Nogales and Sierra Vista
Zone C: Area lying beyond the limits of Zone B extending up to and including 18 road miles, excluding area near Douglas, Nogales and Sierra Vista
Zone D: Area lying beyond the limits of Zone C; for area near the Cities of Douglas, Nogales, Sierra Vista, the area lying beyond the limits of Zone A

AREA and ZONE DEFINITIONS

MARBLE WORKERS:
Area 1: Apache, Coconino, and Gila Counties; Graham County (west and north of San Francisco River to Gila River); Greenlee County (west of San Francisco River to Gila River); Navajo County (west of Little Colorado River); Yavapai County

AREA and ZONE DEFINITIONS

MARBLE WORKERS:
Area 1: Apache, Coconino, and Gila Counties; Graham County (west and north of San Francisco River to Gila River); Greenlee County (west and north of San Francisco River to Gila River); Maricopa, Mohave, and Navajo Counties; Pinal County (north of a boundary line drawn west along the Gila River to the western city limits of Florence, a straight line from the extreme southwestern city limits of Florence to the extreme southern city limits of Coolidge, then a straight line to the extreme southern city limits of Casa Grande with the line extending to the Maricopa/Pinal County Line); Yavapai and Yuma Counties

PAINTERS:
Area 1: Apache, Coconino, Navajo, and Yavapai Counties (north of woodruff/Camp Wood Line); Mohave County (north of a line following the Geodetic Hualapai Boundary Line to the Colorado River, a distance of 23 miles east of Pierce Ferry and then intersecting the Arizona/Nevada State Line):
Zone A: 0-20 road miles from Courthouse in Flagstsff
Zone B: 20-35 road miles from Courthouse in Flagstaff
Zone C: 35-80 road miles from Courthouse in Flagstaff
Zone D: 80 road miles and over from Courthouse in Flagstaff

Area 2: Apache, Coconino, Navajo, and Yavapai Counties (south of the Woodruff/Camp Wood Line); Gila, Graham, Greenlee, Maricopa, and Pinal Counties (north of 33rd Parallel); Mohave County (south of a line following the Geodetic Hualapai Boundary Line to the Colorado River, a distance of 23 miles east of Pierce Ferry and then intersecting the Arizona/Nevada State Line):
Zone A: 0-40 paved road miles from Courthouse in Phoenix; also, Luke and Williams Air Force Bases
Zone B: 41-60 paved road miles from Courthouse in Phoenix
Zone C: 61 paved road miles and over from Courthouse in Phoenix

Area 3: Cochise County; Graham, Greenlee, Maricopa and Pinal Counties (south of 33rd Parallel); Pima, Santa Cruz, and Yuma Counties:
Zone A: 0-30 paved road miles from Stone and Congress in Tucson or from the County Courthouse in Yuma
Zone B: 31-40 paved road miles from Stone and Congress in Tucson or from the County Courthouse in Yuma
Zone C: 41-50 paved road miles from Stone and Congress in Tucson or from the County Courthouse in Yuma
Zone D: 51 paved road miles and over from Stone and Congress in Tucson or from the County Courthouse in Yuma

FOOTNOTE:
a. Employer contributes 8% of basic hourly rate for 5 years' service and 6% of basic hourly rate for 6 months' to 5 years' service as Vacation Pay Credit. Seven Paid Holidays: A through G

PAID HOLIDAYS:
A-New Year's Day; B-Memorial Day; C-Independence Day; D-Labor Day; E-Thanksgiving Day; F-Friday after Thanksgiving; G-Christmas Day

AREA and ZONE DEFINITIONS

PLASTERERS:
Area 1: Apache, Coconino, and Gila Counties; Graham, Greenlee, Maricopa, and Pinal Counties (north of Sentinal - Casa Grande - Safford Line); Mohave, Navajo, Yavapai, and Yuma Counties:
Zone A: 0-35 miles from Phoenix
Zone B: 35-60 miles from Phoenix
Zone C: 60 miles and over from Phoenix

Area 2: Cochise County; Graham, Greenlee, Maricopa, and Pinal Counties (south of Sentinel - Casa Grande - Safford Line); Santa Cruz County:
Zone A: 0-30 miles radius from Tucson
Zone B: 30-50 miles radius from Tucson
Zone C: 50 miles radius and over from Tucson

PLUMBERS:
Zone 1: Area within 15 road miles from either the intersection of Central Avenue and Jefferson Street in Phoenix or the Old Main Building of the University of Arizona in Tucson or the Main Post Office Building in either Douglas, Flagstaff or Yuma; Also, all areas within the City limits of Havasu City, Holbrook, Kingman, Prescott, and Winslow; Also, that area bordered by the Apache Trail on the north, Higley Road on the east, Elliott Road on the south and Arizona Avenue on the west

Zone 2: Over 15 and up to 30 road miles from either the intersection of Central Avenue and Jefferson Street in Phoenix or the Old Main Building of the University of Arizona in Tucson

PLUMBERS: (Cont'd)
Zone 3: Over 30 and up to 40 road miles from either the intersection of Central Avenue and Jefferson Street in Phoenix or the Old Main Building of the University of Arizona in Tucson

Zone 4: Over 40 road miles from either the intersection of Central Avenue and Jefferson Street in Phoenix or the Old Main Building of the University of Arizona in Tucson

ROOFERS:
Area 1: Apache, Coconino, Gila, Maricopa, Mohave, Navajo, Pinal, Yavapai, and Yuma Counties

Area 2: Cochise, Graham, Greenlee, Pima and Santa Cruz Counties:
Zone A: Area less than 44 road miles from City Hall in Tucson
Zone B: Area from 44 to 100 road miles from City Hall in Tucson

SHEET METAL WORKERS:
Area 1: Apache, Coconino, and Gila Counties; Graham, Greenlee, and Pinal Counties (north of 33rd Parallel); Maricopa, Mohave, Navajo, Yavapai, and Yuma Counties:
Zone 1: 0-25 miles radius, excluding Luke and Williams Air Force Bases, from the following base points: the intersection of 56th Street and Indian School Road in Phoenix, and the City Hall in Flagstaff, Kingman, Prescott and Yuma
Zone 2: 25-50 miles radius from the base points listed in Zone 1; also Luke and Williams Air Force Bases
Zone 3: 50 miles radius and over from the base points listed in Zone 1

Area 2: Cochise, Graham, Greenlee, and Pinal Counties (south of 33rd Parallel); Pima and Santa Cruz Counties:
Zone A: 0-25 miles radius from Tucson City Hall or Douglas City Hall
Zone B: 25-50 miles radius from Tucson City Hall or Douglas City Hall
Zone C: Over 50 miles radius from Tucson City Hall or Douglas City Hall; also San Manuel and vicinity

TERRAZZO WORKERS; TILE SETTERS:
Area 1: Apache, Coconino, and Gila Counties; Graham and Greenlee Counties (west and north of San Francisco River to Gila River); Maricopa, Mohave, and Navajo Counties; Pinal County (north of a boundary line drawn west along the Gila River to the western City limits of Florence, a straight line from the extreme southwestern City limits of Florence to the extreme southern city limits of Coolidge, then a straight line to the extreme southern city limits of Casa Grande, with the line extending to the Maricopa/Pinal County Line); Yavapai and Yuma Counties

AREA DEFINITIONS

NORTHERN AREA:
Area north of a straight line drawn between a point 35 miles due north of the City Hall in Flagstaff and a point 35 miles due north of the City Hall in Kingman, extending to the Arizona/Nevada State Line on the west; and connecting to a point 35 miles due north of the City Hall in Holbrook, thence due east to the intersection of the Arizona/New Mexico State Line

CENTRAL and SOUTHERN AREAS:
All Areas not included in the Northern Area

LABORERS

Group 1: Laborer, general or construction; Tool Dispatcher or Checker; Manually-controlled Signal Operator; Fence Builder, Guard Rail Builder - highway; Chat Box Man; Dumpman and/or Spotter; Rip Rap Stone Man; Form Stripper; Landscape Gardener and Nurseryman; Packing Rod Steel and Pans; Window Cleaners; Cesspool Diggers and Installers; Concrete Dump Man - belt; Pipe and/or Hoseman; Astro-truf Layers; Clean-up, Bull Gang and Trackman - railroad; Chipper (clearing and grubbing)

Group 2: Cement Finisher Tender; Concrete Curer (Impervious Membrane); Cutting Torch Operator; Fine Grader (highway, engineering and sewer work only); Kettleman - Tarman; Power-type Concrete Buggy

Group 3: Chuck Tender (except tunnel); Sandblaster (Pot Tender); Powderman Tender; Spikers and Wrenchers; Rip Rap Stone Pavers; Creosote Tieman; Guinea Chaser; Bander

Group 4: Operator and Tenders of pneumatic and electric tools; Concrete Vibrating Machines; Chain Saw Machines (on clearing and grubbing); Floor Sanders - concrete; Hydraulic Jacks and similar mechanical tools not separately herein classified; Cement Dumpers (skip-type Mixer or handling bulk cement); Pipe Caulker and/or Backup Man (pipeline); Rigger/Signalman (pipeline); Pipe Wrapper; Cribber and Shorer (except tunnel); Pneumatic Gopher

Group 5: Grade Setter (pipeline); Driller; Jackhammer and/or Pavement Breakers; Pipe Layer (including but not limited to non-metallic, transite and plastic pipe, water pipe, sewer pipe, drain pipe, underground tile and conduit); Rock Slinger; Asphalt Rakers and Ironers; Air and water Wash-out Nozzleman; Scaler (using Bos'n's Chair or Safety Belt); Tampers (mechanical, all types); Hand-guided Trencher and similar operated equipment; Precast Manhole Erector

Group 6: Driller (Core, Diamond, Wagon or Air Track); Sandblaster (Nozzleman); Concrete Saw (hand-guided); Concrete Cutting Torch; Drill Doctor and/or Air Tool Repairman; Gunman and Mixerman (Gunite)

Group 7: Gunite Nozzleman or Rodman; Scaler (Drillers); Form Setter and/or Builder; Welders and/or Pipe Layers, installing process piping; Drillers, Joy Mustang, PR 143, 220 Gardener-Denver, Hydrasmnic; Powder Man

LABORERS (cont'd)
(Tunnel and Shaft Workers)

Group 1: Bull Gang, Muckers, Trackman; Dumpmen; Concrete Crew (includes Rodders and Spreaders); Grout Crew; Swamper (Brakeman and Switchmen on tunnel work); Change House Man

Group 2: Nipper; Chucktender, Cabletender; Vibratorman, Jackhammer, Pneumatic Tools (except Driller)

Group 3: Grout Gunman

Group 4: Timberman, Retimberman - wood or steel blaster, Driller, Powderman; Cherry Pickerman; Powderman - Primer House; Steel Form Raiser and Setter; Kemper and other pneumatic concrete placer Operator; Miner - Finisher; Miners - Tunnel (hand or machine)

Group 5: Diamond Drill

Group 5A: Shaft and Raise Miner Welder

POWER EQUIPMENT OPERATORS (Cont'd)
(Except Piledriving and Steel Erection)

POWER EQUIPMENT OPERATORS
(Except Piledriving and Steel Erection)

Group 1: Air Compressor Operator; Field Equipment Servicemen Tender; Heavy-duty Repair Tender; Heavy-duty Welder Tender; Oiler; Pump Operator

Group 2: Conveyor Operator; Generator Operator - portable; Power Grizzly Operator; Self-propelled Chip Spreading Machine - Conveyor Operator; Watch Fireman; Welding Machine Operator - gasoline and diesel power

Group 3: Concrete Mixer Operator - skip-type; Driver; Moto-paver, Slurry Seal Machine and similar type equipment; Dinky Operator (under 20 tons wt.); Motor Crane Driver; Power Sweeper Operator, self-propelled; Ross Carrier or Forklift Operator; Skip Loader Operator, all types with rated capacity 1½ cu. yds. or less; Wheel-type Tractor Operator (Ford, Ferguson, or similar type) with attachments such as Fresno, Push Blade, Post Hole Auger, Mover, etc. excluding compacting equipment

Group 4: A-Frame Boom Truck or Winch Truck Operator; Asphalt Plant Fireman; Elevator Hoist Operator (including Tuskey Hoist or similar type); Grade Checker (excluding Civil Engineer); Multiple power Concrete Saw Operator; Pavement Breaker; Mechanical Compactor Operator, power propelled; Roller Operator, all types, except as otherwise classified; Screed Operator; Self-propelled Chip Spreading Machine Operator (including Slurry Seal Machine Operator; Stationary Pipe Wrapping and Cleaning Machine Operator; Tugger Operator

POWER EQUIPMENT OPERATORS (Cont'd)
(Except Piledriving and Steel Erection)

Group 5: Aggregate Plant Operator (including Crushing, Screening and Sand Plants, etc.); Asphalt Laydown Machine Operator; Asphalt Plant Mixer Operator; Beltcrete Operator; Boring Machine Operator; Concrete Mechanical Tamping, Spreading or Finishing Machine (including Clary, Johnson or similar types); Concrete Pump Operators; Concrete Batch Plant Operator, all types and sizes; Conductor, Brakeman or Handler; Drilling Machine; Elevating Grader Operator, all types and sizes (except as otherwise classified); Highline Cableway Signalman; Field Equipment Serviceman; Kolman Belt Loader Operator or similar with belt width 48" or over; Locomotive Engineer (including Dinky, 20 tons wt. and over); Moto-paver and similar type equipment Operator; Operating Engineer Rigger; Pneumatic-tired Scraper Operator (Turnapull, Euclid, Cat, D-W, Hancock and similar equipment) up to and including 12 cu. yds.; Power Jumbo Form Setter Operator; Pressure Grout Machine Operator (as used in heavy engineering construction); Road Oil Mixing Machine Operator; Roller Operator, on all types asphalt pavement; Self-propelled Compactor, with blade; Skip Loader Operator, all types rated capacity, over 1½ but less than 4 cu. yds.; Slip Form Operator (power driven lifting device for concrete forms); Soil Cement Road Mixing Machine Operator, single pass type; Stationary Central Generating Plant Operator, rated 300 K. W. or more; Surface Heater and Planer Operator; Traveling Pipewrapping Machine Operator

Group 5A: Heavy-duty Mechanic and/or Welder; Pneumatic-tired Scraper, all sizes and types over 12 cu. yds. up to and including 45 cu. yds. MRC (Turnapull, Euclid, Cat, D-W, Hancock and similar equipment); Tractor Operator (Pusher, Bulldozer, Scraper) up to 400 net horsepower rating; Trenching Machine Operator

UMI 1 8 9 2 9 M Y 6 4 V

POWER EQUIPMENT OPERATORS (Cont'd)
(Except Piledriving and Steel Erection)

Group 6: Auto Grade Machine (CMI and similar equipment); Boring Machine Operator (including Mole, Badger and similar type); Concrete Mixer Operator, paving type, and Mobile Mixer; Concrete Pump Operator with boom attachment (truck mounted); Crane Operator, Crawler and pneumatic type, under 100 ton capacity MRC; Crawler type Tractor Operator, with boom attachment or slope bar; Derrick Operator; Forklift Operator for hoisting personnel; Grade-all Operator; Helicopter Hoist; Highline Cableway Operator (less than 20 tons rated capacity); Mass Excavator Operator (150 Bucyrus Erie and similar types); Mechanical Hoist Operator (two or more drums); Motor Grade Operator, any type power blade; Motor Grade Operator with elevating grader attachment; Mucking Machine Operator; Overhead Crane Operator; Piledriver Engineer (portable, stationary or skid rig); Pneumatic-tired Scraper Operator, all sizes and types (Turnapull, Euclid, Cat, D-W, Hancock and similar equipment over 45 cu. yds., MRC); Power driven Ditch Lining or Ditch Trimming Machine Operator; Skip Loader Operator, all types with rated capacity 4 cu. yds., but less than 8 cu. yds.; Slip Form Paving Machine Operator (including Gunnert, Zimmerman and similar types); Specialized Power Digger Operator, attached to wheel-type Tractor; Tower Crane (or similar type) Operator; Tractor Operator (Pusher, Bulldozer, Scraper) (400 net horsepower and over); Tugger Operator (two or more); Universal Equipment Operator, Shovel, Backhoe, Dragline, Clamshell, etc., up to 8 cu. yds.

Group 7: Crane Operator, Pneumatic or Crawler (100 ton hoisting capacity and over MRC rating); Helicopter Pilot, FAA qualified, when used in construction work; Highline Cableway Operator, over 20 ton rated capacity and using Traveling Head and Tail Tower; Remote-control Earth Moving Equipment Operator; Skip Loader Operator, all types with rated capacity of 8 cu. yds. or more; Universal Equipment - Shovel, Backhoe, Dragline, Clamshell, etc., 8 cu. yds. and over

All Areas not included in the Northern Area

TRUCK DRIVERS

Group 1: Teamsters; Pick-ups; Station Wagon; Man Haul Driver

SUPERSEDEAS DECISION

STATE: Minnesota COUNTY: Brown
DECISION NUMBER: MN81-2026 DATE: Date of Publication

TRUCK DRIVERS

Group 1: Teamsters; Pick-ups; Station Wagon; Man Haul Driver

Group 2: Dump or Flatrack (2 or 3 axle); Water Truck (under 2500 gallons); Buggymobile (1 cu. yd. or less); Bus Driver; Self-propelled Street Sweeper; Shop Greaser

Group 3: Dump or Flatrack (4 axle); Dumptor or Dumpster (less than 7 cu. yds.); Water Truck (2500 gallons but less than 4000 galloms); Tireman

Group 4: Dumptor or Dumpster (7 cu. yds. but less than 16 cu. yds.); Dump or Flatrack (5 axle); Water Truck (4000 gallons and over); Slurry type equipment Driver or Leverman; Vacuum Pump Truck Drivers; Flaherty Spreader or similar type equipment or Leverman; Transit Mix (8 cu. yds. or less mixer capacity); Warehouseman and/or Warehouse Clerk; Ambulance Driver

Group 5: Dump or Flatrack (6 axle); Transit Mix (over 8 cu. yds. but less than 10.5 cu. yds.); Rock Truck (i.e. Dart, Euclid and other similar type end Dumps, single unit) less than 16 cu. yds.

Group 5A: Oil Tanker or Spreader and/or Bootman, Retortman or Leverman

Group 6: Transit Mix (over 10.5 cu. yds. but less than 14 cu. yds. mixer capacity); Ross Carrier, Fork Lift or Lift Truck; Hydro Lift, Swedish Crane, Iowa 300 and similar types; Concrete Pump (when integral part of Transit Mix Truck); Dump or Flatrack (7 axle); Transport Driver (unless axle rating results in higher classification)

Group 7: Dump or Flatrack (8 axle)

Group 8: Off-highway equipment Driver including but not limited to: 2 or 4 wheel power unit, i.e. Cat, DW Series, Euclid, International and similar type equipment, transporting material when top loaded or by external means including pulling Water Tanks, Fuel Tanks or other applications under Teamster Classifications; Rock Trucks (Dart, Euclid, or other similar end dump types) 16 cu. yds. and over; Eject-alls; Dumptor or Dumpster (16 cu. yds. and over); Dump or Flatrack (9 axle)

Group 8A: Heavy-duty Mechanic/Welder; Body and Fender Man

Group 8B: Heavy-duty Mechanic/Welder Tender

Group 8C: Field Equipment Serviceman or Fuel Truck Drivers

Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29 CFR, 5.5 (a)(1)(ii)).

Patent and Trademark Office

Rules of Practice in Patent Cases; Reexamination Proceedings

DEPARTMENT OF COMMERCE

Patent and Trademark Office

37 CFR Part 1

Rules of Practice in Patent Cases; Reexamination Proceedings

AGENCY: Patent and Trademark Office, Commerce.

ACTION: Final rule.

SUMMARY: The Patent and Trademark Office is amending its rules of practice in patent cases to provide procedures for the reexamination of patents. Public Law 96–517 amended the patent act to authorize reexamination proceedings as a means for improving the quality of United States patents. The Patent and Trademark Office intends, through this amendment of its rules, to provide patent owners and the public with guidance on the procedures the Office will follow in conducting reexamination proceedings.

DATE: Effective date: July 1, 1981.

FOR FURTHER INFORMATION CONTACT: Mr. R. Franklin Burnett by telephone at (703) 557–3054 or by mail marked to his attention and addressed to the Commissioner of Patents and Trademarks, Washington, D.C. 20231.

SUPPLEMENTARY INFORMATION: This rule change relates to a procedure for reexamination of patents as provided for in Public Law 96–517, section 1 of which relates to reexamination and becomes effective on July 1, 1981.

Background

A notice of proposed rulemaking was published in the **Federal Register** on January 13, 1981 at 46 FR 3162–3175 and in the *Official Gazette* on February 17, 1981 at 1003 O.G. 36–47.

The proposed rulemaking set forth two somewhat distinct procedures directed towards determining and improving the quality and reliability of United States patents. The procedures were (1) provisions for reexamination of patents as provided for in Pub. L. 96–517, section 1 of which relates to reexamination and becomes effective on July 1, 1981, and (2) provisions for inter partes protest proceedings in a patent application between the patent applicant and a member (or members) of the public who has (have) access to the application file.

An oral hearing was held on April 16, 1981. Fifty-nine written letters and statements were submitted. Nineteen persons testified at the oral hearing which resulted in 107 pages of testimony.

Discussion of General Issues Involved

After careful consideration of the comments which have been received, the part of the proposed rulemaking relating to reexamination of patents as set forth in new Chapter 30 which Pub. L. 96–517 added to Title 35 of the United States Code (35 U.S.C. 301–307) is being adopted with certain changes. The remainder of the proposal relating to inter partes protest proceedings is not being adopted.

The comments relating to the proposed rules for inter partes protest proceedings were generally mixed, with a majority of persons and associations submitting comments either opposed to these proposed rules or indicating that adoption of the proposed rules should be delayed or deferred for further study and consideration.

A number of comments were received requesting some further changes to the rules be made. The thrust of some of the suggested changes would be to remove public access to reissue applications and to limit public participation in the examination of reissue applications. The changes suggested included restoring the rules in these areas to essentially their pre-1977 form. In particular, it was suggested that § 1.175 be amended to eliminate paragraph (a)(4). These changes were not a part of the published proposal and are not being adopted at this time. Their consideration and adoption would require a new notice of proposed rulemaking.

Further, since the subject matter of reissue applications is already known to the public the necessity for maintaining them in confidence is not compelling. The elimination of paragraph (a)(4) of § 1.175 would not have a significant effect since less than one-fourth of the currently filed reissue applications are based solely upon the 1977 change to § 1.175. Under the present circumstances, it is more appropriate to defer any consideration of such changes until this issue has been reviewed further and possibly until some experience is gained under the rules adopted herein relating to reexamination. Such experience may indicate the desirability of either retaining the 1977 change to § 1.175, deleting the 1977 change, or making different changes in the rules.

The comments relating to reexamination were generally favorable with most of the comments indicating general approval of the proposed rules. Among the more often mentioned specific comments were suggestions relating to public notice of reexamination requests and/or orders. A number of comments also related to requester and/or third party participation in the reexamination proceeding and also to the scope of the proceeding.

After careful review of the comments and suggestions it has been decided to adopt the suggestions relating to the publication in the *Official Gazette* of requests for reexamination for which the fee has been paid. In addition, any reexaminations ordered at the initiative of the Commissioner will also be announced in the *Official Gazette*. The announcement will include at least the date of the request or any Commissioner initiated order, a reexamination request or order control number, the patent number, title, class and subclass, name of the inventor, name of the patent owner of record, and the examining group to which the reexamination is assigned.

The suggestions and comments relating to more participation in the reexamination proceeding by the requester and third parties have been adopted only to a limited degree. The requester will in general have only that participation provided by the rules as proposed. However, any citations under § 1.501 by any person will be entered in the patent file up until the date of an order to reexamine. The essentially ex parte nature of the proceeding is believed to be in keeping with the spirit and intent of the statute even though the statute does not require ex parte proceedings. Ex parte proceedings will minimize the costs and other effects of reexamination requests on patentees, especially individuals and small businesses.

The scope of the reexamination proceeding which was originally proposed has been essentially adopted in the final rules. The suggestions that the rules be broadened to include other issues have not been adopted since the other issues would unduly complicate the proceedings, raise the expense of the proceedings and raise questions whether such issues can be considered under Pub. L. 96–517.

Discussion of the Major Specific Issues Involved

The rules relating to reexamination proceedings are directed to the procedures set forth in new Chapter 30 of Title 35 of the United States Code (35 U.S.C. 301–307). This Chapter provides for the citation of prior art in patents, filing of requests for reexamination, decisions on such requests, reexamination and appeal from reexamination decisions, and the issuance of a certificate at the

termination of the reexamination proceedings.

Present §§ 1.1, 1.5, 1.11, 1.33, 1.34, 1.36, 1.104, 1.107, 1.109, 1.111, 1.112, 1.113, 1.115, 1.116, 1.121, 1.191, 1.192, 1.196, 1.197, 1.231, 1.248, 1.301, and 1.303 are amended to provide for reexamination procedures. A new "Subpart D—Reexamination of Patents" includes new §§ 1.501, 1.510, 1.515, 1.520, 1.525, 1.530, 1.535, 1.540, 1.550, 1.552, 1.555, 1.560, 1.565, and 1.570. Paragraph (b) of § 1.291, relating to prior art citations in patents, is deleted, since provisions therefor appear in § 1.501.

Section 1.1, as amended, provides for communications relating to reexamination proceedings to be marked "Box Reexam" to speed internal Office mail processing. No comments were received concerning this section. The proposal has been modified to indicate that only requests should be marked "Box Reexam".

Section 1.5, as amended, provides for all letters relating to a reexamination proceeding to be identified by patent number and a reexamination request control number. No comments were received concerning this section. Section 1.5 has been modified to also include reference to the Group Art Unit and the examiner, if known.

Section 1.11, as amended, provides for all papers made of record in reexamination proceedings to be open to inspection and copying by the public. Eighteen comments were received relating to publication of a notice in the *Official Gazette*. A new paragraph (c) has been added which provides for the publication of requests with sufficient fees paid and orders initiated by the Commissioner. Proposed paragraph "c" has been adopted as paragraph "d".

Section 1.33, as amended, has a new paragraph (c) relating to which address communications for the patent owner will be sent and who may sign papers filed. Four comments were received on this section relating to whom the mail should be addressed. One proposal, which suggested use of the current address of the attorney or agent of record, was adopted.

Section 1.34, as amended, provides for the appointment of an attorney or agent in a reexamination proceeding. Only one comment was received on this section which proposed a rule specifically allowing attorneys to file requests without identifying their clients. Since any person may request reexamination, such a rule is not felt necessary.

Section 1.36, as amended, provides for the revocation and withdrawal of powers of attorney in a reexamination proceeding. No comment was received. Section 1.36 is adopted as proposed with an additional change which added "or her" near the end.

Section 1.104, as amended, broadens the present section to also include reexamination. Three comments were received on § 1.104. All comments indicated that the examiner should not make a prior art search. Although no complete new search by the examiner is required, the use of patents and printed publications in addition to those submitted by the requester is clearly indicated in 35 U.S.C. 303(a). Accordingly, § 1.104 is adopted as proposed.

Section 1.107, as amended, provides for the citation of prior art by the examiner in a reexamination proceeding. The amended rule also refers to foreign published applications, as well as patents. No comments were received on this section. It is adopted as proposed.

Section 1.109, as amended, provides for the examiner to supply reasons for allowance in a reexamination proceeding if the examiner believes that the record does not make clear the reasons for allowing a claim or claims. No comments were received on this section. Except for a clarifying change in language, it is adopted as proposed.

Section 1.111, as amended, provides for replies by the patent owner in a reexamination proceeding. One comment was received which suggested a clarification. The suggestion was adopted. Other non-substantive changes have been made in the proposed section to shorten the sentences for clarity.

Section 1.112, as amended, provides for reexamination and reconsideration of the patent under reexamination after responses by the patent owner. Three comments were received on this section.

The wording has been changed as suggested to avoid any confusion between "reexamination" and "re-examine". The sentences have also been shortened for clarity.

Section 1.113, as amended, provides for a final rejection or action in a reexamination proceeding. One comment was received which pointed out a possible conflict between the amendment rights of section 305 and the final rejection of section 1.113. No problem is seen in this regard because of the provision of section 305 which states that "reexamination will be conducted according to the procedures established for initial examination." The section is adopted as proposed with the last sentence being divided into two sentences for clarity.

Section 1.115, as amended, provides for amendments by the patent owner in a reexamination proceeding. No comments were received concerning this section. The section is adopted as proposed with minor changes for clarity.

Section 1.116, as amended, provides for amendments after final action in reexamination proceedings. One comment was received which was the same as that mentioned and responded to in Section 1.113 above. The sentences have been shortened for clarity.

Section 1.121, as amended, contains a new paragraph (f) which requires a complete copy of any new or amended claim when presented during reexamination proceedings. Two persons commented on this section. One proposed side-by-side presentation of amended and original claims. The other proposed that exactly the same procedure be used as is now in effect for amending reissue claims. Neither suggestion was adopted since neither lends itself to printing only the amended claims in a certificate as easily as the procedure set forth in § 1.121(f). The proposed section was revised to also provide for the amendment of the description. In addition, the last three sentences of § 1.510(e) have been inserted as the last three sentences of § 1.121(f) in order to provide a more complete description therein of the manner of making amendments, including the numbering of claims, the restriction on scope of the claims and the prohibition against the introduction of new matter.

Section 1.191, as amended, provides for appeal to the Board of Appeals by the patent owner from any decision adverse to patentability, in accordance with 35 U.S.C. 306. One comment was received on proposed § 1.191 which urged that the requester should also be entitled to appeal. This proposal was not adopted because it is not provided for in the law and could result in harassment if permitted. The section is adopted as proposed except that "primary" contained in the existing rule is retained.

Section 1.192, as amended, provides two months from the date of the Notice of Appeal for the patent owner to file an appeal brief in a reexamination proceeding. Five comments were received relating to § 1.192 which proposed that the period for filing an appeal brief in a reexamination appeal be two months as in other appeals. The proposed rule has been adopted with the suggested two month period. The sentences have been shortened for clarity.

Section 1.196 and § 1.197 are being amended to refer to "appellants", which is a term which includes both applicants and patent owners.

These two sections were not published for comment, however, the issues involved were presented in proposed §§ 1.191 and 1.192. Paragraph (c) of § 1.197 has also been rewritten for clarity.

Section 1.231(a)(1), as amended, provides for a motion that a patent claim is unpatentable in an interference proceeding where reexamination thereof has also been requested.

Three comments were received concerning § 1.231. All comments related to when interference or reexamination proceedings would be suspended. Section 1.565 provides basis for such suspensions. Decisions will be made on a case by case basis, depending on the particular fact situation. The sentences in § 1.231(a)(1) have been shortened and rearranged for clarity.

An amendment was proposed to delete the last two sentences of § 1.247 relating to proof of service. No comments were received concerning this section but, on reconsideration, no need for such deletion is felt necessary and no change is being adopted.

Section 1.248, as amended, includes a new paragraph (b) relating to methods of serving papers and proof of service. No comments were received concerning this section. The section is adopted as proposed with minor changes for clarity and to conform to the Federal Rules of Civil Procedure.

Section 1.291, as amended, deletes paragraph (b). Former paragraph (b) dealt with the citation of prior art provisions. It was deleted since the provisions are now covered by § 1.501. Five persons commented on § 1.291. One comment relating to filing protests in reexamination proceedings was not adopted since such proceedings are ex parte in nature and are limited to consideration of prior art patents and printed publications cited by the public prior to the order. Two persons mentioned providing a procedure for citation of prior art by patentees. Citation of prior art by patentees is included in § 1.501. The two other comments related to the content of protest proceedings, which are not part of this final rule. Section 1.291 is adopted as proposed except that the paragraph designation of (c) is not being changed.

Section 1.301, as amended, provides for appeal by the owner of a patent in reexamination proceedings to the U.S. Court of Customs and Patent Appeals. Four comments were received relating to § 1.301. One person suggested the insertion of "any" as the fourth word in the section. This suggestion was adopted. The other three comments related to appeals in inter partes protest proceedings which are not a part of this promulgation. Section 1.301 is adopted as proposed with only the above mentioned change.

Section 1.303, as amended, provides for remedy by civil action under 35 U.S.C. 145 for the owner of a patent in reexamination proceedings. No comments were received concerning this section. The changes from the proposal are the insertion of "any" as the fourth word in the section as suggested in § 1.301 and the addition of ", 306" to the title.

New § 1.501 provides a system for citation of patents and printed publications to the Patent and Trademark Office for placement in the patent file by any person during the period of enforceability of the patent in accordance with 35 U.S.C. 301. Seventeen persons commented on § 1.501. Nine comments indicated that citations should be limited to patents or printed publications. Six comments indicated that persons citing art should be required to apply it to at least one claim. Three persons held the opposite view. The final rule wording provides for citations limited to patents and printed publications where the person making the citation states the pertinency and applicability of the citation to the patent and the bearing the citation has on the patentability of at least one claim of the patent. The final rule provides that a citation made by the patent owner may include an explanation of how the claims differ from the prior art cited. Any citations which include items other than patents and printed publications will not be entered in the patent file. This does not, of course, limit in any manner the kinds and types of information which can be relied upon in protests against pending patent applications, whether such be original applications or reissue applications. Four persons stated that a separate letter requesting confidentiality should be required in cases desiring confidentiality. This provision was not considered to be necessary. One comment requested clarification of the term "period of enforceability of a patent." The meaning of this term appears to be clear since it includes any period for which recovery can be had for infringement. Under usual circumstances, this would be the term of the patent plus the six years provided by 35 U.S.C. 286. Five comments were received relating to paragraph (c) concerning service of citations on the patent owner. The wording has been clarified. A suggestion was made that prior art copies and translations of non-English documents be required. This suggestion was not adopted since such documents are not absolutely essential until a request for reexamination has been filed. However, if the person citing the patents or printed publications desires that they be considered in any subsequent reexamination proceedings, copies and any necessary English translation should be included with the citation. A proposal was also made to charge a fee to prevent harassment. This proposal was not adopted since the mere citation of prior art is not considered to constitute harassment. A suggestion was made to change the title of the section. This suggestion was adopted in slightly modified form.

New § 1.510 sets forth procedures for any person to request reexamination in accordance with 35 U.S.C. 302. Paragraph (a) of new § 1.510 limits the period for such request to the period of enforceability of the patent for which the request is filed and requires payment of the fee for requesting reexamination. Paragraph (b) of new § 1.510 indicates what each request for reexamination must include. Paragraph (c) of new § 1.510 indicates under which conditions a request for reexamination will be considered. Paragraph (d) of new § 1.510 indicates the date on which the entire fee is received will be considered to be the date of the request for reexamination. Upon reconsideration of the paragraph as proposed, it was considered more appropriate to base the filing date of the request for reexamination on the receipt of the fee for requesting reexamination rather than include other matters. Proposed paragraph (d) has been amended accordingly and is adopted. Paragraph (e) of new § 1.510 covers amendments which a patent owner can propose. Such amendments can accompany a request for reexamination by the patent owner. The paragraph, with changes in wording for clarity, is adopted as proposed. A new paragraph (f) was added to clarify that requests for reexamination may be filed by attorneys or agents on behalf of a requester. Nineteen persons commented on § 1.510. One person inquired as to whether confidential requests would be accepted. In response thereto, § 1.510 provides that any person may file a request for reexamination. That person's name will not be maintained in confidence. One suggestion was made to permit comment and rebuttal before the decision under § 1.515. No need for such a procedure is seen since the only question to be considered is whether or not a substantial new question of patentability has been raised. An

opportunity for comment and rebuttal is provided after the issuance of the order. One comment was received which desired provision for supplemental requests at a reduced fee. This proposal was not adopted since it is felt that all requesters should share equally in the cost. One comment was received which proposed that duplicate copies of the request be filed in the Office so that one copy would be available for public inspection at all times. This proposal was not adopted since it would appear to create more problems than it would solve. One comment was received that only "readily available" translations should be required. It is felt that if a document is considered to be sufficiently pertinent to request reexamination, that an English translation should be provided to insure complete and proper consideration. A suggestion was made relating to paragraph (b)(5) that direct service be limited to registered patent attorneys. No need for such a restriction is seen. Various other comments relating to procedures were considered but were not adopted.

New § 1.515 relates to a determination as to whether the request has presented a substantial new question of patentability under 35 U.S.C. 303. Paragraph (a) of new § 1.515 requires that the determination be made within 3 months of the filing date of the request. Paragraph (b) of new § 1.515 refers to the refund provisions. Paragraph (c) of new § 1.515 provides for review by petition to the Commissioner of any decision refusing reexamination. Seven persons commented on § 1.515. Several comments were received suggesting that the term "reexamination" should be dropped before "examiner". This proposal was adopted. Several persons requested that all art cited in the patent file at the time of the order under § 1.525 be considered when deciding whether a substantial new question of patentability is presented in the request. This is possible under the provision of § 1.515(a) which permits "consideration of other patents or printed publications", but is not required insofar as prior art not relied upon in the request is concerned. One person suggested that "is" be changed to—affirms—in paragraph (c). This proposal has been adopted. One commentor questioned whether a right to review was available under paragraph (c) if reexamination was ordered. No right to review exists in such a case because all claims will be reviewed in view of all prior art during the reexamination under § 1.550.

New § 1.520 provides for reexamination at the initiative of the Commissioner under the provisions of the last sentence of paragraph (a) of 35 U.S.C. 303. Six persons commented on § 1.520. One comment was received that indicated that the section did not include a reference to patents "discovered by the Commissioner" which is contained in 35 U.S.C. 303(a). This phrase has been added to the rule. A request was made that the sentence "Normally requests from outside—will not be considered." be deleted from the rule. The sentence is being retained since the rule wording provides an easy reference for Office policy. Two comments were received that indicated a desire to have any decisions not to reexamine in Commissioner initiated situations be made part of the patent file. This proposal was not adopted since the basis for not reexamining may involve many policy issues in addition to whether a substantial new question of patentability exists in the case. If all papers in such a case would be made part of a file, it may lead to conclusions that there are no new questions of patentability when this question may not have been addressed because the reexamination was not ordered for other reasons such as little or no interest in a patent about to expire. One comment stated that the section safeguards the rights of the patentee. The language referring to the designation and delegation of authority to appropriate Patent and Trademark Office officials is deleted as unnecessary since the Commissioner's authority to designate and delegate is implicit and understood.

New § 1.525 provides for ordering reexamination where a substantial new question of patentability has been found pursuant to §§ 1.515 or 1.520. Six comments were received relating to § 1.525. One comment was made that the attorney should be able to return notices to the sender if he is unable to contact the patent owner. This topic has not been added to the rules but will be handled on a case by case basis. One comment requested that the patent owner have the option to request that the reexamination be performed by an examiner (1) other than the original examiner, or (2) other than the examiner who issued the order. Comments were also received on both sides of the question as to whether the original examiner should conduct the reexamination. In response, it would appear to be inappropriate to allow an interested party to select the examiner. Under the section, the only limitation placed on the selection of the examiner by the Office is that the same examiner whose decision was reversed on petition ordinarily will not conduct the reexamination. Paragraph (b) has been changed to provide that the notices published in the *Official Gazette* will be considered to be constructive notice.

New § 1.530 relates to the statement and proposed amendments provided for in the second sentence of 35 U.S.C. 304. Amendments submitted by the patent owner cannot enlarge the scope of a claim in the patent. Amendments will not be effectively entered into the patent until the certificate under § 1.570 and 35 U.S.C. 307 is issued. Nine comments were received on § 1.530. Several persons felt that the patent owner should be allowed to comment before the decision under § 1.515 is made. Providing for such a comment would delay the decision under § 1.515 which must be made within three months following the filing date of the request. Further, no need is seen for a statement relating to whether a new question of patentability is present since the patent owner has the opportunity to address any issues of patentability only after the first Office action. One comment questioned whether paragraph (d) also related to the description. This paragraph has been amended to clarify the matter. One person questioned whether an amendment could be filed with a statement. Paragraph (b) clearly answers this question in the affirmative. Several comments requested more time than two months for the patent owner to file a statement. In reply, the law in section 304 indicates that a reasonable period of not less than two months be provided for the patent owner's statement. If the period is too short in particular situations, extensions of time can be requested. It is felt that two months should be retained in the rule in view of the "Special Dispatch" required in reexamination cases. The proposed second sentence of paragraph (b) has not been adopted since § 1.525(b) now provides for the publication of notices of the filing of all requests which are accompanied by the proper fee.

New § 1.535 provides for reply by the reexamination requester to the statement under § 1.530 of the patent owner and for service on the patent owner of any such reply. The last sentence of proposed § 1.540 has been added as the last sentence of § 1.535. Five persons commented on § 1.535. Four persons indicated that the requester should be given additional opportunity to comment. The reasons for the limited participation are that it is all that is required under the law, it prevents to a great degree, harassment of a patent owner, it results in a less expensive proceeding for all parties, and

it results in an earlier conclusion of the proceedings.

New § 1.540 relates to the consideration of statements under § 1.530 and replies under § 1.535. One comment was received that the phrase "may result in their being refused" was worded too loosely. In the absence of any specific suggestion, the proposed wording is considered to be adequate and is adopted as proposed. In addition, it is appropriate that the Office retain discretion as to consideration in such cases.

New § 1.550 covers the basic items relating to the conduct of reexamination proceedings. These proceedings basically follow the same procedures used for examining patent applications. The patent owner will be required to serve the reexamination requester with any response by the patent owner to the Office, in order to remove the necessity of the requester having to continuously monitor the file wrapper. Fourteen persons commented on § 1.550.

Several persons commented that they felt that at least some input by third parties should be permitted. Paragraph (e) has been revised to permit third party input up until the time of the order. Several comments were received that the periods for response should be extended to be similar to those in regular application Office actions. Although problems may arise in certain cases and extensions of time may be granted, it is felt that relatively short response times are necessary in order to process reexaminations with "special dispatch". A question was raised as to the effect of failure to respond to an Office action. Paragraph (d) has been amended to clarify this matter.

New § 1.552 covers the scope of reexamination in a reexamination proceeding. While it is not intended that the examiners will routinely complete a new search when conducting reexamination, the examiners will be free to, and will, very likely, conduct additional searches and cite and apply additional prior patents and publications when they consider it is appropriate and beneficial to do so. Insofar as the actual reexamination is concerned, the examination as to original patent claims is only on the basis of patents or printed publications. However, narrowed amended claims or new claims limited to the original disclosure will also be examined for compliance with other sections of the statute (35 U.S.C. 112 and 132) which are necessary in order to ensure that any amended or new claims are supported, valid, and do not introduce new matter. New § 1.552 also provides that questions relating to matters other than those identified in paragraphs (a) and (b) of the section would merely be noted by the examiner as being an open question in the record. Patent owners could then file a reissue application if they wish such questions to be revolved. Ten persons commented on § 1.552. Several persons commented that the question of fraud should be considered in reexamination proceedings. Comments were also received that the proceedings should be limited to patents and printed publications. The rules have been written to follow the statute which speaks only to reexamination based on patents and printed publications. Mixed comments were also received concerning the retention of the second sentence of paragraph (c). The paragraph is being adopted as proposed with the addition of a reference to the fact that the examiner will note the existence of unresolved questions in an Office action. In addition, the phrase "raised or" has been deleted from paragraph (c) as unnecessary.

New § 1.555 covers the duty of disclosure by a patent owner in a reexamination proceeding involving the owner's patent. Nine persons commented on § 1.555. Four persons supported placing a duty of disclosure on the patent owner. One comment was received that an oath or declaration be required of the patent owner in a reexamination so as to minimize the appearance and occurrence of any fraudulent acts and to emphasize the patentee's obligation of candor. While the suggestion for an oath or declaration has not been adopted, § 1.555 does place an obligation of candor on the patent owner insofar as bringing patents or printed publications to the attention of the Office is concerned. The necessity for an oath or declaration in addition to the obligation placed on the patent owner by § 1.555 is not apparent at this time. Accordingly, the suggestion has not been adopted. Two persons felt the duty of disclosure should apply to both the patent owner and requester. This proposal was not adopted since no sanction could be easily applied against the requester who violated such a rule. One person suggested broadening the duty requirements to include information in addition to patents and printed publications. Although such a practice may be desirable, no need is seen to require information under the reexamination rules which cannot be used during the reexamination. One person felt that there should be no duty of disclosure requirement in reexamination proceedings since the Office will be considering specific prior art and the presence or absence of other prior art does not seem terribly relevant. This suggestion was not adopted since the issue of patentability is not limited to the specific prior art presented and the duty to disclose is consistent with current practice under § 1.56. The section is adopted as proposed except for the indication that prior art statements should be filed in accordance with § 1.98. Also, the section has been divided into two sentences for clarity.

New § 1.560 relates to the conduct of interviews in reexamination proceedings. Seven comments were received directed to § 1.560. One comment requested elimination of interviews. This suggestion was not adopted since interviews have been found to be very helpful in resolving issues. Five comments were received which indicated that the requester should be permitted to attend all interviews. This suggestion was not adopted because of the otherwise ex parte nature of the examination. Two comments were received which indicated that interviews should be permitted before the first Office action. This suggestion was not adopted since such interviews would be held at a time when the Office has not yet taken a position on the allowability of the claims under reexamination. Section 1.560 is adopted as proposed.

New § 1.565 provides for the Commisioner to determine which, if any, proceedings should be stayed, consolidated, or suspended, if concurrent proceedings involving the patent under reexamination are instituted or in progress. Four comments were received concerning § 1.565. One comment pointed out the desirability of combining copending reexamination proceedings. This concept has been accepted and a new paragraph (c) has been added to cover this matter. Two comments voiced concern over the possibility of delay resulting from stayed, suspended or combined cases. Although some delay may result, it is felt that a resolution of all issues should occur at an earlier date. Decisions as to whether to delay or combine cases will be made on a case by case basis to minimize delays and to protect the interests of all parties concerned. One comment was made to allow the patent owner to comment prior to any decision to stay proceedings by the Commissioner. The desirability of such comment will be decided on a case by case basis and is not considered desirable for placement in the rules. The addition of paragraph (c) and the insertion of "is or" before "becomes" in

the first sentence of paragraph (b) are the only changes from the proposed rule.

New § 1.570 concerns the issuance of the reexamination certificate under 35 U.S.C. 307 after conclusion of reexamination proceedings. The certificate will cancel any patent claims determined to be unpatentable, confirm any patenf claims determined to be patentable, and incorporate into the patent any amended or new claim determined to be patentable. Three commentors mentioned § 1.570. Two persons questioned the satutory authority for paragraph (d). In response to the concern for statutory authority, it is the position of the Office that once all of the claims have been canceled from the patent, the patent ceases to be enforceable for any purpose. Accordingly, any pending reissue or other Office proceeding relating to a patent in which such a certificate has been issued will be terminated. This provides a degree of assurance to the public that patents with all the claims canceled via reexamination proceedings will not again be asserted. One commentor indicated that copies of the certificate should be part of subsequently sold copies of the patent. Such a practice is intended but is not being made part of the regulations.

Environmental, energy, and other consideration: The rule change will not have a significant impact on the quality of the human environment or the conservation of energy resources.

The rule change will not have a significant adverse economic impact on a substantial number of small entities (Regulatory Flexibility Act, Pub. L. 96–354).

The Patent and Trademark Office has determined that this rule change is not a major rule under Executive Order 12291.

Amendment of Regulations

For the reasons set out in the preamble and under the authority given to the Commissioner of Patents and Trademarks by 35 U.S.C. 6, Part I of Title 37 CFR is amended as set forth below.

1. Section 1.1 is revised to read as follows:

§ 1.1 All communications to be addressed to Commissioner of Patents and Trademarks.

(a) All letters and other communications intended for the Patent and Trademark Office must be addressed to "Commissioner of Patents and Trademarks," Washington, D.C. 20231. When appropriate, a letter should also be marked for the attention of a particular officer or individual.

(b) Letters and other communications relating to international applications during the international stage and prior to the assignment of a national serial number should be additionally marked "Box PCT."

(c) Requests for reexamination should be additionally marked "Box Reexam."

Note.— §§ 1.1 to 1.26 are applicable to trademark cases as well as to national and international patent cases except for provisions specifically directed to patent cases. See § 1.9 for definitions of "national application" and "international application." (Pub. L. 94–131, 89 Stat. 685)

2. Section 1.5 is amended by adding a new paragraph (d) to read as follows:

§ 1.5 Identification of application, patent or registration.

* * * * *

(d) A letter relating to a reexamination proceeding should identify it as such by the number of the patent undergoing reexamination, the reexamination request control number assigned to such proceeding and, if known, the group art unit and name of the examiner to which it has been assigned.

3. Section 1.11 is amended by adding new paragraphs (c) and (d) to read as follows:

§ 1.11 Files open to the public.

* * * * *

(c) All requests for reexamination for which the fee under § 1.21 (x) has been paid, will be announced in the *Official Gazette*. Any reexaminations at the initiative of the Commissioner pursuant to § 1.520 will also be announced in the *Official Gazette*. The announcement shall include at least the date of the request, if any, the reexamination request control number or the Commissioner initiated order control number, patent number, title, class and subclass, name of the inventor, name of the patent owner of record, and the examining group to which the reexamination is assigned.

(d) All papers or copies thereof relating to a reexamination proceeding which have been entered of record in the patent or reexamination file are open to inspection by the general public, and copies may be furnished upon paying the fee therefor.

4. Section 1.33 is amended by revising the heading and adding a new paragraph (c) to read as follows:

§ 1.33 Correspondence respecting patent applications, reexamination proceedings, and other proceedings.

* * * * *

(c) All notices, official letters, and other communications for the patent owner or owners in a reexamination proceeding will be directed to the attorney or agent of record (see § 1.34(b)) in the patent file at the address listed on the register of patent attorneys and agents maintained pursuant to §§ 1.341 and 1.347 or, if no attorney or agent is of record, to the patent owner or owners at the address or addresses of record. Amendments and other papers filed in a reexamination proceeding on behalf of the patent owner must be signed by the patent owner, or if there is more than one owner by all the owners, or by an attorney or agent of record in the patent file, or by a registered attorney or agent not of record who acts in a representative capacity under the provisions of § 1.34(a). Double correspondence with the patent owner or owners and the patent owner's attorney or agent, or with more than one attorney or agent, will not be undertaken. If more than one attorney or agent is of record and a correspondence address has not been specified, correspondence will be held with the last attorney or agent made of record.

5. Section 1.34 is revised to read as follows:

§ 1.34 Recognition for representation.

(a) When a registered attorney or agent acting in a representative capacity appears in person or signs a paper in practice before the Patent and Trademark Office in a patent case, his or her personal appearance or signature shall constitute a representation to the Patent and Trademark Office that under the provisions of this part and the law, he or she is authorized to represent the particular party in whose behalf he or she acts. In filing such a paper, the attorney or agent should specify his or her registration number with his or her signature. Further proof of authority to act in a representative capacity may be required.

(b) When an attorney or agent shall have filed his or her power of attorney, or authorization, duly executed by the person or persons entitled to prosecute an application or a patent involved in a reexamination proceeding, he or she is a principal attorney of record in the case. A principal attorney or agent, so appointed, may appoint an associate attorney or agent who shall also then be of record.

6. Section 1.36 is revised to read as follows:

§ 1.36 Revocation of power of attorney or authorization; withdrawal of attorney or agent.

A power of attorney or authorization of agent may be revoked at any stage in the proceedings of a case, and an attorney or agent may withdraw, upon application to and approval by the Commissioner. An attorney or agent, except an associate attorney or agent whose address is the same as that of the principal attorney or agent, will be notified of the revocation of his or her power of attorney or authorization, and the applicant or patent owner will be notified of the withdrawal of the attorney or agent. An assignment will not of itself operate as a revocation of a power or authorization previously given, but the assignee of the entire interest may revoke previous powers and be represented by an attorney or agent of his or her own selection.

7. In § 1.104, paragraphs (a) and (b) are revised to read as follows:

§ 1.104 Nature of examination; examiner's action.

(a) On taking up an application for examination or a patent in a reexamination proceeding, the examiner shall make a thorough study thereof and shall make a thorough investigation of the available prior art relating to the subject matter of the claimed invention. The examination shall be complete with respect both to compliance of the application or patent under reexamination with the applicable statutes and rules and to the patentability of the invention as claimed, as well as with respect to matters of form, unless otherwise indicated.

(b) The applicant, or in the case of a reexamination proceeding, both the patent owner and the requester, will be notified of the examiner's action. The reasons for any adverse action or any objection or requirement will be stated and such information or references will be given as may be useful in aiding the applicant, or in the case of a reexamination proceeding the patent owner, to judge the propriety of continuing the prosecution.

* * * * *

8. Section 1.107 is revised to read as follows:

§ 1.107 Citation of references.

(a) If domestic patents are cited by the examiner, their numbers and dates, and the names of the patentees, and the classes of inventions must be stated. If foreign published applications or patents are cited, their nationality or country, numbers and dates, and the names of the patentees must be stated, and such other data must be furnished as may be necessary to enable the applicant, or in the case of a reexamination proceeding, the patent owner, to identify the published applications or patents cited. In citing foreign published applications or patents, in case only a part of the document is involved, sthe particular pages and sheets containing the parts relied upon must be identified. If printed publications are cited, the author (if any), title, date, pages or plates, and place of publication, or place where a copy can be found, shall be given.

(b) When a rejection in an application is based on facts within the personal knowledge of an employee of the Office, the data shall be as specific as possible, and the reference must be supported, when called for by the applicant, by the affidavit of such employee, and such affidavit shall be subject to contradiction or explanation by the affidavits of the applicant and other persons.

9. Section 1.109 is revised to read as follows:

§ 1.109 Reasons for allowance.

If the examiner believes that the record of the prosecution as a whole does not make clear his or her reasons for allowing a claim or claims, the examiner may set forth such reasoning. The reasons shall be incorporated into an Office action rejecting other claims of the application or patent under reexamination or be the subject of a separate communication to the applicant or patent owner. The applicant or patent owner may file a statement commenting on the reasons for allowance within such time as may be specified by the examiner. Failure to file such a statement shall not give rise to any implication that the applicant or patent owner agrees with or acquiesces in the reasoning of the examiner.

10. Section 1.111 is revised to read as follows:

§ 1.111 Reply by applicant or patent owner.

(a) After the Office action, if adverse in any respect, the applicant or patent owner, if he or she persists in his or her application for a patent or reexamination proceeding, must reply thereto and may request reconsideration or further examination, with or without amendment.

(b) In order to be entitled to reconsideration or further examination, the applicant or patent owner must make request therefor in writing. The reply by the applicant or patent owner must distinctly and specifically point out the supposed errors in the examiner's action and must respond to every ground of objection and rejection in the prior Office action. If the reply is with respect to an application, a request may be made that objections or requirements as to form not necessary to further consideration of the claims be held in abeyance until allowable subject matter is indicated. The applicant's or patent owner's reply must appear throughout to be a bona fide attempt to advance the case to final action. A general allegation that the claims define a patentable invention without specifically pointing out how the language of the claims patentably distinguishes them from the references does not comply with the requirements of this section.

(c) In amending in response to a rejection of claims in an application or patent undergoing reexamination, the applicant or patent owner must clearly point out the patentable novelty which he or she thinks the claims present in view of the state of the art disclosed by the references cited or the objections made. He or she must also show how the amendments avoid such references or objections. (See §§ 1.135 and 1.136 for time for reply.)

11. Section 1.112 is revised to read as follows:

§ 1.112 Reconsideration.

After response by applicant or patent owner (§ 1.111), the application or patent under reexamination will be reconsidered and again examined. The applicant or patent owner will be notified if claims are rejected, or objections or requirements made, in the same manner as after the first examination. Applicant or patent owner may respond to such Office action in the same manner provided in § 1.111, with or without amendment. Any amendments after the second Office action must ordinarily be restricted to the rejection or to the objections or requirements made. The application or patent under reexamination will be again considered, and so on repeatedly, unless the examiner has indicated that the action is final.

12. Section 1.113 is amended by revising paragraph (a) to read as follows:

§ 1.113 Final rejection or action.

(a) On the second or any subsequent examination or consideration the rejection or other action may be made final, whereupon applicant's or patent owner's response is limited to appeal in the case of rejection of any claim (§ 1.191), or to amendment as specified in § 1.116. Petition may be taken to the Commissioner in the case of objections

or requirements not involved in the rejection of any claim (§ 1.181). Response to a final rejection or action must include cancellation of, or appeal from the rejection of, each rejected claim. If any claim stands allowed, the response to a final rejection or action must comply with any requirements or objection as to form.

* * * * *

13. Section 1.115 is revised to read as follows:

§ 1.115 Amendment.

The applicant may amend before or after the first examination and action and also after the second or subsequent examination or reconsideration as specified in § 1.112 or when and as specifically required by the examiner. The patent owner may amend in accordance with §§ 1.510(e) and 1.530(b) prior to reexamination, and during reexamination proceedings in accordance with § §1.112 and 1.116.

14. Section 1.116 is amended by revising paragraphs (a) and (b) to read as follows:

§ 1.116 Amendments after final action.

(a) After final rejection or action (§ 1.113) amendments may be made cancelling claims or complying with any requirement of form which has been made. Amendments presenting rejected claims in better form for consideration on appeal may be admitted. The admission of, or refusal to admit, any amendment after final rejection, and any proceedings relative thereto, shall not operate to relieve the application or patent under reexamination from its condition as subject to appeal or to save the application from abandonment under § 1.135.

(b) If amendments touching the merits of the application or patent under reexamination are presented after final rejection, or after appeal has been taken, or when such amendment might not otherwise be proper, they may be admitted upon a showing of good and sufficient reasons why they are necessary and were not earlier presented.

* * * * *

15. Section 1.121 is amended by adding a new paragraph (f) to read as follows:

§ 1.121 Manner of making amendments.

* * * * *

(f) Proposed amendments presented in patents involved in reexamination proceedings must be presented in the form of a full copy of the text of (1) each claim which is amended and (2) each paragraph of the description which is amended. Matter deleted from the patent shall be placed between brackets and matter added shall be underlined. Copies of the printed claims from the patent may be used with any additions being indicated by carets and deleted material being placed between brackets. Claims must not be renumbered and the numbering of the claims added for reexamination must follow the number of the highest numbered patent claim. No amendment may enlarge the scope of the claims of the patent. No new matter may be introduced into the patent.

16. Section 1.191 is revised to read as follows:

§ 1.191 Appeal to Board of Appeals.

(a) Every applicant for a patent or for reissue of a patent, or every owner of a patent under reexamination, any of the claims of which have been twice rejected, or who has been given a final rejection (§ 1.113), may, upon the payment of the fee required by law, appeal from the decision of the primary examiner to the Board of Appeals within the time allowed for response.

(b) The appeal in an application must identify the rejected claim or claims appealed, and must be signed by the applicant or duly authorized attorney or agent. An appeal in a reexamination proceeding must identify the rejected claim or claims appealed, and must be signed by the patent owner or duly authorized attorney or agent.

(c) Except as otherwise provided by § 1.206, an appeal when taken must be taken from the rejection of all claims under rejection which the applicant or patent owner proposes to contest. Questions relating to matters not affecting the merits of the invention may be required to be settled before an appeal can be considered.

17. Section 1.192 is amended by revising paragraph (a) to read as follows:

§ 1.192 Appellant's brief.

(a) The appellant shall, within 2 months from the date of the notice of appeal under § 1.191 in an application, reissue application, or patent under reexamination, or within the time allowed for response to the action appealed from, if such time is later, file a brief in triplicate. The brief must be accompanied by the requisite fee and must set forth the authorities and arguments on which the appellant will rely to maintain the appeal. The brief must include a concise explanation of the invention which should refer to the drawing by reference characters, and a copy of the claims involved. Appellant must also indicate at the time of filing the brief if an oral hearing is desired. Upon a showing of sufficient cause, the commissioner may grant extensions of time for filing the brief. The determination of such requests may be delegated by the Commissioner to appropriate Patent and Trademark Office officials. All requests for extensions must be filed prior to the expiration of the period sought to be extended. The filing of a request for extension of time does not stay any period unless and until granted.

* * * * *

18. Section 1.196 is amended by revising paragraphs (b), (c) and (d) to read as follows:

§ 1.196 Decision by the Board of Appeals.

* * * * *

(b) Should the Board of Appeals have knowledge of any grounds not involved in the appeal for rejecting any appealed claim, it may include in the decision a statement to that effect with its reasons for so holding, which statement shall constitute a rejection of the claims. The appellant may submit an appropriate amendment of the claims so rejected or a showing of facts, or both, and have the matter reconsidered by the primary examiner. The statement shall be binding upon the primary examiner unless an amendment or showing of facts not previously of record be made which, in the opinion of the primary examiner, avoids the additional ground for rejection stated in the decision. The appellant may waive such reconsideration before the primary examiner and have the case reconsidered by the Board of Appeals upon the same record before them. Where request for such reconsideration is made the Board of Appeals shall, if necessary, render a new decision which shall include all grounds upon which a patent is refused. The appellant may waive reconsideration by the Board of Appeals and treat the decision, including the added grounds for rejection given by the Board of Appeals, as a final decision in the case.

(c) Should the decision of the Board of Appeals include an explicit statement that a claim may be allowed in amended form, appellant shall have the right to amend in conformity with such statement, which shall be binding on the primary examiner in the absence of new references or grounds of rejection.

(d) Although the Board of Appeals normally will confine its decision to a review of rejections made by the primary examiner, should it have knowledge of any grounds for rejecting any allowed claim that it believes should be considered, it may include in its decision a statement to that effect and remand the case to the primary

examiner for consideration thereof. In such event, the Board shall set a period, not less than one month, within which the appellant may submit to the primary examiner an appropriate amendment, or a showing of facts or reasons, or both, in order to avoid the grounds set forth in the statement of the Board of Appeals. If the primary examiner rejects the previously allowed claim or claims on the basis of such statement, the appellant may appeal to the Board of appeals from the rejection. Whenever a decision of the Board of Appeals includes a remand, that decision shall not be considered as a final decision in the case, but the Board of Appeals shall, upon conclusion of the proceedings before the primary examiner on remand, either adopt its decision as final or render a new decision on all of the claims on appeal, as it may deem appropriate.

19. Section 1.197 is amended by revising paragraphs (a) and (c) to read as follows:

§ 1.197 Action following decision.

(a) After decision by the Board of Appeals, the case shall be returned to the primary examiner, subject to the appellant's right of appeal or other review, for such further action by the appellant or by the primary examiner, as the condition of the case may require, to carry into effect the decision.

* * * * *

(c) Proceedings are considered terminated by the dismissal of an appeal or the failure to timely file an appeal to the court or a civil action (§ 1.304) except (1) where claims stand allowed in an application or (2) where the nature of the decision requires further action by the examiner. In such cases, the date of termination of proceedings is the date on which the appeal is dismissed or the date on which the time for appeal to the court or review by civil action (§ 1.304) expires. If an appeal to the court or a civil action has been filed, proceedings are similarly considered terminated when the appeal or civil action is terminated.

20. Section 1.231 is amended by revising paragraph (a)(1) to read as follows:

§ 1.231 Motions before the primary examiner.

(a) Within the period set in the notice of interference for filing motions any party to an interference may file a motion seeking:

(1) To dissolve as to one or more counts, except that such motion based on facts sought to be established by affidavits, declarations or evidence outside of official records and printed publications will not normally be considered. A motion to dissolve an interference in which a patentee is a party on the ground that the claims corresponding to the counts are unpatentable to the patentee over patents or printed publications will be considered through reexamination if it complies with the requirements of § 1.510(b) and is accompanied by the fee for requesting reexamination set in § 1.21(x). Otherwise, a motion to dissolve an interference in which a patentee is a party will not be considered if it would necessarily result in the conclusion that the claims of the patent which correspond to the counts are unpatentable to the patentee on a ground which is not ancillary to priority. Where a motion to dissolve is based on prior art, service on opposing parties must include copies of such prior art. A motion to dissolve on the ground that there is no interference in fact will not be considered unless the interference involves a design or plant patent or application or unless it relates to a count which differs from the corresponding claim of an involved patent or of one or more of the involved applications as provided in §§ 1.203(a) and 1.205(a).

* * * * *

21. Section 1.248 is revised to read as follows:

§ 1.248 Service of papers; manner of service; proof of service.

(a) Service of papers must be on the attorney or agent of the party if there be such or on the party if there is no attorney or agent, and may be made in any of the following ways:

(1) By delivering a copy of the paper to the person served;

(2) By leaving a copy at the usual place of business of the person served with someone in his employment;

(3) When the person served has no usual place of business, by leaving a copy at the person's residence, with some person of suitable age and discretion who resides there;

(4) Transmission by first class mail. When service is by mail the date of mailing will be regarded as the date of service.

(5) Whenever it shall be satisfactorily shown to the Commissioner that none of the above modes of obtaining or serving the paper is practicable, service may be by notice published in the *Official Gazette*.

(b) Papers filed in the Patent and Trademark Office which are required to be served shall contain proof of service. Proof of service may appear on or be affixed to papers filed. Proof of service shall include the date and manner of service. In the case of personal service, proof of service shall also include the name of any person served, certified by the person who made service. Proof of service may be made by (1) an acknowledgement of service by or on behalf of the person served or (2) a statement signed by the attorney or agent containing the information required by this section.

22. Section 1.291 is amended by revising the title, removing and reserving paragraph (b) and revising paragraph (c) to read as follows:

§ 1.291 Protests by public.

* * * * *

(b) (Reserved)

(c) Protests by the public and any accompanying papers should either (1) reflect that a copy of the same has been served upon the applicant in accordance with § 1.248 or (2) be filed with the Office in duplicate in the event service is not possible.

23. Section 1.301 is revised to read as follows:

§ 1.301 Appeal to U.S. Court of Customs and Patent Appeals.

Any applicant or any owner of a patent involved in a reexamination proceeding dissatisfied with the decision of the Board of Appeals, and any party to an interference dissatisfied with the decision of the Board of Patent Interferences, may appeal to the U.S. Court of Customs and Patent Appeals. The appellant must take the following steps in such an appeal: (a) In the Patent and Trademark Office give notice to the Commissioner and file the reasons of appeal (see §§ 1.302 and 1.304); (b) in the court, file a petition of appeal and a certified transcript of the record within a specified time after filing the reasons of appeal, and pay the fee for appeal, as provided by the rules of the court. The transcript will be transmitted to the Court by the Patent and Trademark Office on order of and at the expense of the appellant. Such order should be filed with the notice of appeal, but in no case should it be filed later than 15 days thereafter.

24. Section 1.303 is revised to read as follows:

§ 1.303 Civil action under 35 U.S.C. 145, 146, 306.

(a) Any applicant or any owner of a patent involved in a reexamination proceeding dissatisfied with the decision of the Board of Appeals, and any party dissatisfied with the decision of the Board of Patent Interferences, may, instead of appealing to the U.S. Court of Customs and Patent Appeals (§ 1.301), have remedy by civil action under 35 U.S.C. 145 or 146, as

appropriate. Such civil action must be commenced within the time specified in § 1.304.

(b) If an applicant in an ex parte case or an owner of a patent involved in a reexamination proceeding has taken an appeal to the U.S. Court of Customs and Patent Appeals, he or she thereby waives his or her right to proceed under 35 U.S.C. 145.

(c) If a defeated party to an interference proceeding has taken an appeal to the U.S. Court of Customs and Patent Appeals, and any adverse party to the interference shall, within twenty days after the appellant shall have filed notice of the appeal to the court (§ 1.302), file notice with the Commissioner that he or she elects to have all further proceedings conducted as provided in 35 U.S.C. 146, certified copies of such notices will be transmitted to the U.S. Court of Customs and Patent Appeals for such action as may be necessary. The notice of election must be served as provided in § 1.248.

25. A new "Subpart D—Reexamination of Patents" is added to read as follows:

Subpart D—Reexamination of Patents

Citation of Prior Art

Sec.

1.501 Citation of prior art in patent files.

Request for Reexamination

1.510 Request for reexamination.
1.515 Determination of the request for reexamination.
1.520 Reexamination at the initiative of the Commissioner.

Reexamination

1.525 Order to reexamine.
1.530 Statement and amendment by patent owner.
1.535 Reply by requester.
1.540 Consideration of responses.
1.550 Conduct of reexamination proceedings.
1.552 Scope of reexamination in reexamination proceedings.
1.555 Duty of disclosure in reexamination proceedings.
1.560 Interviews in reexamination proceedings.
1.565 Concurrent Office proceedings.

Certificate

1.570 Issuance of reexamination certificate after reexamination proceedings.

Subpart D—Reexamination of Patents

Citation of Prior Art

§ 1.501 Citation of prior art in patent files.

(a) At any time during the period of enforceability of a patent, any person may cite to the Patent and Trademark Office in writing prior art consisting of patents or printed publications which that person states to be pertinent and applicable to the patent and believes to have a bearing on the patentability of any claim of a particular patent. If the citation is made by the patent owner, the explanation of pertinency and applicability may include an explanation of how the claims differ from the prior art. Citations by the patent owner under § 1.555 and by a reexamination requester under either § 1.510 or § 1.535 will be entered in the patent file during a reexamination proceeding. The entry in the patent file of citations submitted after the date of an order to reexamine pursuant to § 1.525 by persons other than the patent owner, or a reexamination requester under either § 1.510 or § 1.535, will be delayed until the reexamination proceedings have been terminated.

(b) If the person making the citation wishes his or her identity to be excluded from the patent file and kept confidential, the citation papers must be submitted without any identification of the person making the submission.

(c) Citation of patents or printed publications by the public in patent files should either (1) reflect that a copy of the same has been mailed to the patent owner at the address as provided for in § 1.33(c); or in the event service is not possible (2) be filed with the Office in duplicate.

Request for Reexamination

§ 1.510 Request for reexamination.

(a) Any person may, at any time during the period of enforceability of a patent, file a request for reexamination by the Patent and Trademark Office of any claim of the patent on the basis of prior art patents or printed publications cited under § 1.501. The request must be accompanied by the fee for requesting reexamination set in § 1.21(x).

(b) Any request for reexamination must include the following parts:

(1) a statement pointing out each substantial new question of patentability based on prior patents and printed publications.

(2) An identification of every claim for which reexamination is requested, and a detailed explanation of the pertinency and manner of applying the cited prior art to every claim for which reexamination is requested. If appropriate the party requesting reexamination may also point out how claims distinguish over cited prior art.

(3) A copy of every patent or printed publication relied upon or referred to in paragraph (b) (1) and (2) of this section accompanied by an English language translation of all the necessary and pertinent parts of any non-English language patent or printed publication.

(4) The entire specification (including claims) and drawings of the patent for which reexamination is requested must be furnished in the form of cut-up copies of the original patent with only a single column of the printed patent securely mounted or reproduced in permanent form on one side of a separate paper. A copy of any disclaimer, certificate of correction, or reexamination certificate issued in the patent must also be included.

(5) A certification that a copy of the request filed by a person other than the patent owner has been served in its entirety on the patent owner at the address as provided for in § 1.33(c). The name and address of the party served must be indicated. If service was not possible, a duplicate copy must be supplied to the Office.

(c) If the request does not include the fee for requesting reexamination or all of the parts required by paragraph (b) of this section, the person identified as requesting reexamination will be so notified and given an opportunity to complete the request within a specified time. If the fee for requesting reexamination has been paid but the defect in the request is not corrected within the specified time, the determination whether or not to institute reexamination will be made on the request as it then exists. If the fee for requesting reexamination has not been paid, no determination will be made and the request will be placed in the patent file as a citation if it complies with the requirements of § 1.501(a).

(d) The filing date of the request is: (1) the date on which the request including the entire fee for requesting reexamination is received in the Patent and Trademark Office; or (2) the date on which the last portion of the fee for requesting reexamination is received.

(e) A request filed by the patent owner, may include a proposed amendment in accordance with § 1.121(f).

(f) If a request is filed by an attorney or agent identifying another party on whose behalf the request is being filed, the attorney or agent must have a power of attorney from that party or be acting in a representative capacity pursuant to § 1.34(a).

§ 1.515 Determination of the request for reexamination.

(a) Within three months following the filing date of a request for reexamination, an examiner will consider the request and determine whether or not a substantial new

question of patentability affecting any claim of the patent is raised by the request and the prior art cited therein, with or without consideration of other patents or printed publications. The examiner's determination will be based on the claims in effect at the time of the determination and will become a part of the official file of the patent and will be given or mailed to the patent owner at the address as provided for in § 1.33(c) and to the person requesting reexamination.

(b) Where no substantial new question of patentability has been found, a refund of a portion of the fee for requesting reexamination will be made to the requester in accordance with § 1.26(c).

(c) The requester may seek review by a petition to the Commissioner under § 1.181 within one month of the mailing date of the examiner's determination refusing reexamination. Any such petition must comply with § 1.181(b). If no petition is timely filed or if the decision on petition affirms that no substantial new question of patentability has been raised, the determination shall be final and nonappealable.

§ 1.520 Reexamination at the initiative of the commissioner.

The Commissioner, at any time during the period of enforceability of a patent, may determine whether or not a substantial new question of patentability is raised by patents or printed publications which have been discovered by the Commissioner or which have been brought to the Commissioner's attention even though no request for reexamination has been filed in accordance with § 1.510. The Commissioner may initiate reexamination without a request for reexamination pursuant to § 1.510. Normally requests from outside the Patent and Trademark Office that the Commissioner undertake reexamination on his own initiative will not be considered. Any determination to initiate reexamination under this section will become a part of the official file of the patent and will be given or mailed to the patent owner at the address as provided for in § 1.33(c).

Reexamination

§ 1.525 Order to reexamine.

(a) If a substantial new question of patentability is found pursuant to §§ 1.515 or 1.520, the determination will include an order for reexamination of the patent for resolution of the question. If the order for reexamination resulted from a petition pursuant to § 1.515(c), the reexamination will ordinarily be conducted by an examiner other than the examiner responsible for the initial determination under § 1.515(a).

(b) If the order for reexamination of the patent mailed to the patent owner at the address as provided for in § 1.33(c) is returned to the Office undelivered, the notice published in the *Official Gazette* under § 1.11(c) will be considered to be constructive notice and reexamination will proceed.

§ 1.530 Statement and amendment by patent owner.

(a) Except as provided in § 1.510(e), no statement or other response by the patent owner shall be filed prior to the determinations made in accordance with §§ 1.515 or 1.520. If a premature statement or other response is filed by the patent owner it will not be acknowledged or considered in making the determination.

(b) The order for reexamination will set a period of not less than two months from the date of the order within which the patent owner may file a statement on the new question of patentability including any proposed amendments the patent owner wishes to make.

(c) Any statement filed by the patent owner shall clearly point out why the subject matter as claimed is not anticipated or rendered obvious by the prior art patents or printed publications, either alone or in any reasonable combinations. Any statement filed must be served upon the reexamination requester in accordance with § 1.248.

(d) Any proposed amendments to the description and claims must be made in accordance with § 1.121(f). No amendment may enlarge the scope of the claims of the patent or introduce new matter. No amended or new claims may be proposed for entry in an expired patent. Moreover, no amended or new claims will be incorporated into the patent by certificate issued after the expiration of the patent.

(e) Although the Office actions will treat proposed amendments as though they have been entered, the proposed amendments will not be effective until the reexamination certificate is issued.

§ 1.535 Reply by requester.

A reply to the patent owner's statement under § 1.530 may be filed by the reexamination requester within two months from the date of service of the patent owner's statement. Any reply by the requester must be served upon the patent owner in accordance with § 1.248. If the patent owner does not file a statement under § 1.530, no reply or other submission from the reexamination requester will be considered.

§ 1.540 Consideration of responses.

The failure to timely file or serve the documents set forth in § 1.530 or in § 1.535 may result in their being refused consideration. No submissions other than the statement pursuant to § 1.530 and the reply by the requester pursuant to § 1.535 will be considered prior to examination.

§ 1.550 Conduct of reexamination proceedings.

(a) All reexamination proceedings, including any appeals to the Board of Appeals, will be conducted with special dispatch within the Office. After issuance of the reexamination order and expiration of the time for submitting any responses thereto, the examination will be conducted in accordance with §§ 1.104–1.119 and will result in the issuance of a reexamination certificate under § 1.570.

(b) The patent owner will be given at least 30 days to respond to any Office action. Such response may include further statements in response to any rejections and/or proposed amendments or new claims to place the patent in a condition where all the claims, if amended as proposed, would be patentable.

(c) The time for reply set in paragraph (b) of this section will be extended only for sufficient cause, and for a reasonable time specified. Any request for such extension must be filed on or before the day on which action by the patent owner is due, but in no case will the mere filing of the request effect any extension.

(d) If the patent owner fails to file a timely and appropriate response to any Office action, the reexamination proceeding will be terminated and the Commissioner will proceed to issue a certificate under § 1.570 in accordance with the last action of the Office.

(e) The reexamination requester will be sent copies of Office actions issued during the reexamination proceeding. Any document filed by the patent owner must be served on the requester in the manner provided in § 1.248. The document must reflect service or the document may be refused consideration by the Office. The active participation of the reexamination requester ends with the reply pursuant to § 1.535, and no further submissions on behalf of the reexamination requester will be acknowledged or considered. Further, no submissions on behalf of any third parties will be acknowledged or considered unless such submissions are (1) in accordance with § 1.510 or (2) entered in the patent file prior to the date of the order to reexamine pursuant

to § 1.525. Submissions by third parties, filed after the date of the order to reexamine pursuant to § 1.525, must meet the requirements of and will be treated in accordance with § 1.501(a).

§ 1.552 Scope of reexamination in reexamination proceedings.

(a) Patent claims will be reexamined on the basis of patents or printed publications.

(b) Amended or new claims presented during a reexamination proceeding must not enlarge the scope of the claims of the patent and will be examined on the basis of patents or printed publications and also for compliance with the requirements of 35 U.S.C. 112 and the new matter prohibition of 35 U.S.C. 132.

(c) Questions other than those indicated in paragraphs (a) and (b) of this section will not be resolved in a reexamination proceeding. If such questions are discovered during a reexamination proceeding, the existence of such questions will be noted by the examiner in an Office action, in which case the patent owner may desire to consider the advisability of filing a reissue application to have such questions considered and resolved.

§ 1.555 Duty of disclosure in reexamination proceedings.

The owner of a patent involved in a reexamination proceeding who is aware, or becomes aware, of patents or printed publications material to the reexamination which have not been previously made of record in the patent file must bring such patents or printed publications to the attention of the Office. A prior art statement, preferably in accordance with § 1.98, should be filed within two months of the date of the order for reexamination, or as soon thereafter as possible in order to bring such patents or printed publications to the attention of the Office.

§ 1.560 Interviews in reexamination proceedings.

(a) Interviews in reexamination proceedings pending before the Office between examiners and the owners of such patents or their attorneys or agents of record must be had in the Office at such times, within Office hours, as the respective examiners may designate. Interviews will not be permitted at any other time or place without the authority of the Commissioner. Interviews for the discussion of the patentability of claims in patents involved in reexamination proceedings will not be had prior to the first official action thereon. Interviews should be arranged for in advance. Requests that reexamination requesters participate in interviews with examiners will not be granted.

(b) In every instance of an interview with an examiner, a complete written statement of the reasons presented at the interview as warranting favorable action must be filed by the patent owner. An interview does not remove the necessity for response to Office actions as specified in § 1.111.

§ 1.565 Concurrent office proceedings.

(a) In any reexamination proceeding before the Office, the patent owner shall call the attention of the Office to any prior or concurrent proceedings in which the patent is or was involved such as interferences, reissue, reexaminations, or litigation and the results of such proceedings.

(b) If a patent in the process of reexamination is or becomes involved in interference proceedings or a reissue application is filed for the patent, or litigation is instituted, the Commissioner shall determine whether or not to stay the reexamination, reissue or interference proceeding. If reexamination is stayed for the conduct of a reissue proceeding, the reissue proceeding shall take into account prior art provided by the requester for reexamination and the reexamination requester will be granted at least the same degree of participation in the reissue proceeding which the requester would have had in the reexamination proceeding. Any reexamination proceeding stayed for the conduct of a reissue proceeding shall be terminated by the grant of the reissued patent.

(c) If reexamination is ordered while a prior reexamination proceeding is pending, the reexamination proceedings will be consolidated and result in the issuance of a single certificate under § 1.570.

Certificate

§ 1.570 Issuance of reexamination certificate after reexamination proceedings.

(a) Upon the conclusion of reexamination proceedings, the Commissioner will issue a certificate in accordance with 35 U.S.C. 307 setting forth the results of the reexamination proceeding and the content of the patent following the reexamination proceeding.

(b) A certificate will be issued in each patent in which a reexamination proceeding has been ordered under § 1.525. Any statutory disclaimer filed by the patent owner will be made part of the certificate.

(c) The certificate will be mailed on the day of its date to the patent owner at the address as provided for in § 1.33(c). A copy of the certificate will also be mailed to the requester of the reexamination proceeding.

(d) If a certificate has been issued which cancels all of the claims of the patent, no further Office proceedings will be conducted with regard to that patent or any reissue applications or reexamination requests relating thereto.

(e) If the reexamination proceeding is terminated by the grant of a reissued patent as provided in § 1.565(b), the reissued patent will constitute the reexamination certificate required by this section and 35 U.S.C. 307.

(f) A notice of the issuance of each certificate under this section will be published in the *Official Gazette* on its date of issuance.

Dated: May 12, 1981.

Rene D. Tegtmeyer,

Acting Commissioner of Patents and Trademarks.

Dated: May 15, 1981.

Robert B. Ellert,

Acting Assistant Secretary for Productivity, Technology and Innovation.

Part V

Department of Health and Human Services

Social Security Administration

Disability Insurance and Supplemental Security Income; Determinations of Disability

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Social Security Administration

20 CFR Parts 404 and 416

Disability Insurance and Supplemental Security Income; Determinations of Disability

AGENCY: Social Security Administration, HHS.

ACTION: Final rules.

SUMMARY: These regulations for administering the disability determination function implement section 304 of Pub. L. 96-265 (the "Social Security Disability Amendments of 1980") which amends section 211 of the Social Security Act.

The disability determination function was previously carried out by the States and the Federal Government under negotiated agreements between the Social Security Administration (SSA) and States. The law provides that, effective June 1, 1981, disability determinations will be made by the State agencies in compliance with regulations containing performance standards and other administrative requirements and procedures relating to the disability determination function. States have the option of turning the function over to the Federal Government if they do not wish to make disability determinations and the Federal Government has the authority to partially or wholly assume the disability determination function of any State that does not meet the prescribed minimum performance standards.

These regulations specify the responsibilities of the Secetary and the States in administering the disability program. They prescribe standards for accuracy of performance and processing time that State agencies must meet in making disability determinations, and provide the administrative requirements and procedures SSA and the State agencies will follow in carrying out the disability determination function. Provisions are included specifying how SSA or a State may terminate the State agency's performance of this function.

The primary purpose of these regulations is to improve the quality of State agency performance in following our adjudicative criteria and to improve the timeliness of disability determinations. These regulations will afford the States maximum practicable management flexibility in meeting objectives.

These regulations do not meet the criteria for a major rule, as defined in Executive Order 12291.

DATE: These regulations will be effective June 1, 1981.

FOR FURTHER INFORMATION CONTACT: Harry J. Short or William J. Ziegler, Legal Assistants, Office of Regulations, Social Security Administration, 6401 Security Boulevard, Baltimore, Maryland 21235, telephone 301-594-7337 or 301-594-7415.

SUPPLEMENTARY INFORMATION: In order to obtain the public's views and comments before proceeding with these amendments, we published proposed rules for making disability determinations along with a Notice of Proposed Rulemaking in the **Federal Register** on January 16, 1981 (46 FR 4584). Interested persons, organizations, government agencies, and groups were invited to submit data, views, or arguments pertaining to the proposed amendments within a period of 60 days from the date of publication of the notice. We have carefully considered all the comments we received during the comment period. We have answered the issues raised in these comments later in the preamble.

Federal-State Structure Before Public Law 96-265

The disability programs under title II and title XVI of the Social Security Act (The Act) were previously administered under a Federal-State mechanism having its origins in the disability freeze provisions of the 1954 Amendments to the Act. At that time, Congress specified that determinations of disability should be made by State agencies under agreement with the Secretary. Wherever possible the State rehabilitation agency was to be the contracting agency to encourage rehabilitation contacts by disabled persons and to take advantage of the medical and vocational expertise of those agencies.

Negotiated agreements were previously in effect for 54 State agencies for making disability determinations for claimants applying for disability benefits under title II and title XVI of the Act. The agreements covered all the States plus the District of Columbia, Puerto Rico, and Guam; in South Carolina there were separate agencies for the blind and the disabled.

Under these agreements the State agencies, on behalf of the Secretary of Health and Human Services, made determinations of disability on the basis of standards and guides issued by SSA. SSA paid 100 percent of the costs incurred by the States in performing this function. The State agency function included obtaining medical and vocational evidence from the applicant and his or her medical treatment sources, and where necessary, arranging for one or more examinations of the applicant by specialists. Each determination of disability was made by a team consisting of a disability examiner and a physician on the State agency staff.

Section 221(a) of the Act provided that the determination of whether a person was disabled, and when a disability began and ended, would be made by a State agency under an agreement between the State and the Secretary and that, for purposes of the Act, determinations by the State are determinations of the Secretary. Section 1633(a) of the Act authorized the Secretary to make the same arrangements for title XVI purposes. Section 221(c) provided that the Secretary, on his own motion, could reverse the State's determination that a person was disabled, or could determine that a disability began later or ended earlier than the State had determined. In other important respects, the Act generally limited the Secretary's authority to make disability determinations. By precluding the Secretary from reaching a more favorable finding on a disability issue in reviewed cases, it gave the State what amounted to final authority in many cases for determining which applicants were disabled and, consequently, to a large extent how the SSA program was administered.

In 1976, the General Accounting Office (GAO) studied the effectiveness of SSA's management of the disability determination process in State agencies. GAO issued a report criticizing the quality and uniformity of the disability determination process. GAO recommended that SSA adopt a stronger and more active management role and that SSA revise the Federal-State agreements to clearly define the responsibilities of each party consistent with a uniform disability determination process. Papers prepared by the staff of the Subcommittee on Social Security for the use of the Committee on Ways and Means also recommended stronger Federal control.

The Federal-State model agreement was therefore revised. The revised model agreement reflected SSA's intentions to administer the program through standards, to take a lead role in assuring uniform training of State agency personnel, and to deal with those State practices that over the years had become impediments to effective administration.

SSA tried to get all the States to enter into the new agreement during the summer and fall of 1978, but

considerable resistance was encountered. The revisions in the agreement were viewed by various State officials and organizations as interfering with traditional State prerogatives to manage their own affairs. This concern is reflected in the fact that only 21 of 54 State agencies signed the new agreement.

Public Law 96–265—Section 304

General

Congress amended the Act to increase the Secretary's ability to influence State performance. The Secretary is required to establish, by regulation, whatever standards of performance and administrative requirements and procedures he considers necessary for the States to follow to insure effective and uniform administration of the SSA disability programs. Section 221(a), amended by Pub. L. 96–265, provides that beginning June 1981, disability determinations will be made by the State unless it notifies the Secretary, in writing, of its wishes to no longer make the determinations, and if the Secretary has not found that the State has failed to make determinations consistent with standards to be prescribed by the Secretary. Section 221(c) authorizes the Secretary to review State determinations and, based on the review, to make findings as to whether a person is or is not disabled and, if disabled, whether the disability began on an earlier or later date or ended on an earlier or later date than that determined by the State.

The amendments also provide that a State which wishes to discontinue making disability determinations or is found to be failing to make disability determinations as prescribed by standards, must continue to make the determinations for at least 180 more days. The Secretary is required to make the disability determinations thereafter. The Secretary is further required to develop and initiate a plan for the partial or complete assumption of a State's disability determination function if such a step becomes necessary. The plan must provide for the continuation of the disability determination function and for the protection of any affected State employees. The Secretary must give preference to capable State employees in filling appropriate employment positions, and may not assume a State's function until the State has made a fair and equitable arrangement to protect the rights of displaced State personnel (with some limited exceptions) not hired by the Secretary. (The Secretary of Labor will determine if this has been done.) The Secretary is directed to advise the Congress of any amendments of Federal law and regulations needed to carry out the plan. A report containing the plan was submitted to Congress on November 20, 1980.

The amendment also place responsibility upon the Secretary to provide for the continued effective operation of the disability program in the event of the non-participation of one or more States. This is to be done with only limited time to prepare for the State's non-participation and the need to assure protection of the employment rights of the displaced State personnel before the Secretary can assume the State's function.

Specific Provisions of the Law Subject to Regulations

Public Law 96–265 eliminates the system of negotiated agreements between the Secretary and the States and requires the Secretary to establish, through regulations, the procedures and performance standards for the State disability determination function in whatever detail appears appropriate.

The law gives the Secretary broad discretion to determine, for example, what matters to regulate, in how much detail to regulate them, and whether to regulate or to issue "other written guidelines." The Secretary may regulate such matters as:

- The administrative structure and the relationship between various units of the State agency;
- The physical location of, and relationship among, agency staff units and other organizations performing tasks for the State agency;
- Standards for the availability to applicants and beneficiaries of facilities for making disability determinations;
- State agency performance criteria, including the rate of accuracy of decisions and the time periods within which determinations must be made;
- The procedures for and the scope of review by the Secretary and, as he finds appropriate, by the State, of its performance in individual cases and classes of cases;
- Rules governing access of appropriate Federal officials to State offices and to State records relating to its administration of the disability determination function;
- Fiscal control procedures that the State agency may be required to adopt; and
- The submission of reports and other data, in such form and at such time as the Secretary may require, concerning the State agency's activities relating to the disability determination function.

Congressional Concerns

In its deliberation during the development of Pub. L. 96–265, Congress was aware of the problems in the existing Federal-State structure.

It felt that significant improvement in Federal management and control was necessary and that the amendments would strengthen the Federal role in how disability determinations are made in the State agencies.

Congress recognized the possibility that under Pub. L. 96–265 some States may decide not to participate under the program, or that the Secretary may determine that a State is not complying with the regulatory requirements promulgated under this legislation. It was concerned that there be adequate procedures to establish Federal administration if State administration ended for either reason. Two issues were of particular concern: the potential disruption of the ongoing determination process which could create hardship for disability applicants, and the positions of the State employees involved.

Congress concluded that the Department did not appear to have any extensive planning for Federal assumption of the State agencies' functions. Therefore, to stimulate planning for such a contingency, Pub. L. 96–265 required that the Secretary submit to Congress a detailed plan of how the Secretary expects to assume the functions and operations of a State disability determination function should it become necessary. The plan is to assume the uninterrupted operation of the disability determination process, including the utilization of the best-qualified personnel to carry out this function. Congress also required that the Department give a preference in hiring to the best-qualified State employees so that they would not be substantially disadvantaged in transferring to Federal employment, in the event that a State quits or is terminated for poor performance. A report containing the detailed plan was submitted to Congress on November 20, 1980.

Basic Considerations for Assuming State Functions

If a State chooses to stop making disability determinations, or if the Secretary finds it necessary to assume the function because a State fails to meet the standards, several legislated requirements and responsibilities will govern the Secretary's action.

A. Requirements

Public Law 96–265 imposes four conditions on the Secretary's

assumption of the disability determination function. These are:

1. The Secretary must assume the disability determination function no earlier than 180 days after a finding that the State is substantially failing to make disability determinations consistent with the statute and regulations or after receipt of a State's notice of its intentions to stop making disability determinations;

2. The Secretary's assumption must be made without any interruption in services to the residents of the State;

3. The Secretary must, in filling appropriate employment positions, give hiring preference to State agency employees (with some very limited exceptions) who are capable of performing duties in the disability determination process for the Secretary; and

4. The Secretary may not assume a State's function until after the Secretary of Labor has determined that the State has made fair and equitable arrangements under applicable law to protect the interests of those State agency employees who will be displaced from their employment on account of the Secretary's assumption and who will not be hired by the Secretary.

B. Responsibilities

When the Secretary has determined that a State agency's function must be terminated or when a State decides to stop making disability determinations, the Secretary of HHS, the State, and the Secretary of Labor must fulfill certain responsibilities.

1. The Secretary of HHS's responsibilities are to:

a. Begin making disability determinations no sooner than 180 days after notice that a State agency's disability determination function will end;

b. Develop and initiate procedures to give hiring preference to State agency employees who are capable of performing duties in the disability determination process; and

c. Insure that the Secretary of Labor has determined that the State has made fair and equitable arrangements for any State agency employees who will be displaced by the assumption and who will not be hired by the Secretary.

2. The terminating State's responsibilities are to:

a. Continue making disability determinations for not less than 180 days after a termination notice, or until the Secretary has fulfilled his responsibilities; and

b. Make fair and equitable arrangements to protect the interests of State agency employees who will not be hired by SSA. Employees' interests must be protected in accordance with applicable Federal, State, and local statutes.

3. The Secretary of Labor's responsibility is to determine that the State has made fair and equitable arrangements for protecting State personnel.

State Involvement in Development of the Regulations

In January 1980, SSA convened a two-day work group meeting of SSA central and regional office and State personnel to give us their views on developing the performance standards required by the disability bill. This work group developed some tentative guides for such performance standards.

During the summer of 1980, SSA invited to the headquarters in Baltimore, all of the Disability Determination Services (DDS) administrators, and in a series of four meetings, plans for issuing regulations under Pub. L. 96-265 were discussed. These were meetings in which the DDS administrators had an opportunity to comment on the general direction of our plans and to offer specific suggestions for the scope of the regulations. The reactions of these State administrators were considered in developing the regulations, and a number of significant changes resulted from their recommendations.

Our Basic Implementation Approach

It is our intention to use these regulations and the statutory authority derived from Pub. L. 96-265 to improve the overall administration and delivery of the disability program. We will accomplish these improvements by:

1. Setting a targeted level of performance that we will work toward;

2. Creating a system of intermediate goals to serve as stepping stones to progress towards our targeted level of performance;

3. Establishing a threshold level clearly defining the lowest level of acceptable performance by a State agency;

4. Setting forth those actions that we will take to make sure unacceptable performance does not continue; and,

5. Establishing administrative requirements that will provide the States with management flexibility, establishing the framework for the Federal-State partnership, and at the same time, allow us to retain our program stewardship responsibilities.

The regulations use standards as the means to improve the disability determination process.

We will specify the outcome expected. We will carefully monitor the States' disability determination process in terms of performance accuracy and processing time. The States will have control over management of their operation as long as performance is adequate under the standards which we set.

If a State's performance becomes unacceptable, these regulations provide for Federal involvement in the State's activities in making disability determinations for the purpose of improving the State's performance. We have a responsibility under the law for seeing that the disability programs are efficiently and equitably administered. If, even after our assistance, a State's performance is not adequate, we will take action to take over the disability program from the State.

While we are using regulations to establish national standards for performance accuracy and processing time, we will also be considering establishing standards for cost and other factors including incentives and disincentives. We will continue to assure the fiscal integrity of the States' operations through the budget process. Individual State budgets, including the goals they are expected to achieve, will continue to be negotiated on the regional level and in the manner we require. The objective of negotiations will be to determine a level of funding within available resources that will be perceived by Federal and State officials as sufficient to meet standards and stated goals. The negotiated budget is an integral part of the decision of setting goals. States will be expected to meet standards and goals within the negotiated budget.

The Target Level

We have developed target levels for State agency combined title II and title XVI initial accuracy, title II initial processing time, and title XVI processing time. The values selected for the target levels represent a difficult challenge but are designed to reflect what we believe to be a level of performance and service delivery that we should constantly strive to attain.

Intermediate Goals for State Performance Between the Target and Threshold Levels

We will establish intermediate performance goals between the threshold standards and the target standards in order to assure continued movement toward our targeted level of performance. We see these goals as essential to improving the overall performance of State agencies. This will therefore be an area of continuing

concern to us. After negotiating with each State agency, our regional offices will annually establish a new set of individual State agency goals to help them move from current levels of performance to target levels. Failure to meet these intermediate goals will not be cause for considering a State to be substantially failing to comply with the regulations. However, such failure will be a matter of concern to us. It may result in our urging the State to take corrective action and accept our offer of technical and management assistance.

The Threshold Levels

We are also establishing threshold levels for State agency performance accuracy and processing time. These are minimum acceptable levels for combined title II and title XVI initial performance accuracy, title II initial processing time, and title XVI initial processing time. We established the threshold levels for processing time and performance accuracy by using the national mean and applying a measurement of one standard deviation from the mean. (A standard deviation is a mathematical way of measuring the variability of items around an average.) Data from the fiscal year ending September 30, 1979 was used to establish the levels. Falling below these threshold levels will be unacceptable and will mandate appropriate action on our part to improve the situation. These actions are set forth in §§ 404.1650 and 416.1050. We will reexamine the threshold levels annually, but we will not make changes or modifications automatically. Instead, any decision to adjust the prevailing threshold standards will be made based on current State performance, procedural changes, systems modifications and resources.

In making any changes in the threshold levels we will continue to use the mean and standard deviation approach. In §§ 404.1640 through 404.1650 and in §§ 416.1040 through 416.1050, we explain how the threshold standards are used by us in evaluating State performance.

Determining Performance Accuracy

"Performance accuracy" refers to the reliability of State agency adjudication. In determining a national standard for State agency performance accuracy for purposes of section 304, we consider not only whether disability decisions are right or wrong for payment, but also whether the claims have all the desired evidence and whether all factors contributing to a sound decision were considered. Accordingly, the percentage of cases that can be processed without being returned to the State agency for further development or for correction of decisions based on evidence in the file represents the State agency's performance accuracy rate. The State agency's original decision is not changed in the majority of cases that are returned for additional development.

Errors in performance accuracy identified by the quality assurance system should not be interpreted as exclusively reflecting decisions that either incorrectly deny or award benefit payments. Since the quality assurance system measures factors that have the potential for impacting decisions as well as the correctness of the decisions, the rate of incorrect decisions is significantly lower than what is reflected in the standards cited in these regulations. Nevertheless, we believe we must measure accuracy using a higher standard than correct decisions.

Our most current data indicates that with a national level of performance accuracy of about 93 percent the rate of correct decisions is approximately 97 percent. Since decisional accuracy is tied to performance accuracy, the system we are establishing, to use goals and standards to improve performance, will also improve decisional accuracy. We estimate that our target level of 97 percent performance accuracy will yield a decisional accuracy rate of 99 percent.

Performance Accuracy Threshold Level

The national performance accuracy threshold level was established using fiscal year 1979 State-by-State title II and title XVI performance accuracy rates for disability determinations at the initial (first) level of adjudication. These data were obtained from the Disability Quality Assurance System. A combined Title II and title XVI national mean and standard deviation were calculated together. Separate calculations were not made for each title as they were for processing time. The national mean was formulated using the individual State agency fiscal year 1979 performance accuracy rates. The title II initial performance accuracy rates and the title XVI initial performance accuracy rates were statistically weighted by workload size for each individual State agency. A national mean was then computed for combined title II and title XVI initial performance accuracy. The combined title II and title XVI initial performance accuracy national mean for fiscal year 1979 resulted in a rate of 92.5 percent. The standard deviation was caluculated and resulted in a rate of 1.9 percent.

The threshold level for State agency performance accuracy has been established at one standard deviation below the national combined title II and title XVI initial performance accuracy mean. This threshold level was set after considering historical trends in State agency performance accuracy, past performance, and statistical theory. In addition, the selection of the threshold level was dependent upon our staffing and fiscal capacities for providing necessary technical and management assistance to State agencies whose performance is likely to fall below the threshold levels. Applying the one standard deviation measurement to the fiscal year 1979 national combined title II and title XVI performance accuracy mean, the threshold is 90.6 percent for combined title II and title XVI initial performance accuracy.

Determining Processing Time

State agency processing time for title II initial disability claims is the average number of days from the time the State agency receives the claim until the determination is put into the Social Security Administration Case Control System (SSACCS). Saturdays, Sundays, and holidays are counted.

State agency processing time for title XVI initial disability claims is the average number of days from release of the claim by the social security district office to the State agency until the determination by the State agency is put into the Supplemental Security Income Case Control System (SSICCS). Saturdays, Sundays and holidays are counted.

Determining Processing Time Threshold Levels

Processing time threshold levels were formulated using fiscal year 1979 State-by-State title II and title XVI mean processing time data for disability determinations at the initial (first) level of adjudication. These data were obtained from the Social Security Administration Case Control System (SSACCS) for title II and the Supplemental Security Income Control System (SSICCS) for title XVI. National means and standard deviations were calculated separately for title II and title XVI from these data. The national means were calculated using two steps.

First, the fiscal year 1979 mean processing time was established for each State agency by taking the average of the 12 monthly State agency processing time means. Then, the average of the individual State agency means was calculated to produce the national mean. This two-step process was applied separately to title II data and on title XVI data and resulted in the following national means:

Title II initial processing time—43.2 days.

Title XVI initial processing time—54.3 days.

The standard deviations for initial title II and title XVI fiscal year 1979 processing time data were calculated using established statistical techniques and resulted in the following:

Title II initial processing time—6.3 days.

Title XVI initial processing time—7.6 days.

The threshold levels for State agency processing time have been set at 1 standard deviation above the fiscal year 1979 national mean processing time. This decision was based on past State agency processing time, historical trends in State agency processing time, and statistical theory. In addition to mathematical and statistical considerations, the 1 standard deviation level was established based on our fiscal and staffing capabilities for providing necessary technical and management assistance to State agencies whose performance is likely to fall below the threshold levels. Applying the 1 standard deviation measurement to the fiscal year 1979 national processing time means, the thresholds are as follows:

Title II initial processing time—49.5 days.

Title XVI initial processing time—57.9 days.

The title XVI processing time threshold was reduced by 4 days to account for a computer systems modification which was activated in May 1979. This change stopped the measurement of State agency processing time when a State agency presumptive disability determination was put into SSICCS, rather than when the final decision was made. (A finding of presumptive disability is made before obtaining the evidence needed for a final determination when there is a high degree of probability of disability on the basis of the evidence available at the time.) After extensive study, it was determined that this modification lowered State agency title XVI initial mean processing time by 4 days on the average.

Target Levels and Intermediate Goals

Target levels represent the highest level of performance and service delivery presently achievable. They will, by their very nature, challenge nearly all agencies to improve. Each year each State is expected to make progress toward the target. The extent of progress will be negotiated annually on the regional level as part of the State agency budget process.

Other than the annually negotiated goal, there is no time frame for meeting the target. States will always be constrained by workloads, availability and competency of staff, and available money.

Technical and Management Assistance

We will do ongoing monitoring to evaluate State agency performance of combined title II and title XVI initial performance accuracy, of title II initial processing time, and title XVI initial processing time. The monitoring will allow us to determine whether a State agency needs technical and management assistance. A State agency will be provided mandatory assistance if it fails to meet two of three established threshold levels (one being accuracy) for two consecutive quarters. Failure to meet any one of the threshold levels for 2 consecutive quarters may result in mandatory technical and management assistance.

A State agency will be offered optional technical and management assistance when (1) our regular monitoring reveals State agency performance has significantly declined although not so low as to require mandatory assistance or (2) the State agency is failing to meet intermediate goals. We will offer optional assistance at our discretion based on our available resources. The technical and management assistance we will give a State agency is explained in §§ 404.1661 and 416.1061.

Substantial Failure

If a State agency substantially fails to make disability determinations consistent with the Secretary's regulations and other written guidelines, Pub. L. 96–265 requires the Secretary (after giving the State notice and an opportunity for a hearing) to make the disability determinations.

Our approach will be to closely monitor and evaluate State agency performance of title II and title XVI performance accuracy, title II processing time, and title XVI processing time. If a State agency is falling below 2 of the 3 threshold levels (one of which must be accuracy) for 2 consecutive quarters, we will provide technical and management assistance to the State agency for up to 12 months. After the assistance period, the State agency will have a 3-month adjustment period. After the adjustment period, if the State agency again falls below 2 of the 3 threshold levels (one being accuracy) in 2 consecutive quarters, during the next 12 months, we will notify the State that the State agency is in danger of being found to be in substantial failure and give the State an opportunity for a hearing. If it is found that the State substantially failed to comply with the regulations and written guidelines, the Secretary must take over the disability determination function. We are considering expanding the concept of "substantial failure" to include compliance with standards other than those relating to accuracy and processing time. We explain "substantial failure" in more detail in §§ 404.1670 through 404.1675 and in §§ 416.1070 through 416.1075.

Right to Hearing

We will notify a State that we are proposing to terminate its performance of the disability determination function if it is substantially failing to make disability determinations consistent with our regulations. The State will have an opportunity for a hearing before any termination. The hearing will be conducted as described in §§ 404.1680 through 404.1683 and in §§ 416.1080 through 416.1083.

Administrative Requirements and Procedures

Basically, our implementation approach is to specify certain performance results and let the States perform through their best management procedures with minimum Federal involvement as long as their performance is acceptable.

Accordingly, we are regulating administrative areas only to the extent necessary to insure effective stewardship of the disability program. This is a significant shift in our administrative relationship with the States under the agreements. We explain administrative requirements and procedures in §§ 404.1620 through 404.1633 and in §§ 416.1020 through 416.1033. Specifically, here is what we are proposing to do, and not do, in the regulations with respect to the various administrative areas that have to be addressed.

Adjudication

The State will make disability determinations in initial, reconsideration, and continuing eligibility cases under the various provisions of the Act.

A State disability examiner and medical consultant team will make these determinations. However, we do not propose regulating the types of positions to be established beyond the adjudication team.

In making determinations, the State will use our forms and procedures and adhere to the policies we may require to insure uniform and effective

administration of the disability program throughout the United States.

However, we are not proposing to regulate the internal case flow procedures except where they appear to contribute to unacceptable performance by a State.

Organization

The State will be expected to provide an organizational structure, sufficient qualified personnel, medical consultative services, and a quality assurance function that will result in timely processing and accurate decisionmaking of disability claims. We will not impose requirements, either through regulations or other directives, for a specific organizational structure unless State performance approaches unacceptable levels. We also do not propose to regulate the place in the State hierarchy of the State agency, or the relation of the State agency to other components in State government. The State will be responsible for producing an accurate and timely disability decision.

Personnel

In general, the State will be responsible for establishing positions, recruitment, selection, tenure, compensation, and staff development policies. The State will insure an acceptable level of competency of all employees through selection, ongoing training and staff development. However, we will provide technical training materials. We will become further involved only when State performance approaches unacceptable levels, or where the State requires complex instructional or training materials or the capacity of the State to deliver adequate training is in doubt. The State will make personnel available to attend meetings or conferences as may be necessary for furthering the purpose of the disability programs. The State must comply with equal employment opportunity directives in making disability determinations as specified in executive orders or the Code of Federal Regulations.

To the extent that Federal funding is available, the State will contribute to the processing of disability claims by avoiding, to the extent feasible and permissible under State law, personnel freezes, restrictions against overtime work, or other curtailment of facilities or activities.

Facilities

To the extent that Federal funding is available, the State will provide space, equipment, supplies and other services as will contribute to the timely and accurate processing of disability claims. The State will determine the locations where disability determinations are to be made. However, the State will provide the Secretary with access to the premises for the purpose of inspecting the work and activities required by these regulations. We will always give the State reasonable notice of the times of our visits.

Medical and Other Purchased Services

The State will determine the rates of payment to be used in arranging for medical or other examinations necessary to make determinations of disability. These rates should be designed to aid in the procurement of needed services but may not exceed the highest rate paid by Federal or other agencies in the State for the same or a similar type of service. The State will maintain documentation to support the rates of payment it uses.

Records and Reports

The State will furnish schedules, financial and cost reports, and other reports relating to the administration of the disability program that we may require. Records relating to the work being performed under these regulations will be retained by the State for a period of time specified by us. We will have access to these records for purposes of monitoring, research and development, and audit.

Research and Demonstration Projects

We will request State participation in federally funded research and demonstration projects to assess the effectiveness of the disability program and to ascertain the effect of program policy changes. Where we determine that participation is necessary for the project to be complete, e.g., to provide national uniformity in a claims process, State participation will be mandatory.

Fiscal

We will provide the State with funds in advance or by way of reimbursement for necessary costs incurred by the State in making disability determinations under these regulations. The State will submit estimates of anticipated costs for the periods, and at the time and in the manner we may request. After considering all pertinent information, we will notify the State of the amount which will be made available to it for the period, as well as what anticipated costs are being approved. The State will not incur or make expenditures for the period for items which we do not approve, or in excess of the amount we certify as available.

After the close of a period for which funds have been certified to the State, the State will submit a certified report of its actual expenditures. We will inform the State by audit whether expenditures were necessary and proper under standards in effect at the time expenditures were made or incurred. The standards may be found in subpart 1-15.7 of part 1-15 of the Federal Procurement Regulations (41 CFR 1-15.7) and in the Disability Insurance section of the Program Operations Manual System (POMS).

Any monies we pay to the State which are used for purposes not within the scope of these regulations will be paid back to the Treasury of the United States.

Considerations in Developing Standards

Performance Standards

Our primary considerations are related to fostering improvement in the adjudication process. In developing performance threshold levels, we took a middle of the road approach. We considered setting the threshold higher, but rejected it as imposing an unrealistic demand on States in the beginning stages of our changed relationship with the States. We also considered setting the threshold low, but dropped the option as doing little more than reinforcing the status quo. Our middle of the road approach will mean providing technical and management assistance to possibly 13 States with 2 of them likely to be in substantial failure.

Administrative Standards

Again our approach is moderate. We have elected to regulate only to the extent necessary to insure the Secretary's responsible stewardship and foster effective and uniform administration of the program. The proposed regulations on travel, training, access, records and reports, fiscal, and research and demonstration projects are examples in point.

We decided not to regulate specifically in more areas as inconsistent with our objective of giving the States management flexibility. On the other hand, we opted against regulating less specifically as failing to carry out our statutory mandate to assure effective and uniform administration of the disability insurance program throughout the United States.

Public Comments

We published proposed rules for making determinations of disability along with a Notice of Proposed Rulemaking in the **Federal Register** on

January 16, 1981 (46 FR 4584). We asked interested persons, organizations, government agencies, and other groups to give us their views, data, arguments, and evaluations within a period of 60 days. The comment period closed on March 17, 1981.

In the preamble of the Notice of Proposed Rulemaking (46 FR 4589), we invited comments from the State administrators and State employees now involved in the disability programs, employee unions, law and legal service groups, the disabled population and the organizations which represent them, and the public at large. As part of our outreach efforts, we mailed copies of the proposed rules to national organizations and asked them to give us their comments. Our mailing list included the State agency administrators of the 54 State agencies responsible for making title II and title XVI disability determinations, State agency directors responsible for overseeing the activities of the disability determination services (DDS) in the various State agencies, and the Council of State Administrators of Vocational Rehabilitation. In addition, copies were mailed for comment to national organizations representative of disabled persons, their advocates, and service providers as well as to law and legal service organizations.

We received comments from twelve individual State administrators and from the National Association of Disability Examiners on behalf of its members. These are the people directly affected by the proposed regulations.

We received no comments from disabled persons individually or organizations that represent them exclusively. We did receive comments from two national legal organizations, including a subcommittee of the American Bar Association, and legal services groups in seven States who represent the disabled among their clientele.

Overall, State agency administrators and disability examiners support our proposed approach. State agency administrators commented: "SSA's general philosophy of requiring a high level of performance from State agencies while not substantially interfering with State management function is sound", "this approach should offer the best opportunity for improving the uniformity and timeliness of adjudication while preserving the State/Federal partnership", and "the proposed rules are a positive step in the right direction." On the other hand, the State agency administrators urged that the regulations recognize the need for a State-run quality assurance system, questioned the data we would be using to measure State performance, and voiced fears that neither the State nor the Federal Government would provide the resources they needed to meet the proposed performance objectives. The professional association of disability examiners commended us "on an excellent effort to write regulations administering the disability determination function" and, further, "in practically all instances, we do not have any disagreements with the proposed regulations." They did request, however, that the professionalism of the disability examiner be recognized in the regulations. They also expressed concern that employees not be disadvantaged in the event of a Federal assumption of the disability determination function. Further, they urged that the regulations demand more of the State in assuring a working environment of adequate staff and facilities conducive to delivery of a high level of service to the claimants.

The two national legal organizations and the legal services groups, while supporting our intentions, have misgivings about whether our regulations will in fact improve the quality of the decision making process. Quoting the experience of their members in representing disabled claimants, these groups cite the high reversal rate upon appeal as indication of poor development and decision making by the State agencies. They question the quality of the medical evidence purchased by the State, the perceived reluctance of the State to develop the claim fully, and delays in claims processing. They see our proposed performance standards as unresponsive to these problems.

Because Pub. L. 96–265 requires the publication of final regulations in the **Federal Register** by June 1, 1981, we had to limit our consideration to comments which were received by March 17, 1981, the date the comment period closed. However, all the comments which we received after that date, as well as any additional comments which we may later receive, will be carefully evaluated for the purpose of considering possible future revisions in these regulations. Any future revisions we make of a substantive nature will be published in the **Federal Register** with another Notice of Proposed Rulemaking with another opportunity for the public to comment.

In drafting these regulations we had certain objectives in mind:

To improve disability determinations so as to pay benefits only to people properly entitled.

To improve the timeliness of disability determinations.

To improve the management of the disability program both at the State and Federal levels.

To avoid, where possible, increasing administrative complexity and costs.

To preserve the basic Federal/State relationship.

These objectives also guided us as we evaluated the comments received from the public. Some of the comments were not germane to these particular regulations. These comments are not addressed in the preamble. Other comments are condensed, summarized or paraphrased. However, we have responded to each of the issues raised in comments that are germane to these regulations. Of the comments that were germane, some involved hard choices between competing objectives.

For ease of comprehension and for perspective, we have grouped comments according to the issues raised. The issues and our responses are presented in the order in which the regulations are organized.

General Provisions

Issues

Four writers suggested revising the basic responsibilities for SSA and the State. One said there appears to be an imbalance of responsibilities, with the State having the greater responsibility. The same writer said that many of the requirements are vague and ambiguous and should be clarified, especially the State's responsibility for providing adequate facilities and qualified staff. One commenter said that the regulations should contain an absolute requirement that we consult with States before we issue any regulations or guidelines. A writer said that the regulations should provide that SSA should not arbitrarily increase its review of a particular State agency. Another writer said that the responsibility for States to treat all applicants equally and courteously should be deleted because it is subject to broad interpretations and opens the door for litigation against State agency personnel.

Response

Since the purpose of these regulations is to provide rules by which States will carry out the disability determination function, it is necessary that the States be advised of these responsibilities and what is expected of them. We have purposely avoided defining in great detail the administrative requirements and responsibilities of State agencies. Our objective is to specify the outcome we expect to achieve by setting

performance accuracy and processing time standards.

We believe that as long as State agencies meet these standards, we do not need to define State agency administrative responsibilities in detail. This we feel can best be left to each individual State agency.

We have not deleted the State responsibility to treat all applicants and beneficiaries equally and courteously. We believe we have the obligation to give fair and equal treatment and courteous service to the public, and States must share in this with us.

Except in some very limited circumstances, we do not issue regulations without giving the public and State agencies an opportunity to comment before the regulations become final. We will always endeavor to discuss significant changes in guidelines with State agencies and to get their advice before issuing the guidelines. However, in some situations, it may be impractical or impossible to consult first with the State agencies. In these situations, we will generally request State agency comments as soon as possible after the guidelines are issued. A determination that there is a need to increase our review of any particular State agency will be based on its performance and will be carried out only to the extent necessary to fulfill our responsibilities under these regulations.

Responsibilities for Performing the Disability Determination Function

Issues

One commenter said that State agencies should assist applicants with their applications and consolidate eligibility determinations for all related benefits such as those available under titles XIX and XX. This commenter said that application forms should be changed so that persons applying for SSI should not have to file separate forms for Medicaid. Another commenter said there should be a procedure that allows the claimant or his or her representative to have a voice in selecting the physician to be used where additional medical examinations are required in the development of evidence for a claim. This commenter also said that State agencies should be required to share all medical evidence contained in a claim with the claimant's representative and provide opportunity for the representative's comments before a determination is made on the disability question.

Two writers said that these regulations should contain a provision, such as is now contained in the agreements between SSA and the State agencies, that the State agencies shall not assume any responsibility for defending in court any determination made under these regulations.

Response

We have not adopted the recommendation that State agencies should consolidate eligibility determinations for other benefits. This is clearly beyond the role cut out for State agencies making disability determinations under titles II and XVI. However, our district offices do perform a referral service and provide basic information to claimants on related benefits and eligibility requirements for other programs as well as the location of offices for those programs. The district office also alerts State welfare agencies about claimants found eligible for SSI benefits and provides some limited information about the claimant. This helps the State determine who may be eligible for Medicaid and other State administered benefits. The district office notifies claimants who are not found eligible for SSI payments that they may still qualify for Medicaid and where they should apply. While State welfare agencies may adopt some of our decisions, for their program purposes, it is not feasible at this time to combine application forms for SSI and Medicaid. One difficulty is that Medicaid is administered by the States based on their own eligibility requirements.

We also have not adopted the suggestion that these regulations require State agencies to use examining physicians selected by claimants or their representatives whenever additional medical examinations are required. We believe that our present written guidelines are adequate to assure the most objective evaluation of the claimant's condition that is practicable. These guidelines now provide that an examination should be purchased from a physician who in the State agency's judgment is qualified and has agreed to perform these examinations. If the claimant objects, the state agency will attempt to comply with his or her wishes and attempt to schedule the examination with another physician that is acceptable to the State agency and the claimant.

We have not adopted the suggestion that a State agency should be required to share all the medical evidence with a claimant's representative before a disability determination is made since the writer's concern is accommodated by other regulations. Regulations (§§ 404.1710 and 416.1510) provide that a claimant's representative has the right to examine all the evidence the State agency has obtained, to submit any additional evidence and to comment on the evidence. The State agency considers all the evidence and any comments made on the evidence in determining whether the claimant is disabled or blind.

We have changed §§ 404.1615 and 416.1015 of the regulations to show that the State agency is not responsible for defending in court determinations made, or any procedures for making determinations, under these regulations.

Administrative Responsibilities and Requirements

Issues

One commenter stated that SSA should specify in the regulations where within the organization of the State government the disability function should be located and how it is related to other entities within the State government. Another commenter stated we should impose organizational requirements on a State only if the State's performance falls below threshold levels. Several commenters indicated that the regulations should require States to have a quality assurance system. Some went on to indicate that the regulations should mandate the system, the staffing, and the funding for this function.

One commenter felt we should specify the minimum qualifications for disability examiners to enhance their professional standing. Several commenters stated that a person qualified to interpret and evaluate medical reports should be referred to as "disability examiner," "professional nonmedical disability examiner," or "professional disability examiner." One commenter stated we should establish minimum qualifications for State agency vocational experts similar to those described in the Bureau (now "Office") of Hearings and Appeals manual and establish standards for their use. One commenter stated the term "medical consultant" in our regulations should be changed to "qualified consultant" to recognize that nonmedical consultants, including psychologists, who are licensed or certified under State laws are qualified to make certain types of disability determinations.

One commenter indicated that many of the requirements imposed on the States relating to adequate facilities and qualified staff are vague and ambiguous and should be clarified. A commenter stated SSA should be continually involved in workshops and seminars for examiners, medical consultants, and technicians, not just when a State's performance approaches an

unacceptable level. Another said that State participation in research and development projects should be mandatory only when all States need to be involved in the project to provide national uniformity in the claims process. Another commenter stated that participation in research and development projects should be negotiated with the States, taking into consideration their workload and other problems.

Response

Our basic objective is to regulate only to the extent necessary to assure effective and uniform administration of the disability program throughout the United States. That objective can be met by specifying the results we wish the States to achieve instead of imposing a lot of rules on the States. As long as the States are able to achieve these results, they should be free to control the management of their operations, including organizational level, status, types, and number of staff and staff qualifications. Specific organizational requirements should be imposed on States only when they require the technical and management assistance described in these regulations. We have clarified the requirements accordingly. We agree that requiring the States to provide a quality assurance (QA) functions will contribute to effective and uniform administration of the disability program nationally. We therefore have revised §§ 404.1603(c)(2), 404.1620(a), 416.1003(c)(3) and 416.1020(a) to add a quality assurance function as a State responsibility. We did not, however, prescribe the internal design of the QA function or its staffing and funding since that would be counter to our basic objective.

The same is true for establishing minimum qualifications for disability examiners and for State agency vocational specialists in the regulations. We agree to use the term "disability examiner" and we have changed §§ 404.1615 and 416.1015 accordingly. We agree that licensed or certified psychologists may be qualified to determine the nature and severity of mental impairments. We considered permitting psychologists to serve as reviewers in the same manner as licensed physicians. However, because of the limited number of cases where the issues are clearly restricted to mental impairments, the use of psychologists as members of the State agency's review team would not be administratively feasible.

We will not prescribe what constitutes adequate facilities and qualified staff for any State so long as the State's performance meets the standards we set within the fiscal resources we provide after negotiations with the States. This is in keeping with our objective to regulate only to the extent necessary.

The regulations do not need to be revised to permit us to offer workshops or seminars for disability examiners, disability technicians, and medical consultants on a continual basis.

In conducting research and development projects SSA needs the flexibility to select the study design and prescribe the States it wishes to participate so that the most efficient and cost-effective studies can be undertaken. We will consider workload status and the unique problems of a State in selecting States to participate but cannot guarantee that any specific State will not be included in the project. We will also consider providing needed assistance where we agree mandated participation may jeopardize the State's ability to meet threshold levels or negotiated goals.

Medical Development and Evaluation

Issues

Several writers commented on matters relating to medical policy, the payment for travel expenses to medical examinations, and physician fees. One commenter questioned the absence of regulations requiring the State to document all aspects of a person's disability. Other commenters felt that certain travel expenses of claimants should be covered in these regulations; that the State's obligations concerning their medical and travel expense requirements, including notification of claimants of the availability of funds and the mechanisms for payment, should be spelled out; that the State should maintain records to support the rates of payment it uses for each service; and the State budget estimates should include anticipated costs for each service to be purchased and an estimate of the amount (e.g., hours) of service it would purchase. Another writer recommended that we require States to establish rates of compensation sufficient to attract the active participation of competent and accomplished professional personnel, both salaried staff physicians and consultants.

One writer wants us to clarify when SSA can obtain evidence from claimants or special arrangement sources "adequately" and more "readily" than the State agency. Another writer believed "or" should be changed to "and" in §§ 404.1614(a) and 416.1014(a) so as to avoid the impression that the State is restricted in collecting evidence for disability determinations to either the claimant or other sources but not both.

Several commenters recommended that we institute some procedure for assessing the performance of consulting physicians. One said we should impose a quality control on these physicians along the same lines as the performance accuracy standards for State agenices in these regulations. These commenters felt that there are physicians who devote an inordinate amount of their practice to performing consultative examinations for the State agencies and who submit reports that do not reflect the claimants' true medical conditions.

Response

The medical documentation requirements are fully covered in other regulations (Subpart P of Part 404 and Subpart I of Part 416 of this Chapter) and in written guidelines. Regulations covering claimants' travel expenses are being developed. Meanwhile States do have written guidelines relating to payment for travel expenses including notifying claimants that they may be reimbursed and how they are to obtain reimbursement.

Payment rates are established for each medical service. Generally, these rates are comparable to rates paid by other government and private users of similar medical services and are adjusted as necessary. Detailed budget estimates for each service are not required to determine State funding needs for purchasing medical services and would be administratively burdensome. The States set their rates according to the costs of medical services in the State and in conformance with State law and regulations governing expenditures for these services. If a particular provider's services are unsatisfactory, the use of that provider is discontinued. Overall, this system has worked successfully and State-set rates are generally adequate to ensure the participation of sufficient numbers of competent professional personnel.

In some instances, we can obtain "adequate" evidence more "readily" than a State. This usually occurs when an SSA district office has an ongoing working relationship with a medical source or when a claimant wishes to submit evidence directly to SSA when he or she files a claim. This permits more timely disability decisions, lowers costs, and improves the overall disability process. The work "or" has not been changed to "and" in §§ 404.1614(a) and 416.1014(a) because

an "either-or" choice is not intended. The State agency may secure evidence from *any* source it considers appropriate.

We do not believe the performance of consulting physicians requires regulation by us. Our experience clearly indicates that overall the State agencies are maintaining effective relationships with the State medical community. We have been getting objective evaluations from consulting physicians. Further, State agencies overall are effectively monitoring the quality of the consultative examinations purchased by them. If commenters have evidence of improper medical consultant practices they should submit this evidence to the State agency.

Target and Threshold Levels of Performance

Issues

Several commenters said that a standard for processing time was as important as accuracy as a measure of State performance. Other commenters raised questions about how we established the target and threshold levels of the performance standards. One stated that setting the threshold levels at one standard deviation from the national mean for accuracy and processing time would condone mediocrity and continuing to use one standard deviation from the mean when threshold levels are adjusted perpetuates that mediocrity. On the other hand, another commenter criticized using the mean and standard deviation to adjust the threshold levels annually because he believed 16 percent of the States would always fall more than one standard deviation below the mean. Using fiscal year 1979 data as the base year to establish the levels was questioned because it does not take into account significant program changes since that time and because 16 percent of the States will not meet the threshold levels even if the States are able to maintain the performance levels attained in 1979.

Two writers said that these regulations do not motivate the States to meet the target levels. One suggested that incentives be established to encourage States to meet or exceed performance standards. The other suggested establishing a time frame for meeting the target levels. Another writer said that a legislative change would be needed to adjust the threshold and target levels and the writer suggested that the regulations allow for an annual review of the proposed performance levels by State and Federal components. Another commenter noted that the regulations do not require that the threshold levels be strictly complied with and suggested we apply a "substantial performance" concept to performance standards. Use of the term "drive" on page 4586 of the preamble to the proposed rules was objected to because of the implication that the States want or need to be driven toward continued improvement.

Response

Because the thrust of the legislation which these regulations reflect is the enhancement of the accuracy and consistency of disability determinations, we believe we must emphasize improved accuracy over processing time as the more important objective of the performance standards. The quality or accuracy of the determinations is the primary thrust of the legislation. We believe that our concern with accuracy directly reflects Congressional direction to improve the quality of determinations and ensure that claimants throughout the nation will be judged under the same uniform standards and procedures. Nevertheless, we are very much concerned with improving processing time. Much of our effort will be in working with the States to achieve better processing time without sacrificing the accuracy of the decisions.

We established the threshold levels for accuracy and processing time using a national mean and standard deviation approach for two reasons. First, the mean is a level of performance that experience shows the "average" State to be capable of attaining. Second, we believe one standard deviation below the means as a measure of a *minimum* level of acceptable performance is reasonable. Performance below one standard deviation level cannot be tolerated and will cause Federal involvement in the form of technical and management assistance, and if performance does not improve after assistance, a finding of substantial failure. These are serious and potentially expensive measures. In keeping with our objectives to avoid increasing administrative costs and preserve the Federal-State structure, we will take these steps only when necessary. Moreover, the regulations provide intermediate performance goals to ensure progress toward target level performance. We clarified §§ 404.1641 and 416.1041 of the regulations to point out that these goals are established by the SSA regional commissioner after negotiation with each State. Failure to meet these intermediate goals is not a cause for considering the State to be substantially failing to comply with the performance standards. However, failure to meet these goals may result in the offer of technical and management assistance.

We will reexamine the threshold levels annually and we will use the mean and standard deviation approach. However, the regulations do not bind us to use this specific approach or to apply a measurement of one standard deviation or any other standard deviation measurement.

There are 3 separate threshold levels of performance and the performance measurement period is for 2 consecutive calendar quarters. Even if we use the one standard deviation measure to adjust the threshold in future years, it does not mean that 16 percent (or any other given percentage) of the States would always fall below 2 of the 3 threshold levels. While this could occur in any one quarter for any one of the 3 threshold levels, the great majority of the States will not fall below 2 of the 3 threshold levels for 2 consecutive calendar quarters. We compared State performance in fiscal year 1980 to fiscal year 1979 performance and found that the number and mix of States falling below the threshold levels is small and changes from quarter to quarter.

We used fiscal year 1979 as the base year because it was a relatively stable period in State disability program operations and at the time of the development of the standards was the most recent complete year. We recognize that no two years will ever be the same. For that reason, the regulations provide for reexamining the threshold levels annually. The threshold and target levels can be changed without legislation. However, if we change either of them we will revise the regulations through notice of proposed rulemaking. The public will be given an opportunity to comment on any future changes.

The Federal-State partnership has worked well. Many State agencies do an excellent job. States have shown, over the years, that they are self-motivated to do the best job they are capable of doing. With the clearer statement of performance goals that the regulations spell out, we expect they will do even better. It is unrealistic and impractical to establish a single date at this time by which all the States can be expected to reach the target levels of performance. There are 54 State agencies with different levels of performance that prevent them from reaching the target levels at the same time. We will work with the States to help them improve their performance, consistent with our available resources. We will help States improve by annually negotiating with

them and then establishing a new set of intermediate performance goals as part of the budget process. States will be expected to meet these goals within the negotiated budget.

Nevertheless, we recognize the value of establishing incentives for States to meet and exceed goals and standards. We are presently studying possible ways of providing incentives to the States.

The threshold levels must be strictly complied with. We cannot reach our objective of improving the disability determinations with a lesser standard like "substantial performance." We have reworded the preamble to remove the word "drive." We did not intend for it to be read as meaning we believe States want or need to be driven to improvement as pointed out by one commenter.

The Processing Time Standard

Issues

A number of commenters questioned the reason for different processing time standards for the title II and title XVI programs, mentioning that the requirements for the two programs are virtually the same so the same standard should apply to both. One commenter stated that the title XVI standards are less stringent than those imposed on States in the Medicaid program. Since the claimant characteristics are the same or similar for both programs, the writer recommended that the title XVI standards be raised to the same level as those for the Medicaid program. One commenter also said that the size of the title XVI population, fee schedules and State hiring and personnel practices vary among States and can impact on processing time.

Some commenters questioned using past experience to determine the processing time standards. One commenter mentioned that there is no correlation between the mean and how well a State could perform. Another writer wanted the standards to reflect, rather than target and threshold time, what the correct processing time should be. Others wanted the standard to reflect different processing times for different types of actions. Others wanted district office time included. One commenter suggested that only Federal holidays, but not State holidays, be used to compute processing time standards.

Two writers stated that the regulations should establish a maximum time level for processing each class of case (by impairment), but did not specify definite time frames. One commenter indicated that the Puerto Rico agency does not handle title XVI cases and, therefore, cannot be measured against that performance standard.

Response

Although the requirements for developing and adjudicating title II and title XVI claims are the same, there is a notable difference between the two programs in claimant characteristics. A vital difference is that title XVI claimants often have limited medical records available.

As a result of this, the State must usually develop medical evidence either through the purchase of general examinations or a specialized consultative examination. This has the effect of increasing processing time for the title XVI disability cases. Although the Medicaid and title XVI claimant populations are similar, in many instances the documentation requirements for Medicaid are different than the requirements for the title II and title XVI disability programs. States are permitted to waive the established processing time standard in determinations of Medicaid eligibility whenever an examining physician delays a required action. In contrast, medical development time accounts for the majority of State agency processing time in title II and title XVI disability cases. There are no exclusions for applicant or physician delays in computing a State's processing time in the disability cases. Consequently, we could expect that Medicaid processing times would be lower than our proposed State agency standards.

Another reason for different standards for the title II and title XVI programs is that SSA uses two different computer systems the characteristics of which necessitate different methods to measure processing time for the two programs. (See §§ 404.1642 and 416.1042 for these different measurement systems.)

In developing the processing time standards, we explored the various alternatives available and selected past experience and the mean and standard deviation approach. Basing the standards on demonstrated performance and applying this statistical technique is a recognized and acceptable method to set standards. We did not set a "correct" processing time. Instead, we set a standard for the States to meet now and an additional standard that they would work to meet in the future. This is in line with our objective of improving the overall administration of the program. The factors of title XVI population size, fee schedules and State hiring and personnel practices affected State performance in the 1979 base year and are built into the threshold standard. These same factors will continue to exist and be included in the mean processing time data.

We agree with those writers who cited the need to monitor overall processing time of disability claims, including district office time. However, the States should not be held accountable for district office processing time and we are therefore not changing these regulations, which provide standards for States, to include district office time. We also do not believe it is appropriate to set maximum time frames for individual impairments. We have no factual basis for making such differentiation; furthermore, even if we did, such differentiation would increase administrative burdens and program costs. Processing time reflects all the time a disability case resides in the State agency, including Saturdays, Sundays, and all holidays. Otherwise national uniformity in the measurement of State agency processing time could not be achieved.

Finally, since Puerto Rico does not handle title XVI cases, the title XVI processing time standard will not be applicable to that State agency. Puerto Rico's performance will be measured against the title II processing time standard (and the combined accuracy standard).

The Accuracy Standard

Issues

Several commenters requested that the performance standard for accuracy be clarified or expanded, pointing out that in their view the standard now only measures a State's ability to collect evidence or to prepare the case file for appeal or further decision. Some writers mentioned that the accuracy standard does not take into account underdevelopment of claims, interpretation of medical and vocational evidence, the ability to procure relevant evidence, or the ability to apply legal standards. One writer wanted the accuracy standard amended to reflect more reasonable goals since the commenter feels a single error could cause a State to fail to meet the standard.

A number of commenters wanted clarification of the relationship between performance and decisional accuracy. Some recommended that a threshold level be established for decisional accuracy as it now is for the target level.

A number of writers recommended that the high reversal rate at the hearings level be taken into account in

setting the accuracy standard since this is an indication of poor development and decision-making at the initial claims process. Several commenters wanted the regulations on accuracy to require the States to actively assist claimants to obtain evidence.

Response

The primary purpose of the accuracy standard is to achieve improvement in the initial claims process and to ensure that only properly entitled claimants receive disability benefits. Our approach to this standard is to specify outputs (i.e., performance accuracy) rather than to specify all the inputs that could go into the standard.

Our quality assurance system has been in place for some time and we are constantly monitoring and making improvements in it as needed. Data from this review system for fiscal year 1979 were used to establish the performance accuracy levels. Data from this ongoing quality review system will be used to measure State performance.

Our quality assurance system reviews the claims file to determine if it contains the desired evidence; if other factors that could affect a decision have been considered; and if the decision is correct. This review determines the reliability of a State's adjudication of disability claims. The accuracy standard measures such items as interpretation of medical and vocational evidence, procurement of relevant medical evidence, and application of legal standards. Other sections of the regulations require the States to follow written guidelines, and policies and procedures relating to the disability process. These sections give specific requirements for developing and interpreting evidence, applying legal requirements, and adjudicating disability claims. These same guidelines, policies, and procedures are the basis for the factors reviewed in our quality assurance process and are reflected in the accuracy standard.

Further, based on the evidence in the disability claims folder, the quality assurance system identifies the percentage of cases that can be processed without being returned to the State for further development of medical or vocational evidence or for correction of the decision. This percentage is called the State's performance accuracy rate. A separate percentage of cases with correct decisions is called the State's decisional accuracy rate. Decisional accuracy is included in the performance accuracy rate.

We think the State's ability to properly develop a claim is directly related to its ability to arrive at a correct decision. A State could arrive at the right decision in a claim but have incomplete medical or vocational evidence in the folder or have followed incorrect policies and procedures in adjudicating the claim. If we do not return this case as a deficiency, the State could apply the same erroneous practices in other claims which may not be selected for quality assurance review and could make incorrect decisions.

The relationship between the development of a claim and the outcome of the decision makes it unnecessary to set a separate threshold level for decisional accuracy. A target level for decisional accuracy is provided only so the public can better understand the relationship between performance accuracy and decisional accuracy. Also, we wanted to emphasize that performance accuracy reflects more than a right or wrong decision. To set a threshold for decisional accuracy would overemphasize its importance in measuring a State's performance and could lead the States to take shortcuts in developing evidence needed to adjudicate a disability claim.

The commenter who thought a single error could cause a State to fail to meet the accuracy standard was concerned with the sizes of the samples reviewed in the quality assurance system. The likelihood of any State failing to meet the standard because of a single error is statistically possible but extremely remote.

We agree that there is a high reversal rate of denials at the hearings level; however, we do not agree that there is a correlation between this high reversal rate and a State's performance accuracy rate at the initial level. Experience (both special studies and the quality assurance reviews of initial allowances and denials and of hearings level cases) does not support this correlation. Instead, it shows that decisions reversed at the hearings level more often result from the claimant submitting additional medical evidence or the worsening of the claimant's condition. For these reasons, we did not consider the reversal rate at the hearings level in setting initial performance accuracy standards.

We do not agree with the commenters who want the regulations to state that States are required to actively assist claimants to obtain evidence for their claims. Other sections of the regulations require the States to follow SSA's guidelines, policies, and procedures. These sections specify both the claimant's and the State's responsibilities in developing evidence for a disability claim. These factors will be reviewed through the quality assurance function.

Technical and Management Assistance

Issues

Several commenters recommended stricter mandatory technical assistance requirements, a shortening of the technical assistance process, and an SSA assumption of a portion of the workload if a State is unable to meet the threshold levels. Another commenter recommended that SSA assist the State agencies in other ways that the States determine would promote the objectives of effective and uniform administration.

One commenter asked for a more detailed explanation of the meaning of mandatory and optional technical assistance. Another felt that some States would not provide the necessary personnel, equipment, and other resources needed to meet their responsibilities unless forced to do so. The same writer also felt that it would be unrealistic to expect the Federal Government to take over the functions of a State and thus there will be increased pressure on State agency administrators to do more with less.

Response

Our approach for providing technical and management assistance is designed to obtain a high level of performance while not substantially interfering with States' management functions. It gives a State the opportunity to improve its operation without undue interference while still providing for technical and management assistance. Strict requirements would not provide this flexibility. A shortening of the technical and management assistance time frames might not allow a State and SSA a sufficient amount of time to correct the State's problems and permit it to continue to participate in the disability program. One form of technical and management assistance would allow SSA to assume a portion of the State's workload until the State is able to meet the performance standards. Likewise, within the limits of our resources, we will provide assistance which a State determines it needs to promote the objectives of effective and uniform administration.

We are revising the regulations to show when we will provide assistance. (See §§ 404.1660 and 416.1060.)

The State's responsibilities to provide management, personnel, facilities, medical consultant services, and quality assurance are set forth in §§ 404.1603(c) and 416.1003(c) of these regulations. We will make every effort in the budget

process to insure that States have adequate funds to meet these responsibilities.

Substantial Failure in Meeting the Standards

Issues

One commenter stated that because of the consequences of finding a State agency in substantial failure, we should consider the State agency's performance on all the cases it handles, and not only on initial cases. This commenter said that other types of cases, especially reconsideration and continuing disability claims, account for up to one-fourth of the State agency's workload. Thus, it is possible that a State agency may be below the threshold based on its performance on initial claims only but could be above the threshold if all the State agency's work is considered. Another commenter said that, while the threshold levels appear reasonable, a State agency should not be threatened with substantial failure if it falls below a threshold because the volume of work the State agency receives exceeds our predictions of the work it would get. This commenter explained that the State agency's ability to prepare for work depends upon the accuracy of SSA predictions and if these predictions are too low, the State agency may be unable to meet the thresholds through no fault of its own.

Several commenters said that failure to meet the threshold for either performance accuracy or processing time should result in sanctions such as mandatory technical assistance and, if necessary, a finding of substantial failure. They said that a standard for processing time is as important as accuracy in measuring State performance. One writer said that since sanctions are imposed only if a State agency falls below two thresholds, one of which must be performance accuracy, we cannot compel a State agency to meet processing time standards. Another commenter said that since a State agency must fall below two thresholds before sanctions are imposed, a State agency may avoid the sanctions simply by making decisions faster to meet the processing time threshold at the expense of accuracy.

One writer said that the provisions for finding that a State agency had good cause for falling below the performance thresholds are too broad. This person also said that we should establish a mechanism for notifying State agencies when they can expect increased workloads.

Response

We agree that it is desirable to base a determination of whether a State agency is in substantial failure on the State agency's performance on all cases it handles. As soon as we can collect and study sufficient data, we may propose adding standards of performance for reconsideration and continuing disability cases to the regulations. Until then, we must measure a State agency's performance on the basis of the accuracy and timeliness of its initial disability determinations.

We have not adopted the suggestion that we find a State agency in substantial failure if it falls below one or both of the processing time thresholds. As we have noted, the thrust of the legislation which these provisions are intended to reflect is the enhancement of the accuracy and consistency of SSA's determinations with respect to disability. Hence, we consider that we are obliged to place more emphasis on accuracy than processing time to best achieve the statutory purpose. Even so, we are very concerned with processing time and we believe that all cases must be processed as quickly as practicable. However, we do not want any State agency, in order to meet a processing time standard to take short cuts that may keep it from properly developing the evidence and making the right decision in the claims it handles.

We do not believe that the good cause provisions for failing to meet the performance standards are too broad. These provisions ensure only that a State agency will not be found in substantial failure for reasons wholly beyond its control. For example, we routinely advise State agencies of their expected annual workloads and of any changes to these estimates as they occur. The State agency's budget is based on these estimates. If sudden and unanticipated changes make our estimates of a State agency's workload so inaccurate that it is unable to obtain and train adequate staff to meet the workload, we will consider whether this is a factor beyond its control and therefore good cause for not meeting the thresholds.

Hearings and Appeals

Issue

One writer asked that we allow for hearings to permit the State to discuss the differences between the State budget submittal and the budget amount we approve. This writer considered this "essential for sound fiscal management and planning for the State agency."

Response

Sections 404.1626 and 416.1026 require us to "provide funds to the State agency for the necessary cost of performing the disability determination function." The costs are negotiated with the State before they are approved or funds made available. The State has ample opportunity to justify its budget submittal during these negotiations. An additional opportunity to present these issues at a hearing would not seem to further the States' fiscal management and planning.

Assumption of Disability Determination Function

Issues

Several writers commented on potential personnel problems relating to the Federal assumption of a disability determination function. One said that we should set a deadline for the State to make fair and equitable arrangements for displaced State employees who are not hired by us because a State might deliberately fail to make acceptable arrangements for these employees to keep us from assuming its functions. Another commenter asked how we will determine which State employees are capable of performing the disability determination function for us. One writer said that we should further review the negative impact upon our ability to hire State employees because there is no provision in the law for a transfer of State benefits such as seniority, accrued sick and annual leave, and retirement benefits. One commenter said that under a Federal assumption, the State agency's administrator and deputy administrator would not be protected and would not obtain Federal employment. This person also said that a freeze on Federal hiring will preclude the Federal assumption of a State agency function.

One writer said that the regulations should contain a provision that assures that vocational rehabilitation referrals will continue to be made during and after a Federal assumption of the State agency function. Finally, one writer said that there should be a provision that requires us to meet the threshold level of performance if a State agency function is assumed by us.

Response

We do not believe that we need to put in the regulations a specific deadline by which a State agency must make suitable arrangements for its displaced employees before we can assume the State agency's functions. If it is found that we must assume a State agency's

functions, we will notify the Secretary of Labor that an assumption is in progress and that a determination is to be made that the State has made fair and equitable arrangements to protect the interests of displaced employees. If a State, for whatever reasons, does not make fair and equitable arrangements for displaced employees in a timely manner or if the Secretary of Labor cannot determine that proper arrangements have been made, we must accept applications for disability benefits and fully process those applications. This includes making the disability determinations and notifying the claimants of the decisions. We must do this to prevent disruption of services to a State's residents while an assumption of the State's functions is in progress. As required by law, we sent a report to Congress on how we expect to assume the functions and operations of a State agency. That report reflects the approach just described.

We have not yet established criteria for determining which State employees are capable of performing the disability determination function. We are considering State criteria. We must also consider basic and standard requirements which the U.S. Office of Personnel Management will set for each Federal disability determination service job position approved.

We do not yet know what the full effects upon a Federal assumption will be if State employees cannot transfer accrued benefits. We will study this further. Legislation, however, would be required for such benefits to be carried over to a Federal position. It is true that in filling positions under a Federal assumption, the law does not require us to give the State agency administrator and deputy administrator the hiring preference which we must give to other capable State agency employees. Instead it gives us a choice of whether they too should be given the hiring preference. We do not believe that a Federal hiring freeze will preclude a Federal assumption of the State agency's function. If we must assume a State agency's function while under a Federal hiring freeze, we will have to perform the function with existing SSA personnel.

The Social Security Act requires referral for vocational rehabilitation services. We therefore must continue this service. If we assume a State agency's functions, we will make every effort to achieve the highest practicable level of performance.

Additional Changes

Audits, Property and Confidentiality

We have revised §§ 404.1627 and 416.1027 to clarify that the purpose of an audit includes inspecting the work and activities required by the regulations to ensure compliance with pertinent Federal statutes and regulations as well as determining that funds were properly expended.

We have revised §§ 404.1628 and 416.1028 to establish what the disposition would be of a State agency's property and equipment if the State agency's relationship is terminated. The ownership and use of this property may be important if we are required to assume a State's function or we are notified that the State is terminating the relationship. Should assumption of the State's disability determination function become necessary or should the State end the relationship, ownership of all property and equipment acquired with SSA funds will transfer to SSA on the date the State is notified that we are assuming the disability determination function or we are notified that the State is terminating the relationship.

Systems Security

We have amended the language of §§ 404.1631 and 416.1031 which already address the issue of confidentiality of information and records to include the "security of systems" as an area where State agencies are required to adhere to Federal privacy rules.

Hearings and Appeals

According to the rules (45 CFR Part 16) of the Health and Human Services Departmental Grant Appeals Board, "a hearing may be requested within 30 days from the date notice is received rather than within 30 days from the date of the notice," as shown in our Notice of Proposed Rulemaking. Therefore, we have changed §§ 404.1627, 404.1680, 416.1027 and 416.1080 to conform with the Board's rules. Also, since the Board will only provide a hearing on final decisions, we have added language to §§ 404.1683 and 416.1083 to make it clear that a notice of "substantial failure" under §§ 404.1680 and 416.1080 will be considered a "final written decision" for purposes of Board review. We have also eliminated the terms "grantee," "grant" and "termination" in §§ 404.1683 and 416.1083, because under the Board's new procedures, these terms are no longer necessary. We have also added language to §§ 404.1694 and 416.1094 to make it clear that disputes concerning final accounting issues which cannot be resolved between the State and us will be resolved in proceedings before the Grant Appeals Board.

We also revised §§ 404.1681 and 416.1081 to clarify that the Grant Appeals Board will not resolve disputes on matters other than substantial failure that relate to nonfiscal issues. All disputes on nonfiscal issues (i.e., audit determinations relating to management or administrative matters) may be appealed only to the Commissioner of Social Security. Since these nonfiscal matters are generally related to other disability program concerns and interests, we believe it is appropriate that nonfiscal disputes be ultimately decided by the Commissioner as the highest official of the Social Security Administration.

Conclusion

We believe these regulations carry out the intent of Congress, in enacting Pub. L. 96–265, that we improve our administration of the title II and title XVI disability benefits programs while preserving the basic Federal/State structure. Our objective is to place the right person in benefit status in a timely manner, wherever in the country he or she may be living, and to pay the proper amount of benefits as long as that person is entitled to benefits. In our opinion, the regulations foster these objectives by encouraging improvement in the quality of State agency performance which will contribute to assuring that claimants are accorded fair treatment and provided with correct and equitable decisions under uniform national standards. The regulations should help accomplish these goals without adding undue administrative burdens or costs to the adjudicative process.

While Pub. L. 96–265 requires that we issue regulations to implement section 304, our policy is that we should *not* over-regulate the States. We intend to give the States maximum control over the management of their operations in making disability determinations as long as performance is adequate under the standards which we have set. These regulations permit more Federal involvement in the State's activities only if a State's performance becomes unacceptable under the standards. Under these circumstances, our primary objective is not to interfere in the State's operation, but to help the State to improve its performance with the ultimate goal of withdrawing our assistance and allowing the State to resume its own management of the program. Under these regulations, we may take action to take over the disability program from the State only

after clearly establishing that the State has substantially failed to meet its commitment to properly administer the disability determination function in the State and after determining that the State cannot reasonably be expected to effectively carry out these functions in the future. We have the obligation under the law for seeing that the title II and title XVI disability programs are efficiently and equitably administered and intend to make every effort to meet this obligation within the structure of the existing Federal-State partnership.

We certify in accordance with the Regulatory Flexibility Act of 1980 that these regulations do not have an adverse impact on small entities because these rules affect only the States.

(Catalog of Federal Domestic Assistance, Program No. 13.802, Disability Insurance; No. 13.807, Supplemental Security Income Program)

Dated: April 22, 1981.

Herbert R. Doggette, Jr.,

Acting Commissioner of Social Security.

Approved: May 15, 1981.

Richard S. Schweiker,

Secretary of Health and Human Services.

For the reasons set out in the preamble, Chapter III, Title 20 of the *Code of Federal Regulations* is amended as shown.

PART 404—FEDERAL OLD-AGE, SURVIVORS, AND DISABILITY INSURANCE (1950-)

Part 404 of Chapter III of Title 20 of the Code of Federal Regulations is amended as follows:

1. Section 404.1502 is revised to read as follows:

§ 404.1502 General definitions and terms for this subpart.

As used in the subpart—

"Secretary" means the Secretary of Health and Human Services.

"State agency" means that agency of a State which has been designated by the State to carry out the disability determination function.

"We" or "us" refers to either the Social Security Administration or the State agency making the disability or blindness determination.

"You" refers to the person who has applied for benefits or for a period of disability or is receiving benefits based on disability or blindness.

2. Section 404.1503 is revised to read as follows:

§ 404.1503 Who makes disability and blindness determinations.

(a) *State agencies.* State agencies make disability and blindness determinations for the Secretary for most persons living in the State. State agencies make these disability and blindness determinations under regulations containing performance standards and other administrative requirements relating to the disability and blindness determination function. States have the option of turning the function over to the Federal Government if they no longer want to make disability determinations. Also, the Secretary may take the function away from any State which has substantially failed to make disability and blindness determinations in accordance with these regulations. Subpart Q of this Part contains the rules the States must follow in making disability and blindness determinations.

(b) *Social Security Administration.* The Social Security Administration will make disability and blindness determinations for the Secretary for—

(1) Any person living in a State which is not making for the Secretary any disability and blindness determinations or which is not making those determinations for the class of claimants to which that person belongs; and

(2) Any person living outside the United States.

(c) *What determinations are authorized.* The Secretary has authorized the State agencies and the Social Security Administration to make determinations about—

(1) Whether you are disabled or blind;

(2) The date your disability or blindness began; and

(3) The date your disability or blindness stopped.

(d) *Review of State Agency determinations.* On review of a State agency determination or redetermination of disability or blindness we may find that—

(1) You are, or are not, disabled or blind, regardless of what the State agency found;

(2) Your disability or blindness began earlier or later than the date found by the State agency; and

(3) Your disability or blindness stopped earlier or later than the date found by the State agency.

§§ 404.1601–404.1610 (Subpart Q) [Redesignated as §§ 404.2001–404.2010 (Subpart U)]

3. The headings and text of §§ 404.1601–404.1610 (Subpart Q) are redesignated as §§ 404.2001–404.2010 (Subpart U) respectively. The heading for Subpart U is "Representative Payee". (A proposed revision of present Subpart Q has been published in the **Federal Register**. These regulations will be redesignated when adopted as final).

4. A new Subpart Q is added to Part 404 to read as follows:

Subpart Q—Determinations of Disability

General Provisions

Sec.
404.1601 Purpose and scope.
404.1602 Definitions.
404.1603 Basic responsibilities for us and the State.

Responsibilities for Performing the Disability Determination Function

404.1610 How a State notifies us that it wishes to perform the disability determination function.
404.1611 How we notify a State whether it may perform the disability determination function.
404.1613 Disability determinations the State makes.
404.1614 Responsibilities for obtaining evidence to make disability determinations.
404.1615 Making disability determinations.
404.1618 Notifying claimants of the disability determination.

Administrative Responsibilities and Requirements

404.1620 Organization.
404.1621 Personnel.
404.1622 Training.
404.1623 Facilities.
404.1624 Medical and other purchased services.
404.1625 Records and reports.
404.1626 Fiscal.
404.1627 Audits.
404.1628 Property.
404.1629 Participation in research and demonstration projects.
404.1630 Coordination with other agencies.
404.1631 Confidentiality of information and records.
404.1632 Other Federal laws and regulations.
404.1633 Policies and operating instructions.

Performance Standards

404.1640 General.
404.1641 Standards of performance.
404.1642 Processing time standard.
404.1643 Performance accuracy standard.
404.1644 How and when we determine whether the processing time standards are met.
404.1645 How and when we determine whether the performance accuracy standard is met.
404.1650 If a State agency is not meeting the standards.

Technical and Management Assistance

404.1660 When we will provide assistance.
404.1661 What assistance we will provide.

Substantial Failure

404.1670 General.
404.1671 Good cause for not meeting the established threshold levels.
404.1675 Finding of substantial failure.

Hearings and Appeals

404.1680 Notice of right to hearing on proposed finding of substantial failure.
404.1681 Disputes on other matters.
404.1682 Who conducts the hearings.
404.1683 Hearings and appeals process.

Assumption of Disability Determination Function

404.1690 Assumption when we make a finding of substantial failure.
404.1691 Assumption when State no longer wishes to perform the disability determination function.
404.1692 Protection of State employees.
404.1693 Limitation on State expenditures after notice.
404.1694 Final accounting by the State.

Authority: Issued under secs. 205, 221 and 1102 of the Social Security Act, as amended: 53 Stat. 1368, as amended; 66 Stat. 1081, as amended; 49 Stat. 647, as amended; 42 U.S.C. 405, 421 and 1302.

Subpart Q—Determinations of Disability

General Provisions

§ 404.1601 Purpose and scope.

This subpart describes the standards of performance and administrative requirements and procedures for States making determinations of disability for the Secretary under title II of the Act. It also establishes the Secretary's responsibilities in carrying out the disability determination function.

(a) Sections 404.1601–404.1603 describe the purpose of the regulations and the meaning of terms frequently used in the regulations. They also briefly set forth the responsibilities of the Secretary and the States covered in detail in other sections.

(b) Sections 404.1610–404.1618 describe the Secretary's and the State's responsibilities in performing the disability determination function.

(c) Sections 404.1620–404.1633 describe the administrative responsibilities and requirements of the States. The corresponding role of the Secretary is also set out.

(d) Sections 404.1640–404.1650 describe the performance accuracy and processing time standards for measuring State agency performance.

(e) Sections 404.1660–404.1661 describe when and what kind of assistance the Secretary will provide State agencies to help them improve performance.

(f) Sections 404.1670–404.1675 describe the level of performance below which the Secretary will consider a State agency to be substantially failing to make disability determinations consistent with the regulations and other written guidelines and the resulting action the Secretary will take.

(g) Sections 404.1680–404.1683 describe the rules for resolving disputes concerning fiscal issues and providing hearings when we propose to find that a State is in substantial failure.

(h) Sections 404.1690–404.1694 describe when and what action the Secretary will take and what action the State will be expected to take if the Secretary assumes the disability determination function from a State agency.

§ 404.1602 Definitions.

For purposes of this subpart:

"Act" means the Social Security Act, as amended.

"Class or classes of cases" means the categories into which disability claims are divided according to their characteristics.

"Determination of disability" or "disability determination" means one or more of the following decisions:

(a) Whether or not a person is under a disability;

(b) The date a person's disability began; or

(c) The date a person's disability ended.

"Disability" means "disability" or "blindness" as defined in sections 216(i) and 223 of the Act or as defined in title IV of the Federal Mine Safety and Health Act of 1977, as amended.

"Disability determination function" means making determinations as to disability and carrying out related administrative and other responsibilities.

"Disability program" means, as appropriate, the Federal programs for providing disability insurance benefits under title II of the Act and disability benefits under title IV of the Federal Mine Safety and Health Act of 1977, as amended.

"Initial" means the first level of disability adjudication.

"Other written guidelines" means the policies, procedures, guides, and operating instructions in the Disability Insurance section of the Program Operations Manual System that are not designated as advisory or discretionary.

"Regulations" means regulations in this subpart issued under §§ 205(a), 221 and 1102 of the Act, unless otherwise indicated.

"Secretary" means the Secretary of the Department of Health and Human Services or the Secretary's delegate.

"State" means any of the 50 States of the United States, the Commonwealth of Puerto Rico, the District of Columbia, or Guam. It includes the State agency.

"State agency" means that agency of a State which has been designated by the State to carry out the disability determination function.

"We", "us," and "our" refers to the Social Security Administration (SSA) or the Secretary, as appropriate.

§ 404.1603 Basic responsibilities for us and the State.

(a) *General.* We will work with the State to provide and maintain an effective system for processing claims of those who apply for and who are receiving benefits under the disability program. We will provide program standards, leadership, and oversight. We do not intend to become involved in the State's ongoing management of the program except as is necessary and in accordance with these regulations. The State will comply with our regulations and other written guidelines.

(b) *Our responsibilities.* We will:

(1) Periodically review the regulations and other written guidelines to determine whether they insure effective and uniform administration of the disability program. To the extent feasible, we will consult with and take into consideration the experience of the States in issuing regulations and guidelines necessary to insure effective and uniform administration of the disability program;

(2) Provide training materials or in some instances conduct or specify training, see § 404.1622;

(3) Provide funds to the State agency for the necessary cost of performing the disability determination function, see § 404.1626;

(4) Monitor and evaluate the performance of the State agency under the established standards, see §§404.1644 and 404.1645; and

(5) Maintain liaison with the medical profession nationally and with national organizations and agencies whose interests or activities may affect the disability program.

(c) *Responsibilities of the State.* The State will:

(1) Provide management needed to insure that the State agency carries out the disability determination function so that disability determinations are made accurately and promptly;

(2) Provide an organizational structure, adequate facilities, qualified personnel, medical consultant services, and a quality assurance function (§§ 404.1620–404.1624);

(3) Furnish reports and records relating to the administration of the disability program (§ 404.1625);

(4) Submit budgets (§ 404.1626);

(5) Cooperate with audits (§ 404.1627);

(6) Insure that all applicants for and recipients of disability benefits are treated equally and courteously;

(7) Be responsible for property used for disability program purposes (§ 404.1628);

(8) Take part in the research and demonstration projects (§ 404.1629);

(9) Coordinate with other agencies (§ 404.1630);

(10) Safeguard the records created by the State in performing the disability determination function (§ 404.1631);

(11) Comply with other provisions of the Federal law and regulations that apply to the State in performing the disability determination function;

(12) Comply with other written guidelines (§ 404.1633);

(13) Maintain liaison with the medical profession and organizations that may facilitate performing the disability determination function; and

(14) Assist us in other ways that we determine may promote the objectives of effective and uniform administration.

Responsibilities for Performing the Disability Determination Function

§ 404.1610 How a State notifies us that it wishes to perform the disability determination function.

(a) *Deemed notice.* Any State that has in effect as of June 1, 1981, an agreement with us to make disability determinations will be deemed to have given us notice that it wishes to perform the disability determination function, in lieu of continuing the agreement in effect after June 1, 1981.

(b) *Written notice.* After June 1, 1981, a State not making disability determinations that wishes to perform the disability determination function under these regulations must notify us in writing. The notice must be from an official authorized to act for the State for this purpose. The State will provide an opinion from the State's Attorney General verifying the authority of the official who sent the notice to act for the State.

§ 404.1611 How we notify a State whether it may perform the disability determination function.

(a) If a State notifies us in writing that it wishes to perform the disability determination function, we will notify the State in writing whether or not it may perform the function. The State will begin performing the disability determination function beginning with the month we and the State agree upon.

(b) If we have previously found that a State agency has substantially failed to make disability determinations in accordance with the law or these regulations and other written guidelines or if the State has previously notified us in writing that it does not wish to make disability determinations, the notice will advise the State whether the State agency may again make the disability determinations and, if so, the date and the conditions under which the State may again make them.

§ 404.1613 Disability determinations the State makes.

(a) *General rule.* A State agency will make determinations of disability with respect to all persons in the State except those individuals whose cases are in a class specifically excluded by our written guidelines. A determination of disability made by the State is the determination of the Secretary, except as described in § 404.1503(d)(1).

(b) *New classes of cases.* Where any new class or classes of cases arise requiring determinations of disability, we will determine the conditions under which a State may choose not to make the disability determinations. We will provide the State with the necessary funding to do the additional work.

(c) *Temporary transfer of classes of cases.* We will make disability determinations for classes of cases temporarily transferred to us by the State agency if the State agency asks us to do so and we agree. The State agency will make written arrangements with us which will specify the period of time and the class or classes of cases we will do.

§ 404.1614 Responsibilities for obtaining evidence to make disability determinations.

(a) The State agency will secure from the claimant, or other sources, any evidence it needs to make a disability determination.

(b) We will secure from the claimant or other special arrangement sources, any evidence we can obtain as adequately and more readily than the State agency. We will furnish the evidence to the State agency for use in making a disability determination.

(c) At our request, the State agency will obtain and furnish medical or other evidence and provide assistance as may be necessary for us to carry out our responsibilities—

(1) For making disability determinations in those classes of cases described in the written guidelines for which the State agency does not make the determination; or

(2) Under international agreements with respect to social security benefits payable under section 233 of the Act.

§ 404.1615 Making disability determinations.

(a) When making a disability determination, the State agency will apply subpart P, Part 404 of our regulations.

(b) The State agency will make disability determinations based only on the medical and nonmedical evidence in its files.

(c) Disability determinations will be made by a State agency medical consultant and a State agency disability examiner. The State agency disability examiner must be qualified to interpret and evaluate medical reports and other evidence relating to the claimant's physical or mental impairments and as necessary to determine the capacities of the claimant to perform substantial gainful activity. (See § 404.1572 of this part for what we mean by "substantial gainful activity".)

(d) The State agency will certify each determination of disability to us on forms we provide.

(e) The State agency will furnish us with all the evidence it considered in making its determination.

(f) The State agency will not be responsible for defending in court any determination made, or any procedure for making determinations, under these regulations.

§ 404.1618 Notifying claimants of the disability determination.

The State agency will prepare denial notices in accordance with subpart J of this Part whenever it makes a disability determination which is wholly or partly unfavorable to the claimant.

Administrative Responsibilities and Requirements

§ 404.1620 Organization.

(a) The State will provide the organizational structure, sufficient qualified personnel, medical consultant services, and a quality assurance function to insure disability determinations are made accurately and promptly. We may impose specific organizational requirements on the State, but only in the course of mandatory technical and management assistance as described in § 404.1660.

(b) The State is responsible for making accurate and prompt disability determinations.

§ 404.1621 Personnel.

(a) *Equal Employment Opportunity.* The State will comply with all applicable Federal statutes, executive orders and regulations concerned with equal employment opportunities.

(b) *Selection, tenure, and compensation.* The State agency will, except as may be inconsistent with paragraph (a) of this section, adhere to applicable State approved personnel

standards in the selection, tenure, and compensation of any individual employed in the disability program.

(c) *Travel.* The State will make personnel available to attend meetings or workshops as may be sponsored or approved by us for furthering the purposes of the disability program.

(d) *Restrictions.* Subject to appropriate Federal funding, the State will, to the best of its ability, facilitate the processing of disability claims by avoiding personnel freezes, restrictions against overtime work, or curtailment of facilities or activities.

§ 404.1622 Training.

The State will insure that all employees have an acceptable level of competence. We will provide training and other instructional materials to facilitate basic and advanced technical proficiency of disability staff in order to insure uniformity and effectiveness in the administration of the disability program. We will conduct or specify training, as appropriate, but only if:

(a) a State agency's performance approaches unacceptable levels; or

(b) the material required for the training is complex or the capacity of the State to deliver the training is in doubt and uniformity of the training is essential.

§ 404.1623 Facilities.

(a) *Space, equipment, supplies, and other services.* Subject to appropriate Federal funding, the State will provide adequate space, equipment, supplies, and other services to facilitate making accurate and prompt disability determinations.

(b) *Location of facilities.* Subject to appropriate Federal funding, the State will determine the location where the disability determination function is to be performed so that disability determinations are made accurately and promptly.

(c) *Access.* The State will permit us access to the premises where the disability determination function is performed for the purposes of inspecting the work and activities required by the regulations and assuring compliance with pertinent Federal statutes and regulations. We will contact the State and give reasonable prior notice of the times and purposes of any visit.

§ 404.1624 Medical and other purchased services.

The State will determine the rates of payment to be used for purchasing medical or other services necessary to make determinations of disability. The rates may not exceed the highest rate paid by Federal or other agencies in the State for the same or similar type of service. The State will maintain documentation to support the rates of payment it uses.

§ 404.1625 Records and reports.

(a) The State will establish and maintain the records and furnish the schedules, financial, cost, and other reports relating to the administration of the disability programs as we may require.

(b) The State will permit us and the Comptroller General of the United States (including duly authorized representatives) access to and the right to examine records relating to the work which the State performs under these regulations. These records will be retained by the State for the periods of time specified for retention of records in the Federal Procurement Regulations (41 CFR Parts 1–20).

§ 404.1626 Fiscal.

(a) We will give the State funds, in advance or by way of reimbursement, for necessary costs in making disability determinations under these regulations. Necessary costs mean direct as well as indirect costs as defined in title 41 CFR subpart 1–15.7 and in Federal Management Circular 74–4, as amended or superseded.

(b) The State will submit estimates of anticipated costs in the form of a budget at the time and in the manner we require.

(c) We will notify the State of the amount which will be made available to it as well as what anticipated costs are being approved.

(d) The State may not incur or make expenditures for items of cost not approved by us or in excess of the amount we make available to the State.

(e) After the close of a period for which funds have been made available to the State, the State will submit a report of its actual expenditures. We will give the State an audit report showing whether the expenditures were consistent with cost principles described in subpart 1–15.7 of part 1–15 of the Federal Procurement Regulations (41 CFR 1–15.7) and in written guidelines in effect at the time the expenditures were made or incurred.

(f) Any monies paid to the State which are used for purposes not within the scope of these regulations will be paid back to the Treasury of the United States.

§ 404.1627 Audits.

As soon as practicable after the close of each budgetary period, or at other times as necessary, the books of account and records in each State pertaining to the administration of the disability program under the Act will be audited by our Inspector General's office. These audits are conducted to determine whether the expenditures were made for the purposes intended and in amounts necessary for the proper and efficient administration of the disability program. Audits will also be made to inspect the work and activities required by the regulations to ensure compliance with pertinent Federal statutes and regulations. The State will make every effort to act upon and resolve any items questioned in an audit.

(a) *Questioned items.* Expenditures of State agencies will be audited on the basis of cost principles and written guidelines in effect at the time the expenditures were made or incurred. Both the State and the State agency will be informed and given a full explanation of any questioned items. They will be given reasonable time to explain questioned items or expenditures. Any explanation furnished by the State or State agency will be given full consideration before a final determination is made on questioned items in the audit report.

(b) *State appeal of audit determinations.* The appropriate SSA regional commissioner will notify the State of his or her determination on the audit report. If the State disagrees with that determination, the State may request reconsideration in writing within 30 days of the date of the regional commissioner's notice of the determination. The written request may be made, through the Associate Commissioner, Office of Operational Policy and Procedures, to the Commissioner of Social Security, Room 900, Altmeyer Building, 6401 Security Boulevard, Baltimore, Maryland 21235. The Commissioner will make a determination and notify the State of that decision in writing no later than 45 days from the date of the State's appeal. The decision by the Commissioner will be final and conclusive upon the State unless the State appeals that decision in writing to the Department of Health and Human Services, Departmental Grant Appeals Board within 30 days after receiving the Commissioner's decision. See § 404.1683.

§ 404.1628 Property.

The State will have title to equipment purchased for disability program purposes. The State will be responsible for maintaining all property it acquires or which we furnish to it for performing the disability determination function. The State will identify the equipment by labeling and by inventory and will

credit the SSA account with the fair market value of disposed property.

In the event we assume the disability determination function from a State, ownership of all property and equipment acquired with SSA funds will be transferred to us effective on the date the State is notified that we are assuming the disability determination function or we are notified that the State is terminating the relationship.

§ 404.1629 Participation in research and demonstration projects.

We will invite State participation in federally funded research and demonstration projects to assess the effectiveness of the disability program and to ascertain the effect of program policy changes. Where we determine that State participation is necessary for the project to be complete, for example, to provide national uniformity in a claims process, State participation is mandatory.

§ 404.1630 Coordination with other agencies.

(a) The State will establish cooperative working relationships with other agencies concerned with serving the disabled and, insofar as practicable, use their services, facilities, and records to:

(1) Assist the State in developing evidence and making determinations of disability; and

(2) Insure that referral of disabled or blind persons for rehabilitation services will be carried out effectively.

(b) The State may pay these agencies for the services, facilities, or records they provide. The State will include these costs in its estimates of anticipated costs and reports of actual expenditures.

§ 404.1631 Confidentiality of information and records.

The State will comply with the confidentiality of information, including the security of systems, and records requirements described in 20 CFR Part 401 and pertinent written guidelines (see § 404.1633).

§ 404.1632 Other Federal laws and regulations.

The State will comply with the provisions of other Federal laws and regulations that directly affect its responsibilities in carrying out the disability determination function; for example, Treasury Department regulations on letters of credit (31 CFR Part 205).

§ 404.1633 Policies and operating instructions.

(a) We will provide the State agency with written guidelines necessary for it to carry out its responsibilities in performing the disability determination function.

(b) The State agency making determinations of disability will comply with the written guidelines in the Disability Insurance section of the Program Operations Manual System. This manual will also include certain policies, procedures, guides and operating instructions designated as advisory or discretionary.

(c) A representative group of State agencies will be given an opportunity to participate in formulating disability program policies that have an affect on their role in carrying out the disability determination function. State agencies will also be given an opportunity to comment before changes are made in written guidelines unless delay in issuing a change may impair service to the public.

Performance Standards

§ 404.1640 General.

The following sections provide the procedures and guidelines we use to determine whether the State agency meets established national performance standards. We use these performance standards to help assure effective and uniform administration of our disability programs throughout the United States and to measure whether each State agency's performance of the disability determination function is acceptable. Also, the standards are designed to improve overall State agency performance in the disability determination process. We measure the State agency performance in two areas—processing time and performance accuracy.

§ 404.1641 Standards of performance.

(a) *General.* The performance standards include both a target level of performance and a threshold level of performance for the State agency. The target level represents a level of performance that we and the States will work to attain in the future. The threshold level is the minimum acceptable level of performance. Performance below the threshold level will be the basis for the Secretary's taking from the State agency partial or complete responsibility for performing the disability determination function. Intermediate State agency goals are designed to help each State agency move from its current performance levels to the target levels.

(b) *The target level.* The target level is the optimum level of performance. There are three targets—one for combined title II and title XVI initial performance accuracy, one for title II initial processing time, and one for title XVI initial processing time.

(c) *The threshold level.* The threshold level is the minimum acceptable level of performance. There are three thresholds—one for combined title II and title XVI initial performance accuracy, one for title II initial processing time, and one for title XVI initial processing time.

(d) *Intermediate goals.* Intermediate goals are levels of performance between the threshold levels and the target levels established by SSA's regional commissioner after negotiation with each State agency. The intermediate goals are stepping stones designed to help the State agencies reach the target levels. Failure to meet these goals is not a cause for considering the State agency to be substantially failing to comply with the performance standards. However, failure to meet the intermediate goals may result in consultation and an offer of optional technical and management assistance depending on the availability of SSA resources.

§ 404.1642 Processing time standards.

(a) *General.* Title II processing time refers to the average number of days (including Saturday, Sunday and holidays) it takes a State agency to process an initial disability claim from the day it is received in the State agency until the day it is released by the State agency. Title XVI processing time refers to the average number of days (including Saturday, Sunday and holidays) from release of the initial disability claim by the SSA district office until systems input of the disability determination.

(b) *Target levels.* The processing time target levels are:

(1) 37 days for title II initial claims.

(2) 43 days for title XVI initial claims.

(c) *Threshold levels.* The processing time threshold levels are:

(1) 49.5 days for title II initial claims.

(2) 57.9 days for title XVI initial claims.

§ 404.1643 Performance accuracy standard.

(a) *General.* Performance accuracy refers to the percentage of cases that do not have to be returned to State agencies for further development or correction of decisions based on evidence in the files and as such represents the reliability of State agency

adjudication. The definition of performance accuracy includes the measurement of factors that have a potential for affecting a decision, as well as the correctness of the decision. For example, if a particular item of medical evidence should have been in the file but was not included, even though its inclusion does not change the result in the case, that is a performance error. Performance accuracy, therefore, is a higher standard than decisional accuracy. As a result, the percentage of correct decisions is significantly higher than what is reflected in the error rate established by SSA's quality assurance system.

(b) *Target level.* The State agency initial performance accuracy target level for combined title II and title XVI cases is 97 percent with a corresponding decision accuracy rate of 99 percent.

(c) *Intermediate Goals.* These goals will be established annually by SSA's regional commissioner after negotiation with the State and should be used as stepping stones to progress towards our targeted level of performance.

(d) *Threshold levels.* The State agency initial performance accuracy threshold level for combined title II and title XVI cases is 90.6 percent.

§ 404.1644 How and when we determine whether the processing time standards are met.

(a) *How we determine processing times.* For all initial title II cases, we calculate the mean number of days (including Saturday, Sunday and holidays) from the time the case folder is received in the State agency until it is released to us by the State agency. For initial title XVI cases, we calculate a mean number of days (including Saturday, Sunday and holidays) from the release of the case folder by the social security district office until systems input of the disability determination.

(b) *Frequency of review.* Title II processing times and title XVI processing times are monitored separately on a quarterly basis. The determination as to whether or not the processing time thresholds have been met is made at the end of each quarter each year. Quarterly State-by-State mean processing times are compared with the threshold levels for both title II and title XVI.

§ 404.1645 How and when we determine whether the performance accuracy standard is met.

(a) *How we determine performance accuracy.* We determine a State agency's performance accuracy rate on the basis of decision and documentation errors identified in our review of the sample cases.

(b) *Frequency of review.* Title II and title XVI initial performance accuracy are monitored together on a quarterly basis. The determinations as to whether the performance accuracy threshold has been met is made at the end of each quarter each year. Quarterly State-by-State combined initial performance accuracy rates are compared to the established threshold level.

§ 404.1650 If a State agency is not meeting the standards.

If a State agency falls below 2 of the 3 established threshold levels (one of which must be performance accuracy) for 2 or more consecutive quarters, we will notify the State agency in writing that it is not meeting the standards. Following our notification we will as soon as practicable provide the State agency appropriate technical and management assistance described in §§ 404.1660 and 404.1661 of these regulations for a period of up to 12 months.

Technical and Management Assistance

§ 404.1660 When we will provide assistance.

(a) *General.* We will maintain a regular monitoring program to evaluate State agency performance of combined title II and title XVI initial performance accuracy, title II initial processing time and title XVI initial processing time. This regular monitoring program will allow us to determine the type of technical and management assistance a State agency may need to improve its performance. In addition, the results of this monitoring will show whether we will give a State agency mandatory or optional technical and management assistance.

(b) *Mandatory assistance.* (1) We will provide a State agency technical and management assistance if it fails to meet two of three threshold levels (one being performance accuracy) for two consecutive quarters. These levels are—

(i) Combined title II and title XVI initial performance accuracy—90.6 percent

(ii) Title II initial processing time—49.5 days

(iii) Title XVI initial processing time—57.9 days

(2) Failure to meet any one of the threshold levels for two consecutive quarters may result in technical and management assistance being provided depending on available resources.

(c) *Optional assistance.* We may offer a State agency technical and management assistance when regular monitoring reveals that performance has significantly declined or that intermediate goals have not been met. We will offer this technical and management assistance at our discretion based on available resources.

§ 404.1661 What assistance we will provide.

We will initiate a program of technical and management assistance in order to improve performance in those State agencies where it has been determined that such help is necessary. This program will include any or all of the following—

(a) An onsite review of cases processed by the State agency emphasizing adherence to written guidelines.

(b) A fiscal and administrative management review (FAMR) to:

(1) Identify particular aspects of State agency operations which can receive immediate help and thus improve performance accuracy or processing time; and

(2) Develop a long-range plan based on the FAMR results to help the State agency prevent its performance from falling below the threshold levels in the future.

(c) A request that necessary administrative measures be implemented (e.g., filling staffing vacancies, using overtime, assisting with training activities, etc.).

(d) Provisions for Federal personnel to perform onsite reviews, conduct training, or perform other functions needed to improve performance.

(e) Provisions for fiscal aid to allow for overtime, temporary hiring of additional staff, etc., above the authorized budget.

Substantial Failure

§ 404.1670 General.

After a State agency falls below 2 of 3 established threshold levels, one being performance accuracy, for 2 consecutive quarters, and after the mandatory technical and management assistance period, we will give the State agency a 3-month adjustment period. During this 3-month period we will not require the State agency to meet the threshold levels. Following the adjustment period, if the State agency again falls below 2 of 3 threshold levels, one being performance accuracy, in 2 consecutive quarters during the next 12 months, we will notify the State that we propose to find the State agency to be in substantial failure and advise it that it may request a hearing on that issue. After giving the State notice and an opportunity for a hearing, if it is found that a State agency has substantially

failed to make disability determinations consistent with the regulations and other written guidelines, we will assume partial or complete responsibility for performing the disability determination function after we have complied with § 404.1690 and § 404.1692.

§ 404.1671 Good cause for not meeting the established threshold levels.

If we find that a State agency did not meet the threshold levels because of factors beyond its control, we will not find the State agency to be in substantial failure. Some of the factors we will consider are:

(a) Disasters such as fire, flood, or civil disorder, that—

(1) Require the diversion of significant personnel normally assigned the disability determination function, or

(2) Destroyed or delayed access to significant records needed to make accurate disability determinations;

(b) Strikes of State agency staff or other government or private personnel necessary to the performance of the disability determination function; or

(c) Sudden and unanticipated workload changes which result from changes in Federal law, regulation, or written guidelines, systems modifications or systems malfunctions, or rapid, unpredictable caseload growth for a 6-month period or longer.

§ 404.1675 Finding of substantial failure.

A finding of substantial failure with respect to a State may not be made unless and until the State is afforded an opportunity for a hearing.

Hearings and Appeals

§ 404.1680 Notice of right to hearing on proposed finding of substantial failure.

If, following the mandatory technical and management assistance period and the 3-month adjustment period, a State agency again falls below 2 of 3 threshold levels (one being performance accuracy) in 2 consecutive quarters in the succeeding 12 months, we will notify the State in writing that we will find the State agency in substantial failure unless the State submits a written request for a hearing with the Health and Human Services Departmental Grant Appeals Board within 30 days after receiving the notice. The notice will identify the threshold levels that were not met by the State agency, the period during which the thresholds were not met, and the accuracy and processing time levels attained by the State agency during this period. If a hearing is not requested, the State agency will be found in substantial failure and we will implement our plans to assume the disability determination function.

§ 404.1681 Disputes on other matters.

Disputes concerning fiscal issues will be resolved in proceedings before the Health and Human Services Departmental Grant Appeals Board if the issue cannot be resolved between us and the State. Disputes concerning nonfiscal issues will be resolved through an appeal to the Commissioner of Social Security, who will make the final decision. (See § 404.1627.)

§ 404.1682 Who conducts the hearings.

If a hearing is required, it will be conducted by the Health and Human Services Departmental Grant Appeals Board (the Board).

§ 404.1683 Hearings and appeals process.

The rules for hearings and appeals before the Board are provided in 45 CFR Part 16. A notice under § 404.1680 of this subpart will be considered a "final written decision" for purposes of Board review.

Assumption of Disability Determination Function

§ 404.1690 Assumption when we make a finding of substantial failure.

(a) *Notice to State.* When we find that substantial failure exists, we will notify the State in writing that we will assume responsibility for performing the disability determination function from the State agency, whether the assumption will be partial or complete, and the date on which the assumption will be effective.

(b) *Effective date of assumption.* The date of any partial or complete assumption of the disability determination function from a State agency may not be earlier than 180 days after our finding of substantial failure, and not before compliance with the requirements of § 404.1692.

§ 404.1691 Assumption when State no longer wishes to perform the disability determination function.

(a) *Notice to the Secretary.* If a State no longer wishes to perform the disability determination function, it will notify us in writing. The notice must be from an official authorized to act for the State for this purpose. The State will provide an opinion from the State's Attorney General verifying the authority of the official who gave the notice.

(b) *Effective date of assumption.* The State agency will continue to perform whatever activities of the disability determination function it is performing at the time the notice referred to in paragraph (a) of this section is given for not less than 180 days or, if later, until we have complied with the requirements of § 404.1692. For example, if the State is not making disability determinations (because we previously assumed responsibility for making them) but is performing other activities related to the disability determination function at the time it gives notice, the State will continue to do these activities until the requirements of this paragraph are met. Thereafter, we will assume complete responsibility for performing the disability determination function.

§ 404.1692. Protection of State employees.

(a) *Hiring preference.* We will develop and initiate procedures to implement a plan to partially or completely assume the disability determination function from the State agency under § 404.1690 or § 404.1691, as appropriate. Except for the State agency's administrator, deputy administrator, or assistant administrator (or his equivalent), we will give employees of the State agency who are capable of performing duties in the disability determination function preference over any other persons in filling positions with us for which they are qualified. We may also give a preference in hiring to the State agency's administrator, deputy administrator, or assistant administrator (or his equivalent). We will establish a system for determining the hiring priority among the affected State agency employees in those instances where we are not hiring all of them.

(b) *Determination by Secretary of Labor.* We will not assume responsibility for performing the disability determination function from a State until the Secretary of Labor determines that the State has made fair and equitable arrangements under applicable Federal, State and local law to protect the interests of employees who will be displaced from their employment because of the assumption and who we will not hire.

§ 404.1693 Limitation on State expenditures after notice.

The State agency may not, after it receives the notice referred to in § 404.1690, or gives the notice referred to in § 404.1691, make any new commitments to spend funds allocated to it for performing the disability determination function without the approval of the appropriate SSA regional commissioner. The State will make every effort to close out as soon as possible all existing commitments that relate to performing the disability determination function.

§ 404.1694 Final accounting by the State.

The State will submit its final claims to us as soon as possible, but in no event later than 1 year from the effective date of our assumption of the disability determination function unless we grant an extension of time. When the final claim(s) is submitted, a final accounting will be made by the State of any funds paid to the State under § 404.1626 which have not been spent or committed prior to the effective date of our assumption of the disability determination function. Disputes concerning final accounting issues which cannot be resolved between the State and us will be resolved in proceedings before the Grant Appeals Board as described in 45 CFR Part 16.

PART 416—SUPPLEMENTAL SECURITY INCOME FOR THE AGED, BLIND, AND DISABLED

Part 416 of Chapter III of Title 20 of the Code of Federal Regulations is amended as follows:

1. Section 416.902 is revised to read as follows:

§ 416.902 General definitions and terms for this subpart.

As used in the subpart—

"Secretary" means the Secretary of Health and Human Services.

"State agency" means that agency of a State which has been designated by the State to carry out the disability determination function.

"We" or "us" refers to either the Social Security Administration or the State agency making the disability or blindness determination.

"You" refers to the person who has applied for or is receiving benefits based on disability or blindness.

2. Section 416.903 is revised to read as follows:

§ 416.903 Who makes disability and blindness determinations.

(a) *State agencies.* State agencies make disability and blindness determinations for the Secretary for most persons living in the State. State agencies make these disability and blindness determinations under regulations containing performance standards and other administrative requirements relating to the disability and blindness determination function. States have the option of turning the function over to the Federal Government if they no longer want to make disability determinations. Also, the Secretary may take the function away from any State which has substantially failed to make disability and blindness determinations in accordance with these regulations. Subpart J of this Part contains the rules the States must follow in making disability and blindness determinations.

(b) *Social Security Administration.* The Social Security Administration will make disability and blindness determinations for the Secretary for—

(1) Any person living in a State which is not making for the Secretary any disability and blindness determinations or which is not making those determinations for the class of claimants to which that person belongs; and

(2) Any person living outside the United States.

(c) *What determinations are authorized.* The Secretary has authorized the State agencies and the Social Security Administration to make determinations about—

(1) Whether you are disabled or blind;

(2) The date your disability or blindness began; and

(3) The date your disability or blindness stopped.

(d) *Review of State Agency determinations.* On review of a State agency determination or redetermination of disability or blindness we may find that—

(1) You are, or are not, disabled or blind, regardless of what the State agency found;

(2) Your disability or blindness began earlier or later than the date found by the State agency; and

(3) Your disability or blindness stopped earlier or later than the date found by the State agency.

§§ 416.1001–416.1078 [Redesignated as §§416.1801–416.1878 (Subpart R)]

3. The section headings and the text of §§ 416.1001–416.1078 are redesignated as §§ 416.1801–416.1878 (Subpart R). The title of Subpart R is "Relationship".

4. A new Subpart J is added to Part 416 to read as follows:

Subpart J—Determinations of Disability

General Provisions

Sec.
416.1001 Purpose and scope.
416.1002 Definitions.
416.1003 Basic responsibilities for us and the State.

Responsibilities for Performing the Disability Determination Function

416.1010 How a State notifies us that it wishes to perform the disability determination function.
416.1011 How we notify a State whether it may perform the disability determination function.
416.1013 Disability determinations the State makes.
416.1014 Responsibilities for obtaining evidence to make disability determinations.
416.1015 Making disability determinations.
416.1018 Notifying claimants of the disability determination.

Administrative Responsibilities and Requirements

416.1020 Organization.
416.1021 Personnel.
416.1022 Training.
416.1023 Facilities.
416.1024 Medical and other purchased services.
416.1025 Records and reports.
416.1026 Fiscal.
416.1027 Audits.
416.1028 Property.
416.1029 Participation in research and demonstration projects.
416.1030 Coordination with other agencies
416.1031 Confidentiality of information and records.
416.1032 Other Federal laws and regulations.
416.1033 Policies and operating instructions

Performance Standards

416.1040 General.
416.1041 Standards of performance.
416.1042 Processing time standard.
416.1043 Performance accuracy standard
416.1044 How and when we determine whether the processing time standards are met.
416.1045 How and when we determine whether the performance accuracy standard is met.
416.1050 If a State agency is not meeting the standards.

Technical and Management Assistance

416.1060 When we will provide assistance.
416.1061 What assistance we will provide.

Substantial Failure

416.1070 General.
416.1071 Good cause for not meeting the established threshold levels.
416.1075 Finding of substantial failure.

Hearings and Appeals

416.1080 Notice of right to hearing on proposed finding of substantial failure
416.1081 Disputes on other matters.
416.1082 Who conducts the hearings.
416.1083 Hearings and appeals process.

Assumption of Disability Determination Function

416.1090 Assumption when we make a finding of substantial failure.
416.1091 Assumption when State no longer wishes to perform the disability determination function.
416.1092 Protection of State employees.
416.1093 Limitation on State expenditures after notice.
416.1094 Final accounting by the State.

Authority: Issued under secs. 1102, 1614, and 1631 of the Social Security Act, as amended; 49 Stat. 647, as amended; 86 Stat. 1471, as amended by 88 Stat. 52; 86 Stat. 1475; 42 U.S.C. 1302, 1382c, and 1383.

Subpart J—Determinations of Disability

General Provisions

§ 416.1001 Purpose and scope.

This subpart describes the standards of performance and administrative requirements and procedures for States making determinations of disability for the Secretary under title XVI of the Act. It also establishes the Secretary's responsibilities in carrying out the disability determination function.

(a) Sections 416.1001–416.1003 describe the purpose of the regulations and the meaning of terms frequently used in the regulations. They also briefly set forth the responsibilities of the Secretary and the States covered in detail in other sections.

(b) Sections 416.1010–416.1018 describe the Secretary's and the State's responsibilities in performing the disability determination function.

(c) Sections 416.1020–416.1033 describe the administrative responsibilities and requirements of the States. The corresponding role of the Secretary is also set out.

(d) Sections 416.1040–416.1050 describe the performance accuracy and processing time standards for measuring State agency performance.

(e) Sections 416.1060–416.1061 describe when and what kind of assistance the Secretary will provide State agencies to help them improve performance.

(f) Sections 416.1070–416.1075 describe the level of performance below which the Secretary will consider a State agency to be substantially failing to make disability determinations consistent with the regulations and other written guidelines and the resulting action the Secretary will take.

(g) Sections 416.1080–416.1083 describe the rules for resolving disputes concerning fiscal issues and providing hearings when we propose to find that a State is in substantial failure.

(h) Sections 416.1090–416.1094 describe when and what action the Secretary will take and what action the State will be expected to take if the Secretary assumes the disability determination function from a State agency.

§ 416.1002 Definitions.

For purposes of this subpart:

"Act" means the Social Security Act, as amended.

"Class or classes of cases" means the categories into which disability claims are divided according to their characteristics.

"Determination of disability" or "disability determination" means one or more of the following decisions:

(a) Whether or not a person is under a disability;

(b) The date a person's disability began; or

(c) The date a person's disability ended.

"Disability" means "disability" or "blindness" as defined in sections 1614(a) (2) and (3) of the Act.

"Disability determination function" means making determinations as to disability or blindness and carrying out related administrative and other responsibilities.

"Disability program" means the Federal program for providing supplemental security income benefits for the blind and disabled under title XVI of the Act, as amended.

"Initial" means the first level of disability or blindness adjudication.

"Other written guidelines" means the policies, procedures, guides, and operating instructions in the Disability Insurance section of the Program Operations Manual System that are not designated as advisory or discretionary.

"Regulations" means regulations in this subpart issued under §§ 1102, 1631(c) and 1633(a) of the Act, unless otherwise indicated.

"Secretary" means the Secretary of the Department of Health and Human Services or the Secretary's delegate.

"State" means any of the 50 States of the United States and the District of Columbia. It includes the State agency.

"State agency" means that agency of a State which has been designated by the State to carry out the disability determination function.

"We," "us," and "our" refers to the Social Security Administration (SSA) or the Secretary, as appropriate.

§ 416.1003 Basic responsibilities for us and the State.

(a) *General.* We will work with the State to provide and maintain an effective system for processing claims of those who apply for and who are receiving benefits under the disability program. We will provide program standards, leadership, and oversight. We do not intend to become involved in the State's ongoing management of the program except as is necessary and in accordance with these regulations. The State will comply with our regulations and other written guidelines.

(b) *Our responsibilities.* We will:

(1) Periodically review the regulations and other written guidelines to determine whether they insure effective and uniform administration of the disability program. To the extent feasible, we will consult with and take into consideration the experience of the States in issuing regulations and guidelines necessary to insure effective and uniform administration of the disability program;

(2) Provide training materials or in some instances conduct or specify training (see § 416.1022);

(3) Provide funds to the State agency for the necessary cost of performing the disability determination function (see § 416.1026);

(4) Monitor and evaluate the performance of the State agency under the established standards (see §§ 416.1044 and 416.1045); and

(5) Maintain liaison with the medical profession nationally and with national organizations and agencies whose interests or activities may affect the disability program.

(c) *Responsibilities of the State.* The State will:

(1) Provide management needed to insure that the State agency carries out the disability determination function so that disability determinations are made accurately and promptly;

(2) Provide an organizational structure, adequate facilities, qualified personnel, medical consultant services, and a quality assurance function (§§ 416.1020–416.1024);

(3) Furnish reports and records relating to the administration of the disability program (§ 416.1025);

(4) Submit budgets (§ 416.1026);

(5) Cooperate with audits (§ 416.1027);

(6) Insure that all applicants for and recipients of disability benefits are treated equally and courteously;

(7) Be responsible for property used for disability program purposes (§ 416.1028);

(8) Take part in the research and demonstration projects (§ 416.1029);

(9) Coordinate with other agencies (§ 416.1030);

(10) Safeguard the records created by the State in performing the disability determination function (§ 416.1031);

(11) Comply with other provisions of the Federal law and regulations that apply to the State in performing the disability determination function;

(12) Comply with other written guidelines (§ 416.1033);

(13) Maintain liaison with the medical profession and organizations that may facilitate performing the disability determination function; and

(14) Assist us in other ways that we determine may promote the objectives of effective and uniform administration.

Responsibilities for Performing the Disability Determination Function

§ 416.1010 How a State notifies us that it wishes to perform the disability determination function.

(a) *Deemed notice.* Any State that has in effect as of June 1, 1981, an agreement with us to make disability determinations will be deemed to have given us notice that it wishes to perform the disability determination function, in lieu of continuing the agreement in effect after June 1, 1981.

(b) *Written notice.* After June 1, 1981, a State not making disability determinations that wishes to perform the disability determination function under these regulations must notify us in writing. The notice must be from an official authorized to act for the State for this purpose. The State will provide an opinion from the State's Attorney General verifying the authority of the official who sent the notice to act for the State.

§ 416.1011 How we notify a State whether it may perform the disability determination function.

(a) If a State notifies us in writing that it wishes to perform the disability determination function, we will notify the State in writing whether or not it may perform the function. The State will begin performing the disability determination function beginning with the month we and the State agree upon.

(b) If we have previously found that a State agency has substantially failed to make disability determinations in accordance with the law or these regulations and other written guidelines or if the State has previously notified us in writing that it does not wish to make disability determinations, the notice will advise the State whether the State agency may again make the disability determinations and, if so, the date and the conditions under which the State may again make them.

§ 416.1013 Disability determinations the State makes.

(a) *General rule.* A State agency will make determinations of disability with respect to all persons in the State except those individuals whose cases are in a class specifically excluded by our written guidelines. A determination of disability made by the State is the determination of the Secretary, except as described in § 416.903(d)(1).

(b) *New classes of cases.* Where any new class or classes of cases arise requiring determinations of disability, we will determine the conditions under which a State may choose not to make the disability determinations. We will provide the State with the necessary funding to do the additional work.

(c) *Temporary transfer of classes of cases.* We will make disability determinations for classes of cases temporarily transferred to us by the State agency if the State agency asks us to do so and we agree. The State agency will make written arrangements with us which will specify the period of time and the class or classes of cases we will do.

§ 416.1014 Responsibilities for obtaining evidence to make disability determinations.

(a) The State agency will secure from the claimant, or other sources, any evidence it needs to make a disability determination.

(b) We will secure from the claimant or other special arrangement sources, any evidence we can obtain as adequately and more readily than the State agency. We will furnish the evidence to the State agency for use in making a disability determination

(c) At our request, the State agency will obtain and furnish medical or other evidence and provide assistance as may be necessary for us to carry out our responsibility for making disability determinations in those classes of cases described in the written guidelines for which the State agency does not make the determination.

§ 416.1015 Making disability determinations.

(a) When making a disability determination, the State agency will apply subpart I, Part 416 of our regulations.

(b) The State agency will make disability determinations based only on the medical and nonmedical evidence in its files.

(c) Disability determinations will be made by a State agency medical consultant and a State agency disability examiner. The State agency disability examiner must be qualified to interpret and evaluate medical reports and other evidence relating to the claimant's physical or mental impairments and as necessary to determine the capacities of the claimant to perform substantial gainful activity. (See § 416.1072 of this part for what we mean by "substantial gainful activity".)

(d) The State agency will certify each determination of disability to us on forms we provide.

(e) The State agency will furnish us with all the evidence it considered in making its determination.

(f) The State agency will not be responsible for defending in court any determination made, or any procedure for making determinations, under these regulations.

§ 416.1018 Notifying claimant of the disability determination.

The State agency will prepare denial notices in accordance with subpart N of this Part whenever it makes a disability determination which is wholly or partly unfavorable to the claimant.

Administrative Responsibilities and Requirements

§ 416.1020 Organization.

(a) The State will provide the organizational structure, sufficient qualified personnel, medical consultant services, and a quality assurance function to insure disability determinations are made accurately and promptly. We may impose specific organizational requirements on the State, but only in the course of mandatory technical and management assistance as described in § 416.1060.

(b) The State is responsible for making accurate and prompt disability determinations.

§ 416.1021 Personnel.

(a) *Equal Employment Opportunity.* The State will comply with all applicable Federal statutes, executive orders and regulations concerned with equal employment opportunities.

(b) *Selection, tenure, and compensation.* The State agency will, except as may be inconsistent with paragraph (a) of this section, adhere to applicable State approved personnel standards in the selection, tenure, and compensation of any individual employed in the disability program.

(c) *Travel.* The State will make personnel available to attend meetings or workshops as may be sponsored or approved by us for furthering the purposes of the disability program.

(d) *Restrictions.* Subject to appropriate Federal funding, the State will, to the best of its ability, facilitate the processing of disability claims by avoiding personnel freezes, restrictions against overtime work, or curtailment of facilities or activities.

§ 416.1022 Training.

The State will insure that all employees have an acceptable level of competence. We will provide training and other instructional materials to facilitate basic and advanced technical proficiency of disability staff in order to insure uniformity and effectiveness in the administration of the disability program. We will conduct or specify training, as appropriate but only if:

(a) a State agency's performance approaches unacceptable levels or

(b) the material required for the training is complex or the capacity of the State to deliver the training is in doubt and uniformity of the training is essential.

§ 416.1023 Facilities.

(a) *Space, equipment, supplies, and other services.* Subject to appropriate Federal funding, the State will provide adequate space, equipment, supplies, and other services to facilitate making accurate and prompt disability determinations.

(b) *Location of facilities.* Subject to appropriate Federal funding, the State will determine the location where the disability determination function is to be performed so that disability determinations are made accurately and promptly.

(c) *Access.* The State will permit us access to the premises where the disability determination function is performed for the purposes of inspecting the work and activities required by the regulations and assuring compliance with pertinent Federal statutes and regulations. We will contact the State and give reasonable prior notice of the times and purposes of any visit.

§ 416.1024 Medical and other purchased services.

The State will determine the rates of payment to be used for purchasing medical or other services necessary to make determinations of disability. The rates may not exceed the highest rate paid by Federal or other agencies in the State for the same or similar type of service. The State will maintain documentation to support the rates of payment it uses.

§ 416.1025 Records and reports.

(a) The State will establish and maintain the records and furnish the schedules, financial, cost, and other reports relating to the administration of the disability programs as we may require.

(b) The State will permit us and the Comptroller General of the United States (including duly authorized representatives) access to and the right to examine records relating to the work which the State performs under these regulations. These records will be retained by the State for the periods of time specified for retention of records in the Federal Procurement Regulations (41 CFR parts 1–20).

§ 416.1026 Fiscal.

(a) We will give the State funds, in advance or by way of reimbursement, for necessary costs in making disability determinations under these regulations. Necessary costs mean direct as well as indirect costs as defined in title 41 CFR subpart 1–15.7 and in Federal Management Circular 74–4, as amended or superseded.

(b) The State will submit estimates of anticipated costs in the form of a budget at the time and in the manner we require.

(c) We will notify the State of the amount which will be made available to it as well as what anticipated costs are being approved.

(d) The State may not incur or make expenditures for items of cost not approved by us or in excess of the amount we make available to the State.

(e) After the close of a period for which funds have been made available to the State, the State will submit a report of its actual expenditures. We will give the State an audit report showing whether the expenditures were consistent with cost principles described in subpart 1–15.7 of part 1–15 of the Federal Procurement Regulations (41 CFR 1–15.7) and in written guidelines in effect at the time the expenditures were made or incurred.

(f) Any monies paid to the State which are used for purposes not within the scope of these regulations will be paid back to the Treasury of the United States.

§ 416.1027 Audits.

As soon as practicable after the close of each budgetary period, or at other times as necessary, the books of account and records in each State pertaining to the administration of the disability program under the Act will be audited by our Inspector General's office. These audits are conducted to determine whether the expenditures were made for the purposes intended and in amounts necessary for the proper and efficient administration of the disability program. Audits also will be made to inspect the work and activities required by the regulations to ensure compliance with pertinent Federal statutes and regulations. The State will make every effort to act upon and resolve any items questioned in an audit.

(a) *Questioned items.* Expenditures of State agencies will be audited on the basis of cost principles and written guidelines in effect at the time the expenditures were made or incurred. Both the State and the State agency will be informed and given a full explanation of any questioned items. They will be given reasonable time to explain questioned items or expenditures. Any explanation furnished by the State or State agency will be given full consideration before a final determination is made on questioned items in the audit report.

(b) *State appeal of audit determinations.* The appropriate SSA regional commissioner will notify the State of his or her determination on the audit report. If the State disagrees with that determination, the State may request reconsideration in writing within 30 days of the date of the regional commissioner's notice of the determination. The written request may be made, through the Associate Commissioner, Office of Operational Policy and Procedures, to the Commissioner of Social Security, Room 900 Altmeyer Building, 6401 Security Boulevard, Baltimore, Maryland 21235. The Commissioner will make a determination and notify the State of that decision in writing no later than 45 days from the date of the State's appeal. The decision by the Commissioner will be final and conclusive upon the State unless the State appeals that decision in writing within 30 days of the date of the decision by the Commissioner to the Department of Health and Human Services Departmental Grant Appeals Board (the Board) within 30 days after receiving the Commissioner's decision. See § 416.1083.

§ 416.1028 Property.

The State will have title to equipment purchased for disability program purposes. The State will be responsible for maintaining all property it acquires or which we furnish to it for performing the disability determination function. The State will identify the equipment by labeling and by inventory and will credit the SSA account with the fair market value of disposed property. In the event we assume the disability determination function from a State, ownership of all property and equipment acquired with SSA funds will be transferred to us effective on the date the State is notified that we are assuming the disability determination function or we are notified that the State is terminating the relationship.

§ 416.1029 Participation in research and demonstration projects.

We will invite State participation in federally funded research and demonstration projects to assess the effectiveness of the disability program and to ascertain the effect of program policy changes. Where we determine that State participation is necessary for the project to be complete, for example, to provide national uniformity in a claims process, State participation is mandatory.

§ 416.1030 Coordination with other agencies.

(a) The State will establish cooperative working relationships with other agencies concerned with serving the disabled and, insofar as practicable, use their services, facilities, and records to:

(1) Assist the State in developing evidence and making determinations of disability; and

(2) Insure that referral of disabled or blind persons for rehabilitation services will be carried out effectively.

(b) The State may pay these agencies for the services, facilities, or records they provide. The State will include these costs in its estimates of anticipated costs and reports of actual expenditures.

§ 416.1031 Confidentiality of information and records.

The State will comply with the confidentiality of information, including the security of systems, and records requirements described in 20 CFR Part 401 and pertinent written guidelines (see § 416.1033).

§ 416.1032 Other Federal laws and regulations.

The State will comply with the provisions of other Federal laws and regulations that directly affect its responsibilities in carrying out the disability determination function; for example, Treasury Department regulations on letters of credit (31 CFR Part 205).

§ 416.1033 Policies and operating instructions.

(a) We will provide the State agency with written guidelines necessary for it to carry out its responsibilities in performing the disability determination function.

(b) The State agency making determinations of disability will comply with the written guidelines in the Disability Insurance section of the Program Operations Manual System. This manual will also include certain policies, procedures, guides and operating instructions designated as advisory or discretionary.

(c) A representative group of State agencies will be given an opportunity to participate in formulating disability program policies that have an effect on their role in carrying out the disability determination function. State agencies will also be given an opportunity to comment before changes are made in written guidelines unless delay in issuing a change may impair service to the public.

Performance Standards

§ 416.1040 General.

The following sections provide the procedures and guidelines we use to determine whether the State agency meets established national performance standards. We use these performance standards to help assure effective and uniform administration of our disability programs throughout the United States and to measure whether each State agency's performance of the disability determination function is acceptable. Also, the standards are designed to improve overall State agency performance in the disability determination process. We measure the State agency performance in two areas—processing time and performance accuracy.

§ 416.1041 Standards of performance.

(a) *General.* The performance standards include both a target level of performance and a threshold level of performance for the State agency. The target level represents a level of performance that we and the States will work to attain in the future. The threshold level is the minimum acceptable level of performance. Performance below the threshold level will be the basis for the Secretary's taking from the State agency partial or complete responsibility for performing the disability determination function. Intermediate State agency goals are designed to help each State agency move from its current performance levels to the target levels.

(b) *The target level.* The target level is the optimum level of performance. There are three targets—one for combined title II and title XVI initial performance accuracy, one for title II initial processing time, and one for title XVI initial processing time.

(c) *The threshold level.* The threshold level is the minimum acceptable level of performance. There are three thresholds—one for combined title II and title XVI initial performance accuracy, one for title II initial processing time, and one for title XVI initial processing time.

(d) *Intermediate goals.* Intermediate goals are levels of performance between the threshold levels and the target levels established by SSA's regional commissioner after negotiation with each State agency. The intermediate goals are stepping stones designed to help the State agencies reach the target levels. Failure to meet these goals is not a cause for considering the State agency to be substantially failing to comply with the performance standards. However, failure to meet the intermediate goals may result in consultation and an offer of optional technical and management assistance depending on the availability of SSA resources.

§ 416.1042 Processing time standards.

(a) *General.* Title II processing time refers to the average number of days (including Saturday, Sunday and holidays) it takes a State agency to process an initial disability claim from the day it is received in the State agency until the day it is released by the State agency. Title XVI processing time refers to the average number of days (including Saturday, Sunday and holidays) from release of the initial disability claim by the SSA district office until systems input of the disability determination.

(b) *Target levels.* The processing time target levels are:

(1) 37 days for title II initial claims.

(2) 43 days for title XVI initial claims.

(c) *Threshold levels.* The processing time threshold levels are:

(1) 49.5 days for title II initial claims.

(2) 57.9 days for title XVI initial claims.

§ 416.1043 Performance accuracy standard.

(a) *General.* Performance accuracy refers to the percentage of cases that do not have to be returned to State agencies for further development or correction of decisions based on evidence in the files and as such represents the reliability of State agency adjudication. The definition of performance accuracy includes the measurement of factors that have a potential for affecting a decision, as well as the correctness of the decision. For example, if a particular item of medical evidence should have been in the file but was not included, even though its inclusion does not change the result in the case, that is a performance error. Performance accuracy, therefore, is a higher standard than decisional accuracy. As a result, the percentage of correct decisions is significantly higher than what is reflected in the error rate established by SSA's quality assurance system.

(b) *Target level.* The State agency initial performance accuracy target level for combined title II and title XVI cases is 97 percent with a corresponding decision accuracy rate of 99 percent.

(c) *Intermediate goals.* These goals will be established annually by SSA's regional commissioner after negotiation with the State and should be used as stepping stones to progress towards our targeted level of performance.

(d) *Threshold levels.* The State agency initial performance accuracy threshold level for combined title II and title XVI cases is 90.6 percent.

§ 416.1044 How and when we determine whether the processing time standards are met.

(a) *How we determine processing times.* For all initial title II cases, we calculate the mean number of days (including Saturday, Sunday and holidays) from the time the case folder is received in the State agency until it is released to us by the State agency. For initial title XVI cases, we calculate a mean number of days (including Saturday, Sunday and holidays) from the release of the case folder by the social security district office until systems input of the disability determination.

(b) *Frequency of review.* Title II processing times and title XVI processing times are monitored separately on a quarterly basis. The determination as to whether or not the processing time thresholds have been met is made at the end of each quarter each year. Quarterly State-by-State mean processing times are compared with the threshold levels for both title II and title XVI.

§ 416.1045 How and when we determine whether the performance accuracy standard is met.

(a) *How we determine performance accuracy.* We determine a State agency's performance accuracy rate on the basis of decision and documentation errors identified in our review of the sample cases.

(b) *Frequency of review.* Title II and title XVI initial performance accuracy are monitored together on a quarterly basis. The determinations as to whether the performance accuracy threshold has been met is made at the end of each quarter each year. Quarterly State-by-State combined initial performance accuracy rates are compared to the established threshold level.

§ 416.1050 If a State agency is not meeting the standards.

If a State agency falls below two of the three established threshold levels (one of which must be performance accuracy) for two or more consecutive quarters, we will notify the State agency in writing that it is not meeting the standards. Following our notification we will as soon as practicable provide the State agency appropriate technical and management assistance described in §§ 416.1060 and 416.1061 of these regulations for a period of up to 12 months.

Technical and Management Assistance

§ 416.1060 When we will provide assistance.

(a) *General.* We will maintain a regular monitoring program to evaluate State agency performance of combined title II and title XVI initial performance accuracy, title II initial processing time and title XVI initial processing time. This regular monitoring program will allow us to determine the type of technical and management assistance a State agency may need to improve its performance. In addition, the results of this monitoring will show whether we will give a State agency mandatory or optional technical and management assistance.

(b) *Mandatory assistance.* (1) We will provide a State agency technical and management assistance if it fails to meet two of three threshold levels (one being performance accuracy) for two consecutive quarters. These levels are—

(i) Combined title II and title XVI initial performance accuracy—90.6 percent.

(ii) Title II initial processing time—49.5 days.

(iii) Title XVI initial processing time—57.9 days.

(2) Failure to meet any one of the threshold levels for two consecutive quarters may result in technical and management assistance being provided depending on available resources.

(c) *Optional assistance.* We may offer a State agency technical and management assistance when regular monitoring reveals that performance has significantly declined or that intermediate goals have not been met. We will offer this technical and management assistance at our discretion based on available resources.

§ 416.1061 What assistance we will provide.

We will initiate a program of technical and management assistance in order to improve performance in those State agencies where it has been determined that such help is necessary. This program will include any or all of the following—

(a) An onsite review of cases processed by the State agency emphasizing adherence to written guidelines.

(b) A fiscal and administrative management review (FAMR) to:

(1) Identify particular aspects of State agency operations which can receive immediate help and thus improve performance accuracy or processing time; and

(2) Develop a long-range plan based on the FAMR results to help the State agency prevent its performance from falling below the threshold levels in the future.

(c) A request that necessary administrative measures be implemented (e.g., filling staffing vacancies, using overtime, assisting with training activities, etc.).

(d) Provisions for Federal personnel to perform onsite reviews, conduct training, or perform other functions needed to improve performance.

(e) Provisions for fiscal aid to allow for overtime, temporary hiring of additional staff, etc., above the authorized budget.

Substantial Failure

§ 416.1070 General.

After a State agency falls below 2 of 3 established threshold levels, one being performance accuracy, for 2 consecutive quarters, and after the mandatory technical and management assistance period, we will give the State agency a 3-month adjustment period. During this 3-month period we will not require the State agency to meet the threshold levels. Following the adjustment period, if the State agency again falls below 2 of 3 threshold levels, one being performance accuracy, in 2 consecutive quarters during the next 12 months, we will notify the State that we propose to find the State agency to be in substantial failure and advise it that it may request a hearing on that issue. After giving the State notice and an opportunity for a hearing, if it is found that a State agency has substantially failed to make disability determinations consistent with the regulations and other written guidelines, we will assume partial or complete responsibility for performing the disability determination function after we have complied with § 416.1090 and § 416.1092

§ 416.1071 Good cause for not meeting the established threshold levels.

If we find that a State agency did not meet the threshold levels because of factors beyond its control, we will not find the State agency to be in substantial failure. Some of the factors we will consider are:

(a) Disasters such as fire, flood, or civil disorder, that—

(1) Require the diversion of significant personnel normally assigned the disability determination function, or

(2) Destroyed or delayed access to significant records needed to make accurate disability determinations;

(b) Strikes of State agency staff or other government or private personnel necessary to the performance of the disability determination function; or

(c) Sudden and unanticipated workload changes which result from changes in Federal law, regulation, or written guidelines, systems modifications or systems malfunctions, or rapid, unpredictable caseload growth for a 6-month period or longer.

§ 416.1075 Finding of substantial failure.

A finding of substantial failure with respect to a State may not be made unless and until the State is afforded an opportunity for a hearing.

Hearings and Appeals

§ 416.1080 Notice of right to hearing on proposed finding of substantial failure.

If, following the mandatory technical and management assistance period and the 3-month adjustment period, a State agency again falls below 2 of 3 threshold levels (one being performance accuracy) in 2 consecutive quarters in the succeeding 12 months, we will notify the State in writing that we will find the State agency in substantial failure unless the State submits a written request for a hearing with the Health and Human Services Departmental Grant Appeals Board within 30 days after receiving the notice. The notice will identify the threshold levels that were not met by the State agency, the period during which the thresholds were not met, and the accuracy and processing time levels attained by the State agency during this period. If a hearing is not requested, the State agency will be found in substantial failure and we will implement our plans to assume the disability determination function.

§ 416.1081 Disputes on other matters.

Disputes concerning fiscal issues will be resolved in proceedings before the Health and Human Services Departmental Grant Appeals Board if the issue cannot be resolved between us and the State. Disputes concerning nonfiscal issues will be resolved through an appeal to the Commissioner of Social Security, who will make the final decision. (See § 416.1027.)

§ 416.1082 Who conducts the hearings.

If a hearing is required, it will be conducted by the Health and Human Services Departmental Grant Appeals Board (the Board).

§ 416.1083 Hearings and appeals process.

The rules for hearings and appeals before the Board are provided in 45 CFR Part 16. A notice under § 416.1080 of this subpart will be considered a "final written decision" for purposes of Board review.

Assumption of Disability Determination Function

§ 416.1090 Assumption when we make a finding of substantial failure.

(a) *Notice to State.* When we find that substantial failure exists, we will notify the State in writing that we will assume responsibility for performing the disability determination function from the State agency, whether the assumption will be partial or complete, and the date on which the assumption will be effective.

(b) *Effective date of assumption.* The date of any partial or complete assumption of the disability determination function from a State agency may not be earlier than 180 days after our finding of substantial failure, and not before compliance with the requirements of § 416.1092.

§ 416.1091 Assumption when State no longer wishes to perform the disability determination function.

(a) *Notice to the Secretary.* If a State no longer wishes to perform the disability determination function, it will notify us in writing. The notice must be from an official authorized to act for the State for this purpose. The State will provide an opinion from the State's Attorney General verifying the authority of the official who gave the notice.

(b) *Effective date of assumption.* The State agency will continue to perform whatever activities of the disability determination function it is performing at the time the notice referred to in paragraph (a) of this section is given for not less than 180 days or, if later, until we have complied with the requirements of § 416.1092. For example, if the State is not making disability determinations (because we previously assumed responsibility for making them) but is performing other activities related to the disability determination function at the time it gives notice, the State will continue to do these activities until the requirements of this paragraph are met. Thereafter, we will assume complete responsibility for performing the disability determination function.

§ 416.1092 Protection of State employees.

(a) *Hiring preference.* We will develop and initiate procedures to implement a plan to partially or completely assume the disability determination function from the State agency under § 416.1090 or § 416.1091, as appropriate. Except for the State agency's administrator, deputy administrator, or assistant administrator (or his equivalent), we will give employees of the State agency who are capable of performing duties in the disability determination function preference over any other persons in filling positions with us for which they are qualified. We may also give a preference in hiring to the State agency's administrator, deputy administrator, or assistant administrator (or his equivalent). We will establish a system for determining the hiring priority among the affected State agency employees in those instances where we are not hiring all of them.

(b) *Determination by Secretary of Labor.* We will not assume responsibility for performing the disability determination function from a State until the Secretary of Labor determines that the State has made fair and equitable arrangements under applicable Federal, State and local law to protect the interests of employees who will be displaced from their employment because of the assumption and who we will not hire.

§ 416.1093 Limitation on State expenditures after notice.

The State agency may not, after it receives the notice referred to in § 416.1090, or gives the notice referred to in § 416.1091, make any new commitments to spend funds allocated to it for performing the disability determination function without the approval of the appropriate SSA regional commissioner. The State will make every effort to close out as soon as possible all existing commitments that relate to performing the disability determination function.

§ 416.1094 Final accounting by the State.

The State will submit its final claims to us as soon as possible, but in no event later than 1 year from the effective date of our assumption of the disability determination function unless we grant an extension of time. When the final claim(s) is submitted, a final accounting will be made by the State of any funds paid to the State under § 416.1026 which have not been spent or committed prior to the effective date of our assumption of the disability determination function. Disputes concerning final accounting issues which cannot be resolved between the State and us will be resolved in proceedings before the Grant Appeals Board as described in 45 CFR Part 416.

Part VI

Office of the Federal Register

Incorporations by Reference; Approval and Corrections in Titles 21 and 24

Title 21 Chapter I—Food and Drug Administration, Department of Health and Human Services

Title 24 Chapter II—Office of Assistant Secretary for Housing—Federal Housing Commissioner (Federal Housing Administration), Department of Housing and Urban Development

Chapter XX—Office of Assistant Secretary for neighborhoods, Voluntary Associations and Consumer Protection, Department of Housing and Urban Development

OFFICE OF THE FEDERAL REGISTER

1 CFR Part 51

Incorporation by Reference

AGENCY: Office of the Federal Register.

ACTION: Approval of incorporations by reference and corrections.

SUMMARY: This document announces the final approval for incorporation by reference of certain publications that were given extensions of approval by the Director of the Federal Register on March 31, 1981 (46 FR 19660). The March 31 document listed materials approved by the Director for incorporation by reference into Title 17–27 of the *Code of Federal Regulations*. Material that is approved for incorporation by reference has the same legal status as if it were published in full in the **Federal Register**. This document also makes corrections to the March 31 document.

EFFECTIVE DATE: The Director approves the following incorporations by reference for one year effective April 1, 1981.

FOR FURTHER INFORMATION CONTACT: Rose Anne Lawson at (202) 523–4534.

Dated: May 26, 1981.

John E. Byrne,

Director of the Federal Register.

1. The following correction is made to the issue for March 31, 1981:

21 CFR Part 701—Food and Drug Administration

On page 19663, correct the address for The Cosmetic, Toiletry, and Fragrance Association, Inc. to read as follows: 1110 Vermont Avenue, NW., Suite 800, Washington, DC 20005

2. Final approval for incorporation by reference is granted to the following publications:

BILLING CODE 1505-02-M

24 CFR Subtitle B, Chapter II (Parts 200–299)—Department of Housing and Urban Development, Office of Assistant Secretary for Housing—Federal Housing Commissioner

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday).

This is a voluntary program. (See OFR NOTICE 41 FR 32914, August 6, 1976.)

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/SECRETARY	USDA/ASCS		DOT/SECRETARY	USDA/ASCS
DOT/COAST GUARD	USDA/FNS		DOT/COAST GUARD	USDA/FNS
DOT/FAA	USDA/FSQS		DOT/FAA	USDA/FSQS
DOT/FHWA	USDA/REA		DOT/FHWA	USDA/REA
DOT/FRA	MSPB/OPM		DOT/FRA	MSPB/OPM
DOT/NHTSA	LABOR		DOT/NHTSA	LABOR
DOT/RSPA	HHS/FDA		DOT/RSPA	HHS/FDA
DOT/SLSDC			DOT/SLSDC	
DOT/UMTA			DOT/UMTA	
CSA			CSA	

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.
Comments on this program are still invited.
Comments should be submitted to the

Day-of-the-Week Program Coordinator,
Office of the Federal Register,
National Archives and Records Service,
General Services Administration,
Washington, D.C. 20408.

List of Public Laws

Note: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's List of Public Laws.

AUTHORITIES AND RULES

LSA—LIST OF CFR SECTIONS AFFECTED

The LIST OF CFR SECTIONS AFFECTED is a monthly publication designed to lead users of the Code of Federal Regulations (CFR) to amendatory actions published in the Federal Register (FR). It should be shelved with current CFR volumes. Entries are by CFR title, chapter, part, and section. Proposed rules are listed at the end of appropriate titles, except for Title 41, in which proposed rules follow each chapter.

HOW TO USE THIS FINDING AID

The CFR is revised annually according to the following schedule:

Titles 1–16—as of Jan. 1
17–27—as of April 1
28–41—as of July 1
42–50—as of Oct. 1

To bring these regulations up to date, consult the most recent LIST OF CFR SECTIONS AFFECTED for any changes, additions, or deletions published after the revision date of the volume you are using. Then check the CUMULATIVE LIST OF PARTS AFFECTED appearing in the Reader Aids of the latest Federal Register for less detailed but timely changes published after the final date included in this publication.

Daggers † appearing on page numbers under a particular title indicate that the page numbers span 2 years. The dagger is used to distinguish the current year from the previous year.

Cite a page reference from this publication as 45 FR for 1980 page numbers and 46 FR for 1981 page numbers. Example: Page 57234 cite as 45 FR 57234; † 4627 cite as 46 FR 4627.

ISSUES TO BE SAVED

There is no single annual issue of the LIST OF CFR SECTIONS AFFECTED. Four ANNUAL ISSUES must be saved: the DECEMBER issue is the ANNUAL for Titles 1–16; the MARCH issue is the ANNUAL for Titles 17–27; the JUNE issue is the ANNUAL for Titles 28–41; the SEPTEMBER issue is the ANNUAL for Titles 42–50. ANNUAL ISSUES to be saved are clearly designated on the cover.

PARALLEL TABLE OF AUTHORITIES AND RULES

A table is included after Title 50 which contains references to the U.S. Code sections cited as authority for CFR regulations added or revised since January 1, 1981.

TABLE OF FEDERAL REGISTER ISSUE PAGES AND DATES

A table is included at the end of this publication which identifies the inclusive page numbers and corresponding Federal Register issue dates for the period covered.

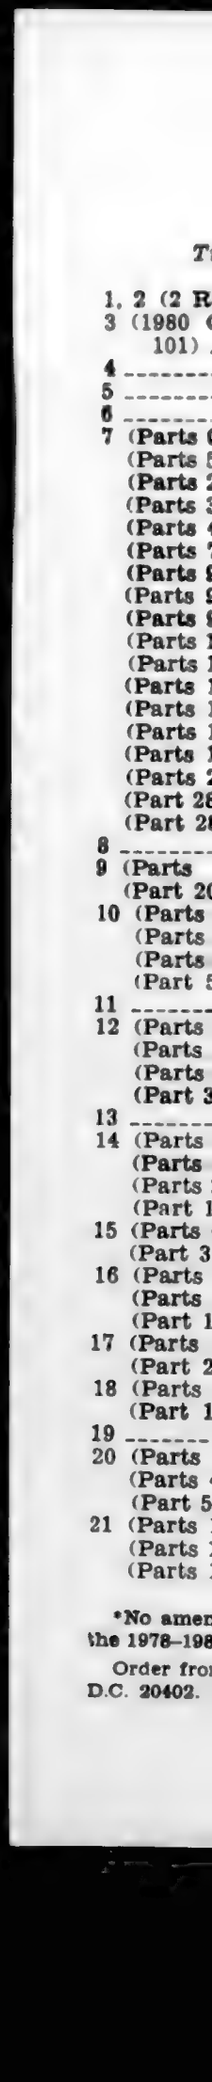
INDEXES

An INDEX to the daily Federal Register is published monthly and is cumulated for 12 months. A separate volume, the CFR Index and Finding Aids to the entire Code of Federal Regulations, is revised as of January 1 and July 1 each year.

INQUIRIES AND SUGGESTIONS

Loren S. Myers was Chief Editor of the LSA, assisted by Carolyn T. Payne. The LSA was prepared under the direction of Martha B. Girard, assisted by Ruth C. Pontius. INQUIRIES, telephone 202–523–5227.

SUGGESTIONS concerning this and other publications of the Office are welcomed. Please send your suggestions to John E. Byrne, Director, Office of the Federal Register, National Archives and Records Service, Washington, D.C. 20408.



(Comprising a complete CFR set)

Additions to Table I, January through June 1981

This table lists the sections of the U.S. Code and U.S. Statutes at Large and Presidential documents which are being added to Table I as a result of authority citations carried in the *Federal Register* from January through June 1981. Recent legislation is carried by public law number.

Table I is in the CFR Index and Finding Aids revised as of January 1, 1981.

In order to determine the *Federal Register* page numbers of the parallel CFR citations, consult the List of CFR Sections Affected.

This table lists the sections of the U.S. Code and U.S. Statutes at Large and Presidential documents which are being removed from Table I as a result of CFR Part removals cited in the *Federal Register* from January through June 1981.

Table I is in the CFR Index and Finding Aids revised as of January 1, 1981.

In order to determine the *Federal Register* page numbers of these citations, consult the List of CFR Sections Affected.

Highlights

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $75.00 per year, or $45.00 for six months, payable in advance. The charge for individual copies is $1.00 for each issue, or $1.00 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

29285 **Air Carriers** CAB seeks comments on its present methodology for determining Standard Foreign Fare Level.

29260 **Wine** Treasury/ATF changes requirements for appellations of origin that appear on foreign wines imported into the United States.

29292 **Flood Insurance** FEMA proposes to increase certain rates for all structures located in communities participating in the emergency phase of the National Flood Insurance Program.

29261 **Excise Taxes** Treasury/ATF defers effective date for provisions about electronic fund transfers for alcohol and tobacco products tax payments.

29294 **Disaster Preparedness Assistance** FEMA proposes procedures by which financial assistance will be provided for planning for severe earthquakes or hurricanes in high-risk, high population areas.

29374 **Sunshine Act Meetings**

Rules and Regulations

Federal Register
Vol. 46, No. 104
Monday, June 1, 1981

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

DEPARTMENT OF AGRICULTURE

Farmers Home Administration

7 CFR Part 1944

Rural Rental Housing; Revision—Redesignation of Loan Regulations; Correction

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule; correction.

SUMMARY: This document corrects a final rule concerning rural rental housing loans which was published in the **Federal Register** on October 27, 1980 (45 FR 70815). The action is necessary to correct sections which were erroneously omitted, not revised, or were revised erroneously.

FOR FURTHER INFORMATION CONTACT: Mr. Antonio O. Izquierdo, Loan Officer, Rural Rental Housing Loan Division, Room 5331, South Agriculture Building, 14th St. and Independence Avenue SW., Washington, D.C. 20250, Telephone 202–382–1621.

SUPPLEMENTARY INFORMATION: This final rule was reviewed under USDA procedures established in Secretary's Memorandum 1955 and Executive Order 12291, and has been classified "not major". The following sections of the regulations are revised or corrected: in Section III A of Exhibit B, where it indicates "June 1, 1980", should read "after October 27, 1980," the date the regulations were published in final form. Paragraphs X B 1 and 2 were revised and paragraph B 3 was added to Exhibit C separately after the regulations were published for comment but before they were published in final form. However, these sections were not updated in the final document which was sent to the **Federal Register** and consequently, were erroneously revised to the previous obsolete text. They should not have been revised when the final publication of the regulations was done on October 27, 1980. Section 8.02 of Exhibit F was totally omitted when the regulations were published for final rule on October 27, 1981.

Accordingly, Subpart E of Part 1944, Chapter XVIII, Title 7, Code of Federal Regulations is corrected as follows:

Part 1944, Exhibit B [Amended]

1. In Exhibit B, paragraph III A, "June 1, 1980" is corrected, to read "after October 27, 1980".

2. In Exhibit C, paragraph IX B is corrected by revising subparagraphs 1 and 2 and adding subparagraph 3 to read as follows:

Exhibit C—Rental Assistance Program

* * * * *

IX. *Terms of the Rental Assistance Agreement.*

* * * * *

B. *Term.*

1. *Twenty (20) Year Agreement.* The term of the agreement shall be for a period of twenty (20) years from the effective date of the agreement for new construction projects in which no unit has been occupied. This agreement may be superceded by a modified agreement in accordance with Section 4 of the rental assistance agreement or terminated in accordance with conditions stated in Section 8 or 10 of the rental assistance agreement. Modified agreements will extend only for the remaining period of an original agreement. Upon expiration of the twenty year period, a new agreement may be executed. If a new agreement is considered, it will be for a period not to exceed five (5) years.

2. *Five (5) Year Agreement.* The term of the agreement shall be for a period of five (5) years from the effective date of the agreement for existing projects or new construction projects when twenty (20) year agreements are not available. This agreement may be superceded by a modified agreement in accordance with Section 4 of the rental assistance agreement or terminated in accordance with conditions stated in Section 8 or 10 of the rental assistance agreement. Modified agreements will extend only for the remaining period of an original agreement. Prior to the termination date of any agreement a new Form FmHA 444–25 may be submitted. If a new agreement is consummated, it will be made for a period not to exceed five (5) years. An existing project is one in which one or more units have been occupied.

3. Modification of the number of units assigned to any project will be limited to the same term as the original agreement. Mixing of agreement terms in any given project is prohibited.

* * * * *

3. In Exhibit F, Article VIII is corrected to add section 8.02 which reads as follows:

Exhibit F—Bylaws

* * * * *

Article VIII—Contracts, Checks, Deposits and Funds.

* * * * *

Section 8.02. Checks, Drafts, etc. All checks, drafts, or orders for the payment of money, notes, or other evidence of indebtedness issued in the name of the corporation shall be signed by the officer or officers, agent or agents of the corporation, and in a manner as shall from time to time be determined by resolution of the board. In the absence of determination by the board, these instruments shall be signed by the treasurer and countersigned by the president of the corporation.

BILLING CODE 3410–07–M

Animal and Plant Health Inspection Service

9 CFR Part 92

Importation of Horses

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Affirmation of final rule.

SUMMARY: This document confirms the final rule promulgated by the Department which established additional methods by which male horses (stallions over 731 days of age)

may be imported into the United States from countries declared to be affected with contagious equine metritis (CEM). This action is necessary to provide the Department's response to comments received relative to the amendment of 9 CFR Part 92 that permitted the importation of certain stallions into the United States from CEM-affected countries when specified requirements are met.

EFFECTIVE DATE: December 21, 1979.

FOR FURTHER INFORMATION CONTACT: Dr. D. E. Herrick, USDA, APHIS, VS, Room 815, Federal Building, Hyattsville, MD 20782, 301–436–8170.

SUPPLEMENTARY INFORMATION: This final action has been reviewed in conformance with Executive Order 12291, and has been classified not a "major rule."

Based on information compiled by the Department, it has been determined that this rule will have an annual effect on the economy of less than $100 million; that this rule will not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and that this rule will not have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

On August 3, 1979, there was published in the **Federal Register** (44 FR 45631–45634) a proposed amendment to the regulations (9 CFR 92.2(i)(2)(iii)(C), 92.2(i)(2)(iv), and 92.17) which would establish additional means to permit the entry of male horses (stallions over 731 days of age), into the United States from countries affected with contagious equine metritis (CEM) when specific requirements and certain conditions are met to prevent their introducing CEM into the United States.

On Friday, January 4, 1980, there was published in the **Federal Register** (45 FR 1003–1006) an amendment to the above referenced regulations. The final rule was somewhat modified from the proposed rule, and the amendment was placed into effect immediately in order for the additional method of importing horses from CEM-affected countries to be available to importers for the then forthcoming breeding season. However, a 60-day comment period was provided to permit public participation in the rulemaking process. A total of three comments were received.

One comment suggested that male horses in training and male horses for breeding be permitted to be imported into the United States on the basis of 3 sets of negative swabs alone. The respondent also suggested that it was not necessary to require a government veterinary officer to be present to supervise the pre-export protocol.

Information compiled by the administrative officials of the Animal and Plant Health Inspection Service responsible for administering regulations for the importation of horses into the United States reveals that to allow the male horses to be imported into the United States on the basis of 3 sets of negative swabs only is not sufficient to insure that the stallions are free of the contagion of CEM. It is possible that the cultures, although taken on 3 separate occasions, seven days apart, could fail to reveal the contagion of CEM. Therefore, since CEM is a disease spread through breeding, the certification that since reaching 2 years of age the horse has not been on premises where breeding was carried out, as well as the topical treatments, testing procedures and handling procedures required to import a stallion to be used for breeding, are all necessary to insure that the stallion is free of the contagion of CEM. In regard to the importation into the United States of male horses in training which are not imported pursuant to this action, information compiled by the Department reveals that the requirements of § 92.2(i)(2)(iii) are necessary to insure that the male horses in training are free of the contagion of CEM.

Additionally, the requirement that the topical treatment be under the supervision of the veterinary officer signing the certificate is considered necessary to provide reliable information to the Department that such treatment was in fact complied with. Therefore, this suggestion was not adopted.

The second comment expressed concern that all tests and cultures were to be conducted at the National Veterinary Services Laboratory (NVSL) since experience during the outbreak in Kentucky had shown that the organism on swabs taken from clinical cases did not survive transportation.

The Department's experience was that some strains of the organism were susceptible to the antibiotic streptomycin used in the transport media to control growth of contaminants usually associated with the collection of these swabs. Streptomycin has been eliminated from the transport media, and the Department does not anticipate any further problems in that respect. It has also been determined that under the present technology, that samples are acceptable for culturing if shipped without streptomycin and received in the laboratory within 48 hours of collection.

The Department imposed the requirement that the tests and cultures be performed in NVSL to insure the accuracy of the results.

The third comment expressed the opinion that an infected stallion could enter the United States and not be discovered until it was cultured in a State approved to receive such stallion.

The Department anticipated this problem, and this is the reason there are specific safeguards in the final rule for every stallion over 731 days of age from any CEM-affected country for which a permit is requested pursuant to § 92.2(i)(2)(iv) of the regulations (9 CFR 92.2). A permit will only be issued if the stallion is consigned to a State which the Deputy Administrator of Veterinary Services, Animal and Plant Health Inspection Service, has approved to receive such horses under § 92.4(a)(6) of the regulations (9 CFR 92.4(a)(6)) on the basis that the State has laws or regulations in effect to require the additional inspection, treatment and testing of such horse necessary to insure its freedom from CEM. The final rule also established the minimum standards which a State must meet in order to be approved to receive stallions imported from CEM-affected countries.

After due consideration of the relevant comments received, it has been determined that the final rule amending § 92.2(i)(2)(iii)(C), § 92.2(i)(2)(iv), and § 92.17, and adding § 92.4(a) (5), (6), and (7), should remain effective as published in the **Federal Register** on January 4, 1980.

Done at Washington, D.C., this 26th day of May 1981.

Norvan L. Meyer,

Acting Deputy Administrator, Veterinary Services.

[FR Doc. 81-16180 Filed 5-29-81, 8:45 am]

BILLING CODE 3410-34-M

---

9 CFR Part 92

Importation of Animals

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: This document amends the requirements regarding an application for an import permit, and certain requirements regarding the importation of horses. This action is necessary to strengthen certain requirements in order to prevent the introduction and

dissemination of communicable diseases of livestock.

EFFECTIVE DATE: July 1, 1981.

FOR FURTHER INFORMATION CONTACT: Dr. D. E. Herrick, USDA, APHIS, VS, Federal Building, Room 815, Hyattsville, MD 20782, 301–436–8170.

SUPPLEMENTARY INFORMATION: This final action has been reviewed in conformance with Executive Order 12291 and has been classified as not a "major rule" because this action should result in an annual effect on the economy of only approximately $20,000 and should result in only a slight increase in costs to consumers and individual industries and no increase in costs to Federal, State, or local governmental agencies, or geographic regions. This action should have no adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

On Friday, April 18, 1980, there was published in the **Federal Register** (45 FR 26342–26344) a document which proposed to revise the requirements regarding the importation of horses, to remove some restrictions which may be unnecessary and to strengthen other requirements in order to prevent the introduction and dissemination of communicable diseases of livestock.

Specifically, amendments were proposed to require that the name and address of the exporter and individual identification of each animal (except poultry) appear on the application for an import permit. Further, § 92.11(d) would have been amended to require that horses from countries where African horse sickness is declared to exist be placed in quarantine at a designated port in the United States for 14 days. A blood sample would then be drawn from such horses and a test would be run on the blood to determine whether or not the horses have African horse sickness. All such horses which were found negative to the test for African horse sickness would then have been released when they were otherwise found to be free of communicable disease. All such horses found to be positive to the test for African horse sickness or found to exhibit evidence of communicable disease would be refused entry to the United States and would be required to be removed from the United States by the importer within 10 days of notification or, at the option of the importer, the horse would be disposed of.

A period of 60 days was provided for receipt of comments. A total of eight comments were received in response to the proposal.

One comment expressed approval of the amendment as proposed.

Two comments, one from the American Veterinary Medical Association (AVMA) and one from the American Horse Council (AHC) expressed approval if suggested changes in the procedures for horses from African horse sickness (AHS) countries were adopted. The AVMA expressed concern that the 14-day quarantine period for horses before collection of the blood samples for testing was not sufficient time to provide for the incubation period of AHS in some cases. It was recommended that the blood samples be collected after the horses had been in quarantine for 21 days.

The AHC recommended that importers be advised that horses vaccinated for AHS might react to the test and suggested that the Department establish a time period, post vaccination, when the vaccination antibodies would be "washed out" of the horses' systems. The council also suggested the importer be provided the option of testing or, as presently provided, keeping the horses in quarantine for 60 days.

Three additional comments expressed the concern that the test for AHS would not distinguish between vaccinated or infected animals.

One comment from Plum Island Animal Disease Center (PIADC) stated that it would be necessary to conduct a Complement-Fixation test and virus isolation studies in order to determine whether horses were infected with AHS virus.

The intended effect of the proposed amendment to test horses from AHS countries was to reduce the time horses are required to be held in quarantine by about half from the minimum 60-day quarantine period now required. In view of the demand for quarantine space, this would be of mutual benefit to importers and the Department.

In consideration of the above comments and specifically that of PIADC, that the laboratory would require additional tests for virus isolation, the Department is withdrawing proposed § 92.11(d)(2) which would have required that horses from African horse sickness countries be tested for AHS. The additional time to conduct the virus isolation test and the cost would nullify any anticipated benefit of a reduced quarantine period, even if both tests could be conducted in less than 60 days. Therefore, the proposed procedure that, after a period of 14 days, a blood sample shall be drawn by a port veterinarian employed by Veterinary Services and submitted to the Plum Island Animal Disease Laboratory to conduct the official test for African horse sickness is deleted from the final rule.

Therefore, this final rule retains the present requirement in § 92.11(d) of the regulations which requires that all horses imported into the United States from or that have been in or transited any country where African horse sickness is declared to exist (Africa) must be quarantined at the port of New York, New York, for at least 60 days. It should be noted that this requirement applies to all horses that have ever been in or transited such countries. Presently, the Department is considering the publication of a proposed rule which would, if adopted, limit this requirement to horses which have been in or transited countries where African horse sickness is declared to exist within the 60 day period immediately preceding importation into the United States.

Since the requirement to conduct the test for AHS is deleted, the suggestions provided by the above comments relative to the test procedures are now irrelevant.

The 8th comment suggested that the identification requirements for the application for an import permit were unnecessary for horses since they are identified in the foreign country on the health certificate that accompanies them to the United States.

As stated in the proposal, the Department believes that requiring the name and address of the exporter should help insure that the permit is used by the proper person. Requiring that the identification of the animal appears on the application should help insure that the permit is issued and used for the same animal.

Only horses from CEM infected countries listed in § 92.(i)(1) (9 CFR 92.2(i)(1)) are presently required to be accompanied by a permit. Only these horses being imported would be affected by the identification requirement. The Department believes that in addition to the reasons stated in the proposal, the identification of horses from CEM infected countries is necessary to prevent the introduction of the disease into the United States.

The comment also suggested that the proposed 10-day period to remove a horse from the United States after being notified that the animal was refused entry should be changed to "a reasonable length of time" to allow for possible unavoidable delays in arranging for shipment.

It is the Department's experience that except for one or two cases a year,

animals refused entry have been removed from the United States within 10 days. Therefore, 10 days is considered a "reasonable time."

However, this document adds a provision whereby the Deputy Administrator, Veterinary Services, may, upon request, grant additional time for the removal of a horse from the United States in any case in which he determines that delay is unavoidable due to unforeseen circumstances and the additional time for removal of the horse will not present a threat of dissemination of a communicable disease to other animals in the United States.

After due consideration of all the comments received, the Department is amending the regulations as proposed with changes as indicated in this document and other minor editorial changes for purposes of clarification.

Accordingly, Part 92, Title 9, Code of Federal Regulations, is amended in the following respects:

1. The authority citation for Part 92 reads as follows:

Authority: Sec. 203, 60 Stat. 1087, as amended; secs. 6, 7, 8, 10, 26 Stat. 416, as amended, 417; secs. 2, 32 Stat. 792, as amended; sec. 306, 46 Stat. 689, as amended; secs. 2, 3, 4, 5, 11, 76 Stat. 129, 130, 132; sec. 1, 84 Stat. 202 (7 U.S.C. 1622, 19 U.S.C. 1306, 21 U.S.C. 102–105, 111, 134a, 134b, 134c, 134d, 134f and 135).

2. In § 92.4, the second sentence in paragraph (a)(1) is revised to read:

§ 92.4 Import permit for ruminants, swine, horses from countries affected with CEM, poultry, poultry semen, animal semen, birds, animal specimens for diagnostic purposes.[5]

(a) * * *

(1) * * * The application shall specify the name and address of the importer; the species, breed, number or quantity of animals, animal semen, or animal test specimens to be imported; the purpose of the importation; individual animal identification (except poultry), which includes a description of the animal, name, age, markings, if any, registration number, if any, and tattoo or eartag; the country of origin; the name and address of the exporter; the port of embarkation in the foreign country; the mode of transportation, route of travel, and the port of entry in the United States; the proposed date of arrival of the animals, animal semen, or animal test specimens to be imported; and the name of the person to whom the animals, animal semen, or animal test specimens will be delivered and the location of the place in the United States to which delivery will be made from the port of entry.

* * * * *

3. In § 92.11, present footnote 6 and the reference thereto are removed, present footnote 7 and the reference thereto are renumbered footnote 6 and paragraph (d)(1) is revised to read:

§ 92.11 Quarantine requirements.

* * * * *

(d) *Horses.* (1) Except as provided in this section, horses intended for importation into the United States from any part of the world shall be shipped directly to a port designated in § 92.3 and be quarantined at said port until negative results to port of entry tests are obtained and the horses are certified by the port veterinarian to be free from clinical evidence of disease.

(i) Except as provided in §§ 92.24 and 92.34 with respect to horses from Canada and Mexico, horses intended for importation from the Western Hemisphere shall be quarantined at a port designated in § 92.3 for not less than 7 days.

(ii) Horses intended for importation from any country on the Continent of Africa, or that have been in or transited any country on the Continent of Africa shall enter the United States only at the Port of New York, New York, and be quarantined there for not less than 60 days.

(iii) In order to qualify for release from quarantine, all horses from any part of the world, while quarantined shall test negative to the following port of entry tests: an official test for dourine, glanders, equine piroplasmosis, and equine infectious anemia [6] and such other tests, inspections, disinfections and precautionary treatments that may be required by the Deputy Administrator, Veterinary Services, to determine their freedom from communicable diseases.

(iv) Any quarantine period required for a horse shall be counted using the first day after arrival of the horse at the quarantine facility as the first day of quarantine and may be extended for such additional period as the Deputy Administrator, Veterinary Services, may require to determine its freedom from disease. Any horse which is positive to any of the port of entry tests named in this paragraph or any other test required by the Deputy Administrator, Veterinary Services, or which is found by the port veterinarian to exhibit evidence of communicable disease during quarantine shall be refused entry into the United States and removed by the importer to a country other than the United States within 10 days of the date that the importer is notified by Veterinary Services that such horse has been refused entry into the United States. Upon request, the Deputy Administrator, Veterinary Services, may grant additional time for the removal of a horse from the United States in any case in which he determines that delay is unavoidable due to unforeseen circumstances and the additional time for removal of the horse will not present a threat of the spread of communicable disease to other animals in the United States. At the option of the importer, such horse may be disposed of in accordance with such conditions as the Deputy Administrator, Veterinary Services, believes necessary to prevent the dissemination of communicable disease into the United States. The importer shall be responsible for all costs of such removal or disposal.

§ 92.11 [Amended]

4. In § 92.11(d)(3)(i), present footnote 7a and the reference thereto are renumbered footnote 7.

Done at Washington, D.C., this 26th day of May 1981.

Norvan L. Meyer,

Acting Deputy Administrator, Veterinary Services.

[FR Doc. 81-16212 Filed 5-29-81; 8:45 am]

BILLING CODE 3410-34-M

DEPARTMENT OF ENERGY

10 CFR Part 440

[Docket No. CAS-RM-80-512]

Weatherization Assistance for Low-Income Persons; Amendment of Regulations

AGENCY: Department of Energy.

ACTION: Amendment to interim rule with request for comments.

SUMMARY: The Department of Energy (DOE) is amending the regulations for its program of weatherization assistance for low-income persons (10 CFR Part 440) to make certain changes mandated by Subtitle E of Title V of the recently enacted Energy Security Act, June 30, 1980. These changes are:

The individual dwelling unit limit on expenditures for incidental repairs is increased from $100 to $150.

The 10 percent limit on administrative expenditures is revised to provide that more than 5 percent may be passed through by the State to subgrantees for administrative purposes; a State still may use not more than 5 percent of the total State grant for such purposes.

These amendments are required by law. Were it not for this legal requirement, DOE would not promulgate this rule because the Administration has proposed to terminate the program for

weatherization assistance for low-income persons at DOE, and instead incorporate the responsibility for the weatherization of low-income homes in the Department of Housing and Urban Development's (HUD) Community Development Block Grant Program. In the Administration's proposal to Congress (The Housing and Community Development Admendments of 1981), the enabling legislation for DOE's Weatherization Assistance Program, Part A of Title IV of the Energy Conservation and Production Act, Pub. Law 94–385, *as amended*, would be repealed. The Administration has also requested no funds for weatherization activities in Fiscal Year 1982.

In light of the legal requirement to make the above amendments, DOE is taking this opportunity to make the three following changes in the regulations:

In accordance with its request, Hawaii will now participate in the program.

Off-site labor, where justified, may be chargeable to program support, and not just to administrative expenses.

The audit requirements are amended to conform with specific language in OMB Circulars A–102 and A–110. Additionally, the Administration of grants section of the regulations is updated to reflect this change.

DATES: Effective Date: July 1, 1981.

Comment Period: Written comments must be received on or before July 31, 1981. See supplementary information, Section III, for further information.

ADDRESSES: All comments to Carol Snipes, Conservation and Solar Energy, Department of Energy, Mail Stop 6B–025, Room 1F–085, Docket Number CAS–RM–80–512, Forrestal Building, 1000 Independence Avenue SW., Washington, D.C. 20585.

FOR FURTHER INFORMATION CONTACT: Howard Foard, Office of Weatherization Assistance, Department of Energy, 1000 Independence Avenue SW., Room 2H–063, Mail Stop 2H–027, Washington, D.C. 20585, (202) 252–2476.

Catherine Edgerton, Office of General Counsel, Department of Energy, 1000 Independence Avenue SW., Room 6B–144, Mail Stop 6E–067, Washington, D.C. 20585, (202) 252–9513.

SUPPLEMENTARY INFORMATION:

I. Introduction
II. Changes to the Regulation
III. Opportunity for Public Comment
IV. Other Matters

I. Introduction

The Department of Energy ("DOE") is amending the regulations for the program for weatherization assistance for low-income persons ("program" or "weatherization program"), 10 CFR Part 440, under the Energy Conservation in Existing Buildings Act of 1976, as amended ("Act"), 42 U.S.C. 6851 *et seq.*

On February 27, 1980, DOE published an interim final rule, 45 FR 13028 (February 27, 1980), which included a number of major changes to the program including the introduction of tentative allocations of financial assistance, use of low-cost/no-cost measures and specific provision for the use of DOE funds to hire labor or contractors where volunteers and labor funded in accordance with the Comprehensive Employment and Training Act of 1973 ("CETA") are unavailable. The interim final rule also clarified and simplified the procedures for qualifying multi-family rental housing, raised the per dwelling unit expenditure limitation to $1,000 (from $800), with an increase up to $1,600 permitted in certain cases, and allowed for flexible program support and materials expenditures depending upon local program operators' needs.

These changes were made in response to DOE's experience with the program since its inception in 1977, and were designed to provide more flexibility to grantees and local program operators (sub-grantees). Historically, the program has been hampered by production and expenditure rates far below original goals, and these changes were intended to improve the program's ability to respond to the varied needs of over 1,000 local program operators in 49 States, and to help the States achieve increased production levels.

Although the changes were issued as an interim final rule, DOE requested members of the public to comment on the changes. DOE received 63 comments on the interim final rulemaking during and after the 60-day comment period, in addition to the testimony of 34 speakers at the public hearings held on March 21, 1980, in Dallas, Texas, on March 24, 1980, in Seattle, Washington, and on March 27, 1980, in Boston, Massachusetts.

On June 30, 1980, subsequent to the issuance of the interim final rule, the President signed the Energy Security Act, Pub. L. 96–294, 94 Stat. 759, ("ESA") into law. Subtitle E of Title V of ESA amends the authorities of the program by mandating several changes, including the following two nondiscretionary changes:

1. *Limitation on Administrative Expenditures*—Section 571 of the ESA amends Section 415(a) of the Act to provide that a State may not use more than 5 percent of the total State grant for administrative purposes. Because of this change, a State may now pass on more than 5 percent, up to 10 percent, of the total grant to local program operators.

2. *Limitations on Expenditures*—Section 575 increases the individual dwelling unit limit from $100 to $150 for incidental repairs as may be necessary to make the installation of weatherization materials effective.

Because these two changes, as required by the ESA, are nondiscretionary and therefore do not require notice and public comment, DOE today is amending its interim final rule to reflect these changes. In light of the legal requirement to make these amendments, DOE is taking the opportunity to make three additional changes to the regulations which do not require notice and public comment.

II. Changes to the Regulation

Today's issuance is limited to making five changes to the interim final rule, as follows:

1. In accordance with its request, Hawaii will participate in the program.

At the initiation of the program, Hawaii declined to participate, even though it was included within the definition of "State" under the Act. At that time, Hawaii indicated that it had no significant problems that the weatherization assistance program could address. See Proposed Rule, 42 FR 17470, at 17474, April 1, 1977. For that reason the regulations have, until today, included a definition for "Eligible State" which excludes Hawaii.

Hawaii, by a letter from Governor Ariyoshi dated May 28, 1980, has requested to participate in the program. It is felt that weatherization funds can be used to insulate hot water heaters of eligible dwelling units within the State, which account for the single largest portion of residential energy use in Hawaii. In order to now include Hawaii as a participant in the program, the definition for "Eligible State," which previously excluded Hawaii is deleted from § 440.3 of the regulations, as well as the word "eligible" before both "States" and "State" in § 440.10, subparagraphs (b)(1), (2) and (e) of the regulations. Section 440.10(b)(1) is revised to divide the first $5,100,000 appropriated equally among the States, in order to enable the program to continue providing each grantee with a base allocation of $100,000.

2. The individual dwelling unit limit on expenditures for incidental repairs is increased from $100 to $150.

This change is mandated by ESA. It provides no room for DOE's exercise of administrative discretion and may not be revised in response to public comment. Note that the incidental repair

expenditure is not a required expenditure; it just may not exceed $150.

3. A State may provide to subgrantees up to 10 percent of any grant made to the State under the program for administrative purposes, but the State may not itself use more than 5 percent of this amount for such purposes.

This is, again, an amendment mandated by ESA and leaves no room for change in response to public comment. The Act originally provided flexibility in the use of the 10 percent administrative funds, as between grantee and subgrantees. Up to 10 percent of a grant could be used for administrative expenses without regard to whether it was incurred by a grantee or subgrantee. The National Energy Conservation Policy Act, Pub. L. 95–619, 92 Stat. 3206 (Nov. 9, 1978) ("NECPA"), amended the Act to impose the more rigorous requirement that not more than 5 percent of the grants could be used for administrative expenses of the grantee, nor more than 5 percent of a subgrant for the administrative expenses of a subgrantee. In light of extensive adverse public comment to the NECPA amendment, Congress again amended the Act so that a State may again pass on more than 5 percent of a grant to local program operators.

4. "Payments to employ labor," chargeable as a program support expenditure in the interim final rule, are no longer restricted to payments for on-site personnel who will "install weatherization materials." Such expenditure, where justified by the unavailability of adequate numbers of volunteers or CETA workers, may now include ancillary personnel such as inventory clerks. Weatherization coordinators may also now be charged to program support. In the interim rule, payments for such labor categories had been made chargeable to administrative expenses. DOE received a considerable number of comments pointing out that administrative funds were frequently inadequate to cover the cost of off-site laborers, such as coordinators and other off-site labor. Therefore, by this change, such labor expenses now are made chargeable to program support. Costs incurred to hire coordinators and off-site workers since the issuance of the interim final rule will not be disallowed in future audits merely because charged to program support.

5. The audit requirements in § 440.21 are amended to conform to the specific language in OMB Circulars A–102 and A–110. As a result of this change, grantees will now require audits with "reasonable frequency, on a continuing basis, or at scheduled intervals, usually annually but not less frequently than every two years." Technical changes are made to § 440.2, "Administration of Grants," to reflect this change.

III. Opportunity for Public Comment

Interested persons are invited to participate in this rulemaking by submitting data, views, or arguments with respect to the changes set forth in this notice to: Ms. Carol Snipes, Hearings and Dockets, Conservation and Solar Energy, Department of Energy, Mail Stop 6B–025, Room 1F–085, 1000 Independence Avenue SW., Washington, D.C. 20585.

Comments should be identified on the outside of the envelope, and on the documents themselves, with the designation "Weatherization Assistance for Low-Income Persons Regulations" (Docket No. CAS–RM–80–512). Fifteen (15) copies should be submitted. All documents received on or before July 31, 1981, and all other relevant information, will be considered by DOE.

Any person submitting information which that person believes to be confidential and which may be exempt by law from public disclosure should submit one copy, as well as fifteen copies from which the information claimed to be confidential has been deleted. DOE shall make a determination of any such claim. This procedure is set forth in 10 CFR 1004.11 (44 FR 1908, January 8, 1979).

IV. Other Matters

A. Environmental Review

Pursuant to the requirements of the National Environmental Policy Act of 1969 ("NEPA"), 42 U.S.C. 4321 *et seq.*, DOE published a Notice of Availability of an Environmental Assessment (DOE/EA–0085) of the Grants Program for Weatherization Assistance for Low-Income Persons on April 10, 1979, in the **Federal Register** (44 FR 21323). Based on this Environmental Assessment, DOE determined that the program did not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of NEPA, and that an environmental impact statement was not needed to support the action.

DOE has reviewed the environmental impacts of the program changes promulgated today. It is DOE's judgment that no new or additional environmental impacts are associated with DOE's amendments. The program changes required by the Energy Security Act do not require the addition of any new measures beyond those already contained in the program. It is, accordingly, DOE's determination that the environmental impacts of the changes have been adequately analyzed in the April 1979 assessment, and that these impacts are not significant. Hence, no additional Environmental Assessment or Environmental Impact Statement is required.

B. Procedural Requirements

1. Section 501 of the Department of Energy Organization Act and Section 553 of the Administrative Procedure Act.

DOE has determined that the proposed rulemaking procedures of the Department of Energy Organization Act, Pub. L. 95–91, 42 U.S.C. 7101 *et seq.*, ("DOE Act") and the Administrative Procedure Act, 5 U.S.C. 551 *et seq.*, ("APA") should be waived with respect to the four changes to the weatherization regulations in today's issuance which raise no substantial issues and have no substantial impacts. Section 501(c)(1) of the DOE Act provides that when a showing has been made that "no substantial issue of fact or law exists" and that such rulemaking "is unlikely to have a substantial impact on the Nation's economy or large numbers of individuals or businesses," such rulemaking can be promulgated in accordance with the APA. Section 553(b) of the APA provides that, except when notice or hearing is required by statute, the APA requirement for a notice of proposed rulemaking does not apply when "the agency for good cause finds (and incorporates the finding and a brief statement of reasons therefor in the rule issued) that notice and public comment procedure thereon are impracticable, unnecessary, or contrary to the public interest."

The two changes in today's issuance mandated by the ESA merely track the statute and provide no occasion for the exercise of administrative discretion. DOE feels that it is important to make these changes to the weatherization regulations as soon as possible. The third change, which revises the audit requirement to conform with the language in OMB Circulars A–102 and A–110, and updates the Administration of Grants section of the rule to reflect this change is a technical amendment. The participation of Hawaii in the program is provided for by the enabling legislation, which defined a State eligible for funding to include Hawaii. Clearly, these four changes raise no "substantial issue of fact or law," and have no "substantial impact on the Nation's economy or large numbers of individuals or businesses," in accordance with section 501(c)(1) of the DOE Act. And, further, due to the nondiscretionary nature of these four changes, the notice and comment

procedures of the APA are waived, under section 553(b), as being impracticable and unnecessary.

The fifth change, the use of program funds for off-site labor in appropriate circumstances, is made after receiving substantial public comment and is in the public interest to have in effect without further delay. Moreover, this change raises no substantial issues and has no substantial impact on the economy or individuals and businesses. Finally, although the changes in today's rule will become effective in 30 days, there is opportunity for further written comment, particularly on the fifth change, which the DOE will consider and incorporate in the program rules if justified.

2. Executive Order 12291. Today's issuance was reviewed under Executive Order 12291 (February 17, 1981). DOE has concluded that the rule is not a "major rule" because it will not result in: (1) an annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

(Energy Conservation in Existing Buildings Act of 1976, as amended, 42 U.S.C. 6851 *et seq.;* Department of Energy Organization Act, 42 U.S.C. 7101 *et seq.)*

In consideration of the foregoing, Part 440 of Chapter II of Title 10 of the Code of Federal Regulations is amended as set forth below, effective July 1, 1981.

Issued in Washington, D.C., May 21, 1981.

Joseph J. Tribble,

Assistant Secretary, Conservation and Renewable Energy.

10 CFR Part 440 is amended as follows:

§ 440.2 [Amended]

1. a. Section 440.2 is amended by removing paragraph (a)(3); by redesignating paragraphs (a)(4), (a)(5), (a)(6), (a)(7), (a)(8) and (a)(9) as paragraphs (a)(3), (a)(4), (a)(5), (a)(9), (a)(10) and (a)(11) respectively; and by inserting new paragraphs (a)(6), (a)(7) and (a)(8) as follows:

(a) * * *

(6) Office of Management and Budget Circular A–102, entitled "Uniform Administrative Requirements for Grants-in-Aid to State and Local Governments;

(7) Office of Management and Budget Circular A–110, entitled "Grants and Agreements with Institutions of Higher Education, Hospitals, and Other Nonprofit Organizations;"

(8) Office of Management and Budget Circular A–122, entitled "Cost Principles for Nonprofit Organizations;"

* * * * *

b. Section 440.2(b) is amended by removing the reference to § 440.2(a)(3) and in its place inserting § 440.2(a)(6).

§ 440.3 [Amended]

2. Section 440.3 is amended by removing the definition for "Eligible State."

§ 440.10 [Amended]

3. Section 440.10 is amended by removing the terms "eligible States" and "eligible State" in paragraphs (b) (1) and (2), respectively, and removing the term "eligible State" in paragraph (e) and inserting in their place the terms "States" and "State" in paragraphs (b) (1) and (2), respectively, and "State" in paragraph (e). Paragraph (b)(1) is also amended by removing "five million dollars" and inserting in its place "five million one hundred thousand dollars."

§ 440.16 [Amended]

4. Section 440.16 is amended by removing "$100" in paragraph (a)(1)(iii) and in its place inserting "$150;" and by removing paragraph (b), and in its place inserting the following new paragraph (b):

* * * * *

(b) Not more than 10 percent of any grant made to a State may be used by the grantee and subgrantees for administrative purposes in carrying out duties under this part, except that not more than 5 percent may be used by the State for such purposes.

* * * * *

§ 440.17 [Amended]

5. Section 440.17(a)(2) is amended by removing "to install weatherization materials," after "* * * weatherization services."

§ 440.21 [Amended]

6. Section 440.21 is amended by removing paragraph (d) and replacing it with a new paragraph (d), as follows:

* * * * *

(d) Each grantee shall ensure that audits by or on behalf of subgrantees are conducted with reasonable frequency, on a continuing basis, or at scheduled intervals, usually annually, but not less frequently than every two years, in accordance with OMB Circular A–102, Attachment P, and OMB Circular A–110, Attachment F, as applicable.

BILLING CODE 6450–01–M

FEDERAL RESERVE SYSTEM

12 CFR Part 213

[Reg. M; Docket No. R–0354]

Consumer Leasing; Regulation M; Correction

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule; correction.

SUMMARY: This document corrects a final Regulation M (Consumer Leasing) that appeared at page 20949 in the **Federal Register** of Tuesday, April 7, 1981 (46 FR 20949). The action is necessary to correct typographical errors and footnote numbering in the document.

FOR FURTHER INFORMATION CONTACT: Steven Zeisel, Staff Attorney, Division of Consumer and Community Affairs, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, (202) 452–3867.

The following corrections are made in FR Doc. 81–10351 appearing on 20949 in the issue of April 7, 1981:

1. On page 20952, column 1, first full paragraph, § 213.2(17)(ii) is corrected by changing "unrefundable" to "nonrefundable * * *".

2. On page 20953, column 3, first full paragraph, § 213.5(b) is corrected by changing "schedule or lease terms" to "schedule of lease terms * * *".

3. On page 20954, at the bottom of column 3, footnotes 2 and 3 to Appendix A and corresponding text references are corrected by renumbering them 1 and 2.

4. On page 20955, at the bottom of column 1, footnotes 4 and 5 to Appendix A and corresponding text references are corrected by renumbering them 3 and 4.

5. On page 20956, at the bottom of column 1, footnotes 6, 7, and 8 to Appendix B and corresponding text references are corrected by renumbering them 1, 2, and 3.

6. On page 20956, column 2, first full paragraph, paragraph (b)(3) of Appendix B is corrected by deleting the parenthetical symbol *preceding* "(reasons) * * *".

7. On page 20956, at the bottom of column 2, footnote 9 to Appendix B and corresponding text reference is corrected by renumbering it 4.

8. On page 20956, column 3, second line, paragraph (c)(6) of Appendix B is

corrected by changing "lessess)" to "lessees) * * *".

9. On page 20956, at the bottom of column 3, footnote 10 is corrected by lowercasing the "A" in "Appendix * * *".

10. On page 20956, at the bottom of column 3, footnote 10 to Appendix B and corresponding text reference is corrected by renumbering it 5.

Board of Governors of the Federal Reserve System, May 22, 1981.

James McAfee,

Assistant Secretary of the Board.

[Reg. Z; Docket No. R-0288]

Truth in Lending; Revised Regulation Z; Correction

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule; correction.

SUMMARY: This document corrects a final, revised Regulation Z (Truth in Lending) that appeared at page 20848 in the **Federal Register** of Tuesday, April 7, 1981 (46 FR 20848). The action is necessary to correct punctuation and typographical errors as well as dropped lines in the document.

FOR FURTHER INFORMATION CONTACT: Ann Marie Bray, Staff Assistant, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, (202) 452-3378.

The following corrections are made in FR Doc. 81-10347 appearing on 20848 in the issue of April 7, 1981:

1. On page 20893 at the top of column 3, § 226.2(17)(iii) is corrected by capitalizing the "f" in "(finance * * *".

2. On page 20896, column 1, last paragraph, § 226.7(d) is corrected by adding a reference to footnote 15 following "annual percentage rate" at the end of the first sentence.

3. On page 20896, column 2, sixth paragraph, § 226.7(j) is corrected by changing "protion" to "portion * * *".

4. On page 20896, column 3, last full paragraph, § 226.8(a)(3) is corrected by changing the semi-colon following "statement" to a comma.

5. On page 20896, at the bottom of column 3, § 226.8(b) is corrected by adding "amount of the transaction; and at least" after "identification of the transaction [20]; the" and before the texts of the footnotes.

6. On page 20897, column 1, second full paragraph, § 226.9(a)(2) is corrected by deleting the "ly" following "As an alternative" and inserting in its place "to paragraph (a)(1) of this section, the creditor may mail or deliver, on or with each periodic statement, a statement substantially * * *".

7. On page 20903, column 3, first full paragraph, § 226.18(q) is corrected by adding "of the dwelling from the" after "purchaser" and before "consumer * * *".

8. On page 20906, column 3, last full paragraph, § 226.29(c) is corrected by deleting "to this part" which appears at the end of the paragraph.

9. On page 20907, column 1, first full paragraph, in the *"Supporting Documents"* section of Appendix A, paragraph (3) is corrected by adding "provision of the federal law, including a full discussion of the basis for the" after "A comparison of the state law with the corresponding" and before "requesting party's belief that the state provision is either inconsistent or substantially the same."

10. On page 20908, column 3, 3rd full paragraph, in Part I of Appendix D, paragraph B is corrected by adding "regard" after "If interest is payable on the entire commitment amount without" and before "to the dates or amounts of actual disbursement: * * *".

Board of Governors of the Federal Reserve System, May 22, 1981.

BILLING CODE 6210-01-M

FEDERAL HOME LOAN BANK BOARD

12 CFR Part 569a

[81-262]

Technical Amendment Relating to Receivership

May 18, 1981.

AGENCY: Federal Home Loan Bank Board.

ACTION: Final rule.

SUMMARY: The Federal Home Loan Bank Board has adopted a technical amendment to Part 569a of the Rules and Regulations of the Federal Savings and Loan Insurance Corporation. The amendment updates the return to be paid as post-default interest in receiverships established under section 406(c)(2), National Housing Act, as amended (12 U.S.C. 1729(c)(2) (1976)).

EFFECTIVE DATE: May 18, 1981.

FOR FURTHER INFORMATION CONTACT: Lawrence W. Hayes (202-377-6428), Associate General Counsel, or Ilsa K. Bush (202-377-6436), Attorney, Federal Home Loan Bank Board, 1700 G Street, N.W., Washington, D.C. 20552.

SUPPLEMENTARY INFORMATION: By this Resolution, the Board has adopted an amendment to Part 569a, in the form of new subparagraph (6) to paragraph (a) of 12 CFR § 569a.7. The amendment alters the rate of interest or return to be paid as post-default interest on certain unsecured claims against receiverships established under section 406(c)(2) of the National Housing Act. The substantive determination to pay post-default interest is currently incorporated in Part 569a, but the specified regulatory rate of 5 per centum per annum is outdated. An appropriate return should allow for variations; the amendment therefore ties the return to the investment opportunity of the Federal

Savings and Loan Insurance Corporation.

The Board notes that under the rule adopted today, the post-default interest rate determined for each receivership remains in effect for the duration of that receivership as has historically been the case. However, an interest rate that varies with changed interest costs might be more consistent with recent Board initiatives to foster flexibility in long-term investment commitments. Therefore, the Board has asked its staff for a recommendation within 120 days on the feasibility of a further regulatory amendment to adjust the rate of post-default interest for each receivership periodically during the receivership to reflect subsequent changes in interest rates. The Board also solicits public comment during the next 120 days on the desirability of periodic adjustment of post-default interest rates during a receivership.

The Board finds that observance of the notice and comment period of 12 CFR 508.12 and 5 U.S.C. 553(b) and the 30-day delay of effective date of 12 CFR 508.14 and 5 U.S.C. 553(d) are unnecessary because the amendment pertains to Board procedure and practices (as described in 12 CFR 508.11), and to avoid uncertainty in pending cases it is in the public interest to provide for an immediate effective date.

PART 569a—RECEIVERS FOR INSURED INSTITUTIONS OTHER THAN FEDERAL SAVINGS AND LOAN ASSOCIATIONS

Accordingly, the Federal Home Loan Bank Board hereby amends Part 569a, Subchapter D, Chapter V of Title 12, *Code of Federal Regulations*, as set forth below.

Amend paragraph (a)(6) of § 569a.7, to read as follows:

§ 569a.7 Priority of claims.

(a) * * *

(6) Interest at the Corporation's current investment opportunity rate from the date of default on the outstanding principal amount of all claims that qualify under paragraphs (a)(3), (4), and (5) of this section; and if the surplus is not sufficient to pay such post-default interest in full on all claims specified in this paragraph, the payment of interest shall be made pro rata on all such claims without regard to any priorities as to the payment of principal on said claims. For the purposes of this paragraph, the "Corporation's current investment opportunity rate" shall be the average annualized rate of return on the Corporation's investments made during the calendar quarter in which the Receiver is appointed; and such investments shall include only those made pursuant to section 402(d) of the National Housing Act and shall not include any asset acquired under section 406(f) of the National Housing Act.

* * * * *

(Secs. 402, 406, 48 Stat. 1256, 1259, as amended; 12 U.S.C. 1725, 1729. Reorg. Plan No. 3 of 1947; 3 CFR 1943–48 Comp., p. 1071)

By the Federal Home Loan Bank Board.

J. J. Finn,

Secretary.

[FR Doc. 81-16303 Filed 5-29-81; 8:45 am]

BILLING CODE 6720-01-M

NATIONAL CREDIT UNION ADMINISTRATION

12 CFR Part 701

Insured and Guaranteed Loans; Deregulation

AGENCY: National Credit Union Administration (NCUA).

ACTION: Final rule.

SUMMARY: In accordance with the established policy goals of clarifying and simplifying its regulations, the National Credit Union Administration Board (NCUA Board) has reviewed its existing regulation concerning the granting of government insured or guaranteed loans. As a result, NCUA will delete this regulation. The action will eliminate a regulation which duplicates provisions of the Federal Credit Union Act, Federal Credit Union Bylaws and other NCUA regulations.

EFFECTIVE DATE: May 29, 1981.

ADDRESS: National Credit Union Administration, 1776 G Street NW., Washington, D.C. 20456

FOR FURTHER INFORMATION CONTACT: Thomas A. Straslicka, Chief, Supervision Section, Office of Examination and Insurance. Telephone: (202) 357–1065.

SUPPLEMENTARY INFORMATION: Subsection 701.21–5(a) of the NCUA Rules and Regulations is virtually identical to Section 107(5)(A)(iii) of the Federal Credit Union Act. Subsection 701.21–5(b) of the NCUA Rules and Regulations reiterates provisions of Article IX, Sections 6 and 8 of the Federal Credit Union Bylaws and Subsections 701.21–1 (e) and (f) of the NCUA Rules and Regulations. The deletion of Section 701.21–5 reduces redundant instructions on the same subject. The deletion does not diminish or change in any way the Federal credit union's responsibility to comply with the laws and regulations governing the insured or guaranteed loan program. Furthermore, it does not diminish or change in any way the responsibility of the credit committee to protect the interests of the credit union and determine that the borrower's application reflects his/her creditworthiness.

The Statement of Interpretation and Policy

When Federal Credit Unions Can Charge More Than 15 Percent Per Annum on Government Insured or Guaranteed Loans (IRPS 80–10), which was issued on October 23, 1980, provides NCUA's interpretation of the phrases "terms and conditions" and "specified". These phrases are contained in both Section 107(5)(A)(iii) of the Federal Credit Union Act and Section 701.21–5 of the NCUA Rules and Regulations, which is being eliminated by this final rule. Therefore, all references to Section 701.21–5 or Section 701.21–5(a) contained in IRPS 80–10 are to be deleted.

Regulatory Analysis: No regulatory analysis has been developed for this regulatory action because it will not result in (1) an annual effect on the economy of $100 million or more, or (2) a major increase in costs or expenses for all, or a significant portion of Federal or Federally insured credit unions with assets under $1 million or for other financial institutions.

Failure to Solicit Public Comment: The deletion of this regulation removes redundant instructions. Therefore, the Board for good cause, finds that notice and public procedure on this action is unnecessary and thus, exempt by 5 U.S.C. Section 533(6)(B).

Procedure for Regulatory Development: The procedures set forth in NCUA's Final Report: "Improving Government Regulations" have been waived in accordance with the exception provided in Part I of the final report. The official responsible for the decision is *Todd Okun, Assistant General Counsel.*

(12 U.S.C. Section 1757(5)(A)(iii), 1766(a)).

Beatrix D. Fields,

Acting Secretary, NCUA Board.

May 22, 1981.

Accordingly, 12 CFR Part 701 is hereby amended as set forth below.

§ 701.21–5 [Removed]

1. 12 CFR 701.21–5 is removed.

[FR Doc. 81-16304 Filed 5-29-81; 8:45 am]

BILLING CODE 7535-01-M

12 CFR Part 720

Developing Government Regulations; Statement of Policy

AGENCY: National Credit Union Administration (NCUA).

ACTION: Statement of policy.

SUMMARY: This policy statement sets forth NCUA's procedures for developing regulations. These procedures are intended to ensure compliance with the Financial Regulation Simplification Act of 1980 and the Regulatory Flexibility Act of 1980.

EFFECTIVE DATES: June 1, 1981. However, comments are requested and will be evaluated through July 1, 1981.

ADDRESS: Send comments to: Robert S. Monheit, Regulatory Development Coordinator, Office of General Counsel, National Credit Union Administration, 1776 G. St., NW., Washington, D.C. 20456.

FOR FURTHER INFORMATION CONTACT: Robert S. Monheit, Senior Attorney or Beatrix D. Fields, Attorney-Advisor, Office of General Counsel at the above address or telephone (202) 357-1030.

SUPPLEMENTARY INFORMATION: This policy statement sets forth NCUA's procedures for developing regulations. The procedures are intended to ensure compliance with the requirements of the "Financial Regulation Simplification Act of 1980", Title VIII of P.L. 96-221, and the "Regulatory Flexibility Act of 1980", P.L. 96-354. The Financial Regulation Simplification Act requires that NCUA (as well as other Federal financial regulatory agencies) ensure that the need for a regulation is clearly established, that alternatives are considered, that compliance costs are minimized, that duplicative regulations are avoided, and that existing regulations are periodically reviewed. The Regulatory Flexibility Act establishes as a principle of rulemaking that, whenever possible, agencies will fit regulatory and informational requirements to the scale of the businesses, organizations and governmental jurisdictions subject to the rule.

In 1979, NCUA published its procedures for developing and improving its regulations within the spirit of the former E.O. 12044. These procedures were set forth in a Final Report: In Response to E.O. 12044, Appendix A to 12 CFR Part 720 ("Final Report"). This policy statement will replace and supercede the Final Report by discussing the basic procedures and statutory requirements for developing regulations. The internal procedures for developing a regulation have been revised and set forth in a specific instruction to agency staff.

In accordance with the Regulatory Flexibility Act's provision defining "small entities", 5 U.S.C. 601, NCUA is seeking comments on a definition of "small credit unions". This policy statement includes an interim standard defining a "small credit union" as one having less than $1 million in assets. We invite comment on this standard and suggestions for other appropriate standards.

By the National Credit Union Administration Board on the 21st day of May, 1981.

Beatrix Fields,

Acting Secretary of the Board.

[IRPS 81-4]

I. Statement of Policy and Coverage

It is the policy of NCUA to ensure that its regulations:

—Impose only minimum required burdens on credit unions, consumers, and the public;

—Are appropriate for the size of financial institutions regulated by NCUA;

—Are issued only after full public participation in the rulemaking process; and

—Are clear and understandable.

The procedures outlined below are designed to achieve these goals. In some cases, the procedures may, however, be inappropriate either because of factors outside of NCUA's control or because following the procedures is determined not to be in the public interest. Therefore, NCUA will not apply the procedures contained in this policy statement in the development of:

1. regulations that are required by statute to be developed on the record after oral hearings before the Administration;

2. regulations that are prepared in response to an emergency or that a statute or a court requires to be developed under a short deadline;

3. regulations where the process would be unnecessary or contrary to the public interest; and

4. matters that relate to the management of NCUA, its personnel, and its procurement of goods and services.

In the event that one of these exemptions is used and the procedures outlined in this policy statement are not followed, NCUA will notify the public and explain the reasons for not following the procedures.

II. Regulatory Development Coordinator

NCUA has designated a Regulatory Development Coordinator in the Office of General Counsel. It is this individual's responsibility to ensure that the development of regulations is accomplished in accordance with applicable laws and this policy statement. Specifically, the Regulatory Development Coordinator is responsible for: (a) coordinating the rulemaking process; (b) reviewing the issues raised by initiation statements and maintaining a record of the development of those issues; (c) preparing and publishing in the **Federal Register** the semi-annual agenda of regulations being developed by NCUA and of existing regulations being reviewed by NUCA; and (d) reviewing proposed and final regulations to ensure compliance with the requirements of the Administrative Procedures Act, the Regulatory Flexibility Act, the Financial Regulation Simplification Act, and the requirements of this policy statement.

III. Procedures For the Development of Regulations

1. *Proposed Rule.* The NCUA Board will designate an Office as the Office of Primary Interest (OPI) to oversee the development of a particular regulation. The OPI will prepare a draft of the proposed rule and an accompanying memorandum for submission to the Board, unless the Board finds that consideration of the memorandum is impracticable. The accompanying memorandum will include:

a. A description of the problem to be addressed by a regulation;

b. An assessment of the need for a regulation and a statement of the purpose and legal basis of a regulation;

c. Meaningful alternative approaches that can be developed to address the problem, and which approach, if developed into a final rule, may have a significant economic impact on small entities;

d. A statement, if applicable, of the reasons for concluding that the proposed rule will not have a significant economic impact on a substantial number of small entities;

e. An identification of other Federal regulations that may conflict with, be duplicated by, or be made inconsistent, as a result of adopting any of the alternatives;

f. Plans for obtaining public participation and for consulting with other regulatory agencies;

g. Anticipated target dates; and

h. Recommendations for further action.

The preamble to the proposed rule will include:

a. A description of the need, purpose, and legal basis for the proposed rule;

b. The name of a knowledgeable official who can be contacted for further information on the proposed rule;

c. A request for comments for a period of 60 days from publication (or shorter if accompanied by a statement explaining the reasons for a shorter comment period); and

d. Either a summary of the initial regulatory flexibility analysis and a statement describing how a copy can be obtained, or a certification by the NCUA Board that the proposed rule will not have a significant economic impact on a substantial number of small entities, accompanied by an explanation of the reasons for the certification.

The proposed rule will be circulated for comment within the agency and then presented to the NCUA Board for approval. The proposed rule will then be published in the **Federal Register** and other appropriate publications. Comments received by NCUA on the proposed rule will be publicly available in the Office of General Counsel.

2. *Initial Regulatory Flexibility Analysis.* Prior to publishing a proposed rule subject to the general notice requirements of 5 U.S.C. 553, NCUA will prepare an initial regulatory flexibility analysis if the proposed rule will have a significant economic impact on a substantial number of small entities. Credit unions having less than $1 million in assets will be considered to be small entities. The initial regulatory flexibility analysis may be combined with the memorandum accompanying the proposed rule, which addresses issues that the Simplification Act requires to be considered (see: Part III, section 1, above). This analysis will describe the impact of the proposed rule on small entities. A summary of the analysis will be published in the **Federal Register** as part of the preamble to the proposed rule. A copy of the analysis shall be transmitted to the Chief Counsel for Advocacy of the Small Business Administration.

Each initial regulatory flexibility analysis shall contain:

a. A description of the reasons why action by the agency is being considered;

b. A succinct statement of the objectives of, and legal basis for, the proposed rule;

c. A description of and, where feasible, an estimate of the number of small entities to which the proposed rule will apply;

d. A description of the projected reporting, recordkeeping and other compliance requirements of the proposed rule, including an estimate of the classes of small entities which will be subject to the requirement and the type of professional skills necessary for preparation of the report of record;

e. An identification, to the extent practicable, of all relevant Federal rules which may duplicate overlap or conflict with the proposed rule; and

f. A description of any significant alternatives to the proposed rule which accomplish the stated objectives of applicable statutes and which minimize any significant economic impact of the proposed rule on small entities, including, when possible, considertion of: (i) the establishment of differing compliance or reporting requirements or timetables that take into account the resources available to small entities; (ii) the clarification, consolidation, or simlification of compliance and reporting requirements under the rule for such small entities; (iii) the use of performance rather than design standards; or (iv) an exemption from coverage under the rule, or any part thereof, for such small entities.

In describing effects and alternatives, a quantifiable or numerical description may be used, or if not practicable or reliable, more general descriptive statements may be used. This analysis may be prepared in conjunction with or as part of any other analysis. Any series of closely related rules may be considered as one rule for purposes of preparing the initial regulatory flexibility analysis.

The initial regulatory flexibility analysis need not be prepared for any proposed rule if the Board certifies that the rule will not, if adopted, have a significant economic impact on a substantial number of small entities. The certification shall be published in the **Federal Register** at the time the proposed or final rule is published along with a succinct statement explaining the reasons for the certification. A copy of the certification and statement shall be forwarded to the Chief Counsel for Adovcacy of the Small business Administration.

The Board may waive or delay the completion of some or all of the requirments of the initial regulatory flexibility analysis by publishing in the **Federal Register**, no later than publication of the final rule, written findings and reasons for the delay provided that the final rule is promulgated in response to an emergency that makes compliance or timely compliance impracticable.

3. *Compliance With the Paperwork Reduction Act.* If a proposed regulation contains a recordkeeping or reporting requirement that, if adopted, will be imposed upon 10 or more credit unions or persons, then a copy of the proposed rule will be sent to the Office of Management and Budget (OMB) prior to publication. OMB will then have 60 days after publication to comment on the recordkeeping or reporting requirement, and may request additional information from NCUA. If OMB does comment, NCUA will respond to those comments in the preamble to the final rule. If OMB thereafter disapproves the reporting or recordkeeping requirement, the NCUA Board can override this by a majority vote. NCUA may ask for an expedited clearance if the normal review period may cause public harm or if it will disrupt the collection of information related to an unanticipated event or if it will result in missing a statutory deadline.

4. *Final Regulatory Flexibility Analysis.* A final regulatory flexibility analysis is prepared for all rules that required the publication of a general notice of proposed rulemaking and that will have a significant economic impact on a substantial number of small entities. This analysis may be included in the Final Review Memorandum (see Part II, section 5, below).

Each final regulatory flexibility analysis shall contain:

a. A succinct statement of the need for, and the objectives of, the rule;

b. A summary of the issues raised by the public comments in response to the initial regulatory flexibility analysis, a summary of the assessment by the agency of such issues, and a statement of any changes made in the proposed rule as a result of such comments; and

c. A description of each of the significant alternatives to the rule which were considered by the agency, and a statement of the reasons why each one of such alternatives was rejected.

In describing effects and alternatives, a quantifiable or numerical description may be used, or if not practicable or reliable, more general descriptive statements may be used. Any series of closely related rules may be considered as one rule for purposes of preparing the final regulatory flexibility analysis.

The final regulatory flexibility analysis need not be prepared for any final rule if a proposed rule was not required by 5 U.S.C. § 553 or if the Board certifies that the rule will not, if promulgated, have a significant economic impact on a substantial number of small entities. The certification shall be published in the preamble to the final rule along with a succinct statement explaining the reasons for the certification. A copy of

the certification and statement shall be forwarded to the Chief Counsel for Advocacy of the Small Business Administration.

The Board may not waive the completion of any of the requirements of the final regulatory flexibility analysis but the Board may delay the completion of the requirements for not more than 180 days after publishing the final rule. The Board must publish in the **Federal Register**, no later than publication of the final rule, a written finding and reasons for the delay and indicate that the final rule is being promulgated in response to an emergency that makes timely compliance with the requirments of the final regulatory flexibility analysis impracticable. If the final regulatory flexibility analysis is not prepared within 180 days of publishing the final rule, the rule lapses and has no effect, and it may not be repromulgated until the analysis has been completed.

NCUA will make copies of the analysis available to members of the public and will describe in the **Federal Register**, at the time the final rule is published, how copies can be obtained.

5. *Final Review Memorandum.* Following the comment period and after public participation procedures have been completed, all information received is reviewed. Along with the NCUA Board's review of the draft final regulation, the NCUA Board evaluates the final review memorandum which indicates that the following policy issues have been considered with regard to developing the final regulation:

a. The need for and purpose of the regulation is established clearly;

b. Meaningful alternatives to the promulgation of the regulation were considered;

c. Compliance costs, paperwork, and other burdens on federal credit unions, consumers, and the public are minimized;

d. Conflicts, duplication and inconsistencies between the regulations issued by the Federal financial regulatory agencies have been avoided to the extent possible taking into account differences in statutory responsibilities, the classes of regulation and methods of implementation or policy objectives;

e. Timely participation and comment by other Federal agencies, appropriate State and local agencies, financial institutions, and consumers was available; and

f. The regulation appeared to be as clearly written as possible and understandable by those subject to the regulation.

Support for establishing that these issues have been considered may be set forth in the final memorandum or in the preamble to the final regulation or as part of a final regulatory flexibility analysis.

7. *Final Rule.* The Office of Primary Interest will prepare a draft final rule to be circulated within NCUA for comments. The preamble of final rule will contain:

a. A statement of the need, purpose, and legal basis for the rule;

b. The name of a knowledgeable official who can be contacted for further information on the final rule;

c. A summary of the significant comments received in the proposed rule;

d. A description of how a copy of the final regulatory flexibility analysis (if any) can be obtained; and

e. A statement responding to comments submitted by OMB on the recordkeeping or reporting requirements (if any).

The final rule will be presented to the NCUA Board for approval. It will then be published in the **Federal Register** and other appropriate publications.

IV. Review of Existing Regulations

NCUA shall periodically update, clarify and simplify existing regulations and eliminate redundant and unnecessary provisions. The regulations under review are listed in the semi-annual regulatory agenda (see Part VI). After the initial review, regulations will be reviewed for need, clarity, and efficiency at least once every ten years.

V. Opportunity for Public Participation

This part describes the methods provided by NCUA for the public to participate in the development of its regulations.

1. *Initiating a regulation.* A member of the public may recommend that NCUA develop a regulation or revise an existing regulation. The recommendation should be submitted, in writing, and should contain a statement of the issues, the opinion and recommendations of the person submitting the statement, any data that is relevant to the issues, an indication of the support of others for the recommendations, and a description of the interest that the person has in the action requested.

2. *Public participation in rulemaking.* A number of methods will be used by NCUA to encourage public participation in the development and review of regulations. The methods used will depend upon the stage of the proceedings, the issues involved, the amount of expressed interest, and the public sector affected by the regulation.

a. *The Semi-Annual Regulatory Agenda.* The agenda, which is described in detail in Part VI, will advise the public on the status of regulations being developed, will give target dates for the review of existing regulations, will identify regulations that may have significant economic impact on small entities, and will provide the name of an NCUA official to contact for further information. The Agenda can be used by the public to track the development of regulations and to identify opportunities to participate in the rulemaking process.

b. *Advance notice of proposed rulemaking.* This notice, when the Board determines it is appropriate, will be published in the **Federal Register** and will set forth the problems identified by NCUA that may give rise to a regulation. The Advance Notice will briefly described some of the options being considered and the restrictions that the law imposes, and will ask the public to send written comments to an NCUA official named in the notice. This will permit public participation before a proposed rule is drafted.

Questionnaires. When it is determined that there is not sufficient data to proceed with the development of a regulation, NCUA will (in accordance with the requirements of the Paperwork Reduction Act of 1980) send out questionnaires to parties likely to be affected by the regulation. The information obtained from the questionnaires should enable NCUA to decide whether there is a need for a regulation and the most efficient and effective means for dealing with the subject of the regulation.

d. *Articles.* NCUA will publish articles in its own publications, and will, on occasion, contribute articles to interested trade publications. These articles will discuss regulations being developed and will include the name of an NCUA official to whom comments can be sent. Also, NCUA will publish copies of proposed and final regulations.

e. *Copies of proposed regulations.* Members of the public can regularly receive copies of proposed regulations by being included on NCUA's regulation mailing list. To be included on the mailing list, persons should write to the Office of Administration, National Credit Union Administration, Washington, D.C. 20456. In this way, persons who have expressed an interest in the development of a regulation, but who do not have regular access to the **Federal Register**, will be assured of receiving a copy of a proposed regulation with sufficient time to comment prior to the close of the comment period.

f. *Public comment.* NCUA will continue to solicit public comment on

proposed regulations as required by the Administrative Procedures Act, 5 U.S.C. Section 553. As a matter of policy, NCUA believes that the public should be given at least 60 days (from the date of publication in the **Federal Register**) to comment on a proposed regulation. If the comment period is less than 60 days, or is extended beyond 60 days, NCUA will publish a statement in the **Federal Register** (usually along with the publication of the proposed regulation) explaining the reasons for the change. NCUA will consider, during the comment period, any request to extend the comment period.

g. *Public hearings or conferences.* If NCUA determines that the written comments that it has received do not provide sufficient information or do not adequately represent significantly varying public interests, public hearings or conferences will be held. Depending upon the nature of the issues involved and the interest expressed in the written comments received, these public meetings will vary from informal conferences between NCUA officials and interested members of the public at which the issues are discussed, to hearings at which oral testimony is recorded and written testimony may be submitted. NCUA will also consider, where appropriate, holding hearings or conferences at each NCUA Regional Office around the country as well as at the Central Office in Washington, D.C. Further, NCUA will consider funding appropriate groups and individual credit union members when appropriate to attend the hearings held in Washington. Eligible applicants must represent a significant viewpoint that would not otherwise be adequately represented and must not have available resources to attend.

h. *Procedures for consulting State and local government officials.* When it appears that a regulation under development will have significant impact on relations between NCUA and State or local governments, NCUA will send to the appropriate government official an advance notice of the development of a regulation or an advance copy of the proposed regulation being developed. This will ensure that affected State and local governments have an opportunity to submit their views.

i. *Participation by small entities.* When a rule, if promulgated, will have a significant economic impact on a substantial number of small entities, NCUA will make additional efforts to ensure that small entities will participate in the rulemaking process. When appropriate, NCUA will: (1) if an advance notice of proposed rulemaking is issued, identify those alternatives that may have significant economic effect on a substantial number of small entities; (2) publish proposed rules in publications likely to be obtained by small entities; (3) send notices directly to interested small entities; or (4) conduct open conferences or public hearings on proposed rules having significant economic impacts on a substantial number of small entities.

VI. Semi-Annual Regulatory Agenda

In April and October, NCUA will publish in the **Federal Register** an agenda listing the regulations being considered and/or developed by NCUA and also listing those existing regulations undergoing periodic review. However, NCUA is not precluded from considering or acting on any matter not included in the agenda and is not required to consider or act on any matter listed in the agenda. The agenda will, for each regulation listed in it, contain the following information:

a. The need for objectives of the regulation and the legal basis for issuing it;

b. A brief indication, where applicable, of whether the regulation will have have an economic impact on a substantial number of small entities;

c. The status of the regulation at the time the agenda is published, the approximate schedule for completing action on a proposed rule that has been issued, and the target date for the review of an existing regulation; and

d. The name and telephone number of an NCUA official who is familiar with the regulation.

Each agenda shall be submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment, if any. Further, NCUA will provide notice of the agenda to small credit unions through direct notification or through publications likely to be obtained by small credit unions. Comments on each regulation discussed in the agenda are invited.

BILLING CODE 7535-01-M

SMALL BUSINESS ADMINISTRATION

13 CFR Part 124

Minority Small Business and Capital Ownership Development Assistance

AGENCY: Small Business Administration.

ACTION: Interim rule.

SUMMARY: Pub. L. 96-481 (October 21, 1980) requires SBA to negotiate with every Section 8(a) concern a fixed period of time ("Fixed Program Participation Term") for the concern to remain in the Minority Small Business and Capital Ownership Development Program. Among the other provisions of that statute is the prohibition against the award of Section 8(a) contracts after June 1, 1981, to any concern which does not have an SBA approved Fixed Program Participation Term. In order to implement this statute, SBA has published elsewhere in this **Federal Register** a Notice of Proposed Rulemaking (proposed 13 CFR § 124.1-1(f)). As can be seen, the effective date of these proposed regulations, when adopted in final form, will be after June 1, 1981, the date after which the statute prohibits the award of Section 8(a) contracts to a concern which does not have an SBA approved Fixed Program Participation Term. Accordingly, in order to avoid disruption in the operations of Section 8(a) concerns if the limitations of the June 1, 1981, date are imposed, this interim regulation authorizes termporary Fixed Program Participation Terms for concerns beginning June 1, 1981.

DATES: This interim rule is effective June 1, 1981. This regulation and any Fixed Program Participation Terms authorized hereunder will expire on November 30, 1981.

FOR FURTHER INFORMATION CONTACT: Charlie L. Dean, Chief Counsel for Special Programs, tel. 202/653-6699.

SUPPLEMENTARY INFORMATION: This interim rule is effective upon publication due to the noted exigency of the situation. This regulation and any fixed Program Participation Terms authorized hereunder will expire on November 30, 1981. Before that date, it is anticipated that the permanent Fixed Program Participation Term regulations, referenced above, will have been adopted in final form and that regular Fixed Program Participation Terms will be negotiated pursuant thereto.

For the purpose of Executive Order 12291, effective February 17, 1981, SBA hereby determines that this rule would not constitute a major rule. In addition, it is hereby certified that, for the purposes of the applicability of the requirements of sections 603 and 604 of the Regulatory Flexibility Act (Pub. L. 96-354, September 19, 1980, 5 U.S.C. 603 and 604), this rule will not have a significant economic impact on a substantial number of small entities. This rule governs only those firms which have been or will be admitted to participate in SBA's Section 8(a) program. This number is not substantial

relative to all small business firms in the United States.

Dated: May 27, 1981.

Michael Cardenas,

Administrator.

Therefore, pursuant to the authority of section 5(b)(6) of the Small Business Act (15 U.S.C. 634(b)(6)), the Small Business Administration hereby amends Part 124 of its regulations (13 CFR Part 124) by adding a new § 124.1–1(g) to read as follows:

§ 124.1–1 The section 8(a) program.

* * * * *

(g) *Fixed Program Participation Term.* (1) In addition to Program Completion and Program Termination, set forth in subsections (d) and (e) of this section, every program participant shall be subject to a Fixed Program Participation Term. A Fixed Program Participation Term will establish the ultimate time period during which a concern may remain in the program and the conditions thereof, regardless of whether competiveness is reached or Program Completion action is effected.

(2) The purpose of this interim rule is to provide for temporary Fixed Program Participation Terms pending adoption of permanent Small Business Administration regulations (proposed 13 CFR 124.1–1(f)) setting forth the detailed policies and procedures for establishing regular Fixed Program Participation Terms. A temporary Fixed Program Participation Term, authorized pursuant to this rule, shall not extend beyond November 30, 1981.

(3) This Fixed Program Participation Term shall be negotiated between SBA and each small concern which is a participant or has applied for participation in the program.

(4) The provisions of the Fixed Program Participation Term, including the time limitations therefor, shall be set forth in the SBA approved business plan of the program participant.

(5) No contracts pursuant to 8(a) of the Small Business Act shall be awarded to any concern unless it has received and is operating under an SBA approved Fixed Program Participation Term.

(6) Nothing in this subsection (g) shall be construed to limit SBA from initiating Termination actions, pursuant to subsection (e) above, or Completion actions, pursuant to subsection (d) above, during any Fixed Program Participation Term granted herein.

(7) At the end of the temporary Fixed Program Participation Term authorized herein, a concern will cease to be a program participant unless it has received a Fixed Program Participation Term under the applicable permanent regulations (proposed 13 CFR 124.1–1(f)). This cessation of program participation shall occur without the necessity of any additional action by SBA; also it shall not give rise to any rights, claims or prerogatives on behalf of the concern. Cessation of program participation at the conclusion of a Fixed Program Participation Term shall not be subject to the hearings or other requirements of section 8(a)(9) of the Small Business Act (15 U.S.C. 637(a)(9)) or any implementing rules or regulations.

(8) This regulation and any temporary Fixed Program Participation Terms in effect thereunder shall expire on November 30, 1981.

BILLING CODE 8025-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Airworthiness Docket No. 81-ASW-3, Amdt. 39-4118]

Bell Helicopter Textron Model 206L-1 Helicopter; Airworthiness Directives

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment amends an existing Airworthiness Directive (AD) which required the fuel filter on Bell Helicopter Textron (BHT) Model 206L–1 helicopters to be moved from its present position behind the engine turbine module to a location on the forward firewall and the relocation of an oil line. The AD is amended to include replacement of the freewheeling oil hose assembly on helicopters equipped with the BHT IFR Kit. This will reduce the possibility of fires in the event of turbine disintegration.

DATES: Effective June 1, 1981. Compliance is required within the next 50 hours' time in service after the effective date of this AD.

ADDRESS: The Alert Service Bulletins specified in this AD may be obtained from Bell Helicopter Textron, Product Support Department, P.O. Box 482, Fort Worth, Texas 76101.

A copy of each service bulletin is contained in the Rules Docket, Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, Texas 76101.

FOR FURTHER INFORMATION CONTACT: R. H. A. West, Propulsion Section, ASW–214, Engineering and Manufacturing Branch, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Texas 76101, telephone number (817) 624–4911, extension 525.

SUPPLEMENTARY INFORMATION: This notice amends Amendment 39–4063, 46 FR 16884, AD 81–06–05, which required relocation of a fuel filter and associated hoses and on non-IFR equipped helicopters, the replacement of an oil hose.

After issuing Amendment 39–4063, 46 FR 16884, AD 81–06–05, installation data and hoses became available for replacement of the freewheeling aft oil hose assembly with a shorter hose on IFR equipped helicopters. Therefore, the FAA is amending Amendment 39–4063.

There have been failures and subsequent disintegration of the turbine wheel on the Detroit Diesel Allison Model 250–C28B engine used on the BHT Model 206L–1 helicopter. In two cases, fragments from the disintegrating turbine wheels penetrated flammable fluid carrying hoses near the engine and serious fires resulted. Since this condition is likely to exist or develop on other helicopters of the same type design, this amended airworthiness directive is being issued to require the relocation of components containing flammable fluids so that they do not cross the turbine wheel plane of rotation. The components affected are the fuel filter with its associated fuel lines and the oil line to the freewheeling assembly.

Since a situation exists which requires the immediate adoption of this regulation, it is found that notice and public procedure hereon are impractical and good cause exists for making this amendment effective in less than 30 days.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by amending Amendment 39–4063, 46 FR 16884, AD 81–06–05 by revising it to read as follows:

Bell: Applies to Model 206L–1 helicopters.

Paragraph (a) applies to S/N 45154 through 45448.

Paragraph (b) applies to helicopters equipped with the BHT IFR Kit.

Compliance is required within the next 50 hours' time in service after the effective date of the AD unless already accomplished.

To prevent fires due to fuel/oil lines severed by a disintegrating turbine wheel, accomplish the following:

(a) Per the instructions in BHT Alert Service Bulletin No. 206L–80–13, "Modification of Engine Fuel Filter, Associated Fuel Hoses and Freewheeling Oil

Hoses," dated February 17, 1980, perform the following modifications:

(1) On all affected rotorcraft, relocate the fuel filter from its present position to the specified location on the forward firewall.

(2) Replace the aft freewheeling oil hose on all affected rotorcraft except rotorcraft equipped with the BHT IFR Kit.

(3) As applicable, replace bleed air tubes to avoid an interference at the new filter location.

(b) Per the instructions in BHT Alert Service Bulletin No. 206L–81–19, "Replacement of Freewheeling Aft Oil Vent Hose Assembly, P/N 124F001ABB03 11SS," dated February 24, 1981, replace the aft freewheeling oil hose on all affected rotorcraft equipped with BHT IFR Kit.

(c) Any alternate method of compliance with this AD must be approved by the Chief, Engineering and Manufacturing Branch, Flight Standards Division, Southwest Region, Federal Aviation Administration.

The manufacturer's specifications and procedures identified and described in this directive are incorporated herein and made a part hereof pursuant to 5 U.S.C. 552(a)(1). All persons affected by this directive who have not already received these documents from the manufacturer may obtain copies upon request to Bell Helicopter Textron, Product Support Department, P.O. Box 482, Fort Worth, Texas 76101. These documents may also be examined at the Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, Texas, and at the FAA Headquarters, 800 Independence Avenue, SW., Washington, D.C. A historical file on this AD, which includes the incorporated material in full, is maintained by the FAA at their headquarters in Washington, D.C., and at the Southwest Regional Office in Fort Worth, Texas.

This amendment becomes effective June 1, 1981.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c); 14 CFR 11.89))

Note.—The FAA has determined that this involves a regulation which is not considered to be major under Executive Order 12291 or significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979) and will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act since the amendment adds only those helicopters which have been equipped with the BHT IFR Kit. A draft evaluation has been prepared for this proposed regulation and has been placed in the docket. A copy of it may be obtained by contacting the person identified under the caption "For Further Information Contact."

This rule is a final order of the Administrator under the Federal Aviation Act of 1958, as amended. As such, it is subject to review only by the courts of appeals of the United States, or the United States Court of Appeals for the District of Columbia.

Issued in Fort Worth, Tex., on May 13, 1981.

C. R. Melugin, Jr.,

Director, Southwest Region.

14 CFR Part 39

[Docket No. 80–GL–7–AD, Admt. 39–4123]

Detroit Diesel Allision Model 250–B17 and 250–C20 Series Engines; Airworthiness Directives

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment amends an existing Airworthiness Directive (AD) which requires replacement of certain third stage turbine wheels manufactured by Detroit Diesel Allison and applicable to the Models 250–B17 and 250–C20 series engines. The wheels are subject to a subsequent blade separation after a hot start. Several failures have resulted in a loss of engine power. Additional turbine wheels that are subject to failure are included in this amendment.

DATE: Effective June 3, 1981. Compliance schedule—As prescribed in body of the AD.

ADDRESSES: The applicable engine service documents may be obtained from Detroit Diesel Allision, Division of General Motors Corporation, Indianapolis, Indiana 46206.

A copy of the service information referenced in this AD is contained in the Rules Docket, Room 415, Office of the Regional Counsel, 2300 East Devon Avenue, Des Plaines, Illinios 60018; and at FAA Headquarters, Room 916, 800 Independence Avenue, SW., Washington, D.C. 20591.

FOR FURTHER INFORMATION CONTACT: Mr. Royace Prather, Engineering and Manufacturing Branch, AGL–214, Flight Standards Division, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois, 60018, telephone number (312) 694–7132.

SUPPLEMENTARY INFORMATION: This amendment amends Amendment 39–3585 44 FR 58683, AD 79–21–01, which currently requires removal of turbine wheels from service after a hot start on Detroit Diesel Allison Model 250–B17 and 250–C20 series engines. After issuing Amendment 39–3585, additional blade separation and subsequent investigations have resulted in a determination to require that additional part number turbine wheels must be included. Therefore, the FAA is amending Amendment 39–3585 to include additional part number turbine wheels on Detroit Diesel Allision Model 250–B17 and 250–C20 series engines.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 3913 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by amending Amendment 39–3585 44 FR 58683, AD 79–21–01, by revising it to read:

79–21–01 R1 Detroit Diesel Allison: Amendment 39–3585 as amended by Amendment 39–4123. Applies to 250–B17, 250–B17B, 250–C20, 250–C20B, and 250–C20C (MIL. T63–A–720) engines equipped with third stage trubine wheel Part Numbers 6898551, 6898567, 6898733, 6898743, 6898753, 6898763, 6899406, 6899415, 6899416 6899417, 6899418, 6899419, 6896863, 6898823 and 6899364 installed in aircraft certificated in all categories.

Compliance required as follows unless previously accomplished:

(a) For engines that have previously experienced a hot start beyond the established limits, compliance must be accomplished prior to further flight.

(b) For engines that experience a hot start beyond the established limits after the effective date of this AD, compliance must be accomplished prior to further flight, except that the aircraft may be flown in accordance with FAR 21.197 to a base where the removal can be performed.

To preclude possible engine power loss resulting from third stage turbine wheel blade separation, remove the turbine wheels from service if the following temperature-time limits are exceeded and install an FAA Approved part number turbine wheel.

Temperature range	Time limit
810°–927°C (1490°–1700°F)	10 seconds maximum
Over 927°C (1700°F)	0 seconds.

The turbine wheels may not be reworked and reinstalled after a hot start.

Note.—Time at temperature limits is not additive and may be repeated without restriction.

(Detroit Diesel Allision Commercial Service Letter 1051, Rev. 3, for the 250–B17 series engines and Commerial Service Letter 1084, Rev. 3, for the 250–C20 series engines also pertain to this subject)

This amendment becomes effective June 3, 1981.

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421,

1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.89)

Note.—The FAA has determined that this document involves a final regulation which is not considered to be significant as implemented by DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). A final regulatory evaluation prepared for this document is contained in the public docket. A copy of it may be obtained by contacting the person identified under the caption "For Further Information Contact." It has been detemined under the criteria of the Regulatory Flexibility Act that this proposed rule, at promulgation, will not have a significant economic impact on a substantial number of small entities.

This rule is final order of the Administrator under the Federal Aviation Act of 1958, as amended. As such, it is subject to review only by the courts of appeals of the United States, or the United States Court of Appeals for the District of Columbia.

Issued in Des Plaines, Ill., on May 19, 1981.

Frederick M. Isaac,

Acting Director, Great Lakes Region.

14 CFR Part 71

[Airspace Docket No. 81-SO-6]

Designation of Control Zone and Alteration of Transition Area, Jupiter, Florida

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule designates the Jupiter, Florida, Control Zone and lowers the base of controlled airspace in the vicinity of the William P. Gwinn Airport, formerly United Technologies Airport, from 700 feet AGL to the surface. The description of Jupiter, Florida, Transition Area is altered by changing the airport name and correcting the airport geographic location.

EFFECTIVE DATE: 0901 GMT, August 6, 1981.

FOR FURTHER INFORMATION CONTACT: Carl F. Stokoe, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone (404) 763-7646.

SUPPLEMENTARY INFORMATION:

History

On Monday, March 16, 1981, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to designate the Jupiter, Florida, Control Zone and alter the Jupiter, Florida, Transition Area. The existing nonfederal airport traffic control tower on the private use William P. Gwinn Airport, formerly United Technologies Airport, meets the requirements for establishment of a part-time control zone with regular hours of operation. In order to provide the maximum level of safety, designated airspace protection to the surface is required to contain Instrument Flight Rule (IFR) operations near the airport.

It is necessary to alter the description of the Jupiter, Florida, Transition Area to reflect the airport name change and correct the airport geographic location (46 FR 16900). Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. The Palm Beach County Department of Airports registered their concern with regard to IFR operations regarding a proposed airport site and the possible interaction that may occur between the two airports. In considering the effect that airspace action would have on neighboring airports, the FAA can only consider plans on file. At the present time, the airport site of concern to Palm Beach County is one of several proposed sites. A site selection has not yet been made. Until such time as a selection is made and an Airport Layout Plan established, the requirements for future IFR operations cannot be identified.

No other comments or objections were received.

The Rule

This amendment to Part 71 of the Federal Aviation Regulations designates the Jupiter, Florida, Control Zone and alters the Jupiter, Florida, Transition Area.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, § 71.171, Subpart F, of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) (46 FR 455) is further amended, effective 0901 GMT, August 6, 1981, as follows:

Jupiter, Florida

Within a 5-mile radius of William P. Gwinn Airport (lat. 26°54'29"N., long. 80°19'45"W.); within 3 miles each side of the 287° bearing from the United RBN (lat. 26°54'32"N., long. 80°19'59"W.), extending from the 5-mile radius zone to 8.5 miles west of the RBN; excluding the area within a 1.5-mile radius of Citrus Ridge Airport (lat. 26°50'14"N., long. 80°17'10"W.). This control zone is effective from 0700 to 1900 hours, local time, daily.

Accordingly, pursuant to the authority delegated to me, § 71.181, Subpart G, of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (and amended) (46 FR 540) is further amended, effective 0901 GMT, August 6, 1981, as follows:

Jupiter, Florida

"* * * United Technologies Airport (lat. 26°54'28"N., long. 80°19'38"W.) * * *" is deleted and "* * * William P. Gwinn Airport (lat. 26°54'29"N., long. 80°19'45"W.) * * *" is substituted therefor.

(Sec. 307(a) of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)) and Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)))

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a major rule under Executive Order 12291; (2) is not a significant rule under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal; and (4) will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

This action involves only a small alteration of navigable airspace and air traffic control procedures over a limited area.

Issued in East Point, Georgia, on May 20, 1981.

George R. LaCaille,

Acting Director, Southern Region.

[FR Doc. 81-16169 Filed 5-29-81; 8:45 am]

14 CFR Part 71

[Airspace Docket No. 81-NE-27]

Amend the Description of the Martha's Vineyard, Massachusetts Control Zone

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The present description of the Martha's Vineyard Airport Control Zone is described with reference to the Edgartown Non-directional Radio Beacon (NDB) which has been decommissioned. Therefore, the description of the control zone is being revised to delete reference to the NDB.

EFFECTIVE DATE: June 2, 1981.

FOR FURTHER INFORMATION CONTACT: Charles Taylor, Operations Procedures and Airspace Branch, ANE-535, Federal Aviation Administration, Air Traffic Division, 12 New England Executive Park, Burlington, Massachusetts 01803; telephone (617) 273-7285.

SUPPLEMENTARY INFORMATION: On August 21, 1980, on page 55760 of the **Federal Register** (45 FR 55760), a Notice of Proposed Rulemaking was published stating that the Federal Aviation Administration proposed to amend the control zone at Martha's Vineyard Airport, Martha's Vineyard, Massachusetts. Interested persons were invited to participate in this rulemaking process by submitting written comments on the proposal to the Federal Aviation Administration. No objections were received.

The Rule

The FAA is amending subpart F of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) by amending the description of the Martha's Vineyard Airport Control Zone.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration amends § 71.171 of Part 71 of the Federal Aviation Regulations (14 CFR of Part 71). Amend § 71.171 of Part 71 of the Federal Aviation Regulations (14 CFR of Part 71), by amending the description of the Martha's Vineyard, Massachusetts Control Zone to read as follows:

Within a 5-mile radius of Martha's Vineyard Airport (latitude 41°23'35"N, longitude 70°36'50"W); within 4.5 miles each side of the Martha's Vineyard VOR 055° radial extending from the 5-mile radius zone to 8.5 miles NE of the VOR. This control zone is effective during specific dates and times established in advance by a Notice to Airmen. The effective date and time will thereafter be continuously published in the Airport/Facility Directory.

Sections 307(a) and 313(c) of the Federal Aviation Act of 1958 (72 Stat. 749; 49 U.S.C. 1348(a) and 1354(c); Section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c) and 14 CFR 11.69).

Note.—The FAA has determined that this document involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal; and (4) will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Burlington, Massachusetts on May 21, 1981.

Robert E. Whittington,

Director, New England Region.

BILLING CODE 4910-13-M

---

14 CFR Part 71

[Airspace Docket No. 80-AEA-78]

Alteration of Airway V-213

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action establishes a low altitude airway between Robbinsville, N.J., and Solberg, N.J., VORTACs. This airway doglegs in alignment with a maximum authorized altitude (MAA) of 8,000 feet that is required to avoid delegated airspace. The traffic that now operates on this route is essentially tower en route between Atlantic City, Newark, and other satellite airports and by designating it as an airway reduces verbiage in spelling out this route, thereby, reducing the chance of a misunderstanding.

EFFECTIVE DATE: August 6, 1981.

FOR FURTHER INFORMATION CONTACT: Charles R. Horne, Airspace Regulations and Obstructions Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426-8783.

History

On March 16, 1981, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to extend Federal Airway V-213 to Sparta, N.J. VORTAC (46 FR 16899). This route, presently undefined on the charts, is used for traffic that operates in tower controlled airspace between Atlantic City, Newark, and other satellite airports. Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Except for editorial changes, this amendment is that proposed in the notice. Section 71.123 was republished on January 2, 1981 (46 FR 409).

The Rule

This amendment to Part 71 of the Federal Aviation Regulations (14 CFR Part 71) extends Federal Airway V-213 to Sparta, N.J. VORTAC via the intersection of Robbinsville 025° and Solberg, N.J., 145° magnetic radials; Solberg; direct to Sparta. This route, presently undefined on the charts, is used for traffic that operates in tower controlled airspace between Atlantic City, Newark, and other satellite airports. This action also establishes that a MAA between Robbinsville and Sparta be designated at 8,000 feet. The dogleg alignment of the extension, along with the MAA, is established to avoid delegated airspace. This action will reduce verbiage in defining the route and will help the pilots in planning their routes through the impacted area.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, § 71.123 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished and amended (46 FR 409 and 45 FR 71773) is further amended, effective 0901 GMT, August 6, 1981, by deleting under V-123 the period after "Robbinsville" and adding the words "; INT Robbinsville 015° and Solberg, N.J., 135° radials; Solberg; to Sparta, N.J. The airspace above 8,000 feet MSL between Robbinsville and Sparta is exluded."

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69)

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal.

Issued in Washington, D.C., on May 22, 1981.

B. Keith Potts,

Acting Chief, Airspace and Air Traffic Rules Division.

[FR Doc. 81-16163 Filed 5-29-81; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 71

[Airspace Docket No. 80-ARM-21]

Correction to Previously Established Transition Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment corrects the Powell, Wyoming, 700' and 1,200' transition areas. This action is necessary as a result of an error in the 1,200' transition area description as published in the final rule for Airspace Docket Number 80-ARM-21.

EFFECTIVE DATE: June 1, 1981.

FOR FURTHER INFORMATION CONTACT: David M. Laschinger, Operations, Procedures and Airspace Branch, Air Traffic Division, ARM-500, Federal Aviation Administration, Rocky Mountain Region, 10455 East 25th Avenue, Aurora, Colorado 80010; telephone (303) 340-5494.

SUPPLEMENTARY INFORMATION:

History

On Monday, January 12, 1981, the Federal Aviation Administration (FAA) published for comment (46 FR 2630) a proposal to establish a 700' and 1,200' transition area at Powell, Wyoming. The only comments received as a result of the circular expressed no objections. On Thursday, April 30, 1981, the FAA published the final rule (46 FR 24170) which established the transition area; however, there was an error in the 1,200' transition area text.

Drafting Information

The principal authors of this document are David M. Laschinger, Operations, Procedures and Airspace Branch, Air Traffic Division, and Daniel J. Peterson, Office of Regional Counsel.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended effective upon publication, as follows:

In the Powell Wyoming transition area text in line 13 delete, "latitude 44°11'00" N.," and substitute, "latitude 44°16'00" N.;" in line 22, delete "west side of V-465." and substitute, "east side of V-465."

(Sec. 307(a) Federal Aviation Act of 1958 as amended (49 U.S.C. 1348(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69)

Note.—The FAA has determined that this regulation is not a major rule under Executive Order 12291 as implemented by DOT Regulatory Policies and Procedures (44 FR 11034) since this action only involves an established body of technical requirements for which frequent and routine amendments are necessary to keep them operationally current. Also, the anticipated impact is so minimal that it does not warrant preparation of a regulatory evaluation.

Issued in Aurora, Colorado, on May 18, 1981.

F. L. Cunningham,

Acting Director.

FEDERAL TRADE COMMISSION

16 CFR Part 460

Trade Regulation Rule; Labeling and Advertising of Home Insulation

AGENCY: Federal Trade Commission.

ACTION: Extension of time in which to comment on tentative partial exemption.

SUMMARY: On March 24, 1981, the Federal Trade Commission announced that it had tentatively decided to grant an exemption to manufacturers of certain types of cellulose insulation from the requirement in § 460.5(a)(2) of its Trade Regulation Rule on labeling and advertising of home insulation [46 FR 18307]. Section 460.5(a)(2) requires that tests to determine the R-value of cellulose insulation be conducted at settled density, as determined by a specific test procedure. The partial exemption would be conditioned upon the use of a specific alternative procedure to determine settled density. The Commission has extended the time period during which it will accept written comments on the proposed exemption until June 22, 1981.

DATES: Written comments regarding the Commission's tentative decision to grant the conditional exemption will be accepted until June 22, 1981.

ADDRESSES: Written comments should be addressed to the Secretary, Federal Trade Commission, 6th and Pennsylvania Avenue, NW., Washington, D.C. 20580. All comments should be captioned: "Comment on Proposed Partial Exemption for Cellulose Manufacturers—Home Insulation Rule, FTC File No. 215-59."

FOR FURTHER INFORMATION CONTACT: Kent C. Howerton, 202-724-1514, Attorney, Division of Energy and Product Information, Bureau of Consumer Protection, Federal Trade Commission, Washington, D.C. 20580.

SUPPLEMENTARY INFORMATION: In response to a petition filed by two (2) cellulose manufacturers, the Federal Trade Commission tentatively decided to grant an exemption to manufacturers of certain types of cellulose insulation from the requirement in § 460.5(a)(2) of its home insulation Trade Regulation Rule [46 FR 18307]. Section 460.5(a)(2) requires that tests to determine the R-value of cellulose insulation be conducted at settled density, as determined by the General Services Administration's (GSA) Federal Specification HH-I-515D (June 15, 1978). The partial exemption would be conditioned upon the use of an alternative procedure to determine settled density which is incorporated as Method B, Specification 51-GP-60M (April, 1979) of the Canadian Government Specifications Board (CGSB).[1] The Canadian specification permits the calculation of settled density by adjusting a blown density result by a factor of 1.27.

In making its tentative decision to grant the exemption, the Commission considered research data collected by the National Research Council of Canada (NRCC) in developing the procedure incorporated as Method B in CGSB Specification 51-GP-60M.[2] The Commission found that the Canadian research data, and the action of the Canadian government in incorporating the factor procedure into its specification, presented a strong *prima facie* case for the accuracy of the factor procedure.[3] Therefore, the Commission also issued a temporary partial stay of the requirement that those cellulose manufacturers use the settled density test procedure which was required by GSA Specification HH-I-515D (June 15, 1978), pending a final Commission decision on the exemption petition. The stay is conditioned on the use of Method B in CGSB Specification 51-GP-60M.[4]

The Commission solicited written public comments during a thirty (30) day period, until April 23, 1981, on the

---

[1] A copy of CGSB Specification 51-GP-60M is available for public inspection as document number X-16 in FTC File No. 215-59.

[2] 46 FR 18307, 18308 (1981).

[3] *Id.*

[4] *Id.*

proposed exemption.[5] On April 23, 1981, the Commission received a request from Mr. James R. Blasius, Chairman of an American Society of Testing and Materials (ASTM)[6] task force, for an extension of sixty (60) days in which to file a written comment. Mr. Blasius' task force is in the process of rewriting GSA's Federal Specification into ASTM form, and in evaluating different settled density approaches. Mr. Blasius requests the additional time to review CGSB Method B and form a written opinion to be filed with the Commission.

Comments filed during the thirty (30) day period by various cellulose insulation manufacturers demonstrate conflicting positions concerning the proposed exemption. Particularly in light of this situation, staff believes that the views of the ASTM task force could significantly benefit the Commission in making a final decision on the proposed exemption. However, the Commission believes that any extension should be granted to all interested parties. Therefore, the Commission has granted a sixty (60) day extension, from April 23, 1981, in which all interested parties can file written comments on the proposed exemption. The extension will make all written comments due by June 22, 1981.

By direction of the Commission.

Carol M. Thomas,

Secretary.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 97

[Docket No. 21759; Amdt. No. 1191]

Standard Instrument Approach Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: An effective date for each SIAP is specified in the amendatory provisions.

ADDRESSES: Availability of matters incorporated by reference in the amendment is as follows:

For Examination—

1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue, SW., Washington, D.C. 20591;

2. The FAA Regional Office of the region in which the affected airport is located; or

3. The Flight Inspection Field Office which originated the SIAP.

For Purchase—

Individual SIAP copies may be obtained from:

1. FAA Public Information Center (APA-430), FAA Headquarters Building, 800 Independence Avenue, SW., Washington, D.C. 20591; or

2. The FAA Regional Office of the region in which the affected airport is located.

By Subscription—

Copies of all SIAPs, mailed once every 2 weeks, may be ordered from Superintendant of Documents, U.S. Government Printing Office, Washington, D.C. 20402. The annual subscription price is $135.00.

FOR FURTHER INFORMATION CONTACT: Donald K. Funai, Flight Procedures and Airspace Branch (AFO-730), Aircraft Programs Division, Office of Flight Operations, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone (202) 426-8277.

SUPPLEMENTARY INFORMATION: This amendment to Part 97 of the Federal Aviation Regulations (14 CFR Part 97) prescribes new, amended, suspended, or revoked Standard Instrument Approach Procedures (SIAPs). The complete regulatory description of each SIAP is contained in official FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. § 552(a), 1 CFR Part 51, and § 97.20 of the Federal Aviation Regulations (FARs). The applicable FAA Forms are identified as FAA Forms 8260-3, 8260-4 and 8260-5. Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the **Federal Register** expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form document is unnecessary. The provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also identifies the airport, its location, the procedure identification and the amendment number.

This amendment to Part 97 is effective on the date of publication and contains separate SIAPs which have compliance dates stated as effective dates based on related changes in the National Airspace System or the application of new or revised criteria. Some SIAP amendments may have been previously issued by the FAA in a National Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for some SIAP amendments may require making them effective in less than 30 days. For the remaining SIAPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Approach Procedures (TERPs). In developing these SIAPs, the TERPS criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs is unnecessary, impracticable, or contrary to the public interest and, where applicable, that good cause exists for making some SIAPs effective in less than 30 days.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Part 97 of the Federal Aviation Regulations (14 CFR Part 97) is amended by establishing, amending, suspending, or revoking Standard Instrument Approach Procedures, effective at 0901 G.m.t. on the dates specified, as follows:

1. By amending § 97.23 VOR-VOR/DME SIAPs identified as follows:

* * * Effective September 3, 1981

Montgomery, NY—Orange County, VOR-A, Original, cancelled

(Secs. 307, 313(a), 601, and 1110, Federal Aviation Act of 1958 (49 U.S.C. 1348, 1354(a), 1421, and 1510); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.49(b)(3))

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal; and (4) will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Washington, D.C. on May 22, 1981.

Note.—The incorporation by reference in the preceding document was approved by the Director of the Federal Register on December 31, 1980.

John S. Kern,

Chief, Aircraft Programs Division.

BILLING CODE 4910-13-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Housing—Federal Housing Commissioner

24 CFR Part 235

[Docket No. R-81-900]

Mortgage Insurance and Assistance Payments for Home Ownership and Project Rehabilitation; Change in Maximum Mortgage Amounts

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Interim rule.

SUMMARY: The Housing and Community Development Act of 1980 amends the National Housing Act in order to permit an increase in the mortgage amounts under HUD's Section 235 mortgage insurance program.

EFFECTIVE DATE: July 13, 1981.

COMMENTS DUE: July 31, 1981.

ADDRESS: Written comments should refer to the docket number and date and should be submitted to the Rules Docket Clerk, Office of the General Counsel, Room 5218, Department of Housing and Urban Development, 451 Seventh Street, S.W., Washington, D.C. 20410.

A copy of each communication will be available for public inspection during regular business hours at the above address.

FOR FURTHER INFORMATION CONTACT: John J. Coonts, Director, Single Family Development Division, Department of Housing and Urban Development, Room 9270, 451 Seventh Street, S.W., Washington, D.C. 20410 (202) 755-6720 (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: The Housing and Community Development Act of 1980 was signed into law on October 8, 1980. Revisions are being made to Chapter II of the 24 CFR to increase the maximum mortgage amount under Section 235 from $32,000 to $40,000 for a single-family dwelling unit or a one-family unit in a condominium project. In such cases where there are five or more persons requiring a minimum of four bedrooms, the maximum mortgage amount is increased from $38,000 to $47,500. In geographical areas where the Secretary finds cost levels so require, these limits may be raised up to an additional $7,500. These increased limits only apply to conditional commitments issued or preliminary reservations approved on or after the date of this rule.

The Secretary has determined that it is urgent that the benefits afforded by this provision of the Act be made available as soon as possible. Publishing a notice of proposed rulemaking and giving the public an opportunity to comment prior to the effective date of this regulation would cause a substantial delay in making the benefits available. A delay could cause unnecessary hardships to homebuyers who need to use the increased mortgage amounts which the Act provides. Therefore, the Secretary finds that notice and prior public procedure on this regulation would be contrary to the public interest. Since these regulations relieve restrictions contained in present regulations, it is necessary to accelerate the effective date as much as possible. However, an opportunity for public comment is being provided to be followed by issuance of a final rule. Accordingly, these amendments will be made effective as soon as possible.

A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulations in 24 CFR Part 50 which implement Section 102(2)(c) of the National Environmental Policy Act of 1969. The Finding of No Significant Impact is available for public inspection during regular business hours in the Office of the Rules Docket Clerk at the address set forth above.

Section 235 is listed as 14.105 Interest Reduction—Homes for Lower Income Families in the Catalog of Federal Domestic Assistance.

Pursuant to Section 605(b) of the Regulatory Flexibility Act, the Undersigned hereby certifies that this rule does not have a significant impact on a substantial number of small entities.

Accordingly, 24 CFR Part 235 is amended as follows:

1. Section 235.25 is revised to read as follows:

§ 235.25 Maximum mortgage amount.

(a) With respect to mortgages insured pursuant to conditional commitments issued or preliminary reservations approved before July 13, 1981, the mortgage shall not exceed the following:

(1) $32,000 for a single-family dwelling or a one-family unit in a condominium project, or

(2) $38,000 where a family of five or more persons requires a minimum of four bedrooms and it is found that adequate housing within the basic mortgage limits of paragraph (a)(1) is not available in the area. The property must contain four or more bedrooms complying with applicable HUD/FHA standards for bedrooms. Partially finished attic or basement space, large closets and other enclosed areas shall not be counted as bedrooms. In addition, the property must meet other applicable underwriting standards.

(b) With respect to mortgages insured pursuant to conditional commitments issued or preliminary reservations approved on or after the mortgage shall not exceed the following:

(1) $40,000 for a single-family dwelling or a one-family unit in a condominium project, or

(2) $47,500 in the case of a family with five or more persons where the conditions set forth in paragraph (a)(2) are met.

2. Section 235.30 is revised to read as follows:

§ 235.30 Increased maximum mortgage amount—high cost areas.

(a) With respect to mortgages insured pursuant to conditional commitments issued or preliminary reservations approved before July 13, 1981, located in any geographical area where the Secretary finds cost levels so require, the Secretary may increase the dollar amount limitations set forth in § 235.25(a) to an amount not to exceed the following:

(1) $38,000 for a single-family dwelling or a one-family unit in a condominium project, or

(2) $44,000 in the case of a family with five or more persons where the conditions set forth in § 235.25(a)(2) are met.

(b) With respect to mortgages insured pursuant to conditional commitments issued or preliminary reservations approved on or after July 13, 1981, located in any geographical area where the Secretary finds cost levels so require, the Secretary may increase the dollar amount limitations set forth in § 235.25(b) to an amount not to exceed the following:

(1) $47,500 for a single-family dwelling or a one-family unit in a condominium project, or

(2) $55,000 in the case of a family with five or more persons where the conditions set forth in § 235.25(a)(2) are met.

3. Section 235.330 is revised to read as follows:

§ 235.330 Cooperative unit eligible for assistance payments.

(a) With respect to mortgages insured pursuant to conditional commitments issued or preliminary reservations approved before July 13, 1981, the maximum amount of the mortgage attributed to the dwelling unit of the cooperative member shall not exceed

$32,000, except that such amount may be increased to $38,000 in the case of a family of five or more persons where the conditions set forth in § 235.25(a)(2) are met. These amounts may be increased to $38,000 and $44,000, respectively, in any geographical area where the Secretary finds cost levels so require.

(b) With respect to mortgages insured pursuant to conditional commitments issued or preliminary reservations approved on or after July 13, 1981, the maximum amount of the mortgage attributed to the dwelling unit of the cooperative member shall not exceed $40,000, except that such amount may be increased to $47,500 in the case of a family of five or more persons where the conditions set forth in § 235.25(a)(2) are met. These amounts may be increased to $47,500 and $55,000, respectively, in any geographical area where the Secretary finds cost levels so require.

(Sec. 211 of the National Housing Act (12 U.S.C. 1709, 1715))

Issued at Washington, D.C., April 22, 1981.

George O. Hipps, Jr.,

Acting Deputy Assistant Secretary for Housing—Deputy Federal Housing Commissioner.

[FR Doc. 81-16328 Filed 5-29-81; 8:45 am]

BILLING CODE 4210-01-M

DEPARTMENT OF THE TREASURY

Bureau of Alcohol, Tobacco and Firearms

27 CFR Part 4

[T.D. ATF-84; Ref.: Notice No. 359]

Labeling and Advertising of Wine (Appellation of Origin) Under the Federal Alcohol Administration Act

AGENCY: Bureau of Alcohol, Tobacco and Firearms, Treasury.

ACTION: Final rule.

SUMMARY: This final rule amends § 4.25a (b)(2) and (e)(3) of 27 CFR Part 4, Labeling and advertising of wine. The amendments require that appellation of origin that appear on foreign wines imported into the United States conform with the laws and regulations governing the composition, method of production, and designation of wines available for sale and consumption within the foreign country of origin. This action will prevent inferior foreign wines from being dumped into the American market and preclude consumer deception.

In accordance with Executive Order 12291, this final rule is not a major rule.

DATE: Effective July 1, 1981.

FOR FURTHER INFORMATION CONTACT:
Roger L. Bowling, Research and Regulations Branch, Bureau of Alcohol, Tobacco and Firearms, Washington, DC 20226, 202-566-7626.

SUPPLEMENTARY INFORMATION:

Background

On August 23, 1978, the Bureau of Alcohol, Tobacco and Firearms (ATF) published Treasury Decision ATF-53 (43 FR 37672, 54624) revising wine labeling regulations in 27 CFR Part 4. These regulations, in addition to other revisions, amended the appellation of origin regulations as they relate to American and imported foreign wines.

These regulations define an appellation of origin for imported wines as:

(1) A country;

(2) A State, province, territory, or similar political subdivisions of a country equivalent to a State or county; or

(3) A viticultural area.

The use of an appellation of origin is qualified in that the wine is entitled to bear an appellation of origin other than a viticultural area if:

(1) At least 75 percent of the wine is derived from fruit or agricultural products grown in the area indicated by the appellation of origin; and

(2) The wine conforms to the laws and regulations governing the composition, method of production, and designation of wines made in such country, province, etc., as appropriate.

A wine may be labeled with a viticultural area appellation if:

(1) At least 85 percent of the wine is derived from fruit or agricultural products grown in the area indicated by the appellation of origin, and

(2) The boundaries have been recognized and defined by the country of origin for use on labels of wine available in the foreign country of origin.

During the drafting of Treasury Decision ATF-53, sections applying to imported wines, such as vintage requirements, were further qualified so that wine could be labeled as vintage if the wine was entitled to bear a vintage date when sold within the country of origin.

However, this particular qualification was not inserted into the regulations pertaining to the use of appellations of origin. This, in effect, allows any foreign country exporting wines into the United States to label a wine with an appellation of origin that is not entitled to appear on that wine if the wine were sold within the country of origin. Furthermore, a foreign country could promulgate a separate set of regulations for wine to be exported which would not conform to the laws and regulations governing wine available in the foreign country of origin.

Therefore, in an effort to make a conforming change to the regulations, ATF published Notice No. 359 (45 FR 82275) on December 15, 1980.

Notice of Proposed Rulemaking

This notice proposed amendments to the regulations which would return the requirements for the labeling of appellations of origin of foreign wines to the status they enjoyed prior to the adoption of § 4.25a (b)(2) and (e)(3), to prevent inferior foreign wines from being dumped into the American market, and to preclude consumer deception.

ATF received five comments fully supporting the proposed amendments.

Treasury Decision

ATF is amending the wine labeling regulations governing appellations of origin on imported foreign wines.

These amendments to § 4.25a require that all appellations of origin on foreign wines imported into the United States conform with the laws and regulations governing wines available in the foreign country of origin. These amendments are adopted as proposed.

Public Inspection and Disclosure

Copies of the final rule and comments will be available for public inspection during normal business hours at: ATF Reading Room, Office of Public Affairs and Disclosure, Room 4407, 12th and Pennsylvania Avenue NW., Washington, D.C. 20226.

Drafting Information

The principal author of this document is Roger L. Bowling, Research and Regulations Branch, Bureau of Alcohol, Tobacco and Firearms. However, personnel from other offices in the Bureau participated in the preparation of this document, both in matters of substance and style.

Authority

Accordingly, under the authority contained in Section 5 of the Federal Alcohol Administration Act (49 Stat. 981, as amended; 27 U.S.C. 205), 27 CFR Part 4 is amended as follows:

PART 4—LABELING AND ADVERTISING OF WINE

Subpart D—Labeling Requirements for Wine

1. Section 4.25a is amended by qualifying paragraph (b)(2) that foreign wine labeled with an appellation of origin must be in conformity with the

laws and regulations governing wine available for consumption within the country of origin; by adding a new requirement in paragraph (e)(3) to be designated as (iii) and redesignating existing (iii) and (iv) as (iv) and (v), respectively; and a conforming change in paragraph (e)(1)(ii).

Accordingly, § 4.25a(b)(2) (i) and (ii), (e)(1)(ii), and (e)(3) are revised to read as follows:

§ 4.25a Appellations of origin (not mandatory before January 1, 1983).

(a) * * *
(b) * * *
(1) * * *

(2) *Imported Wine.* An imported wine is entitled to an appellation of origin other than a viticultural area if:

(i) At least 75 percent of the wine is derived from fruit or agricultural products grown in the area indicated by the appellation of origin; and

(ii) The wine conforms to the requirements of the foreign laws and regulations governing the composition, method of production, and designation of wines available for consumption within the country of origin.

* * * * *

(e) * * *
(1) * * *
(i) * * *

(ii) *Imported wine.* A delimited place or region (other than an appellation defined in paragraphs (a)(2) (i) or (ii)) the boundaries of which have been recognized and defined by the country of origin for use on labels of wine available for consumption within the country of origin.

(2) * * *

(3) *Requirements for Use.* A wine may be labeled with a viticultural area appellation if:

(i) The appellation has been approved under Part 9 of this title or by the appropriate foreign government;

(ii) Not less than 85 percent of the wine is derived from grapes grown within the boundaries of the viticultural area;

(iii) In the case of foreign wine, it conforms to the requirements of the foreign laws and regulations governing the composition, method of production, and designation of wines available for consumption within the country of origin;

(iv) In the case of American wine, it has been fully finished within the State, or one of the States, within which the labeled viticultural area is located (except for cellar treatment pursuant to § 4.22(c), and blending which does not result in an alteration of class and type under § 4.22(b)); and

(v) It conforms to the laws and regulations of all the States contained in the viticultural area.

Signed: April 21, 1981.

G. R. Dickerson,

Director.

Approved: May 18, 1981.

John P. Simpson,

Acting Assistant Secretary (Enforcement and Operations).

27 CFR Parts 19, 240, 245, 250, 270, and 275

[T.D. ATF-85; T.D. ATF-77]

Electronic Fund Transfer for Certain Alcohol and Tobacco Products Excise Taxpayments and Other Provisions.

AGENCY: Bureau of Alcohol, Tobacco and Firearms (ATF).

ACTION: Final rule (Treasury decision).

SUMMARY: The Department of the Treasury is delaying the effective date of Treasury Decision ATF-77 (46 FR 2999) until October 1, 1981. As part of the supplemental appropriations bill for Fiscal year 1981 for the Department of the Treasury, Congress is considering language prohibiting any expenditure to implement changes in the mode of alcohol and tobacco products excise taxpayments from those permitted by law or regulation in effect since January 1, 1981. Accordingly, no alcohol and tobacco products excise taxpayer will be required to pay the tax by electronic fund transfer until the tax return period beginning October 1, 1981.

EFFECTIVE DATE: June 1, 1981.

FOR FURTHER INFORMATION CONTACT:
Armida Stickney or James Hunt, Research and Regulations Branch, (202) 566-7626.

SUPPLEMENTARY INFORMATION: Because Treasury Decision ATF-77 (46 FR 2999) becomes effective on June 1, 1981, it is impractical and not in the public interest to issue this Treasury decision with notice and public procedures under 5 U.S.C. 553(b). Similarly, it is unnecessary and impractical to subject this Treasury decision to the effective date limitations of 5 U.S.C. 553(d).

Authority and Issuance

This Treasury decision is being issued under the authority contained in 26 U.S.C. 7805 (68A Stat. 917).

Accordingly, the effective date of Treasury Decision ATF-77 is postponed until October 1, 1981. Additionally, in 27 CFR 19.523a, paragraph (f) is removed. In 27 CFR 240.591a, paragraph (f) is removed. In 27 CFR 245.117a, paragraph (e) is removed. In 27 CFR 250.112a, paragraph (f) is removed. In 27 CFR 270.165a, paragraph (f) is removed. In 27 CFR 275.115a, paragraph (f) is removed.

Signed: May 27, 1981.

G. R. Dickerson,

Director.

Approved: May 28, 1981.

John P. Simpson,

Acting Assistant Secretary, Enforcement and Operations.

Deferral of Effective Date for Revenue Sharing Regulations

AGENCY: Office of Revenue Sharing, Treasury Department.

ACTION: Notice of deferral effective date of Revenue Sharing handicapped discrmination regulations.

SUMMARY: The effective date of the Revenue Sharing handicapped discrimination regulations, which would otherwise become effective on June 1, 1981, is deferred until June 16, 1981, pending a decision concerning the status of the regulations during the government-wide review of Section 504 pursuant to Executive Order 12291.

EFFECTIVE DATE: The regulations published at 46 FR 1120, January 5, 1981 are deferred until June 16, 1981.

FOR FURTHER INFORMATION CONTACT:
Richard S. Isen,
Acting Chief Counsel, Office of Revenue Sharing
or
Jacqueline L. Jackson, Attorney, Office of Chief Counsel, Office of Revenue Sharing, Washington, D.C. 20226, Telephone: (202) 634-5182.

SUPPLEMENTARY INFORMATION: On January 5, 1981, the Office of Revenue Sharing ("ORS") published in the **Federal Register** (46 FR 1120) final handicapped discrimination regulations, implementing Section 504 of the Rehabilitation Act of 1973, as amended, for purposes of the Revenue Sharing Program. The regulations were due to take effect on February 4, 1981. On January 29, 1981, the President issued a

memorandum entitled "Postponement of Pending Regulations," which in part required the deferral for 60 days of the effective date of any final regulation pending at the date of the memorandum. Pursuant to that memorandum, the ORS filed a notice with the **Federal Register** On February 2, 1981, which was published on February 5, 1981 (46 FR 10908), deferring the effective date of the regulations until March 30, 1981, to permit reconsideration by the new administration.

On February 19, 1981, the President issued Executive Order 12291 entitled "Federal Regulations" (46 FR 12193). The Executive Order requires Federal agencies to defer the effective dates of final regulations to permit reconsideration and to prepare a regulatory impact analysis.

On March 26, 1981, the ORS filed a notice with the **Federal Register**, which was published on March 31, 1981 (46 FR 19468), that the regulation would be further delayed for a period of 60 days. A companion notice was published in the **Federal Register** on April 3, 1981 (46 FR 20230) requesting public comment on whether to issue these regulations in interim from pending reconsideration. Comment was also requested on whether to delete § 51.55(b)(1)(ix) of the regulation which prohibits discrimination by recipient governments in the exercise of their zoning authority. The ORS received 142 comments during the comment period.

The Department is still in the process of analyzing the comments and has yet to reach a decision concerning the status of these regulations pending the reconsideration of Section 504 described above. Therefore, notice is hereby given that the effective date of § 51.55, discrimination on the basis of handicap, is deferred until June 16, 1981.

Authority

This notice is issued under the authority of the State and Local Fiscal Assistance Act of 1972, as amended (31 U.S.C. 1221 *et seq.*) and Treasury Department Order No. 224 (January 26, 1973) (33 FR 3342) as amended by Treasury Department Order No. 242 Revision No. 1, May 17, 1977.

Dated: May 29, 1981.

Kent Peterson,

Acting Director, Office of Revenue Sharing.

Robert W. Rafuse, Jr.,

Deputy Assistant Secretary (State and Local Finance).

BILLING CODE 4910-28-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 60 and 61

[A-4-FRL-1830-8]

Air Pollution; New Source Review; Delegation of Authority to the State of Tennessee

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: The amendments below institute certain address changes for reports and applications required from operators of certain sources subject to Federal regulations. EPA has delegated to the State of Tennessee authority to review new and modified sources. The delegated authority includes the review under 40 CFR Part 60 for the standards of performance for new stationary sources and review under 40 CFR Part 61 for national emission standards for hazardous air pollutants. A notice announcing the delegation of authority is published in the Notices section of this issue of the **Federal Register.** These amendments provide that all reports, requests, applications, submittals, and communications previously required for the delegated reviews will now be sent to the Division of Air Pollution Control, Tennessee Department of Public Health, 256 Capitol Hill Building, Nashville, Tennessee 37219.

EFFECTIVE DATE: April 11, 1980.

FOR FURTHER INFORMATION CONTACT: Mr. Raymond S. Gregory, Air Programs Branch, Environmental Protection Agency, Region IV, 345 Courtland Street, N.E., Atlanta, Georgia 30366, phone 404/881-3286.

SUPPLEMENTARY INFORMATION: The Regional Administrator finds good cause for foregoing prior public notice and for making this rulemaking effective immediately in that it is an adminstrative change and not one of substantive content. No additional substantive burdens are imposed on the parties affected. The delegation which is reflected by this administrative amendment was effective on April 11, 1980, and it serves no purpose to delay the technical change of this addition of the state address to the Code of Federal Regulations.

The Office of Management and Budget has exempted this regulation from the OMB review requirements of Executive Order 12291 pursuant to Section 8(b) of that order.

(Secs. 101, 110, 111, 112, 301, Clean Air Act, as amended. (42 U.S.C. 7401, 7410, 7411, 7412, 7601))

Dated: May 3, 1981.

John A. Little,

Acting Regional Administrator.

PART 60—STANDARDS OF PERFORMANCE FOR NEW STATIONARY SOURCES

Part 60 of Chapter I, Title 40, Code of Federal Regulations, is amended as follows:

In § 60.4, paragraph (b) (RR) is added as follows:

§ 60.4 Address.

* * * * *

(b) * * *

(RR) Division of Air Pollution Control, Tennessee Department of Public Health, 256 Capitol Hill Building, Nashville, Tennessee 37219

PART 61—NATIONAL EMISSION STANDARDS FOR HAZARDOUS AIR POLLUTANTS

Part 61 of Chapter I, Title 40, Code of Federal Regulations, is amended as follows:

In § 61.04, paragraph (b) (RR) is added as follows:

§ 61.04 Address.

* * * * *

(b) * * *

(RR) Division of Air Pollution Control, Tennessee Department of Public Health, 256 Capitol Hill Building, Nashville, Tennessee 37219

BILLING CODE 6560-38-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

43 CFR Part 5400

[Circular No. 2487]

Sales of Forest Products; General

AGENCY: Bureau of Land Management, Interior.

ACTION: Final rulemaking.

SUMMARY: This rulemaking amends the existing provisions for preparation of contract to require affiliates of Bureau of Land Management timber purchasers to provide certain information about exported private timber. The new provisions will safeguard against the substitution of Federal timber for exported private timber by those affiliates.

A provision to amend the definition of the term "unprocessed timber" to include western red cedar with wane

was published in the proposed rulemaking. This provision has been deleted from the final rulemaking because of a recent amendment to the Export Administration Act of 1979 (50 U.S.C. 2401 et seq.) which provides technical changes for the export of western red cedar and certain contracts for western red cedar lumber. A new definition to comply with the 1980 Act will be published as proposed rulemaking later this year.

EFFECTIVE DATE: July 1, 1981.

ADDRESS: Any suggestions or inquiries should be sent to: Director (230), Bureau of Land Management, 1800 C Street NW., Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT: Joseph C. Dose at the above address or call (202) 343–6988.

SUPPLEMENTARY INFORMATION: The principal author of this rulemaking is David Estola, Division of Forestry, assisted by the staff of the Office of Legislation and Regulatory Management, Bureau of Land Management, and the Office of the Solicitor, Department of the Interior.

The Office of Management and Budget approved the information collection requirements contained in this rule (OMB Clearance No. 1004–0058).

The proposed rulemaking was published in the **Federal Register** on December 22, 1980 (45 FR 84102) and invited comments for 60 days ending February 20, 1981. There were no comments received during this comment period. The lack of comments indicates that this rulemaking has been accepted by the public. However, one provision regarding the amendment to the definition of the term "unprocessed timber" under § 5400.0–5(k)(4) in the proposed rulemaking has been deleted from the final rulemaking. This provision prohibited the export of western red cedar lumber with wane and eliminated the export of lumber which traditionally met standard lumber grades. However, the Act of December 16, 1980 (P.L. 96–536) made technical changes in section 7(i)(1) of the Export Administration Act of 1979 to:

(1) Provide for the export of western red cedar lumber which meets standard lumber grades; and

(2) Grandfather existing contracts for western red cedar purchased from State or Federal land entered into prior to October 1979. This new provision will require a change in the definition of the term "unprocessed timber." This will be initiated by issuance of a new proposed rulemaking later this year.

The Department of Interior has determined that this document is not a major rule under Executive Order 12291 and will not have a significant economic effect on a substantial number of small entities under Public Law 96–354.

It is hereby determined that this rulemaking is not a major Federal action significantly affecting the quality of the human environment and that no detailed statement pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 (43 U.S.C. 4332(2)(C)) is required.

Under the authority of the Act of July 31, 1947, as amended (30 U.S.C. 601), Subpart 5400, Part 5400 and Subpart 5424, Part 5420, Subchapter E, Chapter II, Title 43 of the Code of Federal Regulations is amended as set forth below:

April 23, 1981.

David C. Russell,

Deputy Assistant Secretary of the Interior.

1. Subpart 5424 is amended by adding two new §§ 5424.0–5 and 5424.1, and by revising § 5424.0–6(c)(2) to read as follows:

Subpart 5424—Preparation of Contract

§ 5424.0–5 Definitions.

When used in connection with export and substitution restrictions, the following terms apply:

"Purchaser" means a business entity including but not limited to an individual, partnership, corporation or association which buys Federal timber.

"Affiliate" means a business entity including but not limited to an individual, partnership, corporation or association which controls or is controlled by a purchaser, or, along with a purchaser, is controlled by a third business entity.

§ 5424.0–6 Policy.

* * * * *

(c) * * *

(2) The use of any timber of sawlog or peeler grades sold as a substitute for timber from private lands which is exported or sold for export by the purchaser or an affiliate of the purchaser.

§ 5424.1 Reporting provisions for substitution determination.

(a) To determine whether substitution has occurred, the authorized officer may require that information identified in the contract (OMB Clearance No. 1004–0058) be reported by:

(1) A purchaser who has exported private timber within one year preceding the purchase date of Federal timber, and/or

(2) An affiliate of a timber purchaser who exported private timber within one year before the acquisition of Federal timber from the purchaser.

(b) Purchasers or affiliates of purchasers shall retain a record of Federal timber acquisitions and private timber exports for three years from the date the activity occurred.

BILLING CODE 4310-84-M

---

43 CFR Public Land Order 5683

[ORE 02948]

Oregon; Revocation of Public Land Order No. 1281

AGENCY: Bureau of Land Management, Interior.

ACTION: Public land order.

SUMMARY: This order revokes a public land order which withdrew 40.62 acres of public land for water supply protection for the City of Waldport, Oregon. This action will restore the land to operation of the public land laws generally, including the mining and mineral leasing laws.

EFFECTIVE DATE: June 23, 1981.

FOR FURTHER INFORMATION CONTACT: Champ C. Vaughan, Jr., Oregon State Office, 503–231–6905.

By virtue of the authority vested in the Secretary of the Interior by Section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, it is ordered as follows:

1. Public Land Order No. 1281 of April 5, 1956, which withdrew the following described public land for water supply protection is hereby revoked:

Willamette Meridian

T. 14 S., R. 11 W.,
Sec. 5, Lot 10.

The area described contains 40.62 acres in Lincoln County, Oregon.

2. At 10 a.m., on June 23, 1981, the above described public land will be open to operation of the public land laws generally, subject to valid existing rights, the provisions of existing withdrawals and the requirements of applicable law. All valid applications received at or prior to 10 a.m., on June 23, 1981, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

3. At 10 a.m., on June 23, 1981, the above described public land will be open to location under the United States mining laws and to applications and offers under the mineral leasing laws.

Inquiries concerning the land should be addressed to the State Director,

Bureau of Land Management, P.O. Box 2965, Portland, Oregon 97208.

Garrey E. Carruthers,

Assistant Secretary of the Interior

May 18, 1981.

BILLING CODE 4310-84-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Social Security Administration

45 CFR Part 235

Administration of Financial Assistance Programs; Correction

AGENCY: Social Security Administration HHS.

ACTION: Correction of final rule.

SUMMARY: On May 6, 1980, we published in the **Federal Register** (45 FR 29831) final regulations describing the State plan requirements and Federal matching conditions for training State and local welfare staff under the financial assistance programs administered pursuant to title I, IV–A, X, XIV, or XVI (AABD) of the Social Security Act. This regulation in § 235.62 provides that a State plan under these programs must include a training program "for persons preparing for employment." This phrase was inadvertently included and should be deleted.

FOR FURTHER INFORMATION CONTACT: Ms. Aleatha E. Slade, Social Security Administration, Office of Family Assistance, 2100 Second Street SW., Washington, D.C. 20024, Telephone (202) 245–2015.

SUPPLEMENTARY INFORMATION: Section 235.62 reads as follows: "A State plan under title I, IV–A, X, XIV, or XVI (AABD) of the act must provide for ■ training program for agency personnel and for persons preparing for employment." The phrase "and for persons preparing for employment" conflicts with the requirement under § 235.62(a) which allows the State agency the option to provide in its plan training for those persons preparing for employment who are enrolled in educational institutions. To correct this regulation, we are deleting the phrase "and for persons preparing for employment."

Dated: May 18, 1981.

Robert F. Sermier,

Deputy Assistant Secretary for Management Analysis and Systems.

In § 235.62 of Chapter II, Title 45, the introductory paragraph is revised to read as follows:

§ 235.62 State plan requirements for training programs.

A State plan under title I, IV–A, X, XIV, or XVI (AABD) of the Act must provide for a training program for agency personnel. The training program must—

BILLING CODE 4110-07-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 61

[Docket No. 21005; FCC 81-220]

Interface of the International Telex Service With the Domestic Telex and TWX Service (Detariffing of Telex Terminal Equipment Provided by International Record Carriers)

AGENCY: Federal Communications Commission.

ACTION: Decision (Second Report and Order).

SUMMARY: International record carriers are required to detariff (withdraw their schedule of charges, terms and conditions) their telex equipment offerings no later than March 1, 1982. Such equipment is not a necessary or essential component of their common carrier offerings, and not part of a common carrier service to be regulated under Title II of the Communications Act. Thus, such equipment must be offered on a non-regulated basis separable from the international record carriers' transmission services.

DATES: Effective May 7, 1981.

International record carriers are required to detariff their telex equipment offerings no later than March 1, 1982.

ADDRESS: Federal Communications Commisson, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Jill P. Ross, Tariff Division, Common Carrier Bureau, Federal Communications Commission, Washington, D.C. 20554, (202) 632–6917.

SUPPLEMENTARY INFORMATION:

Second Report and Order

Adopted: May 7, 1981.

Released: May 14, 1981.

By the Commission:

1. By *Order* released September 9, 1980, Mimeo No. 35740, the Common Carrier Bureau reactivated the pleading cycle in the Further Notice of Proposed Rulemaking in the above-captioned proceeding (45 FR 60955; September 15, 1980), seeking comments on the deregulation of telex terminal equipment provided by the international record carriers (IRCs). *Unbundling Order*, 76 F.C.C. 2d 61, *recon. den.*, 82 F.C.C. 2d 390 (1980), *appeal pending sub nom. Western Union Telegraph Co.* v. *FCC*, Docket No. 79–2494 and consolidated cases (D.C. Cir., filed December 14, 1979). In reviewing the comments filed and in considering the nature of the market for terminal equipment used in conjunction with international telex services, we conclude that our statutory mandate and the objectives of the Act would be best served by the detariffing of such equipment.

Background

2. In the *Unbundling Order, supra*, the Commission required, *inter alia*, that the IRCs file new telex tariffs unbundling the provision of terminal equipment, tielines and transmission and imposing separate cost-based charges for each element. We also set forth for comment the issue of whether we should deregulate the IRC provision of telex terminal equipment stating that this equipment did not appear to be inextricably related to transmission and did not need to be classified as a common carrier communication service. 76 F.C.C. 2d at 82. In addition, the new telex tariffs establishing separate cost-based charges for terminal equipment, tielines and transmission, were expected to enhance competition in the provision of equipment to the extent that regulatory protection for the ratepayer would be unnecessary and unduly burdensome. *Id.* We also noted that anticompetitive behavior relative to the offering of such equipment could subject an IRC to potential antitrust liability. *Id.*

3. Comments on these and other factors relevant to the resolution of this question were held in abeyance, pending a Commission decision in *Computer II*, 77 F.C.C. 2d 384, *as modified on recon.*, 84 F.C.C. 2d 50, *review pending sub nom. Computer and Communications Industry Association et al.* v. *FCC*, D.C. Cir. Nos. 80–1471 *et al.* (Lead case filed May 5, 1980). On April 7, 1980, the Commission adopted a *Final Decision* in Computer II and in so doing concluded that the provision of terminal equipment was separable from the provision of transmission services and the provision of such equipment was not, in and of itself, a common carrier activity subject to regulation under Title II of the Act. 77 F.C.C. 2d at 450–51. We determined that charges for terminal equipment offered by communications common carriers should be unbundled from charges for transmission service and that such equipment should be provided on a non-

tariffed basis.[1] See Revisions to Rule 64.702, Section (e).

4. Shortly after the release of the *Final Decision*, the instant proceeding was reactivated by Bureau *Order* released September 9, 1980, Mimeo No. 35740, requesting comments on the deregulation of telex terminal equipment provided by the IRCs. There, the Bureau expressed its view that the *Final Decision* in Computer II, requiring that all carrier-provided terminal equipment be unbundled and provided on an untariffed basis, was itself applicable to the IRC's provision of telex terminal equipment, thereby resolving the question posed in this proceeding. The Bureau further stated its belief that, even if doubt existed as to the applicability of *Computer II* to IRC telex equipment (because of statements in the *Unbundling Order* implying that such equipment would be addressed in a spearate proceeding), its determinations of law and policy suggested a similar result with respect to IRC terminal equipment.

Contentions of the Parties

5. Parties commenting on the staff's tentative conclusions include TRT Telecommunications Corporation (TRT), ITT World Communications Inc. (ITT), Western Union Telegraph Company (Western Union), Trans-Lux Corporation (Trans-Lux), FTC Communications, Inc. (FTCC), Western Union International (WUI) and RCA Global Communications, Inc. (RCA). Reply comments were filed by RCA, TRT, and ITT.

6. With the exception of WUI who opposes deregulation of carrier provided equipment as a matter of law, the commenting parties agree in principle with the deregulation of carrier provided terminal equipment. However, in noting circumstances peculiar to the international arena, several parties believe that IRC provided international telex equipment should not be deregulated as a matter of policy. Several parties also raise procedural objections to the direct application of *Computer II* to the IRC's provision of telex terminal equipment. Others maintain that the determinations of law and policy in *Computer II* lack specific considerations of factors relevant to the IRC market.

7. For example, Western Union states that, while it does not oppose, in principle, the deregulation of communications services in competitive markets, it objects to the deregulation of IRC-provided telex terminal equipment. Absent continued tariff regulation, Western Union maintains that the Commission would have no means of preventing the IRCs from reinstituting a bundled rate structure merging the costs of providing terminals and tielines into the usage charge. Even if unbundling were assured, Western Union believes that, until the Commission is willing to regulate the overall level of IRC usage charges, such charges will be excessive, permitting cross-subsidization between regulated and unregulated services. In addition, Western Union notes that the IRCs are not in the business of manufacturing terminal equipment and that they provide it solely as an incident to their transmission service, so there is no overriding public interest in assuring their ability to compete on an equal basis with other equipment suppliers. It continues by arguing that each of the three major IRCs is affiliated with equipment companies whose activities are unaffected by regulation. Western Union thereby concludes that it cannot be said that continued regulation would serve to restrict competition.

8. RCA and Trans-Lux express a similar concern that, without some limited regulation to assure that the IRCs abide by requirements for cost-based charges for international telex equipment, effective competition will not occur. ITT urges the Commission to insure that the carrier provision of terminal equipment is not being subsidized by regulated services. TRT, on the other hand, states that the Commission's ongoing investigation into the IRCs' revised telex tariffs, *ITT World Communications, Inc., et al.*, 79 FCC 2d 173 (1980), *recon. denied.*, FCC 81–164 (released April 17, 1981) as well as the competitive pressures in the international telex market, provide ample safeguards against excessive international telex transmission rates and force the IRCs to recover terminal equipment costs from terminal equipment charges. FTCC asserts that since the IRCs have unbundled as a result of previous orders and since the international telex terminal equipment market is already competitive, the Commission's major concern that failure to separate equipment costs from transmission might stifle competition, does not apply to the IRC industry.

9. On the issue of conditions for carrier provision of deregulated telex terminal equipment, Trans-Lux and FTCC argue that the Commission should maintain maximum separation between the provision of terminals by the IRCs and their provision of international transmission services through the imposition of fully separate subsidiaries. These commenters believe such safeguards are necessary to prevent cross-subsidization and add that the Commission should, at least, require that the accounts relating to terminal equipment be kept entirely separate from the other accounts of the carriers. Other carriers disagree, arguing that the international telex market is highly competitive and that the IRCs are not dominant in the terminal equipment market. In light of these factors, they argue that a separate subsidiary requirement is unwarranted.

Discussion

10. At the outset we consider the procedural questions raised by the commenting parties. As noted, several parties object to the direct application of *Computer II* arguing that international record communications were not within the intended scope of that decision and that the Commission specifically placed the issue of deregulation of IRC provided telex equipment in the instant proceeding. Others maintain that the determinations of law and policy in *Computer II* lack specific consideration of factors relevant to the IRC industry and that to apply that decision would be a violation of the IRCs' due process rights.

11. We recognize that language in the *Unbundling Order* may have created confusion as to whether the status of IRC telex equipment was still under consideration in *Computer II*. Therefore, separate consideration is being given to the IRC provision of telex terminal equipment in the instant proceeding. The Bureau's Order of September 9, 1980, specifically seeking comments on the deregulation of IRC provision of telex terminal equipment afforded interested parties sufficient opportunity to alert us to any relevant factors peculiar to the IRC industry which should be considered in this regard.

12. in the *Unbundling Order*, we require the IRCs to unbundle terminal equipment from tielines and transmission in the provision of international telex service. As a result, the IRCs must isolate investment and expenses associated with their provision of telex equipment along with their rates for such equipment. Unbundling of terminal equipment and transmission service charges increases customer freedom of choice and enables the regulator to more readily identify improper cross-subsidization of competitively provided terminal

[1] To facilitate a smooth transition, a bifurcated approach was adopted under which a separate implementation proceeding would address the manner and time period in which equipment that is not federally tariffed or in the subscriber's possession as of March 1, 1982, is to be detarrifed. 84 F.C.C. 2d at 66–7.

equipment by other regulated services. Unbundling, however, may not, in and of itself, succeed in allowing the full evolution of a competitive markeplace if the equipment of one small group of suppliers (in this case the IRCs) continues to be subject to the tariffing requirements of Section 203 of the Act. Our attention is focused on the question of whether tariff-type regulation of IRC-provided telex equipment is warranted. In considering this issue, we weigh the nature of the telex terminal equipment market, the effects of advances in technology on equipment design and use, the benefits of competitively supplied equipment, and the role of the IRCs in providing such equipment.

13. Beginning with our *Carterfone* decision, this Commission has embarked on a conscious policy of permitting the terminal equipment market to develop on a competitive basis.[2] The resulting innovation in the equipment and service markets has afforded the public a wider range of terminal equipment choices at lower costs.[3] Specifically, this policy, along with the growth and diversity in telex service, has resulted in an increased number of suppliers and a wider variety of telex machines offered in the marketplace.[4] Lacking is any evidence that significant barriers exist that serve to restrict entry into the market for equipment used in conjunction with telex service.[5] Indeed, the currently competitive nature of the telex terminal equipment market is reflected in the fact that there are at least thirty nonregulated vendors of teleprinters directly serving the market.[6] In addition, the IRCs compete among themselves with no IRC controlling a major share of the market.[7] Thus, multiple vendors offer different types of telex equipment and consumers are free to select the equipment with features that best suit their needs.

14. Advances in technology also have contributed to the competitive and dynamic nature of the telex terminal equipment market. For example, increasing use is being made of electronic as opposed to electromechanical telex and TWX terminal devices. As a result, terminal devices will be capable of taking on more on-line as well as off-line processing functions especially through the use of modern micro-processor technology. As terminal devices increasingly employ advanced solid state technology, the terminals can be merged with other processing devices to be part of distributive processing systems in keeping with the trend toward decentralized processing functions. *See Computer II* at 391, 415–16. Implicit in this is the ability to convert from one protocol to another so that information exchange can take place between diverse telecommunications systems. As a result, the boundary between the telex equipment market and the broader equipment market is beginning to erode.[8] Code, protocol and speed conversion capabilities, now becoming widely available, make a broad range of equipment compatible with the telex network. Computer technology has made it possible for TWX machines to access the telex network. Already it is technically feasible for customers to utilize other computerized word processing devices for the preparation and transmission of international telex or TWX messages. In other words, communications networks are becoming transparent with respect to different forms of data transmission. These developments have resulted in an increasing flexibility in the consumers' use and choice of terminal equipment that can be used in conjunction with IRC services and has placed increased pressure on equipment manufacturers and vendors to respond to changing conditions in the marketplace.

15. These developments bring into question whether IRC-provided telex equipment should continue to be offered as part of a common carrier service and regulated under Title II of the Act. Stated differently, the question arises as to whether there is any statutory or public interest justification for subjecting IRC-provided telex equipment to a different regulatory scheme than comparable equipment of other vendors. To answer this it is necessary to determine two things: first, whether the offering of such equipment by an IRC is essential to the continued offering of its common carrier service and, second, whether there is a statutory requirement that we regulate IRC activity in this area.

Consumers have the right to use telecommunications networks "* * * in ways which are privately beneficial without being publically detrimental" *Hush-A-Phone Corp.* v. *U.S.*, 238 F. 2d 266 (D.C. Cir. 1956)

[3] *See*, for example, *First Report in Docket No 20003*, 61 FCC 2d 766 (1976); *Second Report in Docket No. 20003*, 75 FCC 2d 461 (1980); *Phase II Final Decision and Order in Docket No. 19129*, 64 FCC 2d 1, 602; *see also, PIC, supra*, at 1175.

[4] IRC telex revenues increased by $156 million from 1974 to 1979 for an increase of 109 percent. *Statistics of Communications Common Carriers*, 1979, Federal Communications Commission. The number of international telex lines have increased by over 40 percent over the past four years. Derived from International Telecommunications Union, *Yearbook of Common Carrier Statistics*, 8th ed. (1980). In 1975, there were only seventeen vendors of teleprinters whereas in 1979 there were, at least, thirty. Compare 1975 and 1979 *Telephony's Directory and Buyer's Guide*, Telephony Publishing Co., Chicago, pages 173/A and 228 respectively. *See* also, *First Report in Docket No. 20003, supra*, at 865–67

[5] The past IRC marketing strategy of offering telex service and associated terminal equipment at a bundled price may have afforded consumers equipment at a nominal charge. This may have resulted in reducing the incentive of other vendors to market their equipment to international users However, as a result of the Commission's *Unbundling Order, supra*, requiring the IRCs to offer their equipment at unbundled rates, consumer demand for equipment provided by outside vendors will increase. Therefore, further entry into this market is likely.

[6] *Telephony's Directory and Buyer's Guide*, Telephony Publishing Co., Chicago, 1979, p. 228. We believe the relevant equipment market to be analyzed here is that of teleprinters. TWX machines, telex machines, and telephone network-connected teleprinters which comprise the teleprinter equipment market for our purposes here, are functionally equivalent devices. Larger manufacturers producing one of these machines are able to switch to the production of the other, indicating that the limits to production on the supply side between these machines are low. However, even if the telex equipment submarket is recognized as a distinct one, the IRCs provide only a small fraction of all telex machines sold in the United States. *See* note 7, *infra*.

[7] RCA, WUI and ITT, the largest IRCs, provide only a small portion of the telex equipment used in this country. It has been reported that in 1979, RCA provided 8,308 telex machines, ITT provided 6,430, WUI provided 4,980, WUI Carribean provided 401, TRT provided 385, and FTCC provided 128 for an estimated industry total of 20,632. Direct case of each above-mentioned company in *ITT World Communications Inc.*, et al., 79 FCC 2d 173. Western Union, in contrast, provided 24,887 telex machines pursuant to tariff in 1979 and billed over 73,000 telex lines and 55,000 TWX lines, implying that there are almost 130,000 telex and TWX terminals attached to its network. Table provided to Common Carrier Bureau staff on March 16, 1981, by Richard D. Cain, Director, Federal Liaison, Government Relations, Western Union Telegraph Co. Additionally, Western Union estimates that there are over 300,000 telephone network-connected teleprinters in the United States. *See* Petition for Reconsideration, CC Docket 79–252, December 24, 1980. Therefore, out of all the teleprinters in this country including telex TWX and telephone network-connected teleprinters, the IRCs provided a very small fraction of the total market.

[8] As consumers are afforded alternative means of access to IRC networks, there is a corresponding potential broadening of both the market and the types of equipment used in transmitting telex-type messages.

16. As to the former, it is clear that a subscriber to telex service need not obtain terminal equipment from an IRC. There are numerous manufacturers of such equipment in the marketplace so that consumers are able to choose the type of equipment that best suits their needs. While historically IRCs may have offered such equipment as "part and parcel" of their common carrier service, it need not be offered in this fashion and, in fact, it is clear that not all consumers elect to obtain their telex equipment from an IRC. Just as developments in the marketplace have altered perceptions of the need to offer terminal equipment as part of a common carrier service in the domestic arena, 77 FCC 2d 384, the same is true for the IRCs in the offering of their services. Whatever may have been the past practices or beliefs, it is now evident that the provision of telex equipment is not a necessary or essential component to the common carrier offering.

17. In light of this, it is incumbent upon this Commission to assess the role of the IRCs in their provision of telex equipment. In this regard, we conclude that IRCs should be allowed to compete in the terminal equipment market on terms no less favorable, or more favorable, than any other equipment vendor. Their status as common carriers should not restrict their participation as equipment providers nor should their common carrier status allow them to engage in anticompetitive conduct, e.g., through improper cross subsidization to the detriment of the communications ratepayer. This is consistent with Commission policies that have encouraged competition and increased consumer choice in the selection and utilization of equipment attached to common carrier networks, without imposing restrictions on common carriers' participation due to their control over the underlying transmission network. See *Computer II, supra.*

18. Consistent with the conclusion that the IRCs' status should be the same as that of any other equipment vendor is the need to align the manner in which they offer their equipment. IRC-provided telex equipment should be divorced from the common carrier service and detariffed. Regulation of the prices and terms under which they provide such equipment is no longer warranted in light of the equipment market as it currently exists. Continued tariff regulation serves only to restrict a competitive response to marketplace demands in an area of activity that is wholly separable from the provision and regulation of common carrier communications services under Title II of the Act.

19. We find that tariff-type regulation of IRC-provided telex terminal equipment does not recognize the role of the IRCs as competitive providers of this equipment. To continue such regulation would unduly restrict the IRCs' ability to respond competitively to price initiatives by suppliers and subject them to added costs of compliance, regulatory delay and the statutory notice requirement of publicizing prices in advance of their effectiveness. Continued tariffing, therefore, would tend to decrease competition and result in a more limited choice of equipment for consumers. Detariffing, on the other hand, would create an environment where the IRCs would compete on an equal basis with other carriers as well as unregulated equipment vendors.[9] We find that such competition will inure to the benefit of the consumer by fostering innovative design and use of telex equipment at reasonable prices.

20. Those parties arguing against detariffing appear to center their concern around both the effectiveness of unbundling terminal equipment from transmission in the international arena and Commission review of IRC transmission rates. The regulatory task inherent in insuring the reasonableness of IRC transmission rates and in separating costs associated with IRC-provided terminal equipment from transmission costs are no more onerous than those required to insure the reasonableness of other carriers' rates or that other carriers' equipment offerings are not improperly subsidized to the detriment of the communications ratepayer. Our statutory directives under Sections 201–205 of the Act mandate that we insure the reasonableness of charges, practices, classifications and regulations for common carrier services. We also have the authority under Section 205 to prescribe reasonable IRC transmission rates if they are found to be subsidizing the competitive provision of terminal equipment. The complaint process and investigatory powers under Section 208 of the Act also are available to remedy anticompetitive conduct affecting regulated services. Moreover, to the extent the IRCs become involved in the competitive provision of telex equipment, they, like all other carriers, are subject to the applicable antitrust laws. See *Cantor* v. *Detroit Edison*, 428 U.S. 579, 596 (1976).

21. We are currently investigating the rates charged by the IRCs for transmission, tielines and terminal equipment to determine whether they have been unbundled effectively.[10] This investigation will be employed as a means to identify whether transmission and tieline charges are bearing any costs associated with terminal equipment. The information obtained will also enable us to take whatever steps may be necessary to remedy any defect. Moreover, structural remedies are available as an aid in meeting our statutory responsibilities to insure the reasonableness of IRC transmission rates.[11] Finally, where appropriate, we may implement rate of return and rate base investigations directed toward examining capital structure, financing, and expenses and investment associated with the provision of service.[12]

22. We do not agree with the assertions of FTCC and Trans-Lux, that maximum separation requirements are warranted for the IRCs' provision of equipment on a non-regulated basis. The separate subsidiary mechanism will best serve consumers if imposed only where essential to insure that the objectives of the Act are achieved. We find that the costs imposed upon the IRCs and the public from maximum structural separation are not justified at this time. If evidence indicates that the communications ratepayer is subsidizing IRC-provided terminal equipment, we will consider imposing more stringent separations conditions. We shall require, however, that the IRCs maintain

[9] For example, as a result of our decision in *Computer II*, Western Union, a domestic carrier providing more telex equipment than all the IRCs combined (see note 7), may detariff new and federally tariffed equipment on or before March 1, 1982.

[10] *ITT World Communications Inc., et al.*, 79 F.C.C. 2d 173, *recon. den.*, FCC 81–164 (released April 17, 1981), *appeal pending, sub nom. Western Union Telegraph Co. v. FCC*, D.C. Cir. No. 80–2289 filed Oct. 7, 1980.

[11] *ITT et al.* v. *CCI*, 76 F.C.C. 2d 15 (1980); *International Relay, Inc.*, 77 F.C.C. 2d 819 (1980); *AT&T Dataphone*, 76 F.C.C. 2d 682 (1980), *appeal pending sub nom. Western Union International v. FCC, et al.*, (D.C. Cir. Nos. 80–1286 et al.); *IRC Dowl Service*, 76 F.C.C. 2d 166 (1980), *appeal pending sub nom. ITT World Communications* v. *FCC*, (D.C. Cir. No. 76–4049); *Telex Interconnection/Unbundling*, 76 F.C.C. 2d 61 (1980), and *Gateways*, 76 F.C.C. 2d 115 (1980), *appeal pending sub nom. Western Union Telegraph Co.* v. *FCC*, D.C. Cir. Nos. 79–2494 and consolidated cases filed December 14, 1979. Additional potential competitive pressures on the IRCs may result from various other proposals being considered. See *Overseas Communications Services* (TAT–4), FCC 80–585, released October 28, 1980; *International Telecommunications Competition*, 77 F.C.C. 2d 831 (1980); and *Aeronautical Radio, Inc.*, 77 F.C.C. 2d 535 (1980).

[12] *See*, for example, *ITT World Communications Inc.*, 82 FCC 2d 282 (1980), *stay denied*, FCC 81–77, released March 6, 1981; *action temporarily deferred pending reconsideration*, FCC 81–180, released April 14, 1981.

separate books of account for their terminal equipment offerings.

23. Accordingly, we conclude that the IRC provision of telex terminal equipment should no longer be subject to Title II regulation for the following reasons: First, advances in technology will continue to result in an ever increasing substitutability of various equipment divices for traditional telex machines. There are also numerous vendors of such equipment active in the marketplace today. Whatever the past need for regulating the IRC provision of telex equipment as part of a common carrier service its continuation is no longer warranted. Second, continued tariff regulation serves to restrict the IRCs' ability to react to the changing market in a competitive environment. The structure established here eliminates disparate regulatory treatment and encourages the provision of new and innovative equipment and participation by all vendors on a competitive basis. Finally, the potential for greater consumer choice is increased, in that detariffing of IRC provided telex equipment eliminates artificial constraints on either the design or use of such equipment.

Legal Considerations

24. While various carriers have traditionally offered transmission services and terminal equipment together on a package basis, the fact that some carriers have traditionally furnished various types of equipment with their communications services does not establish that they are required to do so. The provision of telex terminal equipment, in and of itself, is not a common carrier activity. This Commission has never regulated under Title II entities that engage solely in the manufacturing and vending of equipment located on the customer's premises and which are attached to the interstate communications network. Even as to common carriers, we have previously determined in *Computer II* that the legislative history of the Communications Act manifests no Congressional intent that terminal equipment must be offered as "part and parcel" of a communications service, or that all carrier provided equipment be offered on a regulated basis subject to the tariff requirements of Section 203 of the Act. 77 FCC at 450. Thus, the Communications Act does not require that the provision of terminal equipment be a common carrier service and tariffed under Title II. Moreover, any regulation by tariff or otherwise must be demonstrated to be reasonably ancillary to the effective performance of the Commission's responsibilities under Title II or "imperative for the achievement of an agency's ultimate purpose."[13]

25. This Commission is given "expansive powers" to appropriately tailor regulation to suit the needs of a highly complex and rapidly changing communications industry.[14] Moreover, Section 203(b)(2) grants us the authority "in (our) discretion and for good cause shown" to "modify any requirement made by or under the authority of this section either in particular instances or by general order applicable to special circumstances". Section 203(c) requires the filing of tariff schedules by carriers engaged in communications, "unless otherwise provided by or under authority of this Act", and Section 205 authorizes us to establish ". . . what classification, regulation, or practice is or will be just, fair, and reasonable. . . ." These sections provide us with flexibility to respond to the highly dynamic and changing conditions of communications services and provide us with ample authority to choose between different approaches to regulation in meeting our overall statutory mandate.

26. The terminal equipment market has changed dramatically since the 1934 Act was adopted. Consumer requirements have changed, the number of suppliers has increased and the nature of the equipment itself has undergone vast technological innovations and advancements. We have concluded that the continued provision of telex terminal equipment by the IRCs under regulation impedes the evolution of a truly competitive market and disserves the public interest by restricting the provision of innovative equipment at reasonable prices. Detariffing together with the unbundling we have previously ordered, *Unbundling Order, supra,* represent a different set of regulatory tools better designed to insure reasonable efficient communications services and a competitive marketplace for terminal equipment.

[13] *Permian Basin Area Rate Cases,* 390 U.S. 747, 780 (1968); *United States* v. *Southwestern Cable Co.,* 392 U.S. 157, 178 (1968); *Home Box Office, Inc.* v. *FCC,* 567 F.2d 9, 36 (1977).

[14] *NBC* v. *United States,* 319 U.S. 190, 219 (1943). *See also, United States v. Southwestern Cable Co.,* 392 U.S. 157, 172–173 (1968); *FCC* v. Pottsville Broadcasting Co., 309 U.S. 134, 138 (1940); *Philadelphia Television Broadcasting Co.* v. *FCC,* 123 U.S. App. D.C. 298, 300, 259 F.2d 282, 284 (1966); *NARUC* v. *FCC,* 525 F.2d 630, 638 (1976).

Implementation

27. The implementation of our decision to require that telex equipment provided by the IRCs be detariffed will require changes in existing tariffs and accounting practices similar to those required by carriers detariffing equipment pursuant to our directives in Computer II. On reconsideration of that decision, 84 FCC 2d 50 (1980), we elected to impose a bifurcated transition plan that distinguished new equipment not in the subscriber's possession as of March 1, 1982, and federally tariffed terminal equipment from "embedded" equipment which is tariffed at the state level and subject to the separations process. We found that the deregulation of new equipment and federally tariffed equipment did not raise the difficult transitional issues that the deregulation of "embedded" equipment raised regarding separations and required that such equipment be detariffed as of March 1, 1982.

28. The IRCs tariff their terminal equipment exclusively at the federal level permitting its detariffing without raising separations issues. We conclude, therefore, that, consistent with *Computer II,* this equipment should be detariffed on or before March 1, 1982.

Ordering Clauses

29. Accordingly, it is ordered, pursuant to Sections 4(i), 4(j), 201–205, 403 and 404 of the Communications Act of 1934, as amended, that the determinations set forth herein are adopted as the Second Report and Order in Docket No. 21005.

30. It is further ordered, That the international record carriers shall file appropriate tariff revisions that detariff their telex equipment offerings with such tariff revisions to be effective no later than March 1, 1982.

31. It is further ordered, That all international record carriers shall maintain separate books of accounts relating to the provision of terminal equipment.

32. It is further ordered, That the Secretary shall cause a copy of the decision to be published in the **Federal Register.**

Federal Communications Commission.

William J. Tricarico,

Secretary.

[FR Doc. 81-16320 Filed 5-29-81; 8:45 am]

BILLING CODE 6712-01-M

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

49 CFR Part 1

[OST Docket No. 1; Amend. No. 162]

Organization and Delegation of Powers and Duties; Delegation to the Commandant of the Coast Guard

AGENCY: Department of Transportation.

ACTION: Final rule.

SUMMARY: The purpose of this amendment is to delegate to the Commandant of the Coast Guard authority and functions that are vested in the Secretary of Transportation, by the Inland Navigation Rules Act of 1980.

EFFECTIVE DATE: June 1, 1981.

FOR FURTHER INFORMATION CONTACT: Ms. Lynne Adams-Whitaker, Department of Transportation Office of the General Counsel; (202) 426–4723, Washington, D.C. 20590.

SUPPLEMENTARY INFORMATION: Since this amendment relates to departmental management, procedures, and practices, it is excepted from notice and public procedure requirements and it may be made effective in fewer than thirty (30) days after publication in the Federal Register.

Drafting Information

The principal persons involved in drafting this amendment are Mr. Chris Llana, Project Manager, Office of Marine Environment and Systems, and Lt. Michael Tagg, Project Attorney, Office of Chief Counsel, U.S. Coast Guard.

Discussion of Delegation

The Inland Navigational Rules Act of 1980, Pub. L. 96–591, was enacted by Congress on December 24, 1980. It constitutes the special rules mandated in Rule 1(b) of the International Regulations for Preventing Collisions at Sea, 1972 (33 U.S.C. 1602).

The Inland Rules will replace the navigation rules for vessels operating on the Western Rivers, Inland Waters, and Great Lakes. The Act vests in the Secretary of the Department, in which the Coast Guard is operating, the power to: establish technical annexes; to issue regulations necessary to implement and interpret the Act; to assess civil penalties for violations of the Act, and to issue certificates of alternative compliance. This amendment delegates these functions to the Commandant of the Coast Guard. The authority granted herein, shall be exercised in accordance with the requirements and limitations of the above-cited Act and other applicable statutes and regulations.

Accordingly, section 1.46 of Part 1 of Title 49 of the Code of Federal Regulations, is amended as follows:

§ 1.46 [Amended]

(1) Paragraphs (c)(2), (c)(3), and (c)(4) of § 1.46 are removed.

(2) Paragraphs (c)(5) through (c)(10) are redesignated as (c)(2) through (c)(7) respectively.

(3) A new paragraph (n)(14) is added to § 1.46 to read as follows:

§ 1.46 Delegations to the United States Coast Guard Commandant.

* * * * *

(n) * * *

(14) Inland Navigational Rules Act of 1980 (Pub. L. 96–591);

* * * * *

(Sec. 9(e), Department of Transportation Act, 49 U.S.C. 1657(e))

Issued in Washington, D.C. on May 21, 1981.

Drew L. Lewis,

Secretary of Transportation.

May 21, 1981.

[FR Doc. 81-16302 Filed 5-29-81; 8:45 am]

BILLING CODE 4910-62-M

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

49 CFR Part 575

[Docket No. 79-02; Notice 3]

Consumer Information Regulations

AGENCY: National Highway Traffic Safety Administration.

ACTION: Final rule.

SUMMARY: This notice delays for one year the effective date of a revision of the Consumer Information Regulations modifying the timing of manufacturers' submissions of performance data to the National Highway Traffic Safety Administration (NHTSA). The revision, which was to become effective June 1, 1981, will require vehicle manufacturers to submit specified performance information to NHTSA at least 90 days in advance of the date the information is made available to the public. A 30 day advance submission period is presently specified. In order to permit the agency to conduct rulemaking pertaining to the new 90-day requirement, and to avoid unnecessary burdens on industry, the effective date for this change has been delayed until June 1, 1982.

EFFECTIVE DATE: The new effective date for the amendment to § 575.6(d) is June 1, 1982.

FOR FURTHER INFORMATION CONTACT: Ivy Baer, Office of Automotive Ratings, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, D.C. 20590, 202–426–1742.

SUPPLEMENTARY INFORMATION: The Consumer Information Regulations (49 CFR Part 575) require that manufacturers of motor vehicles and tires provide performance information to first purchasers and prospective purchasers of their products. The primary purpose of the regulation is to assure that consumers have adequate information on the safety performance of vehicles and tires to permit them to make informed purchasing decisions. Information required by the regulation must be available to consumers at the time the vehicles or tires to which it pertains are first authorized to be put on general public display and offered for sale. (49 CFR 575.6(c)). Section 575.6(d) of the regulation provides that the information must be submitted to NHTSA at least 30 days before it is made available to prospective purchasers. This advance submission requirement is intended to permit the agency to assemble the information from various manufacturers in a comparative format for use by prospective purchasers.

On July 14, 1980, NHTSA published a notice (45 FR 47152) amending Part 575, effective June 1, 1981, to require manufacturers to submit motor vehicle performance information to the agency at least 90 days prior to its availability to the public. The 30-day advance submission period was retained for Uniform Tire Quality Grading information required under 49 CFR 575.104 and for running changes occurring during the model year. The amendment was based on the agency's conclusion that a comparative presentation of performance data could only be effective if made available early in the model year. The additional 60 days advance notice was considered necessary to permit NHTSA to assemble and publish the information in time to be useful to most new car buyers.

Following establishment of the June 1, 1981, effective date for the schedule change, Ford Motor Company petitioned NHTSA to amend the Part 575 requirements to permit modification of previously submitted data. Ford argued that last minute, pre-introduction design or component changes are sometimes required and that these changes may affect performance characteristics covered by the consumer information

program. Absent flexibility to modify previous submissions, manufacturers would be forced to delay introduction of needed changes or disrupt production schedules until 90 days after the submission of the new information. NHTSA intends to issue a notice of proposed rulemaking dealing with this problem in the near future.

As noted in NHTSA's notice of proposed rulemaking on the timing of advance submissions (49 FR 15748; March 15, 1979), the deadline for data submissions was amended with the understanding that the agency's comparative performance data publication would be reevaluated and revised to assure that information is presented in an effective and more timely manner. As a result of delays inherent in the recent change of administrations, and the demands of other agency activities, the contemplated reevaluation and revison of NHTSA's consumer information program cannot be completed in time for the 1982 model year. For this reason, the additional 60-day advance submission required by the amendment of section 575.6(d) will serve no useful purpose with respect to information on model year 1982 vehicles. In order to avoid an unecessary burden on industry, and to permit the agency to deal with the Ford petition prior to the effective date of the schedule modification, the effective date for the amendment of 575.6(d) is changed to June 1, 1982.

The agency has considered the impacts of this limited delay and determined that this notice is neither major within the meaning of E.O. 12291, nor significant for purposes of Department of Transportation procedures for evaluation of regulatory actions. The change will ameliorate a minor regulatory burden on industry, while having no effect on the agency's ability to provide comparative performance data on model year 1982 vehicles. The impacts of this action are so minor as not to warrant preparation of a regulatory evaluation.

The agency has considered the impacts of the effective date change with regard to the Regulatory Flexibility Act and concluded that the one-year delay will not have a significant effect on a substantial number of small entities. Few, if any manufacturers submitting motor vehicle performance data under Part 575 are small businesses. Moreover, the limited nature of the change will result in only minor effects on covered businesses. The agency has also determined that this action is of such limited scope that it clearly will not have a significant effect on the quality of the human environment.

This final rule is being issued without prior notice and opportuntiy for comment because the agency finds that taking these procedural steps is impracticable and contrary to the public interest in this case. Delay in modifying the subject effective date would result in the advance submission schedule change taking effect before action on the pending Ford petition can be completed, and before agency plans for revision of the consumer information program can be implemented. Immediate action is thus necessary to avoid undue and unnecessary burdens on industry.

In consideration of the foregoing, the effective date for the amendment of 49 CFR 575.6(d), announced in the **Federal Register** on July 14, 1980, is delayed one year until June 1, 1982.

(Sec. 103, 112, 119; Pub. L. 80-563, 80 Stat. 718 (15 U.S.C. 1392, 1401, 1407); delegation of authority at 49 CFR 1.50)

Issued on May 29, 1981.

Diane K. Steed,

Acting Administrator.

[Docket No. F & V AO 201-A8]

Dried Prunes Produced in California; Recommended Decision and Opportunity To File Written Exceptions to Proposed Further Amendment of the Maketing Agreement and Marketing Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This notice invites written exceptions on the proposed amendment of the California dried prune marketing agreement and order program. The proposed amendment would eliminate the use of the smallest-sized prunes in manufactured prune products each year; change the name of the Prune Administrative Committee to the Prune Marketing Commmittee; add a public member to the Committee as full voting member; and specify the basis for sharing a portion of Committee representation among cooperative marketing associations. The intent of the proposed changes is to improve the effectiveness of the program.

DATE: Written exceptions to this recommended decision must be filed by July 1, 1981.

ADDRESSES: Interested persons may file written exceptions to this decision with the Hearing Clerk, United States Department of Agriculture, Room 1077, South Building, Washington, D.C. 20250. Two copies of all written exceptions shall be submitted, and they shall be made available for public inspection during regular business hours (7 CFR 1.27(b)).

FOR FURTHER INFORMATION CONTACT: J. S. Miller, Chief, Specialty Crops Branch, Fruit and Vegetable Division, Agricultural Marketing Service, United States Department of Agriculture, Washington, D.C. 20250, (202) 447-5697. An impact statement on this proposal is available on request from J. S. Miller.

SUPPLEMENTARY INFORMATION: Prior documents in the proceeding: Notice of Hearing—Issued November 18, 1980 and published November 24, 1980 (45 FR 77448).

This administrative action is governed by the provisions of Sections 556 and 557 of Title 5 of the United States Code, and therefore, is not subject to the requirements of Executive Order 12291.

William T. Manley, Deputy Administrator, Agricultural Marketing Service, has determined that this action will not have a significant economic impact on a substanital number of small entities because it would result in only minimal costs being incurred by the regulated handlers.

J. S. Miller has determined that a comment period of less than 60 days is warranted. The proposed amendment, if adopted, should be effective no later than August 1, 1981. Harvesting and drying of prunes usually begins by early August, and producers need to know of any continuing undersized regulation as soon as possible so they can plan their operations accordingly.

Preliminary Statement

Notice is hereby given of the filing with the Hearing Clerk of this recommended decision with resect to a proposed further amendment of the marketing agreement, and Order No. 993, regulating the handling of dried prunes produced in California, and of the opportunity to file written exceptions thereto. Copies of this decision may be obtained from the Hearing Clerk.

This notice is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the applicable rules of practice and procedure governing the formulation of marketing agreement and orders (7 CFR Part 900).

This proposed amendment was formulated on the record of a public hearing held in San Francisco, California, on December 2, 1980. The hearing notice was published in the November 24, 1980, issue of the **Federal Register** (45 FR 77448). That notice contained proposals submitted by the Prune Administrative Committee.

Material Issues

The material issues of record are as follows:

(1) Changing the definition of "salable prunes" and provisions regarding the application of salable and reserve percentages after the end of the crop year.

(2) Changing the name of the administrative agency established under the order from "Prune Administrative Committee" to "Prune Marketing Committee".

(3) Adding a public member and alternate on the Committee, establishing the qualifications for such membership, and making other changes in the Committee's procedures necessary to accommodate the addition of a public member to the Committee.

(4) Providing a means for cooperative marketing associations to share Committee representation whenever two or more such associations are engaged in the handling of prunes.

(5) Changing the current authority for regulation of undersized prunes so that annual Committee determinations and recommendations would be unnecessary, and that such regulation would be continuous, even in above parity situations.

(6) Making such changes in the order as may be necessary to bring it into conformity with any amendment that may result from the hearing.

Findings and Conclusions

The following findings and conclusions on the material issues are based on the record of hearing.

(1) Section 993.21c defines the term "salable prunes", and the provisions in § 993.55 pertain to the application of salable and reserve percentages after the end of a crop year. Under these provisions, the Secretary must establish a salable percentage of 100 percent and a reserve percentage of zero percent for a crop year even though the Committee has recommended no volume regulation for that crop year and percentages of 100 percent and zero percent were in effect for the previous crop year. This requirement causes administrative costs for no useful purpose and is inconsistent with current objectives of reducing regulatory activities and costs. The evidence of record is that establishment of salable and reserve percentages of 100 percent and zero percent is

unnecessary in those crop years following years in which no volume regulations are in effect pursuant to § 993.54.

To accomplish this, § 993.21c should be amended by deleting the words "a reserve percentage of zero is established for a crop year," and substituting in lieu thereof the words "no reserve percentage is in effect for a crop year,". Of course, any prunes determined to be undersized prunes pursuant to § 993.49(c) should continue to be excluded from the meaning of "salable" prunes. Also, § 993.55 should be revised to conform with the change in § 993.21c and to improve the wording of the last sentence. As revised, § 993.55 should provide that the salable and reserve percentages established for any crop year shall remain in effect after that crop year until salable and reserve percentages are established for another crop year. After such percentages are established, all reserve obligations shall be adjusted to the newly established percentages.

(2) The name of the local administrative agency of the order should be changed from "Prune Administrative Committee" to "Prune Marketing Committee". Changing the designation from "Administrative" to "Marketing" would identify more clearly the function of the Committee with the marketing of dried prunes, which is the purpose of the order. The change should be accomplished by substituting the word "Marketing" for "Administrative" in the introductory paragraph of § 993.24. Also, the center heading preceding § 993.24 should be revised to read "PRUNE MARKETING COMMITTEE".

(3) Another revision in § 993.24 should be the addition of a public member and alternate member to the Committee with the same voting privileges as the other 21 members. Even though Committee deliberations are open to public participation, the appointment of a "public member" who is outside the industry and represents the public's viewpoint should be beneficial to the industry. One of the advantages to the Committee would be the obtaining of the public's views on program matters such as marketing policy, grade and size regulations, pack specifications, and salable and reserve percentages. Another benefit would be the establishment of a means for maintaining a continuing dialogue between the producer and handler members of the Committee and non-industry persons.

So that the public member would be truly representative of the public and represent its views, that member should not be associated with the commercial production, processing, financing, buying, packing, or marketing of California dried prunes except as a consumer. Nor should the public member be a director, officer, or employee of any firms engaged in those activities. A public member should not have any business dealings with any handler or producer and should not receive any remuneration from a producer or handler. Thus, a banker making loans to prune producers or handlers would not qualify as a public member, but University personnel receiving grants for studies of agricultural products could serve in this capacity. This qualification should be added as a new paragraph (e) in § 993.24. Paragraph (e) should provide that the public member and alternate shall have no financial interest in the prune industry.

The evidence of record is that it is unnecessary to provide additional qualifications for a public member because the provision should be broad enough to include anyone who is outside the industry, and who is willing to regularly attend Committee meetings and become familiar with the production and marketing of dried prunes.

The eligibility requirements in § 993.27 are now applicable to producer and handler members of the Committee. These requirements should continue to apply to those members, but a sentence should be added at the end of that section stating that these eligibility requirements shall not apply to the public member and alternate member.

The current nomination procedures in § 993.28 for producer and handler members are inapplicable for the public member and alternate public member. Therefore, a new paragraph (e) should be added to that section providing that the producer and handler members of the Committee selected for a new term of office shall nominate a public member and alternate member at the first meeting following their selection. This would enable the public member and alternate public member to serve for terms which are, as a near as practicable, concurrent with the terms of office of the other members and alternate members of the Committee. Since the terms of the current membership of the Committee will not expire until May 31, 1982, the initial public member and alternate member should be nominated and selected as soon as practicable following the effective date of the amended order.

The addition of a public member would necessitate a change in the quorum requirements § 993.33. Currently, § 993.33 specifies that a quorum shall be 12 for the 21-member Committee. Adding a public member would increase the Committee's membership to 22. To maintain the current balance between the quorum requirement and total membership, as near as practicable, the number of members required for a quorum should be increased to 13. However, it is unnecessary to change the current provision that at least 8 of the quorum must be producer members and at least 4 must be handler members.

(4) Section 993.28(b) now provides that nominations of producer members to represent cooperative producers and handler members to represent cooperative handlers shall be submitted to the Secretary by cooperative marketing associations engaged in the handling of prunes before April 16 of each year in which nominations are made. However, these provisions do not provide a specific means for cooperative associations to share such nominees when there are two or more associations. To provide such a means, a new sentence should be added to § 993.28(b). That sentence should specify that the number of cooperative producer members and handler members to be nominated by each cooperative marketing association shall bear, as near as practicable, the same percentage as each cooperative marketing association's tonnage of prunes handled as first handler thereof bears to the total tonnage handled by all cooperative marketing associations as first handlers thereof during the crop year preceding the year in which the nominations are to be made.

(5) The provisions of § 993.49(c) currently authorize the Secretary to establish a size regulation with respect to undersized French and non-French prunes upon a recommendation of the Committee whenever it determines that supply conditions for a crop year warrant such regulation. Most of the prunes produced in California are French prunes. Screens having round openings $^{23}/_{32}$ of an inch in diameter are authorized for determining undersized French prunes. The screen sizes for eliminating undersize non-French prunes are $^{28}/_{32}$ of an inch in diameter. Larger openings may be prescribed pursuant to § 993.52 if supply conditions warrant removal of the additional quantities of small prunes. This authority has been included in the order since 1972 and used in four of the nine years since then.

The notice of hearing included a proposal to revise § 993.49(c) so that annual Committee determinations and recommendations relating to undersize prunes would be unnecessary, and that

the use of minimum screen sizes of 23/32 for French prunes and 28/32 for non-French prunes would be continuous. It was also proposed in the notice that authority to increase the screen sizes, when supply conditions for a crop year warrant such regulations, be retained. Thus, under the proposals at least a minimum undersized regulation would be effective for each crop year and would continue in effect irrespective of whether the estimated season average price for prunes is in excess of the parity level specified in section 2(1) of the act.

Proponents contended that this proposal would: (1) Improve the quality of the prunes going into manufactured products, like juice and concentrate, as well as the products themselves; and (2) encourage cultural practices such as fruit thinning and pruning to improve prune size.

In addition to current authority to regulate prunes in terms of minimum standards of quality or more restrictive grades or sizes, the order prohibits handlers from shipping or otherwise making final disposition of lots of French prunes for human consumption as dried prunes unless the average count of such prunes is 100 or less per pound. The same restriction applies to lots of non-French prunes unless the average count of such prunes is 40 or less per pound. Lots of French and non-French prunes in which average size counts exceed those limitations may be disposed of in prune product outlets in which the prunes lose their form and character as prunes.

Prior findings and conclusions substantiating those requirements concluded that small prunes have less sugar, possess less desirable flavor and texture, and are less mature than larger prunes. Thus, the smallness of such prunes is definitely related to quality and maturity. It is also true that the number of pits and amount of skin in a given weight of small prunes is greater than the number and amount in the same weight of larger prunes. Those prior findings and conclusions recognized that there may be some mature and meaty prunes in the smaller size categories. However, those findings also recognized that a large percentage of prunes in those categories are so low in flesh and sugar content that they are unsuitable for human consumption.

Those prior findings and conclusions also concluded that, since prunes are graded by handlers into size categories by diameter screening and not by specific gravity, small prunes that may be mature and meaty are commingled with those unsuitable for human consumption as prunes. Separating such prunes is not economically feasible. Consequently, consumers usually associate such small prunes with immaturity and inferior quality and generally consider them unacceptable for use as human food in the form of prunes.

Not only are small prunes generally unacceptable for this use, but evidence introduced at this hearing indicates that the smallest prunes in the crop are unacceptable for use in prune products as well. French prunes which pass through a 23/32-inch screen have an average count of about 160 per pound when this size screen is the first in the grading operation, as is the case in normal industry grading operations. These prunes may range in size from 148 per pound to as many as 238 per pound. Such prunes contain about 22 percent pit compared to about 16.5 percent pit in 26/32 screen size French prunes, a size more preferable for manufacturing purposes. Additionally, the sugar to acid ratio in 23/32 screen size prunes is only 27 compared to 36 for the 26/32 screen size prunes.

In taste tests conducted by the University of California in 1975–1976, juice prepared from 23/32 screen size French prunes was compared with juice prepared from 24/32 and 26/32 screen size French prunes, and with a commercially prepared juice. The juice from the 23/32 screen size prunes was least preferred and that from the 26/32 screen size was the most preferred, even over the commercially prepared juice. The test results were significant at the five percent and one percent levels, indicating that the tests were statistically valid and that they were representative of the population as a whole.

These tests indicate that prune juice made exclusively from 23/32 screen size prunes would not be an acceptable consumer item. Consequently, these prunes must be blended with larger size prunes to avoid the inferior flavor the juice or concentrate would have if made exclusively from these smaller sized prunes. Only by blending can the smaller prunes be used to make an acceptable consumer product. Further, witnesses testified that these prunes detract from, rather than improve, the quality of product in which they are used. Therefore, their use in products like juice or concentrate is not in the long term interest of the industry, especially when it is endeavoring to improve the quality of its products and expand their markets. Prune juice and concentrate represent the industry's most important manufactured prune products and utilization for such products annually accounts for approximately a third of the total marketable crop.

Undersized prunes are used primarily as a filler in prune products, and their value reflects that use. During the 1978–79 and 1979–80 crop years, no undersized regulations were in effect. In those seasons, producers received 2–9 cents per pound for 140 count and smaller standard French prunes. An undersized regulation was in effect in each of the four crop years preceding the 1978–79 crop year. The prunes removed by the undersized regulations in those years were not included in producer pricing schedules.

Opponents to the establishment of a continuing undersized regulation contend that the proposal would impose unjust financial burdens on prune producers in Santa Clara, San Benito, and Sonoma Counties, and several Counties in the southern San Joaquin Valley, because they produce large percentages of undersized prunes each year. They also contend that while the value of undersized prunes is minimal, producers should be able to market these prunes in order to recoup some of the costs incurred in harvesting and drying them.

All of the prune producing counties in California produce undersized prunes, not just the counties cited by the opponents. Data introduced at the hearing show that the percentage of undersized prunes in the prune production for any given county fluctuates from year-to-year and, for any given year, varies widely by county. Moreover, in some years, the percentages of undersized prunes for Butte, Sutter, and Yuba Counties are higher than those in other years for the Counties of Santa Clara, San Benito, Sonoma, and those in the southern San Joaquin Valley.

That an undersized regulation reduces the supply available for marketing and may inpact some counties more than others in a given crop year was recognized by evidence introduced at the 1971 hearing. That evidence served as the basis for the current authority in the order to establish an undersized regulation for a crop year. Experience with undersized regulations under the current authority also recognizes that some French prunes removed by 23/32 inch screen (and some non-French prunes removed by a 28/32 inch screen) may be usable in conjunction with larger prunes in prune products, but that it is not currently practicable to remove them from the prunes prior to drying, which are not suitable for those purposes. Thus, those who opposed a permanent undersized regulation did not

introduce any new evidence into record. They also offered no convincing evidence to dispute the adverse effects of undersized prunes on the quality of the products in which they were used. There were contentions that the use of small prunes have no material impact because they may be blended with larger ones to mask undesirable characteristics. This was refuted by the observation that no product could be improved by the addition of an inferior ingredient.

The expressed goal of the California prune industry is to improve the quality of all prunes marketed for consumption as prunes or for use in prune products, thereby improving the demand for prunes and contributing to the economic strength of the industry. It is expected that this improvement in demand would result in long-term gains to producers and that this should offset any short-term advantage that might be gained through the sale of undersized prunes for use in prune products.

In view of the foregoing, the continuing undersized regulation as proposed should be established. To accomplish this, § 993.49(c) should be revised specifying that in no crop year shall a handler receive from producers or dehydrators prunes, other than as undersized prunes, which pass freely through a round opening with a diameter as follows: For French prunes $^{23}/_{32}$ of an inch, and for non-French prunes $^{28}/_{32}$ of an inch. A proviso should immediately follow specifying that the Secretary, upon a recommendation of the Committee, may establish larger openings whenever it is determined that supply conditions for a crop year warrant such regulation. The last sentence of that paragraph should state that the quantity of undersized prunes in any lot received by a handler from a producer or dehydrator shall be determined by the inspection service and entered on the applicable inspection certificate.

Section 993.53 currently provides that the minimum standards, the minimun sizes, and the provisions of this part relating to administration shall continue in effect irrespective or whether the estimated season average price for prunes are in excess of the parity levels specified in section 2(1) of the act.

Section 2(3) of the act authorizes the Secretary to establish and maintain such minimum standards of quality and maturity and such grading and inspection requirements for certain agricultural commodities, other than milk and its products, in interstate commerce as will effectuate the orderly marketing of those commodities and be in the public interest. Consistent with the legislative history of section 2(3) of the act, minimum standards of quality are intended to keep off the market low quality, inferior products, even though prices may exceed the parity level. Such action is intended to be in the interest of consumers, as well as in the interest of producers. Any change (i.e., increase) in the size of the openings from those prescribed in § 993.49(c) would not be for the purpose of establishing a new quality-related minimum. On the basis of the record, larger openings would only be applicable when supply conditions warrant the regulation of a larger quantity of prunes as undersized prunes. Thus, any regulation prescribing openings larger than those in § 993.49(c) should not be invoked when that season price is above parity. In view of this, § 993.53 should be amended by adding the words "including the minimum undersized regulation in § 993.49(c)," immediately after the words "minimum sizes".

(b) One amendatory action included in this recommended decision required a conforming change elsewhere in the order, as amended. This was to change the subtitle preceding § 993.24 from "Prune Administrative Committee" to "Prune Marketing Committee". Such change should be incorporated in the recommended amendment of the order.

Rulings on Briefs of Interested Persons

At the end of the hearing, the Administrative Law Judge fixed January 19, 1981, as the final date for interested persons to file proposed findings and conclusions, and written arguments or briefs, based upon the evidence presented at the hearing. The Administrative Law Judge later extended the final date for filing briefs to February 17, 1981. Briefs were filed by the Prune Administrative Committee, and the law firm of Messetti and Testa on behalf of the following prune producers and handlers: Danna and Danna Inc.; Valley View Packing Company; J. and A. Freitos; Mrs. Ottomer Neischulz; Jim Thomas; W. L. and Dorothy Parnow; John I. Ramos; Lazar Fruit Company; and Carl Holmes. Eighteen prune producers filed written arguments or comments regarding the proposed amendment.

Each point included in the briefs was carefully considered, along with evidence in the record, in making the findings and reaching the conclusions contained herein. To the extent that any suggested findings or conclusions contained in any of the briefs or arguments are inconsistent with the findings and conclusions contained herein, the request to make such findings or to reach such conclusions is denied on the basis of the facts found and stated in connection with the recommended decision.

The attorney for the prune producers and handlers opposing the undersized regulation contended at the hearing and in the brief that insufficient time was allowed to adequately prepare for the hearing and requested a continuance. The Administrative Law Judge denied his request at the hearing for the following reasons:

Considerable effort was made by the Department and the Committee to bring the hearing to the attention of interested producers, handlers, and others and to give all parties enough time to prepare for the hearing. The amendatory proposal had been discussed extensively throughout the prune production area prior to the Committee's June 24, 1980, meeting. The matter was again thoroughly discussed at that meeting, during which the Committee requested the Department to hold a hearing to consider the proposed order amendment. Subsequently, the Department issued a pre-notice press release on August 13, 1980, announcing the proposed order amendment and inviting public comments on the proposals and on whether the hearing should be held. One comment was received from the Prune Bargaining Association (a price bargaining association), in support of the proposed changes.

Because there was reason to believe that the amendatory proposals could lead to a more effective marketing order, a decision was made to proceed with the issuance of a notice of a public hearing. A hearing notice was published in the **Federal Register** on November 24, 1980, in accordance with the Department's Rules of Practices and Procedure Governing Procedures To Formulate Marketing Agreements and Orders (7 CFR 900). A copy of that notice was mailed to all known producers and handlers and the Governor of the State of California. A press release concerning the proceeding was issued and made available to the media.

Prior to the time the hearing notice was issued, officials in the Department's Agricultural Marketing Service were available to help all persons, whether a proponent or an opponent. After discussions with persons opposed to change indicated the need for more preparation time, a tentative hearing time of early November 1980 was moved to December 2, 1980. It was decided that a hearing on that date would accommodate the opponent's need for more preparation time, but allow enough

time to complete the amendatory proceeding by the beginning of the 1981–82 season.

The Administrative Law Judge permitted seven opponent declarations to accompany the hearing record but refused to enter them into evidence as requested by the opponent's attorney. The Administrative Law Judge ruled that these individuals had waived their right to be heard in the proceeding because they failed to make an appearance (and thus provide an opportunity for cross examination). This decision is consistent with § 900.8 of the Department's rules.

Even though the seven declarations were not entered as evidence, a review revealed that they expressed opinions similar to those of the opponents who testified at the hearing, and hence, would not have added to the testimony of the opponents or the evidence of record.

General Findings

Upon the basis of the record, it is found that:

(1) The findings hereinafter set forth are supplementary, and in addition, to the previous findings and determinations which were made in connection with the issuance of the marketing agreement and order and each previously issued amendment thereto. Except for the finding as to the base period for parity computation and except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein, all of said prior findings and determinations are hereby ratified and affirmed;

(2) The marketing agreement and order, as amended, and as hereby proposed to be further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(3) The marketing agreement and order, as amended, and as hereby proposed to be further amended, regulate the handling of dried prunes in the production area in the same manner as, and are applicable only to persons in the respective classes of commercial and industrial activity specified in, the marketing agreement and order upon which hearings have been held;

(4) The marketing agreement and order, as amended, and as hereby proposed to be further amended, are limited in their application to the smallest regional production area which is practicable, consistently with carrying out the declared policy of the act, and the issuance of several orders applicable to subdivisions of the production area would not effectively carry out the declared policy of the act;

(5) There are no differences in the production and marketing of dried prunes produced in the production area which make necessary different terms and provisions applicable to different parts of such area; and

(6) All handling of dried prunes produced in the production area as defined in the marketing agreement and order, as amended, and as hereby proposed to be further amended, is in the current of interstate or foreign commerce or directly burdens, obstructs, or affects such commerce.

Recommended Amendment of the Marketing Agreement and Order

The following amendment of the marketing agreement and order, as amended, is recommended as the detailed means by which the foregoing conclusions may be carrier out:

1. Section 993.21 is revised to read as follows:

§ 993.21 Salable prunes.

"Salable prunes" means those prunes which are free to be handled pursuant to any salable percentage established by the Secretary pursuant to § 993.54, or, if no reserve percentage is in effect for a crop year, all prunes, excluding the quantity of undersized prunes determined pursuant to § 993.49(c), received by handlers from producers and dehydrators during that year.

2. The center heading preceding §993.24 is changed from "PRUNE ADMINISTRATIVE COMMITTEE" to "PRUNE MARKETING COMMITTEE" and § 993.24 is amended by revising the introductory paragraph, and adding a new paragraph (e), to read as follows:

§ 993.24 Establishment and membership.

A Prune Marketing Committee (herein referred to as the "Committee"), consisting of 22 members with an alternate member for each such member, is hereby established to administer the terms and provisions of this part, of whom with their respective alternates, 14 shall represent producers, 7 shall represent handlers, and 1 shall represent the public. Committee membership shall be allocated in accordance with the following grouping with the alternate positions identically allocated:

* * * * *

(e) The public member and alternate shall have no financial interest in the prune industry.

3. Section 993.27 is revised to read as follows:

§ 993.27 Eligibility.

Producer members of the Committee shall be at the time of their selection, and during their term of office, producers in the group, for which selected and if to represent a district also producers in the district for which selected, and, except for producer members representing cooperative producers, shall not be engaged in the handling of prunes either in a proprietary capacity or as a director, officer, or employee. Handler mambers of the Committee shall be handlers in the group they represent or directors, officers, or employees of such handlers These eligibility requirements shall not apply to the public member and alternate member.

4. In § 993.28 a new paragraph (e) is added to read as follows:

§ 993.28 Nominees.

* * * * *

(e) The producer and handler members of the Committee selected for a new term of office shall nominate a public member and alternate member at the first meeting following their selection.

5. Section 993.28(b) is revised to read as follows:

§ 993.28 Nominees.

* * * * *

(b) Before April 16 of each even-numbered year nominations of producer members to represent cooperative producers and handler members to represent cooperative handlers shall be submitted to the Secretary by cooperative marketing associations engaged in the handling of prunes. The number of cooperative producer members and handler members to be nominated by each cooperative marketing association shall bear, as near as practicable, the same percentage as each cooperative marketing association's tonnage of prunes handled as first handler thereof is to the total tonnage handled by all cooperative marketing associations during the preceding crop year.

* * * * *

6. Section 993.33 is revised to read as follows:

§ 993.33 Voting procedure.

Decisions of the Committee shall be by majority vote of the members present and voting and a quorum must be present: *Provided*, That decisions on marketing policy, grade or size regulations, pack specifications, salable and reserve percentages, and on any matters pertaining to the control or disposition of reserve prunes or to prune plum diversion pursuant to § 993.62, including any delegation of authority for action on such matters and any recommendation of rules and

procedures with respect to such matters, including any such decision arrived at by mail or telegram, shall require at least 14 affirmative votes. A quorum shall consist of at least 13 members of whom at least 8 must be producer members and at least 4 must be handler members. Except in case of emergency, a minimum of 5 days notice must be given with respect to any meeting of the Committee. In case of an emergency, to be determined within the discretion of the chairman of the Committee, as much notice of a meeting as is practicable in the circumstances shall be given. The Committee may vote by mail or telegram upon due notice to all members, but any proposition to be so voted upon first shall be explained accurately, fully, and identically by mail or telegram to all members. When any proposition is submitted to be voted on by such method, one dissenting vote shall prevent its adoption.

* * * * *

7. Section 993.49(c) is revised to read as follows:

§ 993.49 Incoming regulation.

* * * * *

(c) In no crop year shall a handler receive from producers or dehydrators prunes, other than as undersized prunes, which pass freely through a round opening with a diameter as follows: For French prunes 23/32 of an inch, and for non-French prunes 28/32 of an inch: *Provided*, That the Secretary upon a recommendation of the Committee, may establish larger openings whenever it is determined that supply conditions for a crop year warrant such regulation. The quantity of undersized prunes in any lot received by a handler from a producer or dehydrator shall be determined by the inspection service and entered on the applicable inspection certificate.

* * * * *

8. Section 993.53 is revised to read as follows:

§ 993.53 Above parity situations.

The minimum standards, the minimum sizes, including the minimum undersized regulation in § 993.49(c), and the provisions of this part relating to administration shall continue in effect irrespective of whether the estimated season average price for prunes is in excess of the parity level specified in section 2(1) of the act.

9. Section 993.55 is revised to read as follows:

§ 993.55 Application of salable and reserve percentages after end of crop year.

The salable and reserve percentages established for any crop year shall remain in effect after that crop year until salable and reserve percentages are established for another crop year. After such percentages are established, all reserve obligations shall be adjusted to the newly established percentages.

Signed at Washington, D.C., on May 27, 1981.

William T. Manley,

Deputy Administrator, Marketing Program Operations.

[FR Doc. 81-16279 Filed 5-29-81; 8:45 am]

BILLING CODE 3410-02-M

SMALL BUSINESS ADMINISTRATION

13 CFR Part 124

Minority Small Business and Capital Ownership Development Assistance

AGENCY: Small Business Administration.

ACTION: Proposed rule.

SUMMARY: The proposed amendment to the current regulations of the Minority Small Business and Capital Ownership Development Assistance program will implement those provisions of Pub. L. 96-481 (October 21, 1980), which require SBA to establish a fixed period of time for every participant concern to remain in the program.

DATE: Comments should be received on or before July 31, 1981.

ADDRESSES: Interested parties may submit comments on these proposed regulations to the Office of General Law, Small Business Administration, 1441 L Street, NW., Washington, D.C. 20416.

FOR FURTHER INFORMATION CONTACT: Charlie L. Dean, Chief Counsel for Special Programs (202) 653-6699.

SUPPLEMENTARY INFORMATION: Particular areas covered in the proposed amendment include:

1. Section 124.1-1(f)(1) makes clear that the newly authorized Fixed Program Participation Term is a limited period for program participation in addition to and not as a substitution for periods of program participation limited by Completion actions pursuant to subsection (d) of the regulations or Termination actions pursuant to subsection (E) of the regulations. This provision also specifies that this newly authorized Fixed Program Participation Term is a requirement for program eligibility.

2. Sections 124.1-1(f)(2) and (f)(3) specify that the Fixed Program Participation Term shall be negotiated between SBA and the participant concern and shall be set forth in the concern's business plan. This provision also establishes time limitations for concerns currently in the program to submit a Fixed Program Participation Term for negotiation with SBA.

3. Section 124.1-1(f)(4) establishes maximum periods of time for Fixed Program Participation Terms and provides for a one-time extension of such term. This provision also provides a preliminary Fixed Program Participation Term for concerns currently in the program pending negotiation of a regular Fixed Program Participation Term.

4. Section 124.1-1(f)(5) sets forth the criteria and policies which SBA will apply in negotiating Fixed Program Participation Terms for new program applicants and for concerns currently in the program applying for the necessary revision of their business plans.

5. Section 124.1-1(f)(6) provides that no Section 8(a) contracts may be awarded to a concern unless it has a Fixed Program Participation Term approved by SBA.

6. Section 124.1-1(f)(7) makes clear that the cessation of program eligibility at the conclusion of a Fixed Program Participation Term shall, in essence, be automatic, requiring no additional action by SBA and giving rise to no additional rights for the concerns. It is also emphasized that the cessation of program eligibility at the conclusion of a Fixed Program Participation Term is not subject to the Administrative Procedure Act hearing requirements of Section 8(a)(9) of the Small Business Act.

7. In establishing Fixed Program Participation Terms, the proposed regulations differentiate between concerns initially applying for program eligibility and concerns currently in the program, applying for a revision of their business plans to incorporate the required fixed terms.

For the purpose of Executive Order 12291, effective February 17, 1981, SBA hereby determines that these proposed rules, if finalized, would not constitute major rules. In addition, it is hereby certified that, for the purposes of the applicability of the requirements of sections 603 and 604 of the Regulatory Flexibility Act (Pub. L. 96-354, September 19, 1980, 5 U.S.C. 603 and 604), these proposed rules will not, if promulgated, have a significant economic impact on a substantial number of small entities. These rules govern only those firms which have been or will be admitted to participate in SBA's section 8(a) program. This number is not substantial relative to all small business firms in the United States.

Dated: May 27, 1981.

Michael Cardenas,

Administrator.

Therefore, pursuant to the authority of section 5(b)(6) of the Small Business Act (15 U.S.C. 634(b)(6)), the Small Business Administration proposes to amend Part 124 of its Regulations (13 CFR Part 124) by adding a new § 124.1–1(f) to read as follows:

§ 124.1–1 The section 8(a) program.

* * * * *

(f) *Fixed Program Participation Term.* (1) In addition to Program Completion and Program Termination, set forth in subsections (d) and (e) of this section, every program participant shall be subject to a Fixed Program Participation Term. A Fixed Program Participation Term will establish the ultimate time period during which a concern may remain in the program and the conditions thereof, regardless of whether competitiveness is reached or Program Completion action is effected.

Except as noted in this section, a concern may not be accepted or continue in the program without a Fixed Program Participation Term.

(2) This Fixed Program Participation Term shall be negotiated between SBA and each small concern which is a participant or has applied for participation in the program.

(3) The provision of the Fixed Program Participation Term, including the time limitation therefor, shall be set forth in the SBA approved business plan of the program participant.

(i) A concern currently in the program shall submit to SBA a proposed revision of its business plan, incorporating a Fixed Program Participation Term, within two months from the effective date of this section 124.1–1(f). This Fixed Program Participation Term must be established, following negotations pursuant to subsection (f)(2) herein, no later than April 21, 1982.

In negotiating this revised business plan, SBA will determine whether the concern currently in the program should be terminated, pursuant to subsection (e) of this section, completed pursuant to subsection (d) of this section, or extended subject to a Fixed Program Participation Term. A determination at this time, however, to extend a concern subject to a Fixed Program Participation Term shall not preclude SBA from initiating Program Completion action or Program Termination action at any time prior to the completion of the Fixed Program Participation Term.

(4) The maximum Fixed Program Participation Term shall be as follows. These maximum terms shall apply both to concerns applying for entry into the program and to concerns currently in the program, applying for a revision of their business plan to incorporate a Fixed Program Participation Term as required by these regulations.

For concerns whose primary business activity is classified by SBA as "service"——three years.

For concerns whose primary business activity is classified by SBA as "construction"——five years.

For concerns whose primary business activity is classified by SBA as "manufacturing"——five years.

For concerns whose primary business activity is classified by SBA in any other category——five years.

(i) Not less than one year prior to the expiration of the Fixed Program Participation Term, a concern may request SBA to review and extend its Fixed Program Participation Term for a period not to exceed the difference between the Fixed Program Participation Term established in the business plan and the maximum Fixed Program Participation Term authorized herein, plus one year. There may be no further extensions.

(ii) For concerns currently in the program applying for a revision of their business plan to incorporate a Fixed Program Participation Term, SBA may, at its option, accept these revisions upon receipt for the purpose of a preliminary Fixed Program Participation Term not to exceed one year, pending negotiation of a regular Fixed Program Participation Term as set forth herein.

(5) The criteria that SBA will use in negotiating a Fixed Program Participation Term or an extension thereof with current program participants and applicant program participants are as follows:

(i) The factors referenced in § 124.1–1(c)(4) of this regulation for determining economic disadvantage.

(ii) The number and dollar amount, and the progressively decreasing importance, of section 8(a) contract support that it is anticipated will be necessary to achieve competitiveness. In order to maximize limited program resources, SBA will emphasize business plans anticipating lesser amounts of section 8(a) contract support to reach competitiveness.

In negotiating a Fixed Program Participation Term for concerns currently in the program, SBA will consider the section 8(a) contract support previously received by the concern. An SBA determination that such previous contract support has failed to appreciably contribute toward a timely achievement of competitiveness will be a significant factor toward limiting the Fixed Program Participation Term and the conditions thereof.

(iii) The number and dollar amount and the progressively increasing importance of contract support, other than section 8(a) contract support, that it is anticipated will be necessary to achieve competitiveness. SBA will emphasize business plans having greater reliance on this non-section 8(a) contract support to reach competitiveness.

In negotiating a Fixed Program Participation Term for concerns currently participating in the program, SBA will consider the non-section 8(a) contract support previously received by the firm. An SBA determination that the concern has failed to progressively increase the importance of such non-section 8(a) contract support during its previous participation in the program will be a significant factor toward limiting the Fixed Program Participation Term and the conditions thereof.

(iv) The length of time that it is anticipated will be necessary to achieve competitiveness. In order to maximize limited program resources, SBA will emphasize program participation for those concerns closer to competitiveness.

In negotiating a Fixed Program Participation Term for concerns currently in the program, SBA will consider the length of time during which the concern has previously participated in the program. The degree to which this past participation in the program has exceeded the maximum Fixed Program Participation Terms set forth in subsection (f)(4) herein, will be a factor toward limiting the Fixed Program Participation Term and the conditions thereof.

(v) The degree to which it is anticipated that Advance Payments and Business Development Expense will be necessary to enable the concern to successfully complete section 8(a) contracts and the extent to which reliance upon such proceeds will progressively decrease in importance. In order to maximize limited SBA resources and to increase exposure to regular competitive procedures, SBA will emphasize maximum use of conventional governmental and private

resources in performing such contracts.

In negotiating a Fixed Program Participation Term for concerns currently in the program, SBA will consider the previous Advance Payments and Business Development Expense received by the concern. An SBA determination that such Advance Payments and Business Development Expense support has failed to progressively decrease in importance during its previous participation in the program will be a factor toward limiting the Fixed Program Participation Term and the conditions thereof.

(vi) The rate at which it is anticipated that a concern will decrease its reliance upon all forms of program support, especially section 8(a) contract support, in reaching competitiveness at the end of the Fixed Program Participation Term.

In negotiating a Fixed Program Participation Term for concerns currently in the program, SBA will consider the previous rate at which the concern has decreased its reliance upon program support, and correspondingly increased its reliance upon conventional governmental and private contract business. An SBA determination that the concern has failed to appreciably improve its rate of business reliance in this manner will be a factor toward limiting the Fixed Program Participation Term and the conditions thereof.

(6) No contracts pursuant to 8(a) of the Small Business Act shall be awarded to any concern unless it has received and is operating under an SBA approved Fixed Program Participation Term.

(7) Nothing in this subsection (f) shall be construed to limit SBA from initiating Termination actions, pursuant to subsection (e) above, or Completion actions, pursuant to subsection (d) above, during any Fixed Program Participation Term granted herein.

(8) Upon the conclusion of the Fixed Program Participation Term granted and/or extended herein, a concern will cease to be a program participant. This Cessation of program participation shall occur without the necessity of any additional action by SBA; also it shall not give rise to any rights, claims or prerogatives on behalf of the concern. Cessation of program participation at the conclusion of the Fixed Program Participation Term shall not be subject to the hearings or other requirements of Section 8(a)(9) of the Small Business Act (15 U.S.C. 637(a)(9)) or any implementing rules or regulations.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 81-SO-27]

Proposed Alteration of Transition Area, Campbellsville, Kentucky

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This proposed rule will alter the Campbellsville, Kentucky, Transition Area by designating an extension. A new standard instrument approach procedure has been developed for the Taylor County Airport and additional controlled airspace is required to protect aircraft executing the approach procedure.

DATE: Comments must be received on or before: July 24, 1981.

ADDRESSES: Send comments on the proposal to:

Federal Aviation Administration, Attn: Chief, Airspace and Procedures Branch, ASO-530, P.O. Box 20636, Atlanta, Georgia 30320

The official public docket will be available for examination in the Office of the Regional Counsel, Room 652, 3400 Norman Berry Drive, East Point, Georgia 30344, telephone: (404) 763-7646.

FOR FURTHER INFORMATION CONTACT: Harlen D. Phillips, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone: (404) 763-7646.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons may participate in the proposed rulemaking by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Chief, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320. All communications received on or before July 24, 1981, will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each public contact with FAA personnel concerned with this rulemaking will be filed in the public, regulatory docket.

Availability of NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Chief, Airspace and Procedures Branch (ASO-530), Air Traffic Division, P.O. Box 20636, Atlanta, Georgia 30320, or by calling (404) 763-7646. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedures.

The Proposal

The FAA is considering an amendment to Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR 71) to designate an extension to the Campbellsville, Kentucky, 700-foot Transition Area. This action will provide controlled airspace protection for aircraft executing the proposed NDB Runway 23 standard instrument approach procedure at the Taylor County Airport. The existing Arista, nonfederal, nondirectional radio beacon, located on the airport will support the approach procedure.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend Subpart G, § 71.181 (46 FR 540), of Part 71 of the Federal Aviation Regulations (14 CFR 71) as follows:

Campbellsville, Kentucky

"* * * 211° bearing * * *" is deleted, and "* * * 052° and 211° bearing * * *" is substituted, and "* * * southwest of the NBD * * *" is deleted, and "* * * northeast and southwest of the RBN * * *" is substituted therefor.

(Sec. 307(a) of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)) and Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)))

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a major rule under Executive Order 12291; (2) is not a significant rule under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal; (4) is appropriate to have a comment period of less than 45 days; and (5) at promulgation will not have a significant economic impact on a substantial

number of small entities under the criteria of the Regulatory Flexibility Act.

This proposed amendment involves only a small alteration of navigable airspace and air traffic control procedures over a limited area.

Issued in East Point, Georgia, on May 15, 1981.

George R. LaCaille,

Acting Director, Southern Region.

[FR Doc. 81-16166 Filed 5-29-81; 8:45 am]

14 CFR Part 71

[Airspace Docket No. 81-ASW-19]

Proposed Alteration of VOR Federal Airway

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to alter VOR Federal Airway V-280 between Roswell, N. Mex., and Texico, N. Mex., and would also revoke V-280S between Roswell and Texico. This action would improve flight planning, reduce chart clutter, and eliminate coordination between air traffic control centers for aircraft on V-280 in that area.

DATE: Comments must be received on or before July 1, 1981.

ADDRESSES: Send comments on the proposal in triplicate to: Director, FAA Southwest Region, Attention: Chief, Air Traffic Division, Docket No. 81-ASW-19, P.O. Box 1689, Fort Worth, Tex. 76101.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. The FAA Rules Docket is located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue SW., Washington, D.C.

An informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Lewis W. Still, Airspace Regulations and Obstructions Branch (ATT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591; telephone: (202) 426-8783.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 81-ASW-19." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue SW., Washington, D.C. 20591, or by calling (202) 426-8058. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs, should also request a copy of Advisory Circular No. 11-2 which describes the application procedure.

The Proposal

The FAA is considering an amendment to § 71.123 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to realign V-280 between Roswell, N. Mex., and Texico, N. Mex. In addition, V-280S would be revoked. This action would shorten the distance between Roswell and Texico, thereby saving fuel. The revocation of V-280S is consistent with our policy to eliminate alternate airways in support of an agreement with the International Civil Aviation Organization (ICAO). Section 71.123 under Part 71 was republished on January 2, 1981 (46 FR 409).

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend V-280 under § 71.123 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71), as republished (46 FR 409), by deleting the words "Roswell, N. Mex.; INT Roswell 063° and Texico, N. Mex., 216° radials; Texico, including a south alternate via INT Roswell 080° and Texico 216° radials;" and substituting for them the words "Roswell, N. Mex.; INT Roswell 063°T(051°M) and Texico, N. Mex., 218°T(207°M) radials; Texico;"

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65)

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal; (4) is appropriate to have a comment period of less than 45 days; and (5) at promulgation, will not have a significant effect on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Washington, D.C., on May 21, 1981.

B. Keith Potts,

Acting Chief, Airspace and Air Traffic Rules Division.

[FR Doc. 81-16162 Filed 5-29-81; 8:45 am]

[Airspace Docket No. 81-SO-24]

Proposed Alteration of Transition Area, Aiken, South Carolina

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This proposed rule will alter the Aiken, South Carolina, Transition Area by lowering the base of controlled airspace from 1,200 to 700 feet AGL between 8 and 8.5 miles around the Aiken Municipal Airport. This action will eliminate the need to redesignate an existing arrival extension or to designate further extensions.

DATE: Comments must be received on or before: July 27, 1981.

ADDRESSES: Send comments on the proposal to:
Federal Aviation Administration, Attn: Chief, Airspace and Procedures Branch, ASO-530, P.O. Box 20636, Atlanta, Georgia 30320
The official public docket will be available for examination in the Office of the Regional Counsel, Room 652, 3400 Norman Berry Drive, East Point, Georgia 30344, telephone: (404) 763-7646.

FOR FURTHER INFORMATION CONTACT:
Harlen D. Phillips, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone: (404) 763-7646.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons may participate in the proposed rulemaking by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Chief, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320. All communications received on or before July 27, 1981, will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each public contact with FAA personnel concerned with this rulemaking will be filed in the public regulatory docket.

Availability of NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Chief, Airspace and Procedures Branch (ASO-530), Air Traffic Division, P.O. Box 20636, Atlanta, Georgia 30320, or by calling (404) 763-7646. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedures

The Proposal

The FAA is considering an amendment to Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR 71) to increase the basic radius of the Aiken, South Carolina, Transition Area from 8 to 8.5 miles around the Aiken Municipal Airport. An extension is presently predicated on the 048° bearing from the Aiken (nonfederal) nondirectional radio beacon, located on the airport. The approach course of the NDB Runway 24 standard instrument approach procedure has changed to the 038° bearing. By increasing the basic radius area to 8.5 miles, all extensions based on the radio beacon would be included.

This action will (1) simplify the transition area description by deleting references to the radio beacon, (2) correct an existing deficient arrival extension, and (3) eliminate the need for future amendments resulting from NDB approach procedure changes.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend Subpart G, § 71.181 (46 FR 540), of Part 71 of the Federal Aviation Regulations (14 CFR 71) as follows:

Aiken, South Carolina

The present description is deleted and " . . . That airspace extending upward from 700 feet above the surface within an 8.5-mile radius of Aiken Municipal Airport (latitude 33°39'10"N., longitude 81°41'25"W.) . . ." is substituted therefor.

(Sec. 307(a) of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)) and Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)))

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a major rule under Executive Order 12291; (2) is not a significant rule under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal; (4) is appropriate to have a comment period of less than 45 days; and (5) at promulgation will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

This proposed amendment involves only a small alteration of navigable airspace and air trafic control procedures over a limited area.

Issued in East Point, Georgia, on May 20, 1981.

Thomas H. Protiva,

Acting Director, Southern Region.

[Airspace Docket No. 81-AWA-4]

Designation and Revocation of Area High Routes, Reporting Points, and Control Areas

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to: (a) designate an area high route from Anchorage, Alaska, to the U.S./Canadian border; (2) revoke Area High Route J997R; and (c) revoke Control Area 1310 and associated reporting points. These actions would improve air traffic control routings and flight planning for pilots, and would reduce controlled airspace not required for air traffic control purposes.

DATE: Comments must be received on or before July 1, 1981.

ADDRESS: Send comments on the proposal in triplicate to: Director, FAA Alaskan Region, Attention: Chief, Air Traffic Division, Docket No. 81-AWA-4, Federal Aviation Administration, 701 C Street, Box 14, Anchorage, Alaska, 99513.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. The FAA Rules Docket is located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue, SW., Washington, D.C.

An informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT:
John Watterson, Airspace Regulations and Obstructions Branch (ATT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426-8783.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions

presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 81-AWA-4." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue, SW., Washington, D.C. 20591, or by calling (202) 426-8058. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs, should also request a copy of Advisory Circular No. 11-2 which describes the application procedure.

The Proposal

The FAA is considering amendments to § 71.162, 71.211, 71.213, and 75.400 of Parts 71 and 75 of the Federal Aviation Regulations (14 CFR Parts 71 and 75) to: (a) revoke Control Area 1310 and amend that part of Control Area 1487 that excludes the portion within 1310, and their associated reporting points; (b) revoke J997R; and (c) designate J804R from Anchorage, Alaska, to overlie J-111 and the current Control Area 1310 route to the FRIED reporting point at the U.S./Canadian border. These actions would improve air traffic control efficiency and pilot flight planning for air traffic operating between Anchorage, Alaska, and the Continental U.S. The description of these routes and reporting points under Parts 71 and 75 were republished on January 2, 1981, (46 FR 449, 758, 760 and 848).

ICAO Considerations

As part of these proposals relate to the navigable airspace outside the United States, this notice is submitted in consonance with the International Civil Aviation Organization (ICAO) International Standards and Recommended Practices.

Applicability of International Standards and Recommended Practices by the Air Traffic Service, FAA, in areas outside domestic airspace of the United States is governed by Article 12 of, and Annex 11 to, the Convention on International Civil Aviation, which pertains to the establishment of air navigational facilities and services necessary to promoting the safe, orderly, and expeditious flow of civil air traffic. Their purpose is to ensure that civil flying on international air routes is carried out under uniform conditions designed to improve the safety and efficiency of air operations.

The International Standards and Recommended Practices in Annex 11 apply in those parts of the airspace under the jurisdiction of a contracting state, derived from ICAO, wherein air traffic services are provided and also whenever a contracting state accepts the responsibility of providing air traffic services over high seas or in airspace of undetermined sovereignty. A contracting state accepting such responsibility may apply the International Standards and Recommended Practices in a manner consistent with that adopted for airspace under its domestic jurisdiction.

In accordance with Article 3 of the Convention on International Civil Aviation, Chicago, 1944, state aircraft are exempt from the provisions of Annex 11 and its Standards and Recommended Practices. As a contracting state, the United States agreed by Article 3(d) that its state aircraft will be operated in international airspace with due regard for the safety of civil aircraft.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend §§ 71.163, 71.211, 71.213 and 75.400 of Parts 71 and 75 of the Federal Aviation Regulations (14 CFR Parts 71 and 75), as republished (46 FR 449, 758, 760, and 848) as follows:

1. § 71.163, by removing Control 1310 and by deleting from Control 1487 the words "portion within Control 1310 and the" from the last line of its description.

2. § 71.211, by removing "CARTS" "FRIED" "SHRIM" and "SNOUT" and their definitions in their entirety.

3. § 71.213, by removing "CARTS" "FRIED" and "SNOUT" and their definitions in their entirety.

4. § 75.400, by removing "J997R Anchorage, Alaska, to Annette Island, Alaska" and its description and by adding the following:

Waypoint Name, Location, and Reference Facility

J804R Anchorage, Alaska, to FRIED

Anchorage, Alaska—61°09'05" N., 150°12'16" W., Anchorage, Alaska
NOWEL—60°29'01" N., 146°38'01" W., Anchorage, Alaska
Middleton Island, Alaska—59°53'28" N., 146°20'53" W., Middleton Island, Alaska
SNOUT—57°53'28" N., 141°45'13" W., Yakutat, Alaska
EEDEN—55°54'00" N., 137°00'00" W., Biorka Island, Alaska
FRIED—54°13'20" N., 133°37'51" W., Annette Island, Alaska

(Secs. 307(a), 313(a), and 1110, Federal Aviation Act of 1958 (49 U.S.C. 1348(a), 1354(a), and 1510; Executive Order 10854 (24 FR 9565); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65)

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule"under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal; (4) is appropriate to have a comment period of less than 45 days; and (5) at promulgation, will not have a significant effect on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Washington, D.C. on May 22, 1981.

B. Keith Potts,

Acting Chief, Airspace and Air Traffic Rules Division.

14 CFR Part 75

[Airspace Docket No. 81-ASW-22]

Proposed Alteration of Jet Routes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to alter Jet Routes J–15 and J–180 between Junction, Tex., and Humble, Tex. The realignment of these jet routes would provide additional route flexibility for maneuvering departure/arrival traffice in the Humble area.

DATES: Comments must be received on or before June 1, 1981.

ADDRESSES: Send comments on the proposal in triplicate to: Director, FAA Southwest Region, Attention: Chief, Air Traffic Division, Docket No. 81–ASW–22, P.O. Box 1689, Fort Worth, Tex. 76101.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. The FAA Rules Docket is located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue, SW., Washington, D.C.

An informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Lewis W. Still, Airspace Regulations and Obstructions Branch (AAT–230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426–8783.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 81–ASW–22." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA–430, 800 Independence Avenue, SW., Washington, D.C. 20591, or by calling (202) 426–8058. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs, should also request a copy of Advisory Circular No. 11–2 which describes the application procedure.

The Proposal

The FAA is considering an amendment to § 75.100 of Part 75 of the Federal Aviation Regulations (14 CFR Part 75) to realign Jet Routes J–15 and J–180 between Junction, Tex., and Humble, Tex. The realignment would provide parallel west departure routes from the Houston area, thereby reducing departure delays and enhancing the flow of traffic and decreasing the controller workload. Section 75.100 under Part 75 was republished on January 2, 1981 (46 FR 834).

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend the descriptions of Jet Routes J–15 and J–180 under § 75.100 of Part 75 of the Federal Aviation Regulations (14 CFR Part 75), as republished (46 FR 834), as follows:

1. Jet Route No. 15 [Amended]

By deleting the words "From Humble, Tex., via INT Humble 269° and Junction, Tex., 112° radials: Junction;" and substituting for them the words "From Humble, Tex., via INT Humble 275°T(267°M) and Junction, Tex., 106°T(098°M) radials: Junction;"

2. Jet Route No. 180 [Amended]

By deleting the words "From Humble, Tex., via Daisetta, Tex.;" and substituting for them the words "From Junction, Tex., via INT Junction 112°T(104°M) and Humble, Tex., 264°T(256°M) radials; Humble; Daisetta, Tex.;"

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65)

Note.—The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal; (4) is appropriate to have a comment period of less than 45 days; and (5) at promulgation, will not have a significant effect on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Washington, D.C., on May 21, 1981.

B. Keith Potts,

Acting Chief, Airspace and Air Traffic Rules Division.

BILLING CODE 4910–13–M

CIVIL AERONAUTICS BOARD

14 CFR Part 323

[PDR–74; Docket 39632; Dated: May 14, 1981]

Airlines; Terminations, Suspensions, and Reductions of Service

AGENCY: Civil Aeronautics Board.

ACTION: Notice of proposed rulemaking.

SUMMARY: The CAB proposes to limit the requirement that a certificated airline file a 90-day notice when ending all its service to a community to situations where that airline is the last or next-to-last certificated carrier serving that community. The CAB also proposes to eliminate the requirement that airlines file a 60-day notice when ending the last nonstop or single-plane service in a foreign or domestic market. At the same time, the CAB proposes to require certificated airlines to file a 90-day notice when reducing total available capacity at a community by 25 percent or more. These actions are in response to the sunset and small community air service provisions of the Federal Aviation Act.

DATES: Comments by: July 31, 1981. Comments and other relevant information received after this date will be considered by the Board only to the extent practicable. Requests to be put on the Service List by: June 17, 1981. The Docket Section prepares the Service List and sends it to each person listed, who then serves comments on others on the list.

ADDRESSES: Twenty copies of comments should be sent to Docket 39632, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. 20428.

Individuals may submit their views as consumers without filing multiple copies. Copies may be examined in Room 711, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. 20428.

FOR FURTHER INFORMATION CONTACT: David Schaffer, Office of the General Counsel; Civil Aeronautics Board, 1825 Connecticut Avenue NW., Washington, D.C. 20428; 202–673–5442.

SUPPLEMENTARY INFORMATION: Sections 401(j) and 419 of the Federal Aviation Act require airlines to file a notice with the Board whenever they intend to terminate, suspend, or reduce air service to a community. By PR–200, 44 FR 20635, April 6, 1979, the Board added a new 14 CFR Part 323, *Terminations, Suspensions, and Reductions of Service.* This part establishes procedures for air carriers to flow in filing the notices required by sections 401(j) and 419. It sets forth the circumstances that call for the filing of a notice, how long before the intended termination or reduction of service it must be filed, whom it must be served on, and the information it must contain. Part 323 also establishes procedures for filing objections to a carrier's notice, filing answers to those objections, and notifying the Board of temporary suspensions of service due to strikes or other events beyond the carrier's control.

Under Part 323, certificated carriers must give 90 days' notice whenever they wish to terminate all service at a point, reduce air transportation there below the essential level, or terminate all cargo air transportation to a foreign country. Certificated carriers must give 60 days' notice before terminating the last nonstop or single-plane service between two points in this country, or all nonstop and single-plane service between a point in this country and a point in a foreign country. Commuter air carriers must give 30 days' notice when they wish to terminate or reduce air transportation to a community so that that point will receive less than essential air transportation. The notice must be given 90 days before the intended termination or reduction if the commuter is receiving subsidy for serving that point.

As part of the process of deregulation, some of the authority of the Board terminates on December 31, 1981. Among the authority that we lose is the power to require airlines to file most of the notices now required under section 401(j) of the Act. Section 1601(a)(1)(D) of the Federal Aviation Act states that "The authority of the Board with respect to * * * section 401(j) of this Act (except with respect to essential air transportation) * * * shall cease to be in effect on December 31, 1981." Thus beginning January 1, 1982, the Board may require notices of carriers under section 401(j) of the Act only to the extent necessary to implement the essential air service program mandated by section 419 of the Act.

In order to conform our rules to the changes in our statutory authority, and in light of our experience under the present rule, we are proposing several amendments to Part 323. Under this proposal, the 60-day notice of termination of the last nonstop or single-plane service in a market would no longer be required. The 90-day notice required of a certificated carrier when it terminates all its service to a point would be eliminated except in a few cases explained below. All notice requirements involving foreign air transportation would also be eliminated. Sections prescribing the time for filing, the contents, and the service of notices would be changed to reflect the elimination of these notices. Section 323.8, which exempts minor service from the 60-day notice requirement, would be revoked as it would no longer have any significance. Since no notices would be required for suspensions involving foreign air transportation, the notice (§ 323.14) and report (§ 323.15) required when there is an involuntary interruption of air service to a foreign country would no longer be mandatory.

The only notice requirements that would remain would be those necessary to implement the essential air service program. This program, established under section 419 of the Act, is designed to insure that the increased freedom of airlines to enter and exit markets under deregulation does not leave any community without at least essential air service.

Under this program, the Board sets essential air service levels for communities that are eligible points. Eligible points are those that were listed on an air carrier's certificate on October 24, 1978 and others that the Board designates using the criteria in 14 CFR Part 270. The Board issues essential air services determinations for eligible points if they are serviced by less than two certificated carriers. If an air carrier wanted to reduce service to an eligible point below the level that the Board determined to be essential, it would under this proposal still have to file a notice. For an eligible point where the Board has not yet issued an essential air service determination, the current requirement that a carrier file a notice if service to all hubs is being reduced to less than two flights per day, five days per week would also remain.

Continuation of these notices is authorized by the Act, and would usually insure that the Board and affected communities receive timely notice of a change in service that affects that point's essential air service. We have tentatively concluded, however, that some additional notice requirements are needed in order to carry out our responsibilities under section 419 of the Act.

Section 419(a)(2)(B) states that the Board must make an essential air service determination for an eligible point within 6 months of receiving notice that the point's air service will be reduced to service by one or no certificated air carriers. Currently, we learn of such reductions under § 323.3(a)(1) of our rules. This section requires a certificated carrier to file a notice when terminating all its service at a point. This notice must be filed regardless of how many other certificated carriers will still be serving the point. Since we are proposing to eliminate that requirement here, some other notice is needed to let us know that the 6-month period for making an essential air service determination has begun. A notice requirement in this situation would also give the Board an opportunity to determine whether the proposed service reduction reasonably appears to affect the point's essential air service. We are therefore proposing a new § 323.3(a)(1) to require the next-to-last certificated carrier to file a notice 90 days before terminating all its service at an eligible point. Service that is operated less than 5 days per week would be considered terminated. Since the purpose of this notice requirement would be primarily to notify the Board of the need to make an essential service determination, and the termination itself may not impact on the point's essential service, we request comments on whether the notice period should be shorter than 90 days.

We are also proposing to require the last certificated carrier to file a 90-day notice before terminating all its service to an eligible point, even if commuters are serving there. This would serve several functions relating to the essential service program. First, it would aid in monitoring air service levels at eligible points. The exit of the last certificated carrier is a major change in a community's air service and one that the Board should be made aware of since we are responsible for securing any needed replacement service. The notice also would tell us that we will learn of future air service changes at

that point on only 30 days' notice, the notice period typically required of uncertificated carriers. More importantly, this notice would give us an opportunity to consider the reliability of the remaining commuter air carriers. If we find them to be unreliable or incapable of providing the essential air service, we will have to order the certificated carrier to continue its service at the point until a reliable replacement is found. Finally, notice of the departure of the last certificated carrier is important to the Federal government because it might have an impact on the programs or expenditures of the Federal Aviation Administration or the Post Office.

The notices described above will be sufficient to ensure that the Board is aware of air service changes that affect essential air transportation at single-carrier eligible points. There may be instances at multi-carrier points, however, where the major carrier there terminates or significantly reduces its service without having to file a notice. Although the community might still be receiving service from two or more certificated carriers, the termination or reduction may leave a significant portion of the point's traffic totally unaccommodated. In such situations, the Board has, under 14 CFR 398.6(b)(4), made a finding of a major transitional problem and issued a transitional essential air service determination for the point. This has had the effect of forcing the incumbent carrier to continue providing some or all of the service that it proposed to terminate. To date, each time that the Board has found a transitional problem and ordered the incumbent to continue service, it has involved a reduction of available capacity at the point of at least 25 percent.

We therefore propose to require any certificated carrier seeking to make changes that will reduce the total available capacity at an eligible point by 25 percent or more within a 90-day period to file a 90-day notice with the Board. This would give us an opportunity to review the air service needs of the community and decide whether a major transitional problem exists there. Only certificated carriers would have to file this notice. In determining whether its termination would reduce available capacity by more than 25 percent, the carrier should consider only flights to hubs. The carrier may count the available seats on both certificated and commuter carriers in deciding whether its action will cause a 25-percent reduction. Carriers could not evade this notice requirement by instituting a phased reduction in service of more than 25 percent over a short period of time.

In all, these changes would reduce the current reporting burden on carriers under Part 323 by about 75 percent. At the same time, we would retain our ability to monitor essential air service at eligible points.

Although we are proposing to eliminate all 60-day notices involving foreign air transportation, we still want to know when a carrier is terminating all its nonstop and single-plane service in a foreign market. Currently, under 14 CFR Part 231 air carriers must file schedule changes with the Board. Three copies of the new schedule page and a summary sheet describing all additions and changes to their schedule must be submitted. These provide the Board with the necessary notice without causing a delay in the implementation of the schedule change. No additional filing requirements are needed.

The reduction in the notice requirements proposed here will mean that many flights could be cancelled with little or no notice to the communities affected. This could cause problems for people who hold reservations on those flights. To avoid any hardship, we would expect carriers to contact all passengers holding reservations on the cancelled flights to inform them of the flight cancellation and to attempt to arrange alternate transportation. Failure to do so may be viewed as an unfair or deceptive practice, in violation of section 411 of the Act.

We propose that the amendments described above take effect on January 1, 1982, when our statutory authority changes. We request comments on whether some, particularly the elimination of the notices involving foreign air transportation, should become effective earlier.

The Regulatory Flexibility Act, Pub. L. 96-354, took effect on January 1, 1981. The Act is designed to ensure that agencies consider flexible approaches to the regulation of small businesses and other small entities. It requires agencies to analyze the need, objectives, legal basis, and alternatives, for rules that if adopted will have a "significant economic impact on a substantial number of small entities." This rule would leave the notice requirements for commuters unchanged, so it will not have a significant economic impact on small carriers. Their obligations under Part 323 are already less than those of the larger certificated carriers. The rule may have a significant economic impact on small communities that are eligible points (about 550). They will no longer receive advance notice of some air service reductions. They will, however, continue to receive notice of the most important reductions, those that affect essential air services.

The need, objectives, and legal basis for this rule are described above. Possible alternatives would be continuing the present notice requirements or further reducing them. Our statutory authority to adopt the first alternative is questionable. The second alternative would make it difficult if not impossible to monitor and maintain essential air service at small communities as required by section 419 of the Act. The proposed rule would not impose any additional reporting requirements on small air carriers or small communities and would not duplicate, overlap, or conflict with other Federal rules.

Accordingly, the Civil Aeronautics Board proposes to amend 14 CFR Part 323, *Terminations, Suspensions, and Reductions of Service*, as follows:

1. The table of contents would be amended by removing § 323.8 and by adding at the end a new § 323.18, *Carriers' obligations when terminating, suspending, or reducing air service.*

2. The definition of "certificated carrier" in § 323.2 would be revised to read:

§ 323.2 Definitions.

* * * * *

"Certificated carrier" means a direct air carrier holding a certificate of public convenience and necessity issued by the Board under section 401 of the Act, authorizing scheduled route service.

* * * * *

3. In § 323.3 paragraphs (a) introductory text, (a)(1) through (a)(3), (a)(4) introductory text, and (a)(5) would be revised and paragraph (b) would be removed and reserved so that the section would read:

§ 323.3 Who shall file notices.

(a) *Terminations, suspensions, or reductions by certificated carriers.* The notice described in § 323.4(a) shall be filed by any certificated carrier that intends to:

(1) Terminate or suspend all passenger air transportation that it is providing to any eligible point in the United States when that termination or suspension will leave one or no certificated carriers serving that point. Service shall be considered to be terminated or suspended whenever it is operated less than 5 days per week;

(2) Reduce passenger air transportation so that any eligible point receives less than the level of essential

air transportation determined by the Board;

(3) Reduce passenger air transportation to any eligible point for which the Board has not determined the level of essential air transportation, other than a point in Alaska, so that there is no FAA-designated hub from which the point receives at least two round trip flights per day, 5 days per week;

(4) Reduce passenger air transportation to any eligible point in Alaska for which the Board has not determined the level of essential air transportation so that the service between that point and every other point served by a certificated carrier is either—

* * * * *

(5) Terminate, suspend, or reduce passenger air transportation so that the total available seats of all the carriers linking the eligible point to all FAA-designated hubs will be reduced by 25 percent or more during a 90-day period. Service to a hub shall be considered to be terminated or suspended whenever it is operated less than 5 days per week, with three or more intermediate stops, or in one direction only between the two points.

(b) [Reserved]

* * * * *

§ 323.4 [Amended]

4. In § 323.4, *contents of notices,* paragraph (b) would be removed and reserved.

5. Section 323.5 would be revised to read:

§ 323.5 Time for filing notices.

A notice required by § 323.3 shall be filed at least—

(a) 90 days before the intended termination, suspension, or reduction, if it is filed by a certificated carrier or by an uncertificated carrier receiving compensation under section 419 of the Act for service to the point;

(b) 30 days before the intended termination, suspension, or reduction, if it is filed by an uncertificated carrier not receiving compensation under section 419 of the Act for service to the point.

6. In § 323.6, paragraph (b) would be revised and paragraph (c) would be removed and reserved so that the section reads:

§ 323.6 General requirements for notices.

* * * * *

(b) Each notice filed under this part shall be titled to indicate the point(s) involved, and to indicate whether it is a 30- or 90-day notice and whether it involves a termination, suspension, or a reduction of air transportation.

7. In § 323.7, paragraph (a) introductory text and (a)(1) would be revised and paragraphs (a)(2) and (b) would be removed and reserved so that it reads:

§ 323.7 Service of notices.

(a) A copy of each notice required by § 323.3 shall be served upon:

(1) The chief executive of the principal city or other unit of local government at the affected point. The principal city is the one named, or previously named, in the section 401 certificate by virtue of which the point qualifies as an eligible point. For points in Alaska or Hawaii that are designated by the Board as eligible points without having been listed on a section 401 certificate, the principal city is the most populous municipality at the point.

(2) [Reserved]

* * * * *

(b) [Reserved]

* * * * *

§ 323.8 [Reserved]

8. Section 323.8, *Exemption from 60-day notice for minor service,* would be removed and reserved.

§ 323.10 [Amended]

9. § 323.10, *Time for filing objections,* paragraph (a)(2) would be removed and reserved.

§ 323.12 [Amended]

10. In § 323.12, *General requirements for objections and answers,* paragraph (c) would be removed and reserved.

11. In § 323.14, paragraph (d) would be revised to read:

§ 323.14 Temporary suspension authority for involuntary interruption of service.

* * * * *

(d) The notice required by paragraph (b) or (c) of this section shall be marked for the attention of the Director, Bureau of Domestic Aviation.

12. In § 323.15, paragraph (b) would be revised to read:

§ 323.15 Report to be filed after strikes.

* * * * *

(b) The report shall be marked for the attention of the Director, Bureau of Domestic Aviation.

13. Section 323.16 would be revised to read:

§ 323.16 Listings in schedule publications.

Each air carrier filing a notice under paragraphs (a)(2), (a)(3), (a)(4), (a)(5), or (c) of § 323.3 shall continue to list the affected flights in all generally-distributed schedule publications in which the flight was listed before the notice. The listings shall continue until the Board permits the flights to be discontinued. The listings may include a notice stating that the flights are "to be discontinued as of (date) subject to government approval."

14. A new § 323.18 would be added to read:

§ 323.18 Carrier's obligations when terminating, suspending, or reducing air service.

Any air carrier that terminates, suspends, or reduces air service, whether or not subject to the notice requirements of this part, shall make reasonable efforts to contact all passengers holding reservations on the affected flights to inform them of the flight's cancellation.

(Secs. 204, 401, 407, 411, 419, and 1601, P.L. 85-726, as amended, 72 Stat. 743, 754, 766, 769, 92 Stat. 1732, 1744; 49 U.S.C. 1324, 1371, 1377, 1381, 1389, 1551)

By the Civil Aeronautics Board.

Phyllis T. Kaylor,

Secretary.

14 CFR Part 399

[PSDR-72; Docket 39635; Dated May 14, 1981]

Standard Foreign Fare Level Methodology; Statements of General Policy

AGENCY: Civil Aeronautics Board.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: The CAB is seeking comments on its present Standard Foreign Fare Level (SFFL) methodology The SFFL provides a cost pass-through mechanism that keeps Board fare policy in tune with current cost trends. While the current procedure has been workable and effective, the Board believes that it can be improved.

DATES: Comments by: July 10, 1981.
Reply comments by: July 30, 1981.

Comments and other relevant information received after these dates will be considered by the Board only to the extent practicable.

Requests to be put on the Service List by: June 10, 1981.

The Docket Section prepares the Service List and sends it to each person listed, who then serves comments on the others on the list.

ADDRESSES: Twenty copies of comments should be sent to Docket 39635, Civil Aeronautics Board, 1825 Connecticut Avenue, N.W., Washington, D.C. 20428. Individuals may submit their views as consumers without filing multiple

copies. Comments may be examined in Room 711, Civil Aeronautics Board, 1825 Connecticut Avenue, N.W., Washington, D.C. 20428 as soon as they are received.

FOR FURTHER INFORMATION CONTACT: Julien R. Schrenk, Chief, Domestic Fares and Rates Division, Civil Aeronautics Board, 1825 Connecticut Avenue, N.W., Washington, D.C. 20428; 202–673–5298.

SUPPLEMENTARY INFORMATION:

Background

The International Air Transportation Competition Act (IATCA)[1] requires that the Board establish a Standard Foreign Fare Level (SFFL) and adjust it periodically by percentage changes in actual operating costs per available seat-mile (ASM). The SFFL thus computed forms the benchmark for measuring a no-suspend zone: the Board may not suspend, except in exceptional circumstances, an international fare that is less than 5 percent above and 50 percent below the SFFL, unless it is unjustly discriminatory or a foreign government has unreasonably rejected U.S. carrier fare proposals. With few exceptions, the SFFL system reflects cost escalation over fares approved for effectiveness on or after October 1, 1979. In essence, Congress presumed such fares to be just and reasonable.[2] Consequently, the SFFL calculations measure inflation from October 1, 1979, to the midpoint of the latest projection period for the three international ratemaking entities for which carriers report separate data to the Board: Atlantic, Latin America, and Pacific.

In order to fulfill the intent of Congress that the SFFL reflect the most current costs, we revise the SFFL using short-term projections every two months. In addition, for those carriers preferring greater stability in rate levels, alternative SFFL levels are computed based on four month projections. Thus, the most recently published four month levels are effective February 1, 1981 through May 31, 1981. From time to time, the Board has expanded the no-suspend zones beyond the Congressionally ordained minima to reflect changed circumstances in the industry and new information.[3] Even these expanded regulatory zones, however, use the SFFL as a benchmark. Our approvals of IATA fare agreements have been conditioned on adherence to SFFL regulatory ceilings.[4] The SFFL calculation is, therefore, a crucial component of board international fare policy.

We believe our current methodology is reasonable, but would like to refine it where possible and ensure that it stands on the soundest economic footing. We are, therefore, conducting this inquiry in order to solicit comments from carriers and other interested parties on the issues involved. The comments received, in combination with other information already available, should provide the basis for an additional notice where specific solutions to identified problems will be proposed. We should emphasize that this docket is intended only for examination of the SFFL escalator methodology, and not the Board's fare flexibility policies. The latter, as we noted in Order 81–1–119, are under continuous review and will continue to be dealt with in separate dockets.

Discussion

Basically, our current SFFL methodology, like its domestic SIFL counterpart, projects the most recent cost trends, through linear extrapolation, to the midpoint of the period in which the fare benchmark will be in effect. The IATCA permits the Board to consider reasonable estimates of future costs in the SFFL. Due to the significant differences between the rates of escalation of fuel and other costs, fuel and nonfuel costs are broken out separately.

In general, we strive to use the most objective historical data in all calculations, both to minimize the need for judgment and to reduce the possibility of data manipulation. We have tried to minimize the need for judgment in order to maximize the speed with which these periodic calculations can be issued. The tradeoff between speed and the possible increase in accuracy which increased reliance on judgement might permit is fundamental to the SFFL system, and is at the core of this proceeding.

While we expect the parties to take advantage of this opportunity to comment upon the entire SFFL methodology and to offer concrete and practical suggestions, we have identified a number of areas where specific comment is requested.

I. Method of Fuel Cost Projection

One of the most problematic areas of the present SFFL adjustment procedure is the use of linear extrapolations for fuel cost projections. These are based on the latest available monthly data (Schedule P–12(a), Form 41) submitted by the carriers.[5] We also receive weekly reports of fuel prices paid, which are calculated less formally. It is now all too plain that the price of jet fuel can fluctuate violently. While recent trends have generally been upward, the rates of increase have varied greatly.

With our present system of using the average escalation for the most recent four-month period, unadjusted, and projecting it forward, a substantial change in the price of fuel may not be reflected in a SFFL adjustment until several months after it occurs.

Substantial anomalies have resulted from this method. If fuel costs have been stable, a relatively small SFFL upward adjustment may be issued, just before the stability bursts and prices escalate rapidly. Conversely, if prices have been rising substantially, a high rate of increase may be projected into the future, even as prices stabilize. The result is then an overstated SFFL which may even have to be reduced at the next periodic adjustment if stability continues. The system does have the virtue of being partially self-correcting, particularly when SFFL excesses and shortfalls fall randomly over seasonal variations in fuel usage.

We have used more subjective estimation techniques when weekly price reports indicated that a substantial shift in rates of increase is imminent. In two SFFL orders,[6] these techniques increased the SFFL escalation over what it would otherwise have been. Most recently, the application of judgment led to a small decrease in the escalators.[7] We are troubled by such *ad hoc* adjustments, however. First, there are the obvious disadvantages of predicting such an inherently speculative item as future jet fuel prices. Such predictions inevitably contain a degree of arbitrariness, and there is no way for the Board to seek public comment given the pertinent time constraints. Second, if such adjustments are to be permitted as a matter of policy, the questions of how and when to make them remain.

We specifically request public comment on:

1. The advantages and disadvantages of current linear extrapolations.

2. Whether there is a fully objective methodology available that would avoid the anomalies caused by the current method.

3. Whether increasing the number of months which go into the estimation base, *e.g.*, from the current four to six,

would adequately smooth out fluctuations.

4. The proper use of weekly fuel reports.

5. The uses of data and forecasts from sources other than the Board, *e.g.*, the Department of Energy.

6. When and how to make subjective determinations of fuel costs.

II. Nonfuel Costs

Total nonfuel costs, adjusted to exclude nonpassenger costs on a revenue offset basis,[8] are also estimated through linear extrapolation. We generally project, to the midpoint of the rate period, the escalation shown by a comparison of costs for the most recent 12-month period with the previous 12-month period. Because nonfuel costs have escalated more uniformly and less rapidly than fuel costs, this method, we believe, has proved less troublesome. However, the use of the annual data has been criticized from time to time, when carriers believed inflation was accelerating and thought a comparison of year-over-year quarterly data (*e.g.*, 3rd quarter 1980 over 3rd quarter 1979) would give more accurate results.

Because the SFFL is intended to minimize regulatory lag, the Board, in preparing the SFFL, has calculated it on both a quarterly and annual basis for comparison purposes. In the absence of compelling reasons to do otherwise, we have a strong policy of relying on the annual data. Quarterly data can be completely distorted because of strikes, major groundings, significant changes in cost allocations, or even the weather. Longer annual periods tend to even out such distortions.

In principle, as long as we rely on reported data, the best indication of current inflation would seemingly be calculated by comparing costs per available seat-mile for the most recently reported quarter with the 3-month period preceding, *e.g.*, 4th quarter 1980 over 3rd quarter 1980. However, the airline industry is highly seasonal, adding an additional and overriding obstacle to the difficulties of using quarterly data described above. The challenge of isolating a pure inflation component out of a consecutive quarter change in costs per ASM (i.e., correcting for seasonal changes in capacity and the weather) is significant.

We request the public to comment on:

1. Whether quarterly data used in either of the above described ways can be normalized and adjusted sufficiently to make it acceptable.

2. Whether the Board has the legal authority to adjust quarterly data given the strictures against "adjustments to costs actually incurred" contained in section 1002(j)(9) of the Act.

3. Assuming normalizations are necessary and possible, will they require such judgment that each SFFL calculation will be delayed and controversial.

4. Whether sources of data and projections other than carrier official reports to the Board, such as indices prepared by the Bureau of Labor Statistics, the Department of Commerce or other government agencies, could be usefully employed to improve the estimation process.

III. Capital Costs

By statutory definition,[9] the SFFL deals with changes in "operating cost per available seatmile." The Board has always treated interest accruals as a nonoperating expense and they are, therefore, not explicitly considered in the SFFL calculations. The noninterest component of capital costs, the return on equity, is not reported to the Board as a cost *per se* and plays no role in the SFFL. In essence, the return on investment reflected in the SFFL is that permitted by the base fares approved for effectiveness on or after October 1, 1979.

Return on investment is one of the most difficult areas in any cost based price regulation. Certainly, capital costs do change, and are a fully legitimate cost of business. Prior to introduction of the SFFL system, the Board's deliberations on international fare filings did include consideration of interest expense. On the other hand, reported interest costs can vary because of factors wholly unrelated to changes in investiment costs. Changes in capital structure can have a particularly important effect. When we included reported interest costs in a trail SFFL calculation during mid-1980, the escalations decreased, despite the widely held assumption that the cost of capital had increased since Octover 1979. Congress' use of the term "operating cost", with full knowledge of the existing regulatory definition, suggests to us that it did not intend that the capital cost measurement problem become an SFFL problem as well. Also, we have considered changes in captal costs on a judgmental basis in our fare flexibility policies.

Notwithstanding these considerations, the Board would consider adding an interest cost component into the SFFL calculations if it were shown that this was necessary and workable. The public is also invited to comment specifically on whether explicit recognition of interest costs would comport with the statutory definition.

To some extent, carrier investment is recouped through depreciation accruals. The depreciation expense represented in the SFFL is reported on the carriers' financial reports. This account represents "book depreciation" or any method acceptable to the U.S. Internal Revenue Service. Because our SFFL methodology measures cost changes, rather than absolute levels of cost, our primary concern is that depreciation be treated consistently over time, rather than in the merits of particular depreciation methods.

We do recognize, however, that no accounting treatment of depreciation is likely to portray fully depreciation as it would be defined by an economist, especially during periods of substantial inflation and technological change. Changes in the relationship between book depreciation and economic depreciation are, at best, difficult to quantify. While an enlightened fare policy should reflect such changes to same extent, it appears that the best place to do so may lie in the area of fare flexibility. Moreover, to a substantial extent, the problems of depreciation measurement and capital costs, discussed below, are linked both theoretically and practically. Depreciation reserves which do not accurately reflect costs of acquiring replacement capacity distort capital costs. While we must presume, with Congress, that the October 1, 1979 SFFL base reflects these considerations, we would be interested in comments on practical ways to reduce our dependence on historical depreciation figures. It should be recognized, however, that the well developed and highly efficient used aircraft market frequently allows carriers to sell used aircraft at prices well above book value. This reduces the cost of captal and any suggestion as to revising the methodology should certainly account for this.

IV. Property and Mail Offset

As noted above, property and mail revenues are offset in SFFL against total operating expense. Essentially, this "revenue offset" method assumes that no profit is made on these services. As long as the profitability of cargo and mail services remains relatively

[8] In the revenue offset method, cargo, mail, and charter costs are assumed to be equal to the revenues reported for these services. These and certain other miscellaneous cost items are then subtracted from total costs. See *Cost Methodology—Version 6 Updated, Civil Aeronautics Board (February 1980).*

[9] Section 1002(j)(9) of the Act.

constant, this method is quite accurate: the base and comparison periods, if distorted at all, will be affected in an offsetting manner. On the other hand, a substantial change in profitability could lead to a small under- or over-statement of passenger cost escalation.

We specifically request comments on:

1. The desirability of the revenue offset method as opposed to the refined joint costing method for passenger and cargo costs.

2. Whether the involved carriers could simply report their property and mail expenses, including depreciation, separately.

3. Whether the necessary change in reporting requirements which would be necessary for separate data would be cost effective.

It should be noted that the Board, in PSDR–65, 45 FR 3595, January 18, 1980, proposed to establish a Standard Foreign Rate Level (SFRL) that would permit international cargo rates to be adjusted up or down within a specified zone reflecting the carriers' reported cargo operating costs.

V. Trans-border Operations

Applying the SFFL to fares to and from Canada and Mexico has been particularly difficult. Indeed, the carriers report costs on U.S.-Canada operations as part of the U.S. entity and these costs are not reflected at all in the SFFL calculations. Local service carriers and United Air Lines report U.S.-Mexico costs as part of the U.S. entity, while trunk carriers in general report them together with Latin-American operations. Also, operations to and from Mexico are more heavily dominated by domestic U.S. costs than Latin American operations in general. As a result, trans-border fares have frequently been analyzed using the Standard Industry Fare Level (SIFL), though it is clearly the SFFL that delineates the Board's jurisdiction. The problem could become acute as the Board's domestic rate authority terminates in 1982, after which there will likely be no SIFL.

One solution would be to create new ratemaking entities. These might be justified, notwithstanding the additional reporting burden on carriers, given the large amount of trans-border traffic. Alternatively, we might continue to use the Latin America SFFL for jurisdictional purposes and determine a fare flexibility policy using cost studies of trans-border operations prepared specifically by carriers for our review.

The public is invited to comment on these possibilities and any other solutions that appear workable, with particular emphasis on the costs and benefits of creating separate ratemaking entities for Canada and Mexico.

VI. Foreign Air Carriers

The Board's staff has met informally with a number of foreign air carriers and IATA to discuss whether and how the costs of foreign flag carriers could be reflected in the SFFL. The statute permits us to consider such costs to the extent feasible and reasonable. The principal problems have been: (1) many foreign flag carriers do not wish to report their costs in the detail required for the SFFL calculations; (2) foreign flag carriers report in diverse formats, of which many are not compatible with the CAB Form 41 on which the SFFL is based; (3) the waiting periods required for foreign flag carriers' reports would substantially delay SFFL calculations; (4) foreign flag carriers' reports are rarely verifiable; and (5) the ubiquitous problem of foreign currency fluctuations against the dollar and allegations that hidden government subsidies lie within some carrier reports could provide endless complications. We list these problems not to say they are insurmountable but to demonstrate the substantial challenge posed in incorporating non-U.S. carrier costs in the SFFL system. Perhaps in the exercise of their own sovereign powers, foreign governmental bodies or agencies (in Europe or elsewhere) could collect, validate, and provide such data which could then provide the basis for an even more comprehensive measurment of cost changes. We are prepared to consider any workable options and we remain open to a demonstration that foreign flag costs can be reflected within the SFFL system.

It should also be noted that the U.S. has negotiated, or is in the process of negotiating, new bilateral arrangements with several countries which refer explicitly to the SFFL. We invite the participation of foreign air carriers in this proceeding, and particularly carriers who are operating under such bilaterals. We wish to make it clear that this proceeding is not intended to serve as a means for unilaterally changing the meaning of bilateral agreements having pricing arrangements tied to SFFL. To ensure there is no misunderstanding on this score, any changes in SFFL methodology adopted in this proceeding will not be applied in the case of such bilaterals without the consent of the governments involved or except in accordance with procedures set forth in the pertinent agreements.

(Secs. 101, 102, 105, 204, 401, 402, 403, 404, 405, 407, 408, 409, 411, 412, 414, 416, 801, 1001, 1002, 1102, 1104, Pub. L. 85–726, as amended, 72 Stat. 737, 740, 743, 754, 757, 758, 760, 766, 767, 768, 769, 770, 771, 782, 788, 797, 92 Stat. 1708; 49 U.S.C. 1301, 1302, 1305, 1324, 1371, 1372, 1373, 1374, 1375, 1377, 1378, 1379, 1381, 1382, 1384, 1386, 1461, 1481, 1482, 1502, 1504)

By the Civil Aeronautics Board.

Phyllis T. Kaylor,

Secretary.

BILLING CODE 6320–01–M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 100

[CGD 13–81–03]

Lake Washington, Washington; Establishment of Area of Controlled Navigation

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: 1. This notice proposes promulgating a regulation establishing an area of controlled navigation in Lake Washington, WA.

2. The proposed regulation will be in effect from 5 August until 9 August 1981. Promulgation of the proposed regulation is required to ensure the safety of the spectators and the participants during an approved marine event.

3. The proposed regulation is intended to provide authority to the Coast Guard to control navigation in the designated area.

DATE: Comments must be received on or before June 22, 1981.

ADDRESSES: Comments should be mailed to Commander(bb), Thirteenth Coast Guard District, 915 Second Ave., Seattle, WA 98174. Comments may also be hand-delivered to this address.

FOR FURTHER INFORMATION CONTACT: LCDR R. B. Millson, Boating Safety Office, (206) 442–7355.

SUPPLEMENTARY INFORMATION:

4. Interested persons are invited to participate in this rulemaking by submitting written views, data, or arguments. Persons submitting comments should include their names and addresses, identify this notice and the specific section of this notice to which their comments apply, and give the reasons for each comment. Receipt of comments will be acknowledged if a stamped self-addressed postcard or envelope is enclosed.

5. The proposed regulations may be changed in light of comments received. All comments received before the expiration of the comment period will be considered before final action is taken

on this proposal. No public hearing is planned.

Drafting Information

The principal persons involved in the drafting of this notice were LCDR Millson, Project Officer and Lt Pecos Bill Field, Project Attorney.

Discussion of Proposed Rule

6. Each year SEAFAIR INC., a non-profit corporation, sponsors an unlimited hydroplane regatta on the waters of Lake Washington. This year, the organization is sponsoring the Sea-Galley, APBA Gold Cup Race.

7. The event draws several thousand spectators to the beaches and waters surrounding the Lake Washington race course. A large number of these spectators view the event from over one thousand pleasure craft which anchor around the race course. To ensure the safety of both the spectators and the participants, a special navigational regulation is required. This proposed regulation provides the authority for Coast Guard personnel to control general navigation in the area surrounding the race course, during the event.

8. This proposed regulation will involve minimal costs and will have insignificant impact on recreational and commercial traffic in Lake Washington. This follows from the fact that the regulation affects a small area of Lake Washington and will be in effect for a minimal period of time. As a result, it is not considered a major rule under the terms of Executive Order 12991.

9. For the reasons stated in paragraph 8, the District Commander certifies that the proposed regulation will have an insignificant economic impact on small entities.

10. For the reasons stated in paragraph 8, this proposed regulation is considered to be nonsignificant under the guidelines DOT ORDER 2100.5 dated May 5, 1980. Consequently, an economic evaluation has not been conducted.

Proposed Regulations

In consideration of the foregoing, the Coast Guard proposes to amend Part 100 of Title 33, Code of Federal Regulations, by adding the following new § 100.35a:

A. From 5 August to 8 August 1981, this regulation will be in effect from 0800 until 1700 Pacific Daylight Time. On 9 August 1981, this regulation will be in effect from 0800 until one hour after the conclusion of the last race.

B. The specific area restricted to general navigation by this regulation during the hours it is in effect is:

(1) The waters of Lake Washington bounded by the Mercer Island (Lacey V. Murrow) Bridge, the western shore of Lake Washington, and east/west line drawn tangent to Bailey Peninsula and along the shoreline of Mercer Island.

C. The area described in paragraph B has been divided in two zones. The zones are separated by a log boom and a line from the southeast corner of the boom to the northeast tip of Bailey Peninsula. The western zone is designated Zone I, the eastern zone Zone II. refer to chart 18447.

D. The Coast Guard patrol of the area described in paragraph B will be under the direction of the Patrol Commander. He is empowered to control the movement of vessels on the race course and in the adjoining waters during the periods this regulation is in effect.

E. Only authorized vessels shall be allowed to enter Zone I during the hours this regulation is in effect. Vessels in the vicinity of Zone I shall maneuver and anchor as directed by Coast Guard Officers or Petty Officers.

F. During the times in which this regulation is in effect, swimming, wading, or otherwise entering the water by any person is prohibited.

G. Vessels proceeding in either Zone I or Zone II during the hours this regulation is in effect shall do so only at speeds which will create minimum wake. In any event, vessels may not exceed seven (07) miles per hour. This maximum speed may be reduced at the discretion of the Patrol Commander.

H. Upon completion of the daily racing activities, all vessels leaving either Zone I or Zone II shall proceed at speeds less than seven (07) miles per hour. This maximum speed may be reduced at the discretion of the Patrol Commander.

I. A succession of sharp, short signals by whistle or horn from vessels patrolling the area described in Paragraph B under the direction of the Patrol Commander will be a signal to stop. Vessels signaled shall immediately stop and comply with the orders issued by the Coast Guard personnel aboard the patrol vessel.

(Sec. 1, 35 Stat. 69, as amended, sec. 6(b)(1), 80 Stat. 937; 46 U.S.C. 454, 49 U.S.C. 1655(b)(1); 33 CFR Part 100.35; 49 CFR 1.46(b))

Dated: May 27, 1981.

C. E. Larkin,

Rear Admiral, U.S. Coast Guard Commander, 13th Coast Guard District.

[FR Doc. 81-16280 Filed 5-29-81; 8:45 am]

BILLING CODE 4910-14-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[A-3-FRL-1829-7]

Approval and Promulgation of Implementation Plans; Massachusetts

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: On September 16, 1980 (45 FR 61303) the Environmental Protection Agency (EPA) conditionally approved revisions to the Massachusetts State Implementation Plan (SIP), which were submitted to EPA to meet the requirements of Part D and certain other sections of the Clean Air Act, as amended (the Act). At the time, EPA withheld final action on the commitment to public transportation and the demonstration of Reasonable Further Progress (RFP) in the Boston region. No action was taken on the commitment to public transportation because the Massachusetts Bay Transit Authority (MBTA) had recently instituted a fare increase which was in conflict with the commitment proposed for approval on March 7, 1980 (45 FR 14886) to maintain the fare structure at 1978 levels. Additionally, no action was taken on the RFP demonstration for the Boston urban area because the fare increase has the potential to shift transit riders to automobiles which could increase projections of future emissions and thus necessitate changes in the RFP demonstration.

On February 18, 1981, the Boston Metropolitan Planning Organization (MPO) submitted to the Department of Environmental Quality Engineering (DEQE) a change in language in the Boston Transportation Element of the SIP (TESIP) to make the commitment to public transportation consistent with the MBTA's current practices and policies. Supporting information showed that system ridership initially decreased, but that within several months exceeded the levels prior to the fare increase and therefore that no change in the RFP demonstration was required. The MPO also submitted commitments to several measures undertaken in the Boston region to offset any possible reductions in the long-term ridership growth rate.

The DEQE has proposed adoption of this submittal in the Massachusetts SIP through their revisions procedures and will be holding public hearings on May 8, 1981. Concurrently, EPA is proposing to approve the commitment to public transportation contingent upon adoption

by DEQE of the proposed amendments, and to approve the RFP demonstration for the Boston area previously submitted by DEQE on December 31, 1978, May 16, 1979, and September 19, 1979. This concurrent review, which EPA refers to as "parallel processing", is designed to reduce the time necessary for EPA review of SIP revisions and is being used on a trial basis by Region I.

DATES: Comments should be submitted to Harley F. Laing at the address below on or before July 1, 1981.

ADDRESSES: Copies of the State's submission are available for inpection at the following addresses: Environmental Protection Agency, Region I, Air Branch, Room 1903, J.F.K. Federal Building, Boston, MA 02203; Division of Air Quality Control, One Winter Street, Boston, MA 02110; and Public Information Reference Unit, EPA, 401 M Street S.W., Washington, D.C. 20460.

Comments should be submitted to Harley F. Laing, Chief, Air Branch, Environmental Protection Agency, Region I, Air Branch, Room 1903, JFK Federal Building, Boston, MA 02203, (617) 223–5630.

FOR FURTHER INFORMATION CONTACT: John L. Hanisch, Chief , Mobile Source Emissions Section, Environmental Protection Agency, Region I, J.F.K. Federal Building, Room 1903, Boston, MA 02203, (617) 223–5630.

SUPPLEMENTARY INFORMATION: On September 16, 1980 (45 FR 61303) EPA conditionally approved revisions to the Massachusetts SIP to attain and maintain National Ambient Air Quality Standards for ozone and carbon monoxide which were submitted to EPA to meet in part the requirements of Part D of the Act. At the request of the DEQE, EPA took no action on the commitment to public transportation in the Boston TESIP required by Sections 110 (a)(3)(D) and 172 (b)(2) of the Act and took no action on the demonstration of RFP for attaining ozone standards in the Boston urban area as required by Section 172(b)(3) of the Act of all non-attainment areas. DEQE made this request because the MBTA had instituted a fare increase effective June 30, 1980 which conflicted with a commitment made in the Boston TESIP to maintain aggregate MBTA fares at the 1978 level. The MBTA fare increase went into effect during the public comment period for EPA's proposed rulemaking. The effect of this change in MBTA policy could not be adequately assessed prior to final rulemaking, the therefore EPA agreed to DEQE's request to take no final action. Since the fare increase had the potential to divert public transportation riders to automobiles, and thus increase hydrocarbon emission estimates for future years, EPA also took no action on the demonstration of RFP for the Boston urban area pending a review of the relationship betwen fares and future emissions, and any necessary adjustments to the RFP calculation.

By letter, dated February 18, 1981, the Boston Metropolitan Planning Organization (MPO) submitted proposed amendments to the Boston TESIP to the Massachusetts DEQE. The amendments were endorsed on September 2, 1980 by the Boston MPO. The amended Boston TESIP states that "the MBTA recognizes the effect that fare levels have on ridership and therefore air quality, but also recognizes existing fiscal constraints at the local level. The MBTA must strike a balance between maintaining and increasing current service levels and not unrealistically increasing the funding of the net cost of services provided by taxpayers * * * changes in fares shall be made only after there have been opportunities for public involvement and adequate consideration of environmental impacts."

In support of the amendment, the MPO submitted data comparing ridership both before and after the fare increase was instituted. The analysis shows that immediately following the fare increase on June 30, 1980, ridership was down on both the basic system and commuter rail lines, but that by October 1980, ridership had rebounded and was greater than that for corresponding periods in 1979. The MPO data also indicated that these ridership levels exceeded the base year, 1978, ridership level as well.

Additionally, the MPO submitted, for inclusion in the Boston TESIP, several air quality improving measures undertaken by the state in the last year. The measures are intended to offset any possible reductions in the long-term growth rate of transit ridership which were felt to be small and immeasurable. Specifically, the measures submitted were a Toll Incentive Program for Carpools on the Massachusetts Turnpike, Insurance Discounts for Transit Passholders and Caravan Vanpoolers, and a change in the gasoline tax structure from a fixed amount to 10% of the wholesale price.

EPA's review of the material indicates that these proposed revisions to the Massachusetts SIP are approvable if they are not substantially changed by the State after the forthcoming state hearing and public comment period. In the interest of shortening the federal review period, EPA is proposing approval of these changes now, before the completion of the state public review period, and thus before final submittal of the revision to EPA. EPA refers to this new procedure as "parallel processing". If the proposed revisions are substantially altered during the public review period, EPA will reevaluate them and publish a revised notice of proposed rulemaking. If, based on the state and federal public comments, it is determined that no substantial revisions are required, EPA will issue a final rulemaking on the submittal. Parallel processing is estimated to reduce the time necessary for final approval of SIP revisions by 3 to 4 months on the average.

Proposed Action: Contingent upon adoption of amendments to the Boston TESIP as discussed above by the Massachusetts DEQE, EPA is proposing approval of:

1. The Boston region's commitments to public transportation. These commitments are presented in revisions to the Massachusetts SIP submitted to EPA on December 31, 1978, May 16, 1979 and September 19, 1979, as amended by MPO endorsement on September 2, 1980.

2. The demonstration of RFP toward attainment of ozone standards in the Boston urban area as presented in the September 9, 1979 revisions to the Massachusetts SIP.

3. The Massachusetts Turnpike Carpool Incentive Program; Insurance Discounts for Transit Passholders and Caravan Vanpoolers; and the Percentage State Gasoline Tax as described in amendments to the Boston TESIP submitted by the MPO to DEQE on February 18, 1981.

Under Executive Order 12291, EPA must judge whether a regulation is "Major" and therefore subject to the requirement of a Regulatory Impact Analysis. This regulation is not Major because this action only approves state action and imposes no new requirements.

This regulation was submitted to the Office of Management and Budget for review as required by Executive Order 12291.

Pursuant to the provisions of 5 U.S.C. Section 605(b) the Administrator has certified that SIP approvals under Sections 110 and 172 of the Clean Air Act will not have a significant economic impact on a substantial number of small entities, 46 FR 8709 (January 27, 1981). The attached rule, if promulgated, constitutes a SIP approval under Sections 110 and 172 within the terms of the January 27, 1981 certification. The action only approves state actions. If imposes no new requirements. Moreover, due to the nature of the

Federal-state relationship, federal inquiry into the economic reasonableness of the state actions would serve no practical purpose and could well be improper.

(Sections 110 and 301 of the Clean Air Act, as amended (42 U.S.C. 7410 and 7601))

Dated: April 17, 1981.

Leslie A. Carothers,

Acting Regional Administrator.

BILLING CODE 6560-38-M

---

40 CFR Part 81

[A-5-FRL-1828-6]

Designation of Areas for Air Quality Planning Purposes; Attainment Status Designations: Wisconsin

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA proposes to change the attainment status for portions of La Crosse County, Wisconsin from secondary nonattainment for total suspended particulates (TSP) to attainment, thus making all of La Crosse County attainment for TSP. This proposed change is based on a request from the State of Wisconsin to redesignate La Crosse County. Under the Clean Air Act, designations can be changed if sufficient data is available to warrant such change.

This proposal discusses EPA's evaluation of the additional monitoring data now available and invites public comments on EPA's proposed action.

DATE: Comments must be submitted, in triplicate if possible, by no later than July 1, 1981.

ADDRESSES: Written comments should be sent to: Gary Gulezian, Chief, Regulatory Analysis Section, Air Programs Branch, U.S. Environmental Protection Agency, 230 South Dearborn Street, Chicago, Illinois 60604.

Copies of the redesignation request, technical support documents, and the supporting air quality data are available for copying and inspection during normal business hours at the Region V address given above and at the Public Information Reference Unit address given below. A telephone call to Region V is recommended prior to your visit. A reasonable fee will be charged for copying. Public Information Reference Unit, Room 2922, U.S. Environmental Protection Agency, 230 South Dearborn Street, Chicago, Illinois 20460.

Copies of the supporting material are also available at: Wisconsin Department of Natural Resources, Bureau of Air Management, 101 South Webster, Madison, Wisconsin, 53707.

FOR FURTHER INFORMATION CONTACT: Debra Marcantonio, Air Programs Branch, Region V, U.S. Environmental Protection Agency, 230 South Dearborn Street, Chicago, Illinois 60604. (312) 886-6088.

SUPPLEMENTARY INFORMATION: The Clean Air Act Amendments of 1977 added section, 107(d), which directed each State to determine the National Ambient Air Quality Standards (NAAQS) attainment status of each air quality control region within the State, and to submit to the Administrator of EPA a list of nonattainment areas. The Administrator was required to promulgate the State lists, with any necessary modifications. The Administrator published these lists in the **Federal Register** on March 3, 1978 (43 FR 8962), and made necessary amendments in the **Federal Register** on October 5, 1978 (43 FR 45993).

According to Section 107(d) of the Act, the designation for an area may be changed whenever sufficient data exists to warrant such a change. In the June 12, 1979 memo entitled "Section 107 Redesignation Criteria," Richard G. Rhoads, the Director of USEPA's Control Program Development Division, described EPA's requirements for approval of a change in an area's designation. A change from primary nonattainment to either secondary nonattainment or attainment in an area's nonattainment designation may be approved if there are eight consecutive quarters of recent ambient air quality data which show no violations of the appropriate NAAQS.

On March 3, 1978, EPA designated the following area of La Crosse County as nonattainment for the secondary TSP NAAQS: Sub-city area defined as follows: *North:* Corner of La Crosse St. and Second Ave., East on La Crosse St. to 10th Street. *West:* Corner of Second St. and Main St. to La Crosse St. *South:* Corner 10th St. and Main St., West to Second Street. *East:* Corner of 10th St. South to Main Street. The remainder of La Crosse County was designated as attainment for TSP.

The nonattainment designation was based upon air quality monitoring data collected during 1975, 1976, and the first half of 1977. The Sawyer Auditorium monitoring site, located in downtown La Crosse, recorded one violation of the short-term secondary standard in 1975 and three in 1976. One of the exceedances recorded at the site was discounted because it occurred on a statewide TSP episode day (i.e., a day when TSP levels were high throughout the state due to windstorms and blowing dust). Additionally the Cowley Hall monitor recorded one violation of the short-term secondary TSP standard in 1975 and none thereafter. Although it now appears that the violations were caused by a combination of construction activity near the monitor and unusually dry weather, the area was designated nonattainment based on the 1975 and 1976 violations. (A violation of the secondary TSP NAAQS occurs when the maximum 24-hour concentration exceeds 150 μ/m^3 more than once in a calendar year.)

On July 15, 1980, the State of Wisconsin submitted a request to EPA in accordance with section 107(d)(5) of the Clean Air Act, to redesignate La Crosse County as attainment for TSP. In support of this request the state submitted 1977, 1978 and 1979 quality assured air quality data from the Sawyer Auditorium and the Cowley Hall monitoring sites, which are the only two hi-vol samplers permanently stationed in La Crosse which have been collecting data for several years. The July 15, 1980 submittal contained 11 consecutive quarters of quality assured monitoring data showing no violations (through the third quarter of 1979) for the La Crosse County nonattainment area. Although one exceedance of the short-term secondary standard was recorded in June 1978 at the Cowley Hall monitor and one exceedance in April 1977 and one in June 1978 at the Sawyer Auditorium monitor, no violations of the TSP standards have been recorded at either site since 1976.

Therefore, since eleven quarters of recent monitoring data are available which show no violations of the TSP NAAQS and since only eight quarters of data are necessary to change an area's nonattainment designation, EPA today proposes to change the attainment status for portions of La Crosse County, Wisconsin from secondary nonattainment for TSP to attainment, thus making all of La Crosse County attainment for TSP.

All interested persons are invited to submit written comments on the proposed redesignation. Written comments received by the date specified above will be considered in determining whether EPA will approve the redesignation. After review of all comments submitted the Administrator of EPA will publish in the **Federal Register** the Agency's final action on the redesignation.

Pursuant to Executive Order 12291 (Order), EPA must judge whether a regulation is "major" and therefore subject to the requirement of preparing a

regulatory impact analysis. Today's action does not constitute a major regulation because it only changes an area's air quality designation, it does not impose any new regulatory requirements. This action was submitted to the Office of Management and Budget (OMB) for review as required by the Order.

Pursuant to the provisions of 5 U.S.C. Section 605(b) the Administrator has certified (46 FR 8709) that the attached rule will not, if promulgated, have a significant impact on a substantial number of small entities. This action does not impose any new regulatory requirements but merely changes an area air quality designation to attainment.

(Section 107 of the Clean Air Act, as amended)

Dated: May 7, 1981.

Valdas V. Adamkus,

Acting Regional Administrator.

[SW-8-FRL-1841-5]

Kansas Application for Interim Authorization, Phase I, Hazardous Waste Management Program

AGENCY: Environmental Protection Agency.

ACTION: Notice of public comment period extension.

SUMMARY: This notice extends the public comment period on the Kansas Phase I interim authorization application to July 3, 1981. A previous **Federal Register** notice dated May 4, 1981 (45 FR 124968) announced the availability of the Kansas interim authorization application for public review, invited public comment by June 3, 1981, and gave notice of a June 3, 1981, public hearing. Today the Environmental Protection Agency (EPA) is announcing that the public comment period has been extended 30 days to allow review of minor revisions to the Kansas interim authorization application and to allow the opportunity for submittal of written comments to EPA. Since the State's submission has not materially changed, recommencement of the formal review period was determined unnecessary.

DATE: Comments on the Kansas interim authorization application must be received by July 3, 1981.

ADDRESSES: Copies of the Kansas interim authorization application, including minor revisions, are available during business hours at the following locations for inspection and copying by the public:

Kansas Department of Health and Environment, Bureau of Environmental Sanitation, Forbes Field, Topeka, Kansas 66620, 913/862-9360 Ext. 297, Business Hours: 8:00-4:30, $0.25 per page copying charge;

U.S. Environmental Protection Agency, 324 East 11th Street, Kansas City, Missouri 64106, 816/374-6533, Business Hours: 7:30-4:30, $0.20 per page copying charge;

U.S. Environmental Protection Agency, Office of Solid Waste, 401 M Street, S.W., Washington, D.C. 20460, 202/382-2210, Business Hours: 7:30-4:30;

Send written comments to: Robert L. Morby, U.S. Environmental Protection Agency, 324 East 11th Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT:
Robert L. Morby (816) 374-3307.

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 55

Federal Crime Insurance Program; Depopulation of FAIR Plans

AGENCY: Federal Insurance Administration, FEMA.

ACTION: Notice of withdrawal of proposed rulemaking

SUMMARY: On July 28, 1980, a proposed rule was published (45 FR 49960) by the Federal Insurance Administration (FIA) which would have established a plan to assist those FAIR Plan insureds who are insurable in the voluntary market to secure such coverage, and to revise the regulatory operation of Statewide FAIR Plans under the Urban Property Protection and Reinsurance Act of 1968, to require each FAIR Plan to develop and implement a depopulation program. FIA has evaluated the comments received from the industry and state regulatory administrations and concluded that it would be unnecessary to require the proposed regulatory revision to become effective in final form because the insurance industry and the states are prepared to address the problem as presented. Thus, FIA withdraws the proposed rule.

EFFECTIVE DATE: June 1, 1981.

FOR FURTHER INFORMATION CONTACT:
Mr. Robert DeHenzel, Federal Insurance Administration, Washington, D.C. 20472, (202) 755-6555.

SUPPLEMENTARY INFORMATION: An evaluation of the comments received from the insurance industry and the states clearly reflected that the proposed regulatory revision was unneeded at this time because the States and the insurance industry are prepared to accomplish the goals of the revision. FIA has concluded that the preferable approach is for the states and the industry to take the lead and develop these goals on their own. This conclusion is consistent with the Administrator's policy of allowing states to act when it is their interest to do so without Federal involvement. In consideration of the foregoing the proposed rule (45 FR 49960) published in the **Federal Register** on July 28, 1980 is hereby withdrawn.

Issued: May 19, 1981.

Richard W. Krimm,

Acting Administrator, Federal Insurance Administration.

44 CFR Part 61

[Docket No. FEMA-FIA]

Insurance Coverage and Rates; National Flood Insurance Program Emergency Phase

AGENCY: Federal Insurance Administration (FIA), FEMA.

ACTION: Proposed rule.

SUMMARY: The Federal Emergency Management Agency proposes to increase the chargeable rates for all structures located in communities participating in the emergency phase of the National Flood Insurance Program.

DATE: All comments received on or before July 31, 1981, will be considered before final action is taken on the proposed rule.

ADDRESS: Person who wish to comment should submit comments in duplicate to the Rules Docket Clerk, Office of the General Counsel, Federal Emergency Management Agency, Washington, D.C. 20472.

FOR FURTHER INFORMATION CONTACT:
Mr. H. Joseph Coughlin, Jr., Acting Assistant Administrator, Office of Insurance Operations, Federal Insurance Administration, Federal Emergency Management Agency, 451 7th Street, SW., Room 5126, Washington, D.C. 20472, Telephone Number (202) 755-6580.

SUPPLEMENTARY INFORMATION: Section 1308 of the National Flood Insurance Act of 1968, as amended (42 U.S.C. 4001 et seq.), separated the flood insurance ratemaking process for the National Flood Insurance Program (NFIP) into two distinct categories. These are (1) estimated risk premium or "actuarial" rates and (2) chargeable rates which under certain statutory conditions could be less than estimated risk premium rates. The chargeable or "subsidized" rates currently in use are set forth in Section 61.9 of the National Flood Insurance Program regulations (44 CFR 59 et seq.).

These subsidized rates are countrywide rates for broad building type classications which, when applied to the amount of insurance purchased and added to the expense constant, produce a premium income somewhat less than the expense and loss payments incurred on the flood insurance policies issued on that basis. The funds needed to supplement the inadequate premium income are provided by the National Flood Insurance Fund. The subsidized rates are promulgated by the Administrator for use under the Emergency Program (added to the NFIP by Congress in Section 408 of the Housing and Urban Development Act of 1969) and for the use in the Regular Program on construction or substantial improvement started on or before December 31, 1974 (this additional grandfathering was added to the NFIP by Congress in Section 103 of the Flood Disaster Protection Act of 1973) or the effective date of the initial Flood Insurance Rate Map (FIRM), whichever is later. The level of these rates in recent years has resulted in an average annual insurance premium of $86 per policy paid by policyholders and an average premium subsidy of about $125 per policy borrowed from the Treasury of the United States.

The statutory mandate to establish reasonable chargeable rates requires that the Federal Insurance Administrator balance the need to provide reasonable rates to encourage potential insureds to purchase flood insurance with the requirement that the NFIP be a flexible program which minimizes costs and distributes burdens equitably among those who will be protected by flood insurance and the general public. The Federal Insurance Administration (FIA) has examined the current chargeable rates and the amount of subsidy required to supplement the inadequate premium income derived from insurance policies to which these rates apply. Based on this examination, FIA has determined that the general public now bears too great a share of the burden for subsidized insurance rates. In addition, FIA has determined that it is necessary to take action to bring the National Flood Insurance Program closer to a self-supporting basis and create a sounder financial basis for the Program. Therefore, to meet these needs FIA proposes to increase the chargeable or subsidized rates as follows:

Type of Structure	Rate per year per $100 coverage on	
	Structure	Contents
(1) Residential	$0.40	$0.50
(2) All other (including hotels and motels with normal occupancy of less than 6 months in duration)	.50	1.00

For comparision, the current subsidized rates are as follows:

Type of Structure	Rate per year per $100 coverage on	
	Structure	Contents
(1) Residential	$0.25	$0.35
(2) All other (including hotels and motels with normal occupancy of less than 6 months in duration)	.40	.75

The need for these increases has been balanced with the statutory requirement that the chargeable rates be consistent with the objective of making flood insurance available where necessary at reasonable rates so as to encourage prospective insureds to purchase flood insurance. Although policyholder will be required to pay more for flood insurance coverage for all existing structures and for new structures in emergency program communities, FIA has determined that policies purchased or renewed, to which the new rates are applicable, will be reasonable as required by statute.

In the history of the NFIP, FIA has never increased these chargeable rates. In 1972, action was taken to lower the chargeable rates. These reduced rates were scaled in the same manner as the pre-1972 rates according to the value of the structure and the contents. In 1974, the sliding scale was eliminated. Flat rates were established for building type classifications and contents. The 1972 rate decreases were enacted to encourage prospective insureds to purchase flood insurance. At that time, however, FIA had little experience on which to base a statistical analysis of the expense and loss incurred by the Program. Now more adequate information is available for determining the amount of subsidy required to supplement the chargeable rates. Without an increase in chargeable rates, the subsidy required to operate the NFIP will continue to increase. The amount of the proposed rate increases represents a balance between the need for decreasing the federal subsidy required for the Program thus more equitably distributing the burdens and the requirement that chargeable rates be reasonable.

Section 1308 of the National Flood Insurance Act of 1968, as amended, requires that FIA shall prescribe by regulation chargeable rates after consultation with representatives of the insurance industry, State and local government, lending institutions, the homebuilding industry and the general public. The rates proposed in this rule are the same subsidized rates (without a sliding scale) which were in effect prior to the 1972 rate decreases. These rates were established by regulation in 1969 at which time adequate consultation as required by the 1968 Act was accomplished. Therefore, FIA has determined that the comment period provided for this proposed rule will be adequate for any additional comments to be made on the proposed rates and their effects.

FIA proposes that the increased chargeable rates go into effect on October 1, 1981. This delayed effective date is for the purpose of minimizing the financial burden on policyholders. Effective January 1, 1981, an expense constant is required for policies rated at chargeable rates as well as policies rated at actuarial rates. The October 1, 1981 effective date will eliminate most policyholders having to absorb at the same renewal date both the added expense constant and the chargeable rate increases since the majority of renewals are concentrated in the months preceding October.

FEMA has determined based upon an Environmental Assessment that this proposed rule does not have significant impact upon the quality of the human environment. A finding of no significant impact is included in the formal docket file and is available for public inspection and copying at the Rules Docket Clerk, Office of General Counsel, Federal Emergency Management Agency, Room 802, 1725 Eye Street, N.W., Washington, D.C. 20472.

Accordingly, Part 61 of Subchapter B of Chapter 1 of Title 44 is proposed to be amended as follows.

Section 61.9 is revised to read as follows:

§ 61.9 Establishment of chargeable rates.

(a) Pursuant to section 1308 of the Act, chargeable rates per year per $100 of

flood insurance are established as follows for all areas designated by the Administrator under Part 64 of this subchapter for the offering of flood insurance:

Rates for New and Renewal Policies

Type of structure	Rate per year per $100 coverage on	
	Structure	Contents
(1) Residential	$0.40	$0.50
(2) All other (including hotels and motels with normal occupancy of less than 6 months in duration)	.50	1.00

(b) The contents rate shall be based upon the use of the individual premises for which contents coverage is purchased.

(42 U.S.C. 4001 et seq., Reorganization Plan No. 3 of 1978 (3 CFR 1978 Comp. 329) and Executive Order 12127 (44 FR 19367))

(Catalog of Federal Domestic Assistance Number 83.100 National Flood Insurance Program)

Issued: February 12, 1981.

Richard W. Krimm,

Acting Administrator, Federal Insurance Administration.

BILLING CODE 6718-01-M

---

44 CFR Part 300

[Docket No. FEMA-PP-300A]

Disaster Preparedness Assistance

AGENCY: Federal Emergency Management Agency.

ACTION: Proposed rule.

SUMMARY: The Federal Emergency Management Administration (FEMA) is amending its disaster preparedness assistance regulations to add procedures by which financial assistance will be provided to eligible applicants in priority areas for the development of preparedness plans for severe earthquakes or hurricanes in high-risk, high-population areas.

DATE: Comments should be submitted on or before July 31, 1981.

ADDRESS: Rules Docket Clerk, Office of General Counsel, Federal Emergency Management Agency, Washington, D.C. 20472.

FOR FURTHER INFORMATION CONTACT: Bud Andress, Preparedness Development Division, Plans and Preparedness, Federal Emergency Management Agency, Washington, D.C. 20472 (202) 566-0805.

SUPPLEMENTARY INFORMATION: The original Earthquake and Hurricane Loss Study and Contingency Planning Program was developed in response to the need for effective predisaster planning for a major earthquake or hurricane in a high-risk, high-population area. The loss study determines the casualty and damage potential from feasible catastrophic events. Special emphasis is placed on estimating damage critical to disaster relief and recovery measures. The data from the loss study provide the Federal Government and the appropriate State and local governments with a planning basis for unique or special disaster mitigation, relief, and recovery operations in the identified area.

This program was initiated in the early 1970's under the former Office of Emergency Preparedness (OEP). Four earthquake loss studies were done for OEP and its successor Federal Disaster Assistance Administration (FDAA): two by the National Oceanic and Atmospheric Administration (NOAA)—of the San Francisco Bay and Los Angeles areas—and two by the U.S. Geological Survey—of the Puget Sound and Salt Lake City areas. Subsequent contingency planning was initiated at the Federal level by the appropriate OEP-FDAA Regional Offices and at the State and local levels by California and Utah with the help of Disaster Preparedness Grants under the Disaster Relief Acts of 1970 (Pub. L. 91-606) and 1974 (Pub. L. 93-288). Other seismic risk areas identified for earthquake loss studies and planning were Anchorage, Honolulu, Boston, Charlestown (SC), Upper New York State (Buffalo-Rochester-St. Lawrence Seaway), and the central Mississippi Valley (parts of seven States). Nine primary hurricane-risk areas were identified for the program, but no studies were initiated at that time. Ten other hurricane-risk areas were later added to the potential study list.

The program, inactive for a few years in the mid-1970's because of budget restraints, was revived by FDAA and its successor Federal Emergency Management Agency (FEMA), after Congressional passage and Presidential implementation of the Earthquake Hazards Reduction Act of 1977, as part of the National Earthquake Hazards Reduction Program. Earthquake loss study contracts were let in FY 1979 with Alaska and Hawaii. In FY 1980, FEMA Region I awarded a prototype grant to Massachusetts for an earthquake loss study of the greater Boston area. Region VII contracted for a preliminary study of the central Mississippi Valley seismic risk area, and Region IX entered into a cooperative agreement with California for intensified planning for an earthquake in the Los Angeles area.

The Earthquake and Hurricane Plans and Preparedness Program is authorized under section 201(a) and 201(b) of the Disaster Relief Act of 1974. The earthquake portion is further supported by the Earthquake Hazards Reduction Act, as amended. With full-scale implementation of the program, regulations are now needed to codify applicable procedures for FY 1981 and subsequent years. These procedures will govern the program until publication of the final rule.

Interested parties and government agencies are encouraged to submit written comments, suggestions, data, or arguments regarding this rulemaking to the Rules and Docket Clerk, Office of General Counsel, Federal Emergency Management Agency, Washington, D.C. 20472. All submissions received on or before July 31, 1981 will be evaluated. All comments will be available for inspection at the Office of the Rules Docket Clerk. FEMA will evaluate all such comments and experiences to date and will then prepare a final rule for publication in the **Federal Register**.

The rule is not a major rule under provisions of Executive Order 12291 nor will it, if promulgated, have a significant impact on a substantial number of small entities since it deals with states.

The rule also conforms to the criteria established for categorical exclusion with respect to environmental documents (see part 10 of this title).

Accordingly, it is proposed to add a new § 300.6 to Subchapter E, Part 300 of Chapter I, Title 44, as follows:

PART 300—DISASTER PREPAREDNESS ASSISTANCE

* * * * *

§ 300.6 Earthquake and hurricane plans and preparedness.

(a) The objective of the program is to prepare special or additional plans and capabilities, at all levels of government for integrated response to the threat or consequences of severe earthquakes or hurricanes in certain high-risk, high-population areas, to the extent regular emergency preparedness measures are insufficient for these contingencies.

(b) The program is normally funded by project grants. When appropriate, certain projects may be financed through cooperative agreements or contracts, pursuant to the definitions set forth in 41 CFR 49-1.50.

(c) Funding may cover all or any part of the cost of the project. Normally contingency planning will follow, and be based upon a loss study. The loss study

may address such earthquake-related or hurricane-related activities as determination and definition of the hazard area, identification of seismic or storm-surge risks, estimation of casualties and structural damage, and postulated impact on essential operations, population, and resources. Contingency planning efforts may include developing or improving unique, special or extraordinary protective, relief, and recovery measures. Consideration will be given to studies or planning for earthquake or hurricane caused catastrophes such as volcanic eruptions, landslides, dam ruptures, flooding, subsidence or hazardous-materials releases. Grants for the loss study and for contingency planning may be awarded separately or combined.

(d) Grants are awarded on the basis of a proposed and acceptable work plan and the vulnerability of the area to earthquakes, hurricanes, or related phenomena. Priority is given to high-risk, high-population areas as determined by FEMA on the basis of existing data and expert consultation. Other considerations include the collective interest of the affected jurisdictions in implementing the study and planning the resources available to FEMA for monitoring and assisting the projects. Accordingly:

(1) The following priority earthquake areas are identified: San Francisco, Los Angeles, Puget Sound, Salt Lake City, Anchorage, Honolulu, Boston, Charleston (SC), central Mississippi Valley, and Upper New York State (studies or plans for some of which have already been funded).

(2) Priority hurricane areas are identified as, primarily, Corpus Christi, Galveston-Houston, New Orleans, Tampa Bay, Miami-Miami Beach, Savannah, Charleston (SC), Chesapeake Bay, and Long Island and secondarily, Matagorda (TX), Sabine Lake (TX–LA), Mobile, the Florida Keys, Lake Okeechobee, Pamlico Sound, Delaware Bay, Providence, Buzzards Bay/Cape Cod, and Boston.

(3) Notwithstanding subparagraphs (1) and (2) above, consideration will be given to grant requests for other areas.

(e) State or local governments serving highly populated localities designated as highly vulnerable to earthquake or hurricanes are eligible. The grant (or a cooperative agreement, if more appropriate) would usually be to a State—as defined by the Disaster Relief Act of 1974—but could be to a substate jurisdiction or an interstate consortium. FEMA may, if it determines appropriate, range for a loss study to be performed under a procurement contract or an interagency agreement.

(f) Grants are discretionary and thus must be approved by the Director or the Director's designee (the Director of Finance and Administration) or, upon delegation of approval authority, by the Regional Director. Unless otherwise stipulated, funding will be managed and projects monitored and reviewed by the cognizant FEMA Regional Office.

(g) A preapplication conference with the cognizant Regional Office is needed to discuss the grant Work Plan in draft. The draft should also be reviewed by involved or affected State agencies and local governments. FEMA technical assistance is available for application preparation.

(h) A grant request must be in writing from the Governor or Governor's authorized representative to the appropriate Regional Director. Unless other wise indicated herein, application, reimbursement, reporting, and auditing procedures shall follow the same guidelines as set forth in paragraphs 300.5(h) and (i) of these regulations and in other applicable Federal regulations.

(Sec. 201 of the Disaster Relief Act of 1974, (42 U.S.C. 5131))

Dated: May 14, 1981.

Robert E. Young,

Acting Associate Director for Plans and Preparedness.

Notices

Federal Register
Vol. 46, No. 104
Monday, June 1, 1981

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[Marketing Agreement 146]

Budget of Expenses of Peanut Administrative Committee and Rate of Assessment for the 1980 Crop Year; Amendment

Pursuant to the provisions of section 48 of Marketing Agreement 146, regulating the quality of domestically produced peanuts heretofore entered into between the Secretary of Agriculture and various handlers of peanuts (30 FR 9402), and upon recommendation of the Peanut Administrative Committee established pursuant to such agreement and other information, it is hereby found that the amendment hereinafter set forth to the Budget of Expenses of Administrative Committee and Rate of Assessment applicable to 1980 crop peanuts (45 FR 39521) will tend to effectuate the objectives of the Agricultural Marketing Agreement Act of 1937, as amended, and of such agreement.

Amendment of paragraph (c) of the Budget of Expenses of Peanut Administrative Committee and Rate of Assessment for the 1980 crop year is necessary to provide adequate funds to cover the administrative expenses of the Committee as budgeted at the beginning of the crop year (48 FR 39521). This proposal would increase the rate of assessment to cover such administrative costs from $0.40 to $0.56 per net ton of farmers stock peanuts to provide the additional funds needed. Initial budget estimates were based on handlers handling or receiving some 1.5 million tons of peanuts. However, due to the short 1980 peanut crop that tonnage is expected to be about 970,000 tons.

Therefore, paragraph (c) of the Budget of Expenses of Administrative Committee and Rate of Assessment for the 1980 crop year (48 FR 39521) is amended by deleting the entire paragraph and replaced by the following:

(c) *Rate of Assessment.* Each handler shall pay to the Peanut Administrative Committee, in accordance with § 48 of the marketing agreement, an assessment of the rate of $2.06 per net ton of farmers stock peanuts received or acquired other than those described in (c) and (d) ($0.56 for administrative expenses and $1.50 for indemnification expenses).

The Peanut Administrative Committee has recommended this amendment be issued as soon as possible so as to implement and effectuate the provisions of the marketing agreement. The handlers of peanuts who will be affected hereby have signed the marketing agreement authorizing approval of expenses that may be incurred and the imposition of assessments, they are represented on the Committee which has submitted this proposal to amend the rate of assessment to cover administrative expenses; and handlers have had knowledge of the foregong in their recent industry-wide discussions and will be afforded adequate time to plan their operations accordingly.

Dated: May 27, 1981.

D. S. Kuryloski,

Deputy Director, Fruit and Vegetable Division.

BILLING CODE 3410-02-M

Flue-Cured Tobacco Advisory Committee; Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463) announcement is made of the following committee meeting:

Name: Flue-Cured Tobacco Advisory Committee.
Date: June 26, 1981.
Place: Tobacco Division, Agricultural Marketing Service, U.S. Department of Agriculture, laboratory, Room 223 Flue-Cured Tobacco Cooperative Stabilization Corporation, 1306 Annapolis Drive, Raleigh, North Carolina 27505.
Time: 10 a.m.
Purpose: To discuss marketing area opening dates and selling schedules for flue-cured tobacco to be sold in each marketing area for the 1981 season. Also, other matters as specified in 7 CFR, Part 29, Subpart G, § 9404 will be discussed.

The meeting is open to the public. Persons, other than members, who wish to address the Committee at the meeting should contact Mr. T. A. VonGarlem, Director, Tobacco Division, Agricultural Marketing Service, U.S. Department of Agriculture, 300 12th Street SW., Washington, D.C. 20250, (202) 447-2567. Written statements should be submitted prior to or at the meeting.

Dated: May 27, 1981.

William T. Manley,

Deputy Administrator, Marketing Program Operations.

Forest Service

Cache la Poudre Wild and Scenic River Study, Arapaho and Roosevelt National Forests; Revised Notice of Intent To Prepare an Environmental Impact Statement

A notice of intent to prepare an environmental impact statement for the Cache la Poudre Wild and Scenic River Study, located within the boundaries of the Arapaho and Roosevelt National Forests and the Rocky Mountain National Park, Colorado, was published in the **Federal Register**, Volume 44, No. 65, p. 19497, April 3, 1979.

The draft environmental impact statement was filed with the Environmental Protection Agency April 8, 1980.

The estimated date for transmitting the final environmental impact statement to the Environmental Protection Agency has been postponed. It is proposed for release in October 1982.

If additional information is needed, please contact Raymond O. Benton, Forest Supervisor, Arapaho and Roosevelt National Forests at 301 S. Howes Street, Fort Collins, Colorado 80521, telephone (303) 482-5155.

All other conditions in the original notice remain the same.

Dated: May 21, 1981.

R. M. Peterson,

Chief, Forest Service.

PRESIDENTIAL TASK FORCE ON THE ARTS AND HUMANITIES

Meetings

May 29, 1981.

The Presidential Task Force on the Arts and Humanities will meet on June 15, 1981 at The White House, Washington, D.C. at noon. The purpose of this meeting is to begin to consider ways that private sector support for the arts and humanities can help offset budget cuts at the National Endowment for the Humanities and the National Endowment for the Arts. The agenda for the Task Force will also be considered.

Following a personal greeting by the President in the White House, the Task Force will formally convene at noon in the Old Executive Office Building, 1600 Pennsylvania Avenue, Washington, D.C. on June 15, 1981. The meeting will be open to the public, however, due to security requirements, members of the public who wish to attend should call the White House switchboard (202–456–1414) during business hours no sooner than June 8 and no later than June 12, 1981 and ask for the Presidential Task Force on the Arts and Humanities.

Kate L. Moore,

Special Assistant to the Chief of Staff.

CIVIL AERONAUTICS BOARD

[Order 81-5-143]

Fitness Determination of Pennsylvania Commuter Airlines; Order To Show Cause

AGENCY: Civil Aeronautics Board.

ACTION: Notice of Commuter Air Carrier Fitness Determination—Order 81–5–143, Order to Show Cause.

SUMMARY: The Board is proposing to find that Pennsylvania Commuter Airlines d.b.a. Pennsylvania Airlines is fit, willing, and able to provide commuter air carrier service under section 419(c)(2) of the Federal Aviation Act, as amended: that it has the ability to provide reliable essential air service; and that the aircraft used in this service conform to the applicable safety standards. The complete text of this order is available as noted below.

DATES: Responses: All interested persons wishing to respond to the Board's tentative fitness determination shall serve their responses on all persons listed below no later than June 16, 1981, together with a summary of the testimony, statistical data, and other material relied upon to support the allegations.

ADDRESSES: Responses or additional data should be filed with the Essential Air Services Division, Room 921, Civil Aeronautics Board, Washington, D.C. 20428, and with all persons listed in Attachment A of the order.

FOR FURTHER INFORMATION CONTACT: Barbara Pfeiffer, Bureau of Domestic Aviation, Civil Aeronautics Board, 1825 Connecticut Avenue, N.W., Washington, D.C. 20428 (202) 673–5354.

SUPPLEMENTARY INFORMATION: The complete text of Order 81–5–143 is available from the Distribution Section, Room 516, Connecticut Avenue, N.W., Washington, D.C. Persons outside the metropolitan area may send a postcard request for Order 81–5–143 to Distribution Section, Civil Aeronautics Board, Washington, D.C. 20428.

By the Civil Aeronautics Board: May 27, 1981.

Phyllis T. Kaylor,

Secretary.

BILLING CODE 6320–01–M

Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits; Applications

In the matter of notice of applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits filed under Subpart Q of the Board's procedural regulations (see, 14 CFR 302.1701 et seq.); week ended May 22, 1981.

Subpart Q Applications

The due date for answers, conforming application, or motions to modify scope are set forth below for each application. Following the answer period the board may process the application by expedited procedures. Such procedures may consist of the adoption of a show-cause order, a tentative order, or in appropriate cases a final order without further proceeding.

Date filed	Docket No.	Description
May 19, 1981	39640	Pan American World Airways, Inc., Pan Am Building, New York, New York 10166. Application of Pan American World Airways, Inc., pursuant to Section 401 of the Act and Subpart Q of the Board's Procedural Regulations requests amendment of its certificate of public convenience and necessity for Route 31 so as to permit nonstop operations among and between currently certificated points and the following cities: Albany, NY, Amarillo, TX, Asheville, NC, Atlantic City, NJ, Augusta, GA, Baton Route, LA, Buffalo/Niagara Falls, NY, Charlotte, NC, Chattanooga, TN, Columbia, SC, Columbus, GA, Greensboro/High Point, NC, Greenville/Spartanburg, SC, Hartford, CT/Springfield, MA, Huntsville/Decatur, AL, Jackson/Vicksburg, MS, Knoxville, TN, Lexington, KY, Little Rock, AK, Louisville, KY, Lubbock, TX, Midland/Odessa, TX, Montgomery, AL, Nashville, TN, Orange County/Santa Ana/Anahiem, CA, Raleigh/Durham, NC, Richmond, VA, Roanoke, VA, Rochester, NY, Salinas/Monterey, CA, Santa Barbara, CA, Shreveport, LA, and Syracuse, NY. Conforming Applications, motions to modify scope, and Answers may be filed by June 16, 1981.
May 19, 1981	39642	Air Wisconsin, Inc., Outagamie County Airport, Appleton, Wisconsin 54911. Application of Air Wisconsin, Inc. pursuant to Section 401 of the Act and Subpart Q of the Board's Procedural Regulations requests the Board to issue a final order awarding it a certificate of public convenience and necessity, of permanent duration, to engage in scheduled air transportation of persons, property and mail between and among all the points on its route system (including Akron/Canton pending in Docket 39556) and Eau Claire, Wisconsin, Green Bay, Wisconsin, La Crosse, Wisconsin, Madison, Wisconsin, Milwaukee, Wisconsin, Mosnee, Wisconsin, and Oshkosh, Wisconsin. Conforming Applications, motions to modify scope, and Answers may be filed by June 16, 1981.
May 20, 1981	39647	Sea Airmotive, Inc., P.O. Box 6003, Anchorage, Alaska 99502. Application of Sea Airmotive, Inc. pursuant to Section 401 of the Act and Subpart Q of Board's Procedural Regulations requests that its certificate of public convenience and necessity be amended by inserting the following new points in alphabetical order into the current linear description for Route 244: Between the terminal point Allakaket, the intermediate points: Ambler, Anaktuvik Pass, Arctic Village, Atgun, Beaver, Bettles, Brevig Mission, Buckland, Cape Lisburne, Cape Yakataga, Central, Chalkyitsak, Chandalar, Chandalar Shelf, Circle, Circle Hot Springs, Coldfoot, Cordova, Deering, Delta Junction, Dietrich, Eagle, Elim, Fairbanks, Farewell, Five Mile, Flat, Fort Yukon, Franklin Bluffs, Galena, Galbraith Lake, Gambell, Golovin, Gulkana, Happy Valley, Huslia, Isabelle Pass, Juneau, Kaltag, Ketchikan, Kiana, Kivalina, Kobuk, Kotzebue, Koyuk, Koyukuk, Lake Minchumina, Livengood, Manley Hot Springs, Medfra, Minto, McGrath, Moses Point, Noatak, Nome, Noorvik, Nulato, Old Man, Petersburg, Point Hope, Point Lay, Prospect Creek, Rampart, Ruby, Savoonga, Selawik, Seward, Shaktoolik, Shishmaref, Shungnak, Sitka, Skwentna, Stevens Village, Takotna, Tanana, Tatalina, Teller, Tin City, Unalakleet, Valdez, Venetie, Wainwright, Wales, White Mountain, Wiseman, Wrangell, and the terminal point Yakutat. Conforming Applications, motions to modify scope, and Answers may be filed by June 17, 1981.
May 21, 1981	39650	Fast Air Carrier Ltds., Suite 330, 7220 NW., 36th Street, Miami, Florida 33166.

Date filed	Docket No.	Description
		Application of Fast Air Carrier Ltda. pursuant to Section 402 of the Act and Subpart Q of the Board's Procedural Regulations requests the Board to issue it a foreign air carrier permit authorizing the carriage of persons, property and mail between a point or points in Chile, on the one hand, and Miami and New York, on the other, via the intermediated points, Bogota, Columbia and Panama City, Panama. Fast Air also requests that the Board contemporaneously issue it a blanket statement of authorization allowing the operation of fifth freedom as well as third and fourth freedom charter flights with DC-10 and B-707 aircraft. Answers may be filed by June 18, 1981.
May 22, 1981	39652	Air Florida, Inc., 3900 NW 79th Avenue, Miami, Florida 33166. Application of Air Florida, Inc. pursuant to Section 401 of the Act and Subpart Q of the Board's Procedural Regulations requests an amendment of its certificate of public convenience and necessity for Route 197 authorizing it to engage in air transportation with respect to persons, property and mail at the points Charleston, South Carolina and Savannah, Georgia. Conforming Applications, motions to modify scope, and Answers may be filed by June 19, 1981.

Phyllis T. Kaylor,
Secretary.

BILLING CODE 6320-01-M

[Order 81-5-138; Docket 29977]

Transportes Aereos Portugueses, E.P.; Authority To Conduct Charter Operations; Order

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 26th day of May 1981.

Transportes Aereos Portugueses, E.P. (TAP) holds a foreign air carrier permit, most recently reissued by the Board in Order 79-8-47, authorizing it to provide foreign air transportation of persons, property, and mail between Lisbon, Portugal, an intermediate point or points in the Azores, the intermediate points Gander, Newfoundland, Canada, and Boston, and the terminal point New York. The permit also authorizes TAP to conduct charter operations under the terms, conditions, and limitations of Part 212 of the Board's Economic Regulations. Under this latter authority, TAP may (unless otherwise provided by the Board under § 212.4(b)) operate charters between points named in its permit ("on-route" charters) without prior Board approval, and may operate charters in other markets ("off-route" charters) upon obtaining a Statement of Authorization from the Board.

By Order 79-12-205, as amended by Order 80-12-151, the staff granted TAP, and a number of other foreign carriers, blanket Statements of Authorization to permit them to operate off-route charters without obtaining prior approval for each flight or series of flights. The staff found that these carriers' applications for off-route charter authority consistently met the criteria for issuance of Statements of Authorization under § 212.6 and were routinely granted. In that order the Board reserved the right to terminate the blanket Statement of Authorization of any subject carrier, on thirty days' notice, if it found such action to be necessary for reciprocity or the public interest.

We find that it is now necessary to terminate TAP's blanket Statement of Authorization and to require the carrier to obtain individual Statements of Authorization to operate off-route charters.[1] In addition, we find it necessary to require TAP to obtain prior approval for all on-route charter flights, in accordance with §§ 212.4(b) and 212.5.[2]

Our actions are prompted by recent events which indicate to us that the present state of comity and reciprocity is sufficiently in doubt to require prior Board scrutiny and approval of TAP's charter flights.[3] Specifically, we note that the Government of Portugal has recently denied two U.S. carriers, Transamerica Airlines, Inc. and The Flying Tiger Line Inc., d/b/a Metro International Airways, authority to operate Public Charter programs in the New York-Portugal market.[4] These actions appear to discriminate against authorized U.S. carriers and charter operators, who should be able to operate charters in any U.S.-Portugal market, just as Portugal's flag carrier is able to do. TAP has been afforded the opportunity to operate charters freely to and from any U.S. point. Reciprocity requires that equivalent opportunities be preserved for flag carriers of the United States.[5]

We will continue to evaluate the state of reciprocity in the days ahead and look forward to a quick resolution of the issues through U.S. government consultations with the Government of Portugal. As a result of our decision here, we will be able to take appropriate action should that prove necessary. We hope further steps will not be needed.

Accordingly,

1. We terminate, effective thirty days after the date of service of this order, the blanket Statement of Authorization granted to TAP by Order 79-12-205, as amended by Order 80-12-151;

2. We notify TAP that effective thirty days after the date of service of this order, it shall not perform any on-route charter trip unless specific authority in the form of a Statement of Authorization to conduct such charter trip has been granted by the Board. In the event that an application for a Statement of Authorization has been properly filed at least thirty days in advance of a proposed flight, notice of the Board's failure to approve either the whole or part of such application will be submitted to the President of the United States at least ten days prior to the date of the proposed flight. Any such failure to approve a timely-filed on-route charter trip application shall be subject to stay or disapproval by the President within ten days after the date of the Board's notification;

3. Our action in ordering paragraph 2 above will apply to Third and Fourth Freedom charters proposed by TAP, upon the effectiveness of the final rule issued by the Board in ER-1220;

4. We will serve copies of this order upon TAP, the Ambassador of Portugal

[1] In ER-1220, adopted May 8, 1981, and effective August 20, 1981, the Board made extensive revisions to Part 212, including the replacement of the present distinction between on- and off-route charters with a framework where Third and Fourth Freedom operations normally would be authorized without prior approval, and where Fifth Freedom operations would normally be subject to prior approval. ER-1220 also provides that the Board may require prior approval for Third and Fourth Freedom operations in the same manner as it may now do for on-route charters. Our action in this order applies equally to TAP's operations under the provisions of the revised Part 212 when it becomes effective; *i.e.*, TAP will be required to obtain prior approval for all Third, Fourth, and Fifth Freedom charters.

[2] Section 212.4(b) provides that the Board may, if the public interest requires and upon thirty days' notice to the foreign carrier involved, require such carrier to obtain prior approval for any on-route charter operated.

[3] Scheduled air services between the United States and Portugal are governed by the Air Transport Agreement between the United States and Portugal of December 6, 1945, as subsequently amended. Charter services, however, are not covered by the agreement. TAP's charter rights are, therefore, strictly dependent upon comity and reciprocity.

[4] The charter programs at issue are PC 80-490, filed by Maptours, Inc. and Metro International, and PC 81-3, filed by Relvas Sunshine Vacations, Inc. and Transamerica. TAP also is participating in the Relvas program, operating flights between Boston and Portugal. The Government of Portugal has not, to our knowledge, restricted U.S. carrier charter operations in markets other than New York-Portugal.

[5] The refusal of the Government of Portugal to authorize charters in the New York market apparently does not apply to TAP. We note that it operated a Portugal-New York Public Charter earlier this month.

in Washington, D.C., Transamerica Airlines, Inc., The Flying Tiger Line Inc., d.b.a. Metro International Airways, and Trans World Airlines, Inc.; and

5. We may amend or revoke this order at any time and without hearing.

This order will be published in the **Federal Register.**

By the Civil Aeronautics Board.[1]

Phyllis T. Kaylor,

Secretary.

DEPARTMENT OF COMMERCE

Maritime Administration

[Maritime Administration Docket No. A-132]

Carriage of Bulk Preference Cargo by Subsidized U.S.-Flag Operator—Review of Vessel Participation; Agency Review

AGENCY: Maritime Administration, Commerce.

ACTION: Notice of Agency Review.

SUMMARY: On June 15, 1979, the Maritime Subsidy Board (Board) issued a Final Opinion and Order approving an application by Aeron Marine Shipping Co. (Aeron) to permit two vessels, the SSs GOLDEN DOLPHIN and GOLDEN ENDEAVOR, to carry lots of not less than 55,000 long tons in the bulk preference cargo trades with operating-differential subsidy at world market rates. In conjunction with this decision, the Board denied the applications of American Shipping, Inc., Pacific Shipping, Inc., Aquarius Marine Co., Atlas Marine Co., and Worth Oil Transport Co., related companies, for the same service. The Board directed that after one year, Aeron's operating experience under the authority granted would be reviewed.

The Maritime Administration staff has completed its review and has submitted a report to the Board. Although the Board has not adopted the staff report, it is making the staff report available to the public for comments.

ADDRESS: Copies of the staff review may be obtained from the Secretary, Maritime Administration, Room 3099-B, Department of Commerce Building, Washington, D.C. 20230. Comments from any interested person desiring to offer views concerning the staff review should be submitted in writing, with 15 copies, to the above address not later than July 31, 1981.

FOR FURTHER INFORMATION CONTACT: F. R. Larson, (202) 377-5532.

By order of the Maritime Subsidy Board.

Dated: May 12, 1981.

Georgia Poumaras Stamas,

Assistant Secretary.

BILLING CODE 3510-15-M

[Docket No. S-690]

Fredericksburg Shipping Co., Keystone Tankship Corp., Keystone Shipping Co.; Applications for ODS by Operators With Interest in Vessels Engaged in Domestic Service

Notice is hereby given that Fredericksburg Shipping Company (Fredericksburg), Keystone Tankship Corporation (Tankship) and Keystone Shipping Co. (Keystone) have filed applications dated January 7, 1981 under the Merchant Marine Act, 1936, as amended (the Act), for operating-differential subsidy with respect to the carriage of bulk commodities in U.S. foreign trade, principally between the United States and the Union of Soviet Socialist Republics. Inasmuch as the applicant companies and/or related persons or firms employ or may employ ships in the domestic intercoastal or coastwise services, written permission of the Maritime subsidy Board under section 805(a) of the Act will be required if the applications for operating-differential subsidy are to be approved.

The written permission requested by the applicants by letter dated May 11, 1981 is as follows:

For Fredericksburg, Tankship and Keystone and affiliated or associated companies to operate up to a total of 31 U.S.-flag vessels in the transport of bulk cargoes within and between the following U.S. coastal areas, with free interchange of vessels among those areas, and with the maximum number of vessels employed in the areas at any one time to be as specified:

U.S. Gulf-Atlantic Coastwise—17 vessels
U.S. Gulf-Atlantic Puerto Rico—2 vessels
U.S. Atlantic-Gulf Intercoastal (including Alaska and Hawaii)—10 vessels
Pacific Coast—Alaska—Hawaii—15 vessels

Such written permission is required under section 805(a) of the Act notwithstanding the fact that a voyage in the proposed service on which the vessels engaged in domestic intercoastal or coastwise trade would not be eligible for subsidy.

Any person, firm, or corporation having any interest in such applications (within the meaning of section 805(a)) and desiring to submit comments concerning the applications must file written comments in triplicate with the Secretary, Maritime Subsidy Board, by close of business on June 26, 1981 together with petition for leave to intervene. The petition shall state clearly and concisely the grounds of interest, and the alleged facts relied on for relief.

If no petitions for leave to intervene are recieved within the specified time or if it is determined that petitions filed do not demonstrate sufficient interest to warrant a hearing, the Maritime Subsidy Board will take such action as may be deemed appropriate.

In the event petitions regarding the relevant section 805(a) issues are received from parties with standing to be heard, a hearing will be held. The purpose of the hearing will be to receive evidence under section 805(a) relative to whether the proposed operations (a) will result in unfair competition to any person, firm, or corporation operating exclusively in the coastwise or intercoastal service, or (b) would be prejudicial to the objects and policy of the Act relative to domestic trade operations.

(Catalog of Federal Domestic Assistance Program No. 11.504 Operating-Differential Subsidies (ODS))

By order of the Maritime Subsidy Board.

Dated: May 22, 1981.

Robert J. Patton, Jr.,

Secretary.

BILLING CODE 3510-15-M

National Oceanic and Atmospheric Administration

Public Hearing on the Mullica River Estuarine Sanctuary; Draft Environmental Impact Statement

Notice is hereby given that the Office of Coastal Zone Management (OCZM), National Oceanic and Atmospheric Administration (NOAA), U.S. Department of Commerce, will hold a public hearing for the purpose of receiving comments on the Draft Environmental Impact Statement (DEIS) prepared on the proposed Mullica River Estuarine Sanctuary.

The hearing will be held Tuesday, July 7, 1981, 2:30 and 7:30 p.m. at the following location:

Stockton State College, "A" Wing—Lecture Hall, Pomona, New Jersey.

The views of interested persons and organizations on the adequacy of the impact statement and the proposed Mullica River Estuarine Sanctuary are solicited, and may be expressed orally or in written statements. Presentations will be scheduled on a first-come, first-heard basis, and may be limited to a maximum of 5 minutes. This time allotment may be extended before the hearing when the number of speakers can be determined. A verbatim transcript of the hearing will be prepared by the State of New Jersey for their purposes. However, the OCZM/NOAA staff will record and summarize the comments for the Final Environmental Impact Statement (FEIS). All comments received at the hearing and those submitted in writing will be considered in the preparation of the FEIS.

The comment period for this draft environmental impact statement will end on Monday, July 20, 1981.

As part of the procedures leading toward approval of the Mullica River Estuarine Sanctuary, a Final Environmental Impact Statement, reflecting consideration of these comments, will be prepared pursuant to the National Environmental Policy Act of 1969 and its implementing regulations. All written comments received by OCZM prior to the deadline will be included in the FEIS.

Copies of the DEIS may be obtained from the Office of Coastal Zone Management, 3300 Whitehaven Street, NW., Washington, D.C. 20235 (telephone: 202/634-4253).

(Federal Domestic Assistance Catalog No. 11.420, Coastal Zone Management Estuarine Sanctuaries)

Dated: May 19, 1981.

William Matuszeski,

Acting Deputy Assistant Administrator for Office of Coastal Zone Management.

[FR Doc. 81-16213 Filed 5-29-81; 8:45 am]

BILLING CODE 3510-08-M

DEPARTMENT OF ENERGY

Proposed Contract Award

AGENCY: Department of Energy.

ACTION: Notice of Proposed Contract Award.

SUMMARY: In accordance with U.S. Department of Energy (DOE) Procurement Regulations, Title 41, Subpart 9-1.5490, DOE gives public notice that a contract award, recognizing the existence of potential organizational conflicts of interest, is in the best interest of the United States.

FOR FURTHER INFORMATION CONTACT:

Linda Feeney, U.S. Department of Energy, Office of Procurement Operations, PR-521, 1000 Independence Avenue, S.W., Washington, D.C. 20585, (202) 252-4296

Richard Weiner, U.S. Department of Energy, Division of Power Supply and

Reliability, RG (EP)–73, 2000 M Street, N.W., Washington, D.C. 20461, (202) 653–3949

SUPPLEMENTARY INFORMATION: Upon the basis of the following findings, mitigation, and determination, the proposed contract described below is being awarded, recognizing the existence of potential organizational conflicts of interest pursuant to the authority of 41 CFR 9–1.5409(a)(3).

1. Findings

The Division of Power Supply and Reliability (DPSR) administers electric utility programs related to the planning, design, and operation of an adequate, reliable, and cost-effective bulk power supply system for the United States.

Program goals are to promote (1) reliability and adequacy of bulk electric power supplies, by encouraging strong interconnections, diversity in production, and reserve margins suffcient to ensure both short- and long-term response capability and (2) economy in the production of electricity, especially in the utilization of fuels.

To further these goals, the DPSR requires expert technical assistance to supplement staff resources dedicated to the analysis of electric power utility systems.

Therefore, a competitive procurement (DE–RP01–80RG–10365, "Technical and Analytical Support to the Division of Power Supply and Reliability") was initiated during 1980 to solicit contractor assistance.

Commonwealth Associates Inc. (CAI) has been chosen for contract negotiation and award, as a result of its successful response to this RFP.

2. Specific Need

The objective of the proposed contractor effort is to provide technical and analytical support to the DPSR. The nation's bulk power supply shall be examined in order to assure its continuing reliability, economy, safety, and environmental acceptability in the production and delivery of electrical power. Specifically, this support will result in:

- Better understanding of economic/resource allocation/environmental optima
- Insights into economic tradeoffs in large system operation
- Improved data bases

The contractor will be expected to furnish personnel, facilities, services, materials, and travel necessary to provide electric utility planning, development, and operating studies.

The DPSR plans to use the work product primarily to support its efforts in assuring the nation an adequate, reliable, cost-effective bulk power supply system, and promoting the national goal of reducing premium fuels consumption.

3. Funding and Performance

The contract period will be for one year, with two one-year options. The contract is to be structured to provide for the issuance of specific task orders describing the work to be performed and the expected deliverables. The contractor will be required to submit monthly performance reports for all tasks. The principal place of performance will be the contractor's offices and facilities.

4. Disclosure and Conclusion

In accordance with 41 CFR 9–1.5405, CAI has provided statements disclosing relevant information concerning its interests related to the work to be performed, and bearing on whether it has possible organizational conflicts of interest (1) with respect to being able to render impartial, technically sound and objective assistance or advice, or (2) which may give it an unfair competitive advantage.

Based on an evaluation of the facts contained in the disclosure statement, which indicates that CAI (considering all "affiliates") is heavily and diversely involved in providing engineering consulting services to a large number of energy firms, it has been determined that CAI has potential organizational conflicts of interest with regard to the work required by the DPSR, in accordance with 41 CFR 9–1.5409(a).

Furthermore, it is not possible to avoid the potential organizational conflicts of interest by the inclusion of appropriate conditions in the resulting contract, pursuant to 41 CFR 9–1.5409(a)(2).

In addition, the contracting officer has determined that possible organizational conflicts of interest exist with respect to all other firms which fell within the competitive range for award of this contract.

5. Mitigation

The DPSR will provide absolute constraints within which the contractor will operate. The nature and extent of the contractor's performance will be clearly defined and all conclusions and recommendations will be made independently by the DPSR. In addition, all pertinent contractor analysis will become a part of the public record and thus will be subject to close third-party scrutiny for the validity of the data and technical findings presented.

The contract awarded under this procurement will include the Organizational Conflicts of Interest Special Clause (41 CFR 9–1.5408–2(b)), which will apply to both prime and subcontractors. The primary purpose of this clause is to aid in ensuring that the contractor is not biased because of its past, present, or currently planned interests (financial, contractual, organizational, or otherwise) which relate to the work under this contract, and does not obtain any unfair competitive advantage over other parties by virtue of its performance of this contract.

Conflict of interest determinations for subcontractors will be made by DOE prior to award to any potential subcontractors.

6. Determination

In light of the above Findings and Mitigation, and in accordance with 41 CFR 9–1.5409(a)(3), the proposed contract award is in the best interest of the United States.

Dated: May 26, 1981.

Barton R. House,

Acting Assistant Secretary for Environmental Protection, Safety, and Emergency Preparedness.

[FR Doc. 81–16186 Filed 5–29–81; 8:45 am]

BILLING CODE 6450–01–M

Economic Regulatory Administration

Calvin Petroleum Corp.; Action Taken on Consent Order

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of action taken and opportunity for comment on Consent Order.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) announces action taken to execute a Consent Order and provides an opportunity for comment on the Consent Order and on potential claims against the refunds deposited in an escrow account established pursuant to the Consent Order.

DATES: Effective date: May 14, 1981. Comments by: July 1, 1981.

ADDRESS: Send comments to: Kenneth E. Merica, District Manager of Enforcement, Economic Regulatory Administration, P.O. Box 26247, Belmar Branch, Lakewood, Colorado 80226.

FOR FURTHER INFORMATION CONTACT: Kenneth E. Merica, District Manager of Enforcement, Economic Regulatory Administration, P.O. Box 26247, Belmar

Branch, Lakewood, Colorado 80226, (303) 234–3195.

SUPPLEMENTARY INFORMATION: On May 14, 1981, the Office of Enforcement executed a Consent Order with Calvin Petroleum Corporation (CPC) of Denver, Colorado. Under 10 C.F.R. 205.199J(b), a Consent Order which involves a sum of less then $500,000 in the aggregate, excluding penalties and interest, becomes effective upon its execution.

I. The Consent Order

CPC, with its home office located in Denver, Colorado, is a crude oil producer as defined in 10 C.F.R. 212.31 and is subject to the Mandatory Petroleum Price and Allocation Regulations at 10 C.F.R., Parts 210, 211 and 212. To resolve certain civil actions which could be brought by the Office of Enforcement of the Economic Regulatory Administration as a result of its audit of CPC, the Office of Enforcement of ERA and CPC entered into a Consent Order, the significant terms of which are as follows:

1. The ERA alleges that during the audit period certain volumes of crude oil produced and sold from the John DiTirro (Di-Ta) #1 and #2 Lease were improperly characterized as "stripper well" crude oil exempt from the "old" oil or "lower tier" ceiling price rule contained in 10 C.F.R. § 212.73. The ERA further alleged that during the period January 1, 1976 through September 30, 1980 (audit period) certain sales of crude oil were made by CPC at prices in excess of the maximum allowable prices in violation of 10 C.F.R. Part 212, Subpart D.

2. CPC has agreed to pay $45,000 into a special fund administered by ERA in settlement of the alleged overcharges to its customers during that period and possible further overcharges through January 28, 1981.

3. The provisions of 10 C.F.R. 205.199J are applicable to the Consent Order.

II. Disposition of Refunded Overcharges

In this Consent Order, CPC agrees to refund, in full settlement of any civil liability with respect to actions which might be brought by the Office of Enforcement, ERA, arising out of the transactions specified in I.2. above, the sum of $45,000, on or before June 15, 1981. Refund of those overcharges will be in the form of a certified check made payable to the United States Department of Energy and will be delivered to the Assistant Administrator for Enforcement, ERA. These funds will remain in a suitable account pending the determination of their proper disposition.

The DOE intends to distribute the refund amounts in a just and equitable manner in accordance with applicable laws and regulations. Accordingly, distribution of such refunded overcharges requires that only those "persons" (as defined at 10 C.F.R. 205.2) who actually suffered a loss as a result of the transactions described in the Consent Order receive appropriate refunds. Because of the petroleum industry's complex marketing system, it is likely that overcharges have been passed through as higher prices to subsequent purchasers or offset through devices such as the Old Oil Allocations (Entitlements) Program, 10 C.F.R. 211.67. In fact, the adverse effects of the overcharges may have become so diffused that it is a practical impossibility to identify specific, adversely affected persons, in which case disposition of the refunds will be made in the general public interest by an appropriate means such as payment to the Treasury of the United States pursuant to 10 C.F.R. 205.199I(a).

III. Submission of Written Comments

A. *Potential Claimants:* Interested persons who believe that they have a claim to all or a portion of the settlement amount specified in I.2., above, should provide written notification of the claim to the ERA at this time. Proof of claims is not now being required. Written notification to the ERA at this time is requested primarily for the purpose of identifying valid potential claims to the refund amount. After potential claims are identified, procedures for the making of proof of claims may be established. Failure by a person to provide written notification of a potential claim within the comment period for this Notice may result in the DOE irrevocably disbursing the funds to other claimants or to the general public interest.

B. *Other Comments:* The ERA invites interested persons to comment on the terms, conditions, or procedural aspects of this Consent Order.

You should send your comments or written notifications of a claim to Kenneth E. Merica, District Manager of Enforcement Economic Regulatory Administration, P.O. Box 26247, Belmar Branch, Lakewood, Colorado, 80226. You may obtain a free copy of this Consent Order, with proprietary information deleted, by writing to the same address or by calling (303) 234–3195.

You should identify your comments or written notification of a claim on the outside of your envelope and on the documents you submmit with the designation, "Comments on Calvin Petroleum Corporation Consent Order." We will consider all comments we receive by 4:30 p.m., local time, on July 1, 1981. You should identify any information or data which, in your opinion, is confidential and submit it in accordance with the procedures in 10 C.F.R. 205.9(f) and 10 C.F.R 1004.11.

Issued in Lakewood, Colorado, on the 20th day of May 1981.

Kenneth E. Merica,

District Manager, Rocky Mountain District, Economic Regulatory Administration.

BILLING CODE 6450-01-M

Payne-Johnston and Byars; Proposed Remedial Order

Pursuant to 10 CFR 205.192(c), the Economic Regulatory Administration (ERA) of the Department of Energy hereby gives notice of a Proposed Remedial Order which was issued to Payne-Johnston and Byars. This Proposed Remedial Order charges Payne-Johnston and Byars with pricing violations in the amount of $97,734.40, connected with the sale of crude oil at prices in excess of those permitted by 10 CFR Part 212, Subpart D during the time period September 1973 through June 1980 in the State of Texas.

A copy of the Proposed Remedial Order, with confidential information deleted, may be obtained from Wayne I. Tucker, District Manager of Enforcement, southwest District office, Department of Energy, P.O. Box 35228, Dallas, Texas 75235—(214) 767–7745. On or before June 16, 1981, any aggrieved person may file a Notice of Objection with the Office of Hearings and Appeals, 2000 M Street, N.W., Washington, D.C. 20461, in accordance with 10 CFR 205.193.

Issued in Dallas, Texas on the 20th day of May 1981.

Wayne I. Tucker,

District Manager for Enforcement, Southwest District, Economic Regulatory Administration.

[Docket Nos. ERA-R-80-39, ERA-R-80-40]

Withdrawal of Proposed Voluntary Guidelines for the Advertising Standard and the Master Metering Standard Under the Public Utility Regulatory Policies Act of 1978

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Withdrawal of proposed guidelines.

SUMMARY: The Economic Regulatory Administration (ERA) is withdrawing its proposed voluntary guidelines regarding advertising and use of master metering by electric utilities. The proposed guideline regarding advertising was issued on November 10, 1980 (45 FR 76370, November 18, 1980). The proposed guideline regarding the use of master metering was issued on December 12, 1980 (45 FR 84936, December 23, 1980). These proposed guidelines were issued pursuant to section 131 of the Public Utility Regulatory Policies Act of 1978 (PURPA).

FOR FURTHER INFORMATION CONTACT:

Stephen S. Skjei, Division of Rates and Energy Management, Office of Program Operations, Economic Regulatory Administration, Department of Energy, 2000 M Street, N.W., Room 4016 D, Washington, D.C. 20461, Telephone (202) 653–3913.

Jack Vandenberg, Office of Public Information, Economic Regulatory Administration, Department of Energy, 2000 M Street, N.W., Room B–110, Washington, D.C. 20461, Telephone (202) 653–4055.

Arthur Perry Bruder, Office of the General Counsel, Department of Energy, 1000 Independence Avenue, S.W., Room 6B–144, Washington, D.C., Telephone (202) 252–9516.

Cynthia Ford, Office of Public Hearings Management, Economic Regulatory Administration, Department of Energy, 2000 M Street, N.W., Room B–210, Washington, D.C. 20461, Telephone (202) 653–3971.

SUPPLEMENTARY INFORMATION: On November 10, 1980, ERA issued for public comment, pursuant to PURPA section 131, a proposed voluntary guideline respecting the advertising standard established by PURPA section 113(b)(5). The purpose of the proposed guideline was to present the Department of Energy's (DOE) position on national energy problems which might be affected by regulatory authorities' and nonregulated utilities' decisions regarding utility advertising. Toward this end, the proposed guideline offered direction on those provisions of the standard concerned with (a) conservation oriented advertising (PURPA sections 115(h)(2) (A) and (B)), and (b) advertising which promotes the use of energy efficient appliances, equipment or services (PURPA section 115(h)(2)(E)).

Data submitted by State regulatory authorities relative to the PURPA annual reporting requirements revealed that as of June 30, 1980, a majority (36) had already completed their hearings on the standard. Moreover, opportunities exist for DOE to convey concerns about the implications of utility advertising policy through other program activities. As a consequence, ERA has concluded that it would not be productive to proceed to a final guideline. Accordingly, no final guideline will be issued, and the proposed guideline is hereby withdrawn.

On December 12, 1980, ERA issued for public comment, pursuant to PURPA section 131, a proposed voluntary guideline respecting the master metering standard established by PURPA section 113(b)(1). The purpose of the proposed guideline was to present the Department of Energy's (DOE) position on certain issues which should be addressed by regulatory authorities and nonregulated utilities in their consideration of the master metering standard. Toward this end, the proposed guideline offered direction on those provisions of the standard concerned with (a) the impact on the three purposes of PURPA, (b) economic factors, and (c) building categories and restrictions on master metering.

At least 31 State regulatory authorities, according to their reports to DOE, had completed hearings on the master metering standard as of June 30, 1980. In addition, DOE has previously published technical assistance materials which address the technical aspects of the master metering standard, and in particular, the relative advantages of individual and master metering. For these reasons, ERA has concluded that it would not be productive to proceed to a final guideline. Accordingly, no final guideline will be issued, and the proposed guideline is hereby withdrawn.

(Public Utility Regulatory Policies Act of 1978, Pub. L. 95–617, 92 Stat. 3117 *et seq.* (16 U.S.C. 2601 *et seq.*); Department of Energy Organization Act, Pub. L. 95–91 (42 U.S.C. 7101 *et seq.*))

Issued in Washington, D.C., on May 20, 1981.

Barton R. House,

Acting Administrator, Economic Regulatory Administration.

BILLING CODE 6450–01–M

Conlo Service, Inc.; Action Taken on Consent Order

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of action taken and opportunity for comment on consent order.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) announces action taken to execute a Consent Order and provides an opportunity for public comment on the Consent Order and on potential claims against the refunds deposited in an escrow account established pursuant to the Consent Order.

DATES: Effective date: March 20, 1981.

COMMENTS BY: July 1, 1981.

ADDRESS: Send comments to: Edward Momorella, District Manager, Northeast District, 1421 Cherry Street, Philadelphia, Pennsylvania 19102.

FOR FURTHER INFORMATION CONTACT: Edward Momorella, District Manager, Northeast District, 1421 Cherry Street, Philadelphia, Pennsylvania 19102, 215/597–2633.

SUPPLEMENTARY INFORMATION: On March 20, 1981, the Office of Enforcement of the ERA executed a Consent Order with Conlo Service, Inc. Under 10 CFR Sec. 205.199J(b), a Consent Order which involves a sum of less than $500,000 in the aggregate, excluding penalties and interest, becomes effective upon its execution.

I. The Consent Order

Conlo Service, Inc. ("Conlo"), with its home offices located in Farmingdale, New York, is a firm engaged in the resale and retail sale of motor gasoline and is subject to the Mandatory Petroleum Price and Allocation Regulations at 10 CFR, Parts 210, 211, 212. To resolve certain civil actions which could be brought by the Office of Enforcement of the Economic Regulatory Administration as a result of its audit of Conlo, the Office of Enforcement of the ERA, and Conlo entered into a Consent Order, the significant terms of which are as follows:

1. During the period April 1, 1979 through September 30, 1979 (audit period), Conlo allegedly overcharged its commercial end-user and retailer classes of purchaser on sales of motor gasoline.

2. It is alleged that Conlo incorrectly computed its maximum legal selling price in its sales of regular and unleaded gasoline to the classes of purchaser listed above during the audit period. As a result, Conlo charged prices in excess of those permitted under 10 CFR 212.93(a) and 6 CFR 150.359(c)(1).

3. This Consent Order constitutes neither an admission by Conlo that it has violated the Mandatory Petroleum Price Regulations nor a finding by ERA that Conlo has violated such regulations.

4. The provisions of 10 CFR Sec. 205–199J, including the publication of this Notice, are applicable to the Consent Order.

II. Disposition of Refunded Overcharges

In this Consent Order, Conlo agrees to refund, in full settlement of any civil liability with respect to actions which might be brought by the Office of Enforcement, ERA, arising out of the transactions specified in I.1. above, the sum of $20,022.00 over the period of twelve (12) months.

The amount to be refunded to each class is as follows:

Class I—Regular—Commercial End-user	$10,112
Classes II and IV—Regular and Unleaded—Retailer	4,854
Class III—Unleaded—Commercial End-user	5,056

In order to accomplish the refund of overcharges to Classes I and III Conlo will issue refund checks or credit memoranda to the affected customers during the refund period. In order to accomplish the refund of overcharges to Classes II and IV, Conlo will issue, during the refund period, certified checks made payable to the United States Department of Energy and delivered to the Assistant Administrator for Enforcement, ERA. These funds will remain in a suitable account pending the determination of their proper disposition.

The DOE intends to distribute the Classes II and IV refund amounts in a just and equitable manner in accordance with applicable laws and regulations. Accordingly, distribution of such refunded overcharges requires that only those "persons" (as defined at 10 CFR Sec. 205.2) who actually suffered a loss as a result of the transactions described in the Consent Order receive appropriate refunds. Because of the petroleum industry's complex marketing system, it is likely that overcharges have either been passed through as higher prices to subsequent purchasers or offset through devices such as the Old Oil Allocation (Entitlements) Program, 10 CFR Sec. 211.67. In fact, the adverse effects of the overcharges may have become so diffused that is a practical impossibility to identify specific, adversely affected persons, in which case disposition of the Classes II and IV refunds will be made in the general public interest by an appropriate means such as payment to the Treasury of the United States pursuant to 10 CFR 205.199I(a).

III. Submission of Written Comments

A. *Potential Claimants:* Interested persons who believe that they have a claim to all or a portion of the Classes II and IV refund amounts should provide written notification of the claim to the ERA at this time. Proof of claims is not now being required. Written notification to the ERA at this time is requested primarily for the purpose of identifying valid potential claims to this refund amount. After potential claims are identified, procedures for the making of proof of claims may be established. Failure by a person to provide written notification of a potential claim within the comment period for this Notice may result in the DOE irrevocably disbursing the funds to other claimants or to the general public interest.

B. *Other Comments:* The ERA invites interested persons to comment on the terms, conditions, or procedural aspects of this Consent Order. Such comments will be considered solely in connection with DOE's right to rescind or modify the Consent Order upon the discovery of new evidence or upon petition by Conlo.

You should send your comments or written notification of a claim to Edward Momorella, District Manager, Northeast District, 1421 Cherry Street, Philadelphia, Pennsylvania 19102. You may obtain a free copy of this Consent Order by writing to the same address or by calling 215/597–2633.

You should identify your comments or written notification of a claim on the outside of your envelope and on the documents you submit with the designation, "Comments on Conlo Service, Inc. Consent Order". We will consider all comments we receive by 4:30 p.m., local time, on July 1, 1981.

You should identify any information or data which, in your opinion, is confidential and submit it in accordance with the procedures in 10 CFR 205.9(f).

Issued in Philadelphia, Pennsylvania, on the 11th day of May, 1981.

Edward Momorella,

Northeast District Manager of Enforcement.

BILLING CODE 6450-01-M

Cross Oil & Refining Co. of Arkansas; Action Taken on Consent Order

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of action taken on Consent Order.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) announces notice of a final Consent Order.

EFFECTIVE DATE: May 26, 1981.

FOR FURTHER INFORMATION CONTACT: Mr. Stanley S. Mills, Program Manager for Entitlements, Office of Enforcement, 2000 M Street, NW., Washington, D.C. 20841, (202) 653–3548.

SUPPLEMENTARY INFORMATION: On April 9, 1981, 46 Fed. Reg. 21229 (1981), the Office of Enforcement of the ERA published notification in the **Federal Register** that it had executed a proposed Consent Order with Cross Oil and Refining Company of Arkansas on March 27, 1981 which would not become effective sooner than 30 days after publication. Pursuant to 10 CFR § 205.199J(c), interested persons were invited to submit comments concerning the terms, conditions or procedural aspects of the proposed Consent Order.

Two comments were received. Both commentors recommended that the refunds be effected through the Entitlements Program. The terms of the proposed Consent Order would not prohibit this distribution of the refunds. The proposed Consent Order, therefore, was finanlized and made effective on May 26, 1981.

Robert D. Gerring,

Director, Program Operations Division, Office of Enforcement, Economic Regulatory Administration.

BILLING CODE 6450-01-M

Gas Systems, Inc.; Action Taken on Consent Order

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of action taken and opportunity for comment on consent order.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) announces action taken to execute a Consent Order and provides an opportunity for public comment on the Consent Order and on potential claims against the refunds deposited in an escrow account established pursuant to the Consent Order.

DATES: Effective date: May 14, 1981.

COMMENTS BY: July 1, 1981.

ADDRESS: Send comments to: Wayne I. Tucker, District Manager of Enforcement, Southwest District Office, Department of Energy, P.O. Box 35228, Dallas, Texas 75235.

FOR FURTHER INFORMATION CONTACT: Wayne I. Tucker, District Manager of Enforcement, Southwest District Office, Department of Energy, P.O. Box 35228, Dallas, Texas 75235 [phone] 214/767–7745.

SUPPLEMENTARY INFORMATION: On May 14, 1981, the Office of Enforcement of

the ERA executed a Consent Order with Gas Systems, Inc., of Fort Worth, Texas. Under 10 CFR 205.199J(b), a Consent Order which involves a sum of less than $500,000 in the aggregate, excluding penalties and interest, becomes effective upon its execution.

Because the DOE and Gas Systems, Inc., (Gas Systems) wish to expeditiously resolve this matter as agreed and to avoid delay in the payment of refunds, the DOE has determined that it is in the public interest to make the Consent Order with Gas Systems effective as of the date of its execution by the DOE and Gas Systems.

I. The Consent Order

Gas Systems, with its home office located in Fort Worth, Texas, is a firm which engaged in the production and sale of natural gas liquids (NGL's) and natural gas liquid products (NGLP's), and was subject to the Mandatory Petroleum Price and Allocation Regulations at 10 CFR, Parts 210, 211, 212. To resolve certain civil actions which could be brought by the Office of Enforcement of the Economic Regulatory Administration as a result of its audit of Gas Systems, the Office of Enforcement, ERA, and Gas Systems entered into a Consent Order, the significant terms of which are as follows:

1. The period covered by the Consent Order was September 1, 1973 through October 31, 1976, and it included all sales of NGL's and NGLP's made by Gas Systems during that period.

2. Alleged overcharges on these sales were due to Gas Systems not applying the provisions of 10 CFR Part 212 Subpart K, in a manner acceptable to the DOE.

3. The Consent Order does not constitute an admission by Gas Systems that ERA regulations have been violated.

4. The Consent Order is a settlement of the alleged overcharges which were the subject of the Notice of Probable Violation issued to Gas Systems on August 22, 1980.

5. Gas Systems agrees to refund to the DOE $45,000 within 30 days of the effective date of the Consent Order.

6. The provisions of 10 CFR 205.199J, including the publication of this Notice, are applicable to the Consent Order.

II. Disposition of Refunded Overcharges

In this Consent Order, Gas Systems agrees to refund, in full settlement of any civil liability with respect to actions which might be brought by the Office of Enforcement, ERA, arising out of the transactions specified in I. 1. above, the sum of $44,500 in the manner specified in I. 5. above, plus $500 in penalty. Refunded overcharges will be in the form of a certified check made payable to the United States Department of Energy and will be delivered to the Assistant Administrator for Enforcement, ERA. These funds will remain in a suitable account pending the determination of their proper disposition.

The DOE intends to distribute the refund amounts in a just and equitable manner in accordance with applicable laws and regulations. Accordingly, distribution of such refunded overcharges requires that only those "persons" (as defined in 10 CFR 205.2) who actually suffered a loss as a result of the transactions described in the Consent Order receive appropriate refunds. Because of the petroleum industry's complex marketing system, it is likely that overcharges may have been passed through as higher prices to subsequent purchasers. In fact, the adverse effects of the overcharges may have become so diffused that it is a practical impossibility to identify specific, adversely affected persons, in which case disposition of the refunds will be made in the general public interest by an appropriate means such as payment to the Treasury of the United States pursuant to 10 CFR 205.199I(a).

III. Submission of Written Comments

A. *Potential Claimants:* Interested persons who believe that they have a claim to all or a portion of the refund amount should provide written notification of the claim to the ERA at this time. Proof of claim is not now being required. Written notification to the ERA at this time is requested primarily for the purpose of identifying valid potential claims to the refund amount. After potential claims are identified, procedures for the making of proof of claims may be established. Failure by a person to provide written notification of a potential claim within the comment period for this Notice may result in the DOE irrevocably disbursing the funds to other claimants or to the general public interest.

B. *Other Comments:* The ERA invites interested persons to comment on the terms, conditions, or procedural aspects of this Consent Order.

You should send your comments or written notification of a claim, to Wayne I. Tucker, District Manager of Enforcement, Southwest District Office, Department of Energy, P.O. Box 35228, Dallas, Texas. You may obtain a free copy of this Consent Order by writing to the same address or by calling 214/767-7745.

You should identify your comments or written notification of a claim on the outside of your envelope and on the documents you submit with the designation, "Comments on Gas Systems Consent Order." We will consider all comments we receive by 4:30 p.m. local time, on July 1, 1981. You should identify any information or data which, in your opinion, is confidential and submit it in accordance with the procedures in 10 CFR 205.9(f).

Issued in Dallas, Texas, on the 19th day of May, 1981.

Wayne I. Tucker,

Southwest District Manager, Economic Regulatory Administration.

[FR Doc. 81-16306 Filed 5-29-81; 8:45 am]

BILLING CODE 6450-01-M

Summit Transportation Co.; Action Taken on Consent Order

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of action taken on consent order.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) announces notice of filing a Petition for the Implementation of Special Refund Procedures for refunds received pursuant to a Consent Order.

DATE: Petition submitted to the Office of Hearings and Appeals: May 20, 1981.

FOR FURTHER INFORMATION CONTACT: Crude Producers Branch, Attn: Larry Harris, Office of Enforcement, Room 5002, 2000 M Street, NW., Washington, D.C. 20461, Telephone No. (202) 653-3517.

SUPPLEMENTARY INFORMATION: On March 4, 1981, the Office of Enforcement of the ERA published notification in the **Federal Register** that it executed a Consent Order with Summit Transportation Company (Summit) of Houston, Texas, on January 6, 1981, 46 Fed. Reg. 15203 (1981). Interested persons were invited to submit comments concerning the terms, conditions or procedural aspects of the Consent Order. In addition, persons who believe they have a claim to all or a portion of the refund of overcharges paid by Summit pursuant to the Consent Order were requested to submit notice of their claims to the ERA.

Although interested persons were invited to submit comments regarding the Consent Order to the DOE, no comments were received. Therefore, the Consent Order was issued as signed.

Pursuant to the Consent Order, Summit refunded the sum of $17,000,000

including interest by checks made payable to the United States Department of Energy. This sum received by DOE has been placed into a suitable account pending determination of its proper distribution.

Action Taken

The ERA is unable readily to identify the persons entitled to receive the $17,000,000 including interest or to ascertain the amounts of refunds that such persons are entitled to receive. Therefore, the ERA has petitioned the Office of Hearings and Appeals (OHA) on May 20, 1981 to implement Special Refund Procedures pursuant to 10 CFR Prt 205, Subpart V, 10 CFR 205.280 *et seq.* to determine the identity of persons entitled to the refunds and the amounts owing to each of them. Persons who believe they are entitled to all or a portion of the refunds should comply with the procedures of 10 CFR Part 205, Subpart V.

Issued in Washington, D.C. on the 22nd day of May, 1981.

Robert D. Gerring,

Director, Program Operations Division.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket Nos. CP81-315-000; CP80-225]

Algonquin Gas Transmission Co.; Application

May 28, 1981.

Take notice that on May 1, 1981, Algonquin Gas Transmission Company (Algonquin), 1284 Soldiers Field Road, Boston, Massachusetts 02135, filed in Docket No. CP81-315-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing it to: (i) construct and operate facilities necessary to convert a portion of the storage contract demand presently rendered pursuant to Algonquin's Rate Schedule STB (Backup Storage Service) to a firm basis; and (ii) render long-term firm STB storage service pursuant to its proposed Rate Schedule STB (Firm and Backup Storage Service). Applicant also requests amendment of the June 16, 1980 order issued in Docket No. CP80-225 pursuant to Section 7(c) of the Natural Gas Act so as to modify the terms of its existing certificate authorizing service under existing Rate Schedule STB (Backup Storage Service). Algonquin's proposals are more fully set forth in the application which is on file with the Commission and open to public inspection.

Algonquin states that the other parties involved in the rendition of service under proposed Rate Schedule STB (Firm and Backup Storage Service) by Algonquin to its participating customers are:

—Texas Eastern Transmission Corporation (Texas Eastern), which would transport the customers' gas to and from storage, rendering service to Algonquin pursuant to Texas Eastern's Rate Schedule SS-II; and

—Consolidated Gas Supply Corporation (Consolidated), which owns and operates underground storage facilities to be utilized for such service, and which has contracted with Texas Eastern to render storage service for the 20-year term of this proposal.

It is stated that, by this proposal, Algonquin proposes to convert to firm service a portion of the existing STB storage contract demand by the addition of certain facilities and the modification of certain other facilities, thus making possible the firm delivery, to STB customers desiring such service, of storage quantities in addition to the firm quantities deliverable pursuant to Algonquin's Rate Schedules WS-1 and F-1. Algonquin says the term of service would not change, which term, as authorized by the order issued June 16, 1980, in Docket No. CP80-255, extends to April 15, 2000. Further, Algonquin says the portion of the present backup storage service that would be converted to firm service commencing with the 1982-83 winter season is 57,055 MMBtu per day.

It is stated that the following customers have executed Precedent Letters for service under Algonquin's proposed Rate Schedule STB (Firm and Backup Storage Service):

Customer	Interim firm daily portion (1 yr) million Btu
Boston Gas Co	10,428
Cape Cod Gas Co	1,052
Commonwealth Gas Co	2,185
The Connecticut Gas Co	1,052
Connecticut Natural Gas Corp	1,475
Fall River Gas Co	855
City of Norwich, Connecticut	208
Providence Gas Company	2,960
Total	20,000

In addition, Algonquin states that it proposes to provide 20 billion Btu per day of firm STB deliveries during the 1981-82 winter season interim period, and that during such interim period, each customer would be entitled to a *pro rata* share of its firm daily portion of storage demand, as follows:

Customer	Storage demands (million Btu)	
	Total	Firm daily portion of storage demand
Boston Gas Co	31,818	29,750
Cape Cod Gas Co	10,000	3,000
Commonwealth Gas Co	8,666	6,233
The Connecticut Gas Co	6,200	3,000
Connecticut Natural Gas Corp	4,500	4,207
Fall River Gas Co	2,000	1,870
City of Norwich, Connecticut	620	580
Providence Gas Company	9,000	8,415
Total	70,904	57,055

Algonquin states that it must construct additional facilities and modify certain other facilities to effectuate firm storage deliveries. The new and modified facilities are estimated, according to Algonquin, to cost $44.9 million and would include the installation of 21.1 miles of 30-inch pipeline, the installation of one 3830 horsepower compressor at each of Algonquin's Stony Point, New York and Cromwell, Connecticut compressor stations, retesting of a 10-mile segment of its system, the installation of regulators to control downstream pressures and the modification of certain existing measurement stations. Algonquin states that the proposed facilities would be financed during 1981 and 1982 through bank loans and other short-term loans to be followed by long-term financing arrangments when those can be completed.

Algonquin states that, to the extent that firm contract demand storage service is now being proposed, it is proposing new initial demand charges reflecting, in addition to the existing charges for backup storage service, charges designed to recover the costs of rendering such firm service. The initial rate which Algonquin proposes to charge for the proposed firm STB service reflects, it is said, two new charges in addition to the charges reflected in the presently effective STB (Backup Storage Service) rate. These charges are:

(1) For reimbursement of payments to Texas Eastern, Algonquin proposes to add a new charge designed to pass on to the firm STB customers the Texas Eastern demand charge related to the firm portion of the storage demand.

(2) For Algonquin's own handling charges, it proposes to add a new demand charge to recover the cost of service related to the 57,055 million Btu of firm storage demand pursuant to proposed Rate Schedule STB (Firm and

Backup Storage Service). Algonquin says that during the 1981 interim service period, for which only relatively minor new facilities are necessary, the new demand charge will be appropriately discounted.

Algonquin says that the proposed initial rate for the firm portion of service has been computed at the rate of return factors reflected in its pending rate proceeding at Docket No. RP80–72. Algonquin also says that, in order to expedite the processing of this application, it hereby indicates that it would accept a condition in the Commission's certificate order herein to the effect that the firm service handling charges of Algonquin's proposed initial rate (both the discounted interim period charge and the final charge) should be adjusted, back to the date such charges commence for the firm STB service, to reflect the rate of return that is established by final Commission order in Docket No. RP80–72.

Algonquin indicates that, on April 16, 1981, Texas Eastern filed a related application in Docket No. CP81–291–000 for requisite certificate authorization to render firm SS–II service to Algonquin for 1981–82 interim quantities and is currently preparing an application for additional firm service commencing with the 1982–83 winter season.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 16, 1981, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to interve is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450–85–M

[Docket Nos. G–14250–001, et al.]

ARCO & Gas Company, Division of Atlantic Richfield Company, et al.; Applications for Certificates, Abandonment of Service and Petitions To Amend Certificates[1]

May 22, 1981.

Take notice that each of the Applicants listed herein has filed an application or petition pursuant to Section 7 of the Natural Gas Act for authorization to sell natural gas in interstate commerce or to abandon service as described herein, all as more fully described in the respective applications and amendments which are on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should on or before June 9, 1981, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure a hearing will be held without further notice before the Commission on all applications in which no petition to intervene is filed within the time required herein if the Commission on its own review of the matter believes that a grant of the certificates or the authorization for the proposed abandonment is required by the public convenience and necessity. Where a petition for leave to intervene is timely filed, or where the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[1] Reclassification of well from gas to oil by the New Mexico Oil Conservation Commission. Oil well gas is committed to Warren Petroleum Company, a Division of Gulf Oil Corporation, under Percentage of Proceeds Contract dated August 15, 1973, as amended June 22, 1978.

[2] Purchaser has agreed to release acreage. Since they are not willing to take this production, abandonment is necessary to find a new market.

[3] The only well in the unit, the Allen State Gas Unit Well #1, ceased to produce in December 1978 and was plugged and abandoned September 10, 1979. The Commissioners of the Land Office of the State of Oklahoma requested Release, which was executed October 11, 1979.

[4] Shell Oil Company is no longer able to render service from the acreage involved in this application because it has no interest in the acreage.

[5] Applicant is filing under Gas Purchase and Sales Agreement dated April 11, 1977, amended by amendment dated April 6, 1981.

[6] Well plugged and abandoned.

[7] Effective August 1, 1980, Getty Reserve Oil, Inc., assigned all of its oil, gas and mineral properties, assets, and rights to Getty Oil Company.

[8] Applicant is filing under Gas Purchase Contract dated December 31, 1975.

[9] Applicant agrees to accept a Certificate at the rates prescribed by the NGPA.

[10] Contract expired April 1, 1981. ARCO plans no development for the area.

[11] Contract expired by its own terms on December 1, 1975. On May 1, 1972, ARCO's interest in the acreage covered under such contract was sold to Weldon Guest. No gas has been sold under this contract since that date.

[12] Contract expired by its own terms on March 3, 1969. The lease sold to Ibex, Inc. effective June 1, 1972. The lease has now expired as to any interest retained by ARCO.

[13] Contract terminated effective May 12, 1980. The only producing acreage commited under said contract was sold to Chateaugay Company effecve October 1, 1973. ARCO has no plans for further development in the retained acreage.

[14] Contract expired by its own terms May 26, 1975. ARCO's interest in the properties covered under such contract was sold to Union Oil Company of California effective October 1, 1973.

[15] Applicant is filing under Gas Sales Contract dated March 19, 1981.

[16] Applicant is filing under Gas Sales Contract dated October 27, 1977.

[17] Contract has expired, well has been plugged and acreage expired.

[18] Marginal production, no other zones which merit testing, not economically feasible to operate.

[19] Conoco Inc. sold its interest in all of the leases committed to the subject contract and rate schedule to Joseph B. Gould effective September 1, 1976.

[20] By Assignment and Agreement executed December 18, 1973, but made effective December 1, 1973, Mobil Oil Corporation (MPTM's predecessor) assigned to J. W. Lemons all of its rights, title and interest in and to certain producing property fully described in said Assignment and Agreement.

Filing Code: A—Initial Service, B—Abandonment, C—Amendment to add acreage, D—Amendment to delete acreage, E—Total Succession, F—Partial Succession.

[FR Doc. 81-16252 Filed 5-29-81; 8:45 am]

BILLING CODE 6450-85-M

[Project No. 4590-000]

Buena Vista Water Storage District; Application for Preliminary Permit

May 27, 1981.

Take notice that Buena Vista Water Storage District (Applicant) filed on April 27, 1981, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. §§ 791(a)–825(r)] for proposed Project No. 4590 to be known as the Buena Vista One Power Plant Project located on the Turnout No. 1 Pipeline in Kern County, California. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. Harold Russell, Engineer Manager, Buena Vista Water Storage District, 525 North Main Street, P.O. Box 756, Buttonwillow, California 93206. Any person who wishes to file a response to this notice should read the entire notice and must comply with the requirements specified for the particular kind of response that person wishes to file.

Project Description—The proposed project would consist of a powerhouse containing a single 180-kW generating unit located at the outlet to the Turnout No. 1 Pipeline and associated electrical and transmission equipment.

The Applicant estimates that the average annual energy output would be 1,400 MWh.

Purpose of Project—Project energy would be sold.

Proposed Scope and Cost of Studies Under Permit—Applicant would conduct a detailed study to determine the technical, economical, financial, and envornmental feasibility of the proposed project. Applicant estimates that the proposed studies would cost $30,000.

Purpose of Preliminary Permit—A preliminary permit does not authorize construction. A permit, if issued, gives the Permittee, during the term of the permit, the right of priority of application for license while the

Permittee undertakes the necessary studies and examinations to determine the engineering, economic, and environmental feasibility of the proposed project, the market for power, and all other information necessary for inclusion in an application for a license.

Agency Comments—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are invited to submit comments on the described application for preliminary permit. (A copy of the application may be obtained directly from the Applicant.) Comments should be confined to substantive issues relevant to the issuance of a permit and consistent with the purpose of a permit as described in this notice. No other formal request for comments will be made. If an agency does not file comments within the time set below, it will be presumed to have no comments.

Competing Applications—Anyone desiring to file a competing application must submit to the Commission, on or before July 16, 1981, either the competing application itself or a notice of intent to file a competing application. Submission of a timely notice of intent allows an interested person to file the competing application no later than September 14, 1981. A notice of intent must conform with the requirements of 18 CFR 4.33 (b) and (c) (1980). A competing application must conform with the requirements of 18 CFR 4.33 (a) and (d) (1980).

Comments, Protests, or Petitions To Intervene—Anyone desiring to be heard or to make any protests about this application should file a petition to intervene or a protest with the Commission, in accordance with the requirements of its Rules or Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in § 1.10 for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any comments, protest, or petition to intervene must be received on or before July 16, 1981.

Filing and Service of Responsive Documents—Any comments, notices of intent, competing applications, protests, or petitions to intervene must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable. Any of these filings must also state that it is made in response to this notice of application for preliminary permit for Project No. 4590. Any comments, notices of intent, competing applications, protests, or petitions to intervene must be filed by providing the original and those copies requried by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208, 400 First Street, N.W., Washington, D.C. 20426. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-16280 Filed 5-29-81; 8:45 am]

BILLING CODE 6450-85-M

[Project No. 4423-000]

Central Montana Electric Generation and Transmission Cooperative, Inc.; Application for Preliminary Permit

May 27, 1981.

Take notice that Central Montana Electric Generation and Transmission Cooperative, Inc. (Applicant) filed on March 26, 1981, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)] for proposed Project No. 4423 to be known as the Tiber Dam Project located on the Marias River in Liberty County, Montana. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. James H. Follensbee, Central Montana Electric Generation and Transmission Cooperative, Inc., 705 Lincoln Lane, Billings, Montana 59101. Any person who wishes to file a response to this notice should read the entire notice and must comply with the requirements specified for the particular kind of response that person wishes to file.

Project Description—the proposed project would utilize the existing Water and Power Resources Service's, U.S. Department of the Interior, Tiber Dam and would consist of: 1) a proposed powerhouse with an installed generating capacity of 13 MW; 2) a proposed 5,000-foot long transmission line, and 3) appurtenant facilities.

The Applicant estimates that the average annual energy output would be 79 GWh.

Purpose of Project—the Applicant proposes to use the power output to serve the loads of Central Montana Electric Generation and Transmission Cooperative and adjacent rural electric cooperatives which are members of Central Montana Electric Generation and Transmission Cooperative.

Proposed Scope and Cost of Studies Under Permit—the Applicant seeks issuance of a preliminary permit for a period of 36 months. During this time the significant legal, institutional, engineering, environmental, marketing, economic and financial aspects of the project will be defined, investigated and assessed to support an investment decision. The report of the proposed study will address whether or not a commitment to implementation is warranted, and, if the findings are positive, describe the steps required for implementation. The report will be prepared so that the information presented will be useful in preparing an application for license for the project. The Applicant's estimated total cost for performing a feasibility study is $51,770.

Purpose of Preliminary Permit—a perliminary permit does not authorize construction. A permit, if issued, gives the Permittee, during the term of the permit, the right of priority of application for license while the Permittee undertakes the necessary studies and examinations to determine the engineering, economic, and environmental feasibility of the proposed project, the market for power, and all other information necessary for inclusion in an application for a license.

Agency Comments—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are invited to submit comments on the described application for preliminary permit. (A copy of the application may be obtained directly from the Applicant.) Comments should be confined to substantive issues relevant to the issuance of a permit and consistent with the purpose of a permit as described in this notice. No other formal request for comments will be made. If an agency does not file comments within the time set below, it will be presumed to have no comments.

Competing Applications—this application was filed as a competing application to Continental Hydro Corporation's Project No. 3574 on December 30, 1980, under 18 CFR 4.33 (1980), and, therefore, no further competing application or notices of

intent to file a competing application will be accepted for filing.

Comments, Protests, or Petitions To Intervene—Anyone desiring to be heard or to make any protests about this application should file a petition to intervene or a protest with the Commission, in accordance with the requirements of its Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in § 1.10 for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's rules. Any comments, protest, or petition to intervene must be received on or before July 6, 1981.

Filing and Service of Responsive Documents—Any comments, protests, or petitions to intervene must bear in all capital letters the title "COMMENTS", "PROTEST", or "PETITION TO INTERVENE", as applicable. Any of these filings must also state that it is made a response to this notice of application for preliminary permit for Project No. 4423. Any comments, protests, or petitions to intervene must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426 an additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Room 208 RB Building, Washington, D.C. 20426. A copy of any petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-16281 Filed 5-29-81; 8:45 am]

BILLING CODE 6450-85-M

[Project No. 4512-000]

City of Bountiful, Utah; Application for Preliminary Permit

May 28, 1981.

Take notice that City of Bountiful, Utah (Applicant) filed on April 13, 1981, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)] for proposed Project No. 4512 to be known as Joes Valley Dam located on Seely Creek in Emery County, Utah. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. W. Berry Hutchings, Manager, Bountiful City Light and Power Department, 198 South 200 West, Bountiful, Utah 84010. Any person who wishes to file a response to this notice should read the entire notice and must comply with the requirements specified for the particular kind of response that person wishes to file.

Project Description—The proposed project would utilize the existing Water Power and Resources Service's Joes Valley Dam and would consist of, a powerhouse containing a single generating unit with a rated capacity of 3,500 kW; a spillway; existing transmission lines; and appurtenant facilities. The Applicant estimates that the average annual energy output would be 9.5 million kWh.

Purpose of Project—The energy generated at the proposed project would be utilized by the City of Bountiful for municipal purposes.

Proposed Scope and Cost of Studies Under Permit—The proposed term of the requested permit is 12 months. The work proposed under the preliminary permit would include economic analysis, preparation of preliminary engineering plans, and a study of environmental impacts. Based on results of these studies, Applicant would decide whether to proceed with more detailed studies and the preparation of an application for license to construct and operate the project. Applicant estimates that the cost of the work to be performed under the preliminary permit would be $61,000.

Purpose of Preliminary Permit—A preliminary permit does not authorize construction. A permit, if issued, gives the Permittee, during the term of the permit, the right of priority of application for license while the Permittee undertakes the necessary studies and examinations to determine the engineering, economic, and environmental feasibility of the proposed project, the market for power, and all other information necessary for inclusion in an application for a license.

Agency Comments—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are invited to submit comments on the described application for preliminary permit. (A copy of the application may be obtained directly from the Applicant.) Comments should be confined to substantive issues relevant to the issuance of a permit and consistent with the purpose of a permit as described in this notice. No other formal request for comments will be made. If an agency does not file comments within the time set below, it will be presumed to have no comments.

Competing Applications—This application was filed as a competing application to Continental Hydro Corporation's Project No. 3824 filed on December 4, 1980, under 18 CFR 4.33 (1980), and, therefore, no further competing applications or notices of intent to file a competing application will be accepted for filing.

Comments, Protests, or Petitions To Intervene—Anyone desiring to be ehard or to make any protests about this application should file a petition to intervene or a protest with the Commission, in accordance with the requirements of its Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in § 1.10 for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any comments, protest, or petition to intervene must be received on or before July 6, 1981.

Filing and Service of Responsive Documents—Any comments, protests, or petitions to intervene must bear in all capital letters the title "COMMENTS", "PROTEST", or "PETITION TO INTERVENE", as applicable. Any of these filings must also state that it is made in response to this notice of application for preliminary permit for Project No. 4512. Any comments, protests, or petitions to intervene must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Room 208 RB Building, Washington, D.C. 20426. A copy of any petition to intervene must also be served upon each

representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-16262 Filed 5-29-81; 8:45 am]

BILLING CODE 6450-85-M

[Docket No. ER81-183-000]

Consolidated Edison Co. of New York, Inc.; Order Declaring Jurisdiction, Accepting and Suspending Rate Filing, Granting Intervention, and Establishing Procedures

Issued: May 26, 1981.

On December 22, 1980, and March 27, 1981,[1] Consolidated Edison Company of New York, Inc. (Con Ed) tendered for filing a supplement to its Service Delivery Agreement with the Power Authority of the State of New York (PASNY). The supplement would increase Con Ed's charges to PASNY by approximately $9.5 million (31%) for the transmission portion of the service to PASNY's customers located in Con Ed's service area.[2] The company requests that the revised rates become effective on March 21, 1981. Accordingly, waiver of the notice requirements is requested. Further, to the extent that the filing does not strictly comply with the requirements of section 35.13 of the Commission's regulations, Con Ed requests waiver of those regulations as well.

Notice of the filing was issued on January 2, 1981, with responses due on or before January 23, 1981. Timely petitions to intervene were filed by PASNY and the Port Authority of New York and New Jersey (Port Authority), a customer of PASNY served by Con Ed under the instant rate schedule. In its petition to intervene, PASNY states that rates currently on file with the NYPSC for Con Ed's delivery service to PASNY's customers cover both the transmission and distribution portions of the service. PASNY therefore requests that the Commission issue an order indicating that it has jurisdiction over the transmission portion of Con Ed's service.

The Port Authority has protested the instant filing on the grounds that the Commission has exclusive jurisdiction over the entire contract entered into between PASNY and Con Ed, including the distribution portion of the service. Thus, insofar as the instant filing reflects rates for transmission only, it is alleged to be deficient. The Port Authority contends that the filing fails to comply with section 35.13 in other respects as well. Accordingly, the Port Authority requested that the filing be rejected or, in the alternative, be suspended for the full five-month period, and that Con Ed be required to amend its filing. On March 5, 1981, the Port Authority filed a notice of withdrawal of its request for suspension or rejection.

Con Ed filed a reply on February 6, 1981, to the Port Authority's petition. The company contends that the Commission has jurisdiction only over the transmission portion of its contract with PASNY. In support, Con Ed argues that local distribution is specifically exempted from FERC jurisdiction by Section 201(b) of the Federal Power Act.[3] In the event that the Commission determines it has jurisdiction over the entire agreement between PASNY and Con Ed, the company contends it should decline to exercise such jurisdiction as a matter of policy. Finally, Con Ed asks that the Port Authority's petition to intervene or, in the alternative, its request for relief, be denied. Thus, neither intervenor, at present, challenges the rate level reflected in the instant filing or requests that the rates be suspended.

On the same date as it filed its notice of withdrawal of its request for rejection or suspension of the filing, the Port Authority filed a response to Con Ed's reply of February 6, 1981. In its response, the Port Authority reaffirmed its view that the Commission has jurisdiction over the entire contract, stating: that the rate for service under the PASNY-Con Ed agreement is a single, indivisible rate for delivery of power from generation to the point of consumption; that Con Ed's attempt to establish a rate for only the transmission portion of the service is contrary to legal precedent; and that the "local distribution facilities" exemption does not serve to oust this Commission of its jurisdiction over the PASNY-Con Ed Transmission Agreement.

Discussion

Initially, we find that participation by PASNY and the Port Authority is in the public interest, and we shall therefore grant their petitions to intervene.

The Service Delivery Agreement between Con Ed and PASNY was originally filed with the Commission in November 1976, in Docket No. ER77-52. While Con Ed has consistently expressed the position that only the transmission portion of the service was jurisdictional, the question of jurisdiction has not been previously addressed on the merits.

Until 1927, state commissions exercised ratemaking jurisdiction over sales by public utilities of electric energy, including some energy transmitted across state lines. However, the Supreme Court determined, in *Public Utilities Commission of Rhode Island v. Attleboro Steam & Electric Co.*,[4] that the states were constitutionally forbidden from fixing rates for sales at wholesale in interstate commerce. Largely in response to the "regulatory gap" created by the Attleboro decision, Congress enacted the Federal Power Act.

Section 201(b) of the Federal Power Act provides that the Act shall apply "to the transmission of electric energy in interstate commerce and to the sale of electric energy at wholesale in interstate commerce." The statute further provides that "[t]he Commission shall have jurisdiction over all facilities for such transmission or sale of electric energy, but shall not have jurisdiction, except as specifically provided * * * over facilities used in local distribution * * *" The Act seeks to achieve a balance of authority between the states and the federal government in the regulation of the electric utility industry and reflects a policy "that matters largely of a local nature, even though interstate in character, should be handled locally and should receive the consideration of local men familiar with the local conditions in the communities involved." *Duke Power Company* v. *F.P.C.*[5]. Thus, the Act provides a clear line of demarcation between those transactions which are jurisdictional and those which are not.[6]

The agreement which is the subject of the instant docket is unusual in that it provides for the delivery of power directly to PASNY's customers and contains elements of activities which sometimes may be regarded as distributional. Nonetheless, we find that

---

[1] Con Ed submitted the instant filing on a preliminary basis on December 22, 1980, in order to comply with the notice provisions of section 35.13 of the Commission's regulations. The company indicated that it would base its charge to PASNY on the cost of service as approved by the New York Public Service Commission (NYPSC) in its latest retail rate case and would revise the instant filing upon the issuance of an order in that proceeding by the NYPSC.

[2] The present rate schedule is the result of an arrangement in which Con Ed transferred its interests in the Astoria No. 6 and Indian Point No. 3 generating units to PASNY. Under the present Service Delivery Agreement, Con Ed delivers power and energy from PASNY's Astoria No. 6 and Indian Point No. 3 generating units to PASNY's customers (Federal, State, and City agencies) located in Con Ed's service area. Con Ed performs all functions necessary to deliver power and energy including distribution and meter reading services.

[3] 16 U.S.C. 824(b).

[4] 273 U.S. 83 (1927).

[5] 401 F.2d 930 (D.C. Cir. 1968).

[6] *F.P.C.* v. *Southern California Edison Company*, 376 U.S. 205 (1964).

the agreement between PASNY and Con Ed provides for a single transaction which constitutes the transmission of electric energy in interstate commerce. The entire transaction comprises a service provided and billed to PASNY which, in turn, charges its customers.

We disagree with Con Ed's argument that the portion of the service which relates to the use of its distribution facilities is exempt under Section 201(b) of the Federal Power Act. The "local distribution facilities" exemption, upon which Con Ed relies, establishes a legal standard for distinguishing between companies which are "public utilities" as defined by the Federal Power Act and those which are not.[7] It neither applies to nor deprives the Commission of jurisdiction over sales for resale or transmission in interstate commerce.[8]

While we find the entire service to be jurisdictional, we do recognize, however, the unusual circumstances which create a strong local interest in this docket. The Commission takes note of the historical link and the ongoing complementary relationship between the rates filed by Con Ed before this agency and those approved by the NYPSC in the company's retail rate proceedings. Finally, we note that the Service Delivery Agreement provides that, in the absence of mutual agreement by the parties, the NYPSC, as arbiter, may establish rates for Con Ed's service on behalf of PASNY, and that PASNY shall accept the New York Commission's decision as a matter of contract. While the parties cannot determine by contract that the New York regulatory authorities have jurisdiction over any or all of the services provided by Con Ed,[9] the terms do evidence a recognition by Con Ed and PASNY of the local nature, in part, of the service, and the interest of the New York regulatory authorities in such matters.

In light of the foregoing and the particular circumstances which surround the instant filing, we intend to exercise our jurisdictioin over this service, in this and future filings by Con Ed, by accepting the rate determinations of the NYPSC in the absence of a showing that the NYPSC has abused its discretion or violated a public policy, such as the policy against undue discrimination. In other words, we shall not insist that the rates be developed, in all respects, according to the ratemaking practices of this Commission, but will accept the NYPSC's rate practices and determinations in the absence of a showing of abuse as described above.

In submitting rates for the remaining portion of the service, Con Ed may file cost support data derived from the NYPSC approved rates which is applicable to the service provided, on PASNY's behalf, to PASNY's customers. In subsequent cases concerning this service, Con Ed shall submit filings in accordance with this Commission's rules and regulations or seek appropriate waivers as it did in connection with the filing already made in this docket. In addition to our own independent analysis of the NYPSC-approved rates, we shall grant PASNY's customers three weeks from the date of this order to show that the rates do not comply with the standards set forth in this order.

In adopting this procedure, we do not abandon our statutory responsibilities in this or future proceedings. Our course of action is based upon, and confined to, the unusual facts present in this case, and serves the ends of comity and administrative efficiency, and at the same time fosters parity of rates between customers.

Accordingly, we shall accept Con Ed's March 27, 1981, filing as of March 20, 1981 and suspend it for one day, to take effect March 21, 1981, when Con Ed's latest retail rates, as approved by the NYPSC, went into effect. Because the company's filing does not reflect all components of the services performed on PASNY's behalf, we shall require it to file, within 30 days, revised rates in accordance with the views expressed herein. We shall act on this supplemental filing within 60 days of its submission, as provided in Section 205(d) of the Federal Power Act and, unless our analysis and the submissions of Con Ed or any intervenors indicates a contrary view, we shall also accept the revised rates for the full service effective March 21, 1981. To the extent necessary, we find that good cause exists to grant waiver of the notice and filing requirements.

The Commission Orders

(A) The petitions of the Port Authority and PASNY to intervene are hereby granted subject to the rules and regulations of the *Commission, provided,* however, that participation by the intervenors shall be limited to matters set forth in their petitions to intervene; and *provided, further,* that the admission of the intervenors shall not be construed as recognition by the Commission that they might be aggrieved because of any order or orders by the Commission entered in this proceeding.

(B) Con Ed's filing on March 27, 1981, is hereby accepted for filing and suspended for one day, to become effective March 21, 1981.

(C) Within thirty (30) days of the issuance of this order, Con Ed shall file revised rate sheets which reflect all charges to be assessed PASNY in rendering the services performed pursuant to their Service Delivery Agreement.

(D) Waiver of the notice requirements is hereby granted.

(E) Waiver of the filing requirements is hereby granted.

(F) The Secretary shall promptly publish this order in the Federal Register.

By the Commission.

Kenneth F. Plumb,

Secretary.

[7] *Connecticut Light & Power Company* v. *F.P.C.*, 324 U.S. 515 (1945). And Con Ed is unquestionably a public utility within the meaning of the Power Act.

[8] *Indiana & Michigan Electric Company* v. *F.P.C.*, 365 F.2d 180 (7th Cir. 1966) *cert. den.* 385 U.S. 972 (1966).

[9] In this regard, we note that the Service Delivery Agreement specifically provides that the procedure referred to above does not constitute a recognition by PASNY of NYPSC jurisdiction over the contract.

[Docket No. TC81-51-000]

Consolidated Edison Co. of New York, Inc.; Petition for Declaratory Order

May 26, 1981.

Take notice that on April 15, 1981, Consolidated Edison Company of New York, Inc. (Petitioner), 4 Irving Place, New York 10003, filed in Docket No. TC81-51-000 a petition pursuant to Section 1.7 of the Commission's Rules of Practice and Procedure (18 CFR 1.7) for an order declaring that purchases of excess pipeline gas specifically for the purposes of displacing oil that otherwise would be used to generate electricity and steam would be afforded curtailment protection similar to that now provided by § 284.206 of the Commission's Regulations, all as more fully set forth in the petition which is on file with the Commission and open to public inspection.

Petitioner states that it purchases gas from its pipeline suppliers under contracts which contain specific demand limits and that at times when the pipeline is not curtailing sales, under those contracts Petitioner on any given day can demand that the pipeline deliver an amount equal to the contract limit, but no more. It is indicated that Transcontinental Gas Pipe Line Corporation (Transco) has notified Petitioner that during this summer season "excess" gas may be available for purchase and that this is gas over

and above the contract demand needs and can be sold by Transco under the terms of its tariff, when available. Applicant states that it would be in a position to purchase some of that gas and to use it as boiler fuel to generate steam and electricity, and that by so doing, it would accomplish a number of benefits for its consumers, for other customers on the Transco system, and for the national interest.

It is stated that in order for these benefit to be realized, however, the potential detriment to Petitioner's gas consumers, if the gas is purchased without some curtailment protection, should be eliminated. It is asserted that if the Commission were to implement fixed base period curtailment plans in the future, which plans based the allocation of natural gas upon the amount of gas used during a time period when Petitioner (or a similarly situated customer) were using excess pipeline gas rather than fuel oil and those volumes and usages were included in the curtailment data, the customer serving the excess gas user would be curtailed based upon a greater proportion of low-priority load than is in fact usually served by its system. Thus, Petitioner maintains, this short-term participation in an excess gas purchase might subject the distributor (and its consumers) to a greater risk of curtailment over the life of a new curtailment plan and that the curtailment protection provision set forth in Section 248.206 of the Regulations would help to alleviate that risk. Accordingly, Petitioner requests that the Commission issue an order stating that if Petitioner (or a similarly situated company) purchases "excess" gas from Transco (or from other similarly situated pipeline suppliers) which gas would be used to displace oil.

All volumes of natural gas purchased by an eligible user and transported by an interstate pipeline pursuant to this subpart shall not be considered as either a natural gas supply or market in a determination of an interstate pipeline's customers' requirements for present or future allocations of natural gas during periods of natural gas curtailment.

Any person desiring to be heard or to make any protest with reference to said petition should on or before June 17, 1981, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commision will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-16245 Filed 5-29-81; 8:45 am]

BILLING CODE 6450-85-M

[Project No. 4575-000]

Crown Zellerbach Corp.; Application for Preliminary Permit

May 28, 1981.

Take notice that Crown Zellerbach Corporation (Applicant) filed on April 22, 1981, an application for preliminary permit [pursuant to the Federal Power Act, 16, U.S.C. 791(a)–825(r)] for Project No. 4575 known as the Big Quilcene Hydroelectric Project located on the Big Quilcene River in Jefferson County, Washington. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: ANVIL Corporation, 1675 W. Bakerview Road, Bellingham, Washington 98225.

Project Description—The proposed project would consist of: (1) an existing rock-filled, log-crib with wood planking diversion dam; (2) intake structure; (3) a 4.5-mile long pipeline; (4) a surge tank; (5) a 2,400-foot long penstock; (6) a powerhouse to contain two pelton-type, turbine-generating units with a total rated capacity of 10 MW; and (7) a 1.5-mile long, 12-kV transmission line to connect to an existing Puget Sound Power and Light Company transmission line. The Applicant estimates that the average annual energy output would be 50 million kWhs.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. The Applicant seeks issuance of a preliminary permit for a period of 24 months during which it would prepare a definitive project report that would include engineering, economic, and environmental data. The cost of these activities, the preparation of an environmental report, obtaining agreements with various Federal, State, and local agencies, and preparation of an FERC license application are estimated to be about $200,000.

Competing Applications—Anyone desiring to file a competing application must submit to the Commission, on or before August 7, 1981, either the competing application itself [See 18 CFR 4.33 (a) and (d) (1980)] or a notice of intent [See 18 CFR 4.33 (b) and (c) (1980)] to file a competing application. Submission of a timely notice of intent allows an interested person to file an acceptable competing application no later than October 6, 1981.

Agency Comments—Federal, State and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies only directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirments of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protest, or petition to intervene must be received on or before August 7, 1981.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. Copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-16263 Filed 5-29-81; 8:45 am]

BILLING CODE 6450-85-M

[Project No. 4318-000]

Darobsum, Inc.; Application for Preliminary Permit

May 27, 1981.

Take notice that Darobsum, Inc. (Applicant) filed on March 10, 1981, an application for preliminary permit

[pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)] for proposed Project No. 4318 to be known as Noone Mills Project located on the Contoocook River at Peterborough in Hillsborough County, New Hampshire. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. Timothy P. Brown, Jr., Darobsum, Inc., Box 592, Keene, New Hampshire, 03431.

Any person who wishes to file a response to this notice should read the entire notice and must comply with the requirements specified for the particular kind of response that person wishes to file.

Project Description—The proposed project would consist of existing project works including: (1) Noone Mills dam owned by the Applicant, a composite concrete, timber, and stone dam, 267 feet long and 20 feet high, with a 102-foot long center spillway section and a second spillway section 55 feet long at the right (east) abutment; (2) a reservoir with 315 acre-feet of storage at surface elevation 754 feet m.s.l.; (3) an intake structure and bar rack at the left (west) abutment connecting to an abandoned penstock 5.5 feet in diameter and 100 feet long; and new project works to include; (4) a new penstock 176 feet long; (5) a new powerhouse with unit(s) having an installed capacity of 300 kW; (6) a tailrace; and (7) other appurtenances.

The Applicant estimates that the average annual energy output would be 1,200,000 kWh.

Purpose of Project—Project energy would be sold to the Public Service Company of New Hampshire.

Proposed Scope and Cost of Studies Under Permit—Applicant seeks issuance of a preliminary permit for a period of 24 months, during which time it would perform hydraulic, construction, economic, environmental, historic, and recreational studies, and if the proposed project is determined feasible, prepare an application for an FERC license. Applicant estimates cost of studies under the permit would not exceed $15,000.

Purpose of Preliminary Permit—A preliminary permit does not authorize construction. A permit, if issued, gives the Permittee, during the term of the permit, the right of priority of application for license while the Permittee undertakes the necessary studies and examinations to determine the engineering, economic, and environmental feasibility of the proposed project, the market for power, and all other information necessary for inclusion in an application for a license.

Agency Comments—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are invited to submit comments on the described application for preliminary permit. (A copy of the application may be obtained directly from the Applicant.) Comments should be confined to substantive issues relevant to the issuance of a permit and consistent with the purpose of a permit as described in this notice. No other formal request for comments will be made. If an agency does not file comments within the time set below, it will be presumed to have no comments.

Competing Applications—This application was filed as a competing application to American Hydro Power Company's Project No. 3616 filed on October 27, 1980, under 18 CFR 4.33 (1980), and, therefore, no further competing applications or notices of intent to file a competing application will be accepted for filing.

Comments, Protests, or Petitions To Intervene—Anyone desiring to be heard or to make any protests about this application should file a petition to intervene or a protest with the Commission, in accordance with the requirements of its Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in § 1.10 for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any comments, protest, or petition to intervene must be received on or before June 30, 1981.

Filing and Service of Responsive Documents—Any comments, protests, or petitions to intervene must bear in all capital letters the title "COMMENTS", "PROTEST", or "PETITION TO INTERVENE", as applicable. Any of these filings must also state that it is made in response to this notice of application for preliminary permit for Project No. 4318. Any comments, protests, or petitions to intervene must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Room 208 RB Building, Washington, D.C. 20426. A copy of any petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-16294 Filed 5-29-81; 8:45 am]

BILLING CODE 6450-85-M

[Docket No. EL81-5-000]

Edison Electric Institute; Order Granting Intervention, Granting Rehearing for Purpose of Receiving Further Comments, and Clarifying Prior Order

Issued: May 26, 1981.

By order issued March 27, 1981, the Commission determined that persons serving as officers or directors of public utilities and officers or directors of commercial banks were authorized to hold such positions upon a minimal filing provided that the subject banks did not engage in the underwriting or marketing of public utility securities, including commercial paper. If, however, the subject banks engaged in underwriting or marketing public utility securities, including commercial paper, such persons were required to seek individual authorization pursuant to Part 45 of the Commission's regulations, 18 CFR Part 45 (1980).

On April 10, 1981, the Continental Illinois National Bank and Trust Company of Chicago (CINB) petitioned to intervene out of time. On April 24, 1981, CINB filed an application for rehearing. CINB states that it is a commercial bank with two directors who also serve as directors of public utilities and that it has numerous relationships with public utilities subject to the Commission's jurisdiction. CINB argues that it did not receive adequate notice of this proceeding and so it did not previously petition to intervene. The comments and analysis of CINB and of the commercial banking industry, CINB submits, would have been and will be of great benefit to the Commission in this proceeding. Moreover, CINB argues that the Commission improperly determined that commercial banks are authorized to underwrite or market public utility securities and that the Commission's authority thus extends to interlocks between public utilities and commercial banks. Finally, CINB argues that the holding of such interlocks does not adversely affect public or private interests. CINB asks in the alternative

that the Commission (1) reverse its order of March 27, 1981 and find that commercial banks are not authorized to underwrite or market public utility securities; (2) vacate its order of March 27, 1981 and permit all interested parties to address the merits of the questions before the Commission; or (3) stay its order of March 27, 1981 until the actions now ongoing in the courts are resolved.

We find that CINB's participation in this proceeding is in the public interest and that good cause exists to grant the untimely petition. Accordingly, we shall grant CINB's petition to intervene out of time. In this instance, we also believe that further input from interested persons should be permitted. CINB has requested an opportunity to comment further on the structure of the commercial banking industry and how it would be affected by our order of March 27, 1981 in this proceeding. Because the commercial banking industry is one with which the Commission does not ordinarily have direct involvement, we believe that it is appropriate to grant CINB's request to comment further and to afford an additional opportunity for comment to all interested persons. Accordingly, we shall invite interested persons, whether or not parties, to file responses to the application for rehearing or additional comments on our prior order in the form of briefs, to be submitted within forty-five days of the issuance of this order.

We shall further amend our prior order to resolve the ambiguities that may have resulted and to clarify the Commission's intent, particularly with regard to the filing requirement found in ordering paragraph (C) of that order. These clarifications also respond to allegations of a technical violation of the Paperwork Reduction Act of 1980.

The Commission orders:

(A) The petition to intervene is hereby granted subject to the rules and regulations of the Commission; *Provided, however,* That participation by the intervenor shall be limited to matters set forth in its petition to intervene; and *Provided further,* That the admission of the intervenor shall not be construed as recognition by the Commission that it might be aggrieved because of any order or orders by the Commission entered in this proceeding.

(B) The application for rehearing is hereby granted for purposes of further hearing. Responses to the application for rehearing and additional comments on the order issued March 27, 1981 in this proceeding are invited from any interested persons, whether or not parties, within 45 days of the issuance of this order.

(C) Ordering paragraphs (A), (B), and (C) of the Commission's order issued March 27, 1981 in the instant docket are hereby amended to read as follows:

(A) Until further order of this Commission, any person holding the positions of officer or director of a public utility and officer or director of a bank subject to the provisions of the Glass-Steagall Act is authorized to hold such positions on an interim basis; *Provided,* That the subject bank does not engage in the underwriting or participate in the marketing of securities of a public utility, including commercial paper; and *Provided, further,* That such person files the statement required in Paragraph (C) below.

(B) Until further order of this Commission, no person holding the positions of officer or director of a public utility and officer or director of a bank subject to the provisions of the Glass-Steagall Act is authorized to hold such positions if the subject bank engages in the underwriting or participates in the marketing of securities of a public utility, including commercial paper, unless that person has obtained authorization to hold such positions pursuant to section 305(b) of the Federal Power Act and Part 45 of the Commission's regulations. Those persons who wish to continue to hold such positions shall file an application for authorization pursuant to Part 45 of the Commission's regulations within either forty-five days of the date the subject bank engages in the underwriting or participates in the marketing of securities of a public utility, including commercial paper, or within 45 days of the date of issuance of this order, whichever is later.

(C) Until further order of this Commission, the full requirements of Part 45 of the Commission's regulations, except as required below, are hereby waived with respect to those persons subject to Paragraph (A) above. In lieu of the full requirements of Part 45 of the Commission's regulations, those persons shall file an application providing only the following information:

(1) Full name and business address;

(2) All public utilities with which the person holds the positions of officer or director, and identifying those positions;

(3) All banks subject to the provisions of the Glass-Steagall Act with which the person holds the positions of officer or director and identifying those positions.

(C) The Secretary shall promptly publish this order in the **Federal Register.**

By the Commission.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-16271 Filed 5-29-81; 8:45 am]

BILLING CODE 6450-85-M

[Docket No. CP78-443]

El Paso Natural Gas Co.; Petition To Amend

May 26, 1981.

Take notice that on April 28, 1981, El Paso Natural Gas Company (Petitioner), P.O. Box 1492, El Paso, Texas 79978, filed in Docket No. CP78-443 a petition to amend the order, issued January 12, 1979, as amended, in said docket so as to authorize certain revisions in Petitioner's transportation and delivery arrangement with Southwest Gas Corporation (Southwest) under Petitioner's Rate Schedule T-15, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

The petition indicates that the currently effective Rate Schedule T-15 is comprised of a gas transportation agreement, dated June 30, 1978, which provides for the transportation by Petitioner of up to 2,500 Mcf of natural gas per day and the delivery of such gas, less shrinkage, to Southwest, on a best efforts basis, at various existing delivery points within Arizona and at the Arizona-Nevada boundary.

Petitioner states that it has been advised by Southwest that it desires to modify the T-15 arrangement to provide one additional delivery point, the Ignacio delivery point, an existing interconnection between the facilities of Petitioner and Northwest Pipeline Corporation (Northwest) in La Plata County, Colorado. It is asserted that the Ignacio delivery point would enhance Southwest's ability to enter into arrangements with Northwest and possibly other companies for the purpose of permitting greater flexibility in deliveries of natural gas to Southwest's northern Nevada system. Southwest has agreed to pay Petitioner for each Mcf of gas delivered on any day at such point, the rate in effect and reflected from time to time as the Mainline Transmission Charge—New Mexico as set forth in Sheet No. 1-D.2 of Petitioner's FERC Gas Tariff, Third Revised Volume No. 2, or superseding tariff. In order to provide greater flexibility in the future utilization of the T-15 arrangement, Petitioner and Southwest have agreed that the Petitioner delivery points may be used for deliveries of natural gas to a third

party for the account of Southwest. Additionally, Applicant states that the parties have agreed to certain changes in Appendix A, *General Terms and Conditions*, respecting the billing and payment provisions contained in the transportation agreement.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before June 12, 1981, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-16253 Filed 5-29-81; 8:45 am]

BILLING CODE 6450-85-M

[Docket No. CP81-308-000]

El Paso Natural Gas Co.; Application

May 26, 1981.

Take notice that on April 28, 1981, El Paso Natural Gas Company (Applicant), P.O. Box 1492, El Paso, Texas 79978, filed in Docket No. CP81-308-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain minor tap and related facilities in Mohave County, Arizona, in order to provide an interconnection between the facilities of Applicant and Pataya Storage Company (Pataya) and the transportation and delivery to Southwest Gas Corporation (Southwest) of natural gas withdrawn from the Pataya storage field for the purpose of assisting Southwest in maintaining service to its customers, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that Southwest is one of its distributor customers currently purchasing its base supply of gas required to service its southern Nevada, central Arizona and southern Arizona systems and that since 1973, Southwest has experienced curtailment of natural gas deliveries to its Priority 3 and 5 customers throughout those service areas which receive base gas supply from Applicant. It is indicated that since 1975, Southwest has been actively engaged in a self-help supplemental natural gas procurement program for the protection and continued growth in its Priority 1 and 2 requirements of its customers. Southwest now desires to have volumes of its excess supplemental gas supplies injected into storage in order to make more efficient use of all of the natural gas supplies available to it. The application shows that Southwest has entered into arrangements with Pataya for the injection into, storage and withdrawal from Pataya's proposed storage field in Mohave County of up to 3,000,000 Mcf of gas per year, or with greater cycling in excess of 3,000,000 Mcf per year.

In order to assist Southwest, Applicant has agreed to receive up to 54,000 Mcf of gas per day for Southwest at various points of receipt, to transport such gas and to deliver the gas to Pataya at the proposed interconnection in Mohave County. To provide for such service, Applicant and Southwest would enter into amendatory agreements to existing gas transportation agreements to establish the proposed interconnection as an additional delivery point. Further, in order to assist Southwest in withdrawing gas from storage, Applicant has agreed to accept at the proposed interconnection with Pataya up to 100,000 Mcf of storage gas per day, to transport such gas and deliver equivalent quantities to Southwest at certain existing points of delivery in Arizona and on the Arizona-Nevada border and at the Ignacio delivery point in Colorado. Applicant and Southwest have entered into a transportation agreement, dated April 13, 1981, covering this proposed service. Under the agreement, Southwest would compensate Applicant for the back-haul tranportation service by the payment of a one-cent administrative fee for each Mcf of gas withdrawn from storage for transportation and delivery.

The total cost of the proposed facilities is estimated to be $128,319 which would be reimbursed by Southwest.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 12, 1981, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice, that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-16254 Filed 5-29-81; 8:45 am]

BILLING CODE 6450-85-M

[Project No. 4560-000]

Hacket Mills Hydro Co.; Application for Preliminary Permit

May 28, 1981.

Take notice that Hacket Mills Hydro Company (Applicant) filed on April 21, 1981, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)-825(r)] for proposed Project No. 4560 to be known as the Hacket Mills Project located on the Little Androscoggin River in the towns of Poland and Minot, Androscoggin County, Maine. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. Tom Sturdevant, P.O. Box 403, Portland, Maine 04112. Any person who wishes to file a response to this notice should read the entire notice and must comply with the requirements specified for the particular kind of response that person wishes to file.

Project Description—The proposed project would utilize existing facilities

and would consist of: (1) an 8-foot high, 120-foot long, rock-filled timber-crib dam with new 3-foot high flashboards to be added; (2) a reservoir with no storage capacity and a normal water surface elevation with flashboards of 238 feet m.s.l.; (3) canal headworks, (4) a 100-foot long, 25-foot wide, 6-foot deep power canal; (5) a powerhouse containing two, existing, hydromechanical units to be reconditioned and connected to new generators with a rated capacity of 125 kW each and an additional new turbine-generator unit to be installed with a rated capacity of 300 kW; (6) a transmission line; and (7) appurtenant facilities. The Applicant estimates that the average annual energy output would be 2,500,000 kWh.

Purpose of Project—Energy produced at the project would be sold to Central Maine Power Company.

Proposed Scope and Cost of Studies Under Permit—The work proposed under the preliminary permit would include economic analysis, preparation of preliminary engineering plans, and a study of environmental impacts. Based on results of these studies, Applicant would decide whether to proceed with more detailed studies and the preparation of an application for license to construct and operate the project. The Applicant has estimated that the cost of studies under the preliminary permit would be $15,000.

Purpose of Preliminary Permit—A preliminary permit does not authorize construction. A permit, if issued, gives the Permittee, during the term of the permit, the right of priority of application for license while the Permittee undertakes the necessary studies and examinations to determine the engineering, economic, and environmental feasibility of the proposed project, the market for power, and all other information necessary for inclusion in an application for a license.

Agency Comments—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are invited to submit comments on the described application for preliminary permit. (A copy of the application may be obtained directly from the Applicant.) Comments should be confined to substantive issues relevant to the issuance of a permit and consistent with the purpose of a permit as described in this notice. No other formal request for comments will be made. If an agency does not file comments within the time set below, it will be presumed to have no comments.

Competing Applications—Anyone desiring to file a competing application must submit to the Commission, on or before August 7, 1981, either the competing application itself or a notice of intent to file a competing application. Submission of a timely notice of intent allows an interested person to file the competing application no later than October 6, 1981. A notice of intent must conform with the requirements of 18 CFR 4.33 (b) and (c) (1980). A competing application must conform with the requirements of 18 CFR 4.33 (a) and (d) (1980).

Comments, Protests, or Petitions To Intervene—Anyone desiring to be heard or to make any protests about this application should file a petition to intervene or a protest with the Commission, in accordance with the requirements of its Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in § 1.10 for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any comments, protest, or petition to intervene must be received on or before August 7, 1981.

Filing and Service of Responsive Documents—Any comments, notices of intent, competing applications, protests, or petitions to intervene must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETITING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable. Any of these filings must also state that it is made in response to this notice of application for preliminary permit for Project No. 4560. Any comments, notices of intent, competing applications, protests, or petitions to intervene must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208, 400 First Street NW., Washington, D.C. 20426. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-16255 Filed 5-29-81; 8:45 am]

BILLING CODE 6450-85-M

[Docket No. CP81-323-000]

International Paper Co.; Application

May 26, 1981.

Take notice that on May 7, 1981, International Paper Company (Applicant), International Paper Plaza, 77 West 45th Street, New York, New York 10036, filed in Docket No. CP81-323-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public covenience and necessity authorizing the transportation of up to 600 Mcf of natural gas per day owned by Applicant from the Lake Erling Field, Lafayette County, Arkansas, to Springhill, Louisiana, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant requests authorization to transport natural gas on its own behalf from the Lake Erling Field by means of an existing 6-inch pipeline owned by Applicant and operated by Superior Oil Company (Superior) to the Applicant and Arizona Chemical Company facilities at Springhill. Certification of the facilities to be used for the transportation is also sought. The subject pipeline extends approximately 10.5 miles from Lafayette County, Arkansas, to Applicant's plant in Webster Parish, Louisiana. The natural gas transported is consumed in space heating equipment and boilers in applicant's and Arizona Chemical Company's facilities.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 12, 1981, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-16255 Filed 5-29-81; 8:45 am]

BILLING CODE 6450-85-M

[Project No. 4579-000]

James B. and Janet A. Boyd; Application for Preliminary Permit

May 27, 1981.

Take notice that James B. and Janet A. Boyd (Applicant) filed on April 23, 1981, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)] for Project No. 4579 known as the Jim Boyd Water Power Project located on the Umatilla River in Umatilla County, Oregon. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. William N. Reynolds, Michener Associates, Inc., P.O. Box 650, 505 Willamette, Umatilla, Oregon 97838.

Project Description—The proposed project would consist of: (1) a 6-foot high by 72-foot long intake structure; (2) a 600-foot long unlined canal; (3) a 60-foot long, 96-inch diameter penstock; (4) a powerhouse to be located at the site of an abandoned Pacific Power and Light Company powerhouse and to contain two turbine-generating units with a total rated capacity of 400 kW; and (5) a 600-foot long, 13.8-kV transmission line to connect to an existing PP & L transmission line. The entire project would be located on land owned by the Applicant. The Applicant estimates that the average annual energy output would be 2.6 million kWhs.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. The Applicant seeks issuance of a preliminary permit for a period of 36 months to study the feasibility of constructing and operating the proposed project. The Applicant estimates that the cost of the feasibility studies would be about $32,000.

Competing Applications—Anyone desiring to file a competing application must submit to the Commission, on or before August 5, 1981, either the competing application itself [See 18 CFR 4.33(a) and (d) (1980)] or a notice of intent [See 18 CFR 4.33(b) and (c) (1980)] to file a competing application. Submission of a timely notice of intent allows an interested person to file an acceptable competing application no later than October 5, 1981.

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies only directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protest, or petition to intervene must be received on or before August 5, 1981.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[Docket No. CP81-316]

Montana-Dakota Utilities, Inc.; Technical Conference

May 26, 1981.

Take notice that at 10:00 a.m. on June 17, 1981 Staff will meet with representatives of the above-captioned company for the purpose of a technical discussion on the justification and need for expedient Commission action on all or part of the facilities and service proposed in the above docket.

The conference will be held in room 3200 of the Commission's offices at 941 North Capitol Street, N.E., and all interested parties may at their option attend.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-16249 Filed 5-29-81; 8:45 am]

BILLING CODE 6450-85-M

[Docket No. CP81-316-000]

Montana-Dakota Utilities Co.; Application

May 28, 1981.

Take notice that on May 1, 1981, Montana-Dakota Utilities Co. (MDU), 400 North Fourth Street, Bismarck, North Dakota 58501, filed in Docket No. CP81-316-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing: (1) the construction and operation of facilities; (2) the sale and delivery of excess natural gas to Colorado Interstate Gas Company (CIG) and MIGC, Inc. (MIGC), formerly McCulloch Interstate Corporation; and (3) the storage of some of the excess gas and redelivery thereof to CIG, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

It is stated that MDU would soon experience an oversupply of gas on its system such that its pipeline and storage facilities would be filled to capacity, thus precluding MDU from taking any more gas supplies into its system. The oversupply situation, according to MDU, would also effectively preclude it from negotiating and contracting for the acquisition of future reserves to

maintain MDU as a viable pipeline supplier.

MDU states that the instant application presents two proposals for relieving this oversupply situation so that it can continue to secure system gas reserves. First, MDU requests authorization to construct and operate compressors and loop line facilities for the transportation of supplies of gas to MDU's Elk Basin Field for injection into storage. MDU states that, because of the oversupply on its system, it anticipates that its Baker Storage field would be filled to capacity by this summer. According to MDU, its Elk Basin Field can accommodate some of the overflow from Baker if the gas can be transported in a westerly direction along MDU's Cabin Creek to Elk Basin system to the Elk Basin Storage Field. Because of the capacity limitations on the Cabin Creek to Elk Basin system, however, it says it cannot now transport all the excess volumes to Elk Basin. The facilities proposed herein, it is stated, would enable MDU to transport the gas through the Cabin Creek-Elk Basin system for injection into the Elk Basin Storage Field. The second part of MDU's proposal, it says, involves the authorization to sell and deliver to MIGC certain volumes of excess gas pursuant to a gas sales and transportation contract dated April 20, 1981. Additionally, MDU says it is requesting authorization to sell and deliver, and store and redeliver to CIG, certain volumes of excess gas. Sales and services under the agreements, according to MDU, are proposed to commence on July 1, 1981. It is stated that the gas sold under each contract represents volumes in excess of MDU's integrated system requirements.

MDU states that many of the new supply sources it has acquired and which have resulted in its oversupply situation are located in North Dakota. In the past, according to MDU, those volumes in excess of day-to-day system requirements were primarily stored in its Baker Storage Field. It is stated, however, that the recent oversupply situation has required the injection of gas into the Baker Field at such rates that soon the field would have no remaining injection capacity.

According to MDU, it does have limited available storage capacity in its Elk Basin Storage Field. Due to current capacity limitations on its Cabin Creek-Elk Basin System, however, MDU says it is unable to move the overflow volumes from Baker to Elk Basin. Consequently, MDU says it is now proposing herein to construct certain facilities along the Cabin Creek-Elk Basin System that would allow it to transport the overflow gas for injection into Elk Basin.

These facilities, it is stated, would consist of approximately 13.7 miles of transmission looping facilities extending from a point in Carbon County, Montana, to the Elk Basin Compressor Station located in Park County, Wyoming. The estimated cost of the facilities, according to MDU is $1,795,300.

It is further stated that, in order to accommodate the increased volumes flowing to Elk Basin, MDU must construct and install certain compression facilities along the Cabin Creek-Elk Basin System consisting of

(1) two Solar 3730 horsepower Centaur Turbine compressor sets at a new compressor station to be located near Hathaway, Montana on the Worland-Cabin Creek Line at an estimated cost of $4,182,600,

(2) two Superior 1100 horsepower compressors and appurtenant facilities to be located at the existing Elk Basin Compressor Station at an estimated cost of $1,414,800, and

(3) certain piping modification at the Elk Basin Compressor Station yard area at an estimated cost of $839,800.

MDU says these facilities are necessary not only to accommodate the increased volumes that would be injected into Elk Basin, but also to handle the gas injected and withdrawn for the account of CIG under that portion of the CIG arrangement where MDU would store gas for CIG's account and redeliver such volumes out of storage during the months of October through March.

Regarding MDU's off-system sales of excess gas to CIG and MIGC, MDU states that the gas supply for these proposed sales is based on contracts for the purchase of gas at the tailgates of the following processing plants:

(1) the McKenzie Plant, located in McKenzie County, North Dakota,

(2) the TR Plant, located in Billings County, North Dakota,

(3) the Little Knife Plant, located in Billings County, North Dakota.

MDU says that, since some of the volumes from these three plants are excess to the needs of its interstate system, MDU proposes to sell them to CIG and MIGC.

According to MDU, under its sales and storage arrangements with CIG, MDU would deliver and sell, every day, a portion of the gas received by MDU at the three sources to CIG at two major delivery points. MDU says the first such point is an interconnection to be constructed between MDU's and MIGC's transmission facilities in the Recluse area, Campbell County, Wyoming. From that point of interconnection, according to MDU, MIGC would transport and deliver the gas to CIG at an existing interconnection between MIGC and CIG in Converse County, Wyoming. MDU says it expects that daily deliveries to CIG between July 1981 and June 1991, would be as follows:

Dates	Volumes (mcf)
July 1981 to September 1981	10,000
October 1981	16,400
November 1981 to March 1982	16,900
April 1982 to June 1982	16,400
April 1982 to September 1982	16,400
October 1982	16,400
November to March (1983–1991)	16,900
April to October (1983–1991)	16,400

MDU says the second major delivery point is an interconnection to be constructed between MDU's and CIG's transmission facilities near the Elk Basin Storage Field. During the summer period, it says, the volumes not delivered at the Recluse Delivery point could, in part, be sold to CIG and stored by MDU for CIG's account in MDU's Elk Basin storage facilities, and, in part, be delivered and sold directly to CIG and transported by CIG through its Elk Basin to Madden Line where it would be commingled with other CIG system supplies.

It is stated that the gas to be stored for CIG's account would be delivered and sold to CIG at CIG's existing compressor station located in Park County, Wyoming. MDU says that CIG would compress the gas and deliver it back to MDU for injection into the Elk Basin Storage Field. According to MDU, during the winter months, it would redeliver the gas to CIG.

MDU says that, in order for CIG to transport and deliver the compressed gas to the Elk Basin facilities for injection, CIG would have to construct approximately 1.7 miles of 12-inch line from the compressor plant to a point of redelivery at MDU's Elk Basin Plant located in Park County, Wyoming. According to MDU, the flow on that new proposed line would reverse during the withdrawal period, and the gas would then be delivered by MDU at the Elk Basin Plant into CIG's line for transportation to an existing interconnection between CIG's compressor plant and its Elk Basin to Madden Line.

MDU states that the gas delivered and sold directly to CIG would also occur at the CIG Compressor Station Delivery Point, but would then be transported by CIG through its Elk Basin to Madden Line.

It is stated that the term of the CIG arrangement would be fifteen years, divided into three, five-year service periods. During the first five years, according to MDU, it would deliver, on a firm basis, up to 17,850,000 Mcf per year. If the three sources of gas set forth above are insufficient to meet MDU's firm obligations, MDU says it would amend the agreement to add other specific sources of supply as necessary to fulfill its firm service obligation. During the second five years, according to MDU, it would sell, on a best efforts basis, up to 8,175,000 Mcf annually. If the supplies from the original three sources of supply are not then sufficient to supply 8,175,000 annually, it says, MDU would not be under any obligation to, commit additional sources of supply, but may do so in the exercise of its efforts. During the third five-year period, according to MDU, volumes committed to the sale would be those available to MDU at the designated supply sources, which in MDU's sole discretion are in excess of MDU's system requirements. MDU would not, it says, commit any of its general system supply to the performance of the sale.

According to MDU, the contract between it and MIGC is purely a sales and transportation arrangement. Following its purchase of volumes at the three plant-sources described above, MDU says it would resell a portion of such volumes to MIGC at the tailgate of those plants and that it would then transport the gas for MIGC's account for redelivery at the Recluse Delivery Point.

The term of the contract, according to MDU, is ten years, divided into two five-year service periods. During the first period, MDU says, it would sell and redeliver, on a firm basis, up to 3,650,000 Mcf per year. During the second five years, MDU says, it would sell and deliver, on a best efforts basis, up to 1,825,000 Mcf annually.

It is stated that, in order to sell and deliver gas directly to CIG and MIGC, and in order to store and redeliver gas for CIG, MDU would have to construct and install certain new facilities and modify certain existing facilities, as follows:

(1) modification of present plant facilities at the Fourche Compressor Station, Butte County, South Dakota at an estimated cost of $822,000, and the construction of a check measurement station at the Recluse Delivery Point at an estimated cost of $72,600.

(2) construction of a measurement station for delivery of gas to CIG at CIG's Elk Basin Compressor Station at an estimated cost of $88,200, as well as the modifications to piping facilities in MDU's Elk Basin Compressor Station Yard and construction of compressors and looping facilities for the Cabin Creek-Elk Basin System as described above.

MDU also says that it is requesting blanket authority to add or delete sources of supply and delivery and redelivery points necessary to effectuate the sales, transportation, and storage services described herein. According to MDU, such blanket authorization would only apply in cases where such additions and deletions do not entail facility construction.

According to MDU, since it would be rendering two different kinds of service under the proposed agreement with CIG, it is proposing two rates; for those volumes stored for CIG's account and redelivered to CIG MDU proposes an initial rate of 378.762 cents per Mcf; for those volumes sold and delivered directly to CIG, where there is no storage service, MDU proposes an initial rate of 361.992 cents per MCF. Both rates, it says, include the cost of the gas purchased at the three sources of supply, transportation costs, and storage costs (if applicable).

Under the MIGC contract, MDU says MIGC would pay the weighted average price that MDU pays for gas available at the sources of supply. In addition, it says , MIGC would pay a transportation charge for volumes redelivered to MIGC at the Recluse Delivery Point, which proposed initial transportation charge is 22.083 cents per Mcf.

MDU says the rates proposed herein for the cost of gas are not based on the system average cost of gas. Instead, MDU says, it is proposing to assign the cost of gas directly to CIG and MIGC which method would insure that MDU's system customers are neither disadvantaged by the sales nor are they "subsidizing" the sales to MDU's off-system customers.

MDU says that since the sales contemplated in this application are sales to off-system customers, the Commission must declare that the arrangements described are not subject to the provisions of MDU's FERC curtailment plan which was approved by the Commission by its order of November 30, 1979, in Docket No. RP16-91. According to MDU, the plan currently limits it to 7,500 new connections per year, all of which must be for Priority 1 users. MDU says it is requesting that the sales to CIG and MIGC be declared not subject to this limitation since the addition of these sales would not result in any curtailment for MDU's regular customers.

MDU says it will finance the various proposals described herein by means of internally generated funds or short-term financing.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 16, 1981, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determinng the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in a accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Section 7 and 15 of the Natural Gas Act and the Commission's Rules of Practices and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity.

If a petition for lease to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-16267 Filed 5-29-81; 8:45 am]

BILLING CODE 6450-85-M

[Docket No. ST81-260-000]

Mustang Fuel Corp.; Petition for Approval of Rates

May 26, 1981.

Take notice that on May 1, 1981, Mustang Fuel Corporation (Mustang), 1100 First National Center East, Oklahoma City, Oklahoma 73102, filed in Docket No. ST81-260-000 a petition for approval of rates and charges for transportation of gas pursuant to Subpart C of Part 284 of the Commission's Regulations and Section 311(a) of the Natural Gas Policy Act of

1978 (NGPA) on behalf of El Paso Natural Gas Company (El Paso), all as more fully set forth in the petition which is on file with the Commission and open to public inspection.

Mustang says that it and El Paso have entered into a transportation agreement dated January 9, 1981, under which Mustang would transport natural gas as authorized by Section 311(a)(2) of the NGPA. Mustang states that the transportation agreement contemplates transportation of gas resold by Oklahoma Gas and Electric Company (OG&E) to El Paso pursuant to a gas resale agreement dated January 9, 1981, together with other gas directly contracted for by El Paso in the State of Oklahoma which is reasonably accessible to Mustang's pipeline system. Mustang advises that the total daily quantity which El Paso would be required to take or pay for under said gas resale agreement and under its own Oklahoma gas purchase contracts, expressed in Mcf per day, constitutes the minimum "Contract Demand" under said transportation agreement. Mustang states further that the initial contract demand shall be deemed to be 130,000 Mcf based on anticipated quantities to be transported.

According to Mustang, El Paso would pay to Mustang a monthly amount for services rendered under said transportation agreement computed by multiplying El Paso's Contract Demand by the initial rate herein applied for of 22.29 cents per Mcf times 365/12, rounded to the nearest one-tenth of a cent. Mustang further states that the 22.29 cents per Mcf rate is based on a recently completed cost of service study, and that the cost of service study contains an allocation between the cost of service to OG&E and El Paso effective the date of first deliveries to or on behalf of El Paso. The cost of service was first determined, according to Mustang, for its entire gas transmission activities. Mustang says that, due to El Paso's furnishing its gas costs in kind, all gas costs included in the cost of service were directly assigned to OG&E.

Mustang advises that if it accepts, transports and redelivers on any day a quantity of gas in excess of El Paso's contract demand, the amount payable is adjusted upwards to reflect the greater quantity of gas handled, and that if it does not accept, transport and redeliver the contract demand on any day, when requested to do so by El Paso, the amount payable is adjusted downward to reflect the lesser quantity of gas handled.

Mustang says that it is to review periodically (at intervals not less than once each year) its rates to El Paso, coincident with its review of rates and charges to OG&E, and where applicable, is to file applications for changes in its rates to reflect changes in its cost of service and/or the allocation thereof between El Paso, OG&E and others since the last rate filing.

Mustang states that the elections othewise available to an intrastate pipeline under § 284.123(b)(1) are not available to it inasmuch as Mustang has no rate schedules on file with the Oklahoma Corporation Commission covering city-gate service or transportration service of the nature proposed to be rendered on behalf of El Paso. Neither that Commission nor any other state regulatory agency, according to Mustang, establishes transportation rates permitted to be charged by Mustang to its intrastate customers.

Accordingly, this Petition is filed pursuant to § 284.123(b)(2) of the Regulations, according to Mustang, with the request that the Commission determine, by order, that an initial rate of 22.29 cents per Mcf is fair and equitab'e for the service proposed to be rendered by Mustang.

Any person desiring to be heard or to make any protest with reference to said petition should on or before June 12, 1981, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to a proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-16246 Filed 5-29-81; 8:45 am]

BILLING CODE 6450-85-M

[Project No. 4471-000]

Public Utility District No. 1 of Ferry County; Application for Preliminary Permit

May 28, 1981.

Take notice that Public Utility District No. 1 of Ferry County (Applicant) filed on April 3, 1981, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)—825(r)] for proposed Project No. 4471 to be known as Barstow Project located on the Kettle River in Ferry and Stevens Counties, Washington. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Kenneth R. Coyle, Public Utility District No. 1 of Ferry County, 686 S. Clark Avenue, P.O. Box 324, Republic, Washington 99166. Any person who wishes to file a response to this notice should read the entire notice and must comply with the requirements specified for the particular kind of response that person wishes to file.

Project Description—The proposed project would consist of: (1) a 60-foot high and 380-foot long concrete gravity dam with a gate controlled spillway, impounding; (2) a 520-acre reservoir; (3) an intake structure; (4) a powerhouse to be located at the toe of the dam and containing two generating units, each rated at 7,500-foot kW; and (5) a 14-mile long transmission line. A new 1,500-foot long access road would be constructed to the project site.

The Applicant estimates that the average annual energy output would be 58 million kWh.

Purpose of Project—The energy generated by the project would be sold to the Bonneville Power Administration.

Proposed Scope and Cost of Studies Under Permit—Applicant seeks issuance of a preliminary permit for a period of 36 months, during which time it would conduct engineering, geotechnical, environmental, feasibility, and economic studies, and prepare an FERC license application. A new temporary gravel road will be required to conduct the studies. Applicant proposes to make test borings at the new dam and powerhouse sites. The cost of the work to be performed under the preliminay permit is estimated to be $150,000.

Purpose of Preliminary Permit—A preliminary permit does not authorize constuction. A permit, if issued, gives the Permittee, during the term of the permit, the right of priority of application for license while the Permittee undertakes the necessary studies and examinations to determine the engineering, economic, and environmental feasibility of the proposed project, the market for power, and all other information necessary for inclusion in an application for a license.

Agency Comments—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are invited to submit comments on the described application for preliminary permit. (A copy of the application may be obtained directly from the Applicant.) Comments should be confined to substantive issues

relevant to the issuance of a permit and consistent with the purpose of a permit as described in this notice. No other formal request for comments will be made. If an agency does not file comments within the time set below, it will be presumed to have no comments.

Competing Applications—Anyone desiring to file a competing application must submit to the Commission, on or before July 20, 1981, either the competing application. Submission of a timely notice of intent allows an interested person to file the competing application itself or a notice of intent to file a competing application no later than September 18, 1981. A notice of intent must conform with the requirements of 18 CFR 4.33 (b) and (c) (1980). A competing application must conform with the requirements of 18 CFR 4.33 (a) and (d) (1980).

Comments, Protests, or Petitions To Intervene—Anyone desiring to be heard or to make any protests about this application should file a petition to intervene or a protest with the Commission, in accordance with the requirements of its Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). Comments not in the nature of a protest may also be submitted by conforming to the procedures, specified in § 1.10 for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the commission's Rules. Any comments, protest, or petition to intervene must be received on or before July 20, 1981.

Filing and Service of Responsive Documents—Any comments, notices of intent, competing applications, protests, or petitions to intervene must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable. Any of these filings must also state that it is made in response to this notice of application for preliminary permit for Project No. 4471. Any comments, notices of intent, competing applications, protests, or petitions to intervene must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208, 400 First Street NW., Washington, D.C. 20426. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-16268 Filed 5-29-81; 8:45 am]

BILLING CODE 6450-85-M

[Docket No. CP81-334-000]

Southern Natural Gas Co.; Application

May 26, 1981.

Take notice that on May 13, 1981, Southern Natural Gas Company (Applicant), P.O. Box 2563, Birmingham, Alabama 35202, filed in Docket No. CP81-334-000 an applicaton pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operaton of facilities for the establishment of a positive displacement meter and appurtenances at its Tuscaloosa, Alabama, No. 1 Meter Station, to provide more efficient and accurate measurement of natural gas transported through said station, all as more fully set forth in the applicaton on file with the Commission and open to public inspection.

The application states that Applicant delivers natural gas through the Tuscaloosa station to Alabama Gas Corporation (Alagasco) at a contract delivery pressure of 250 psig. Alagasco has requested Applicant to increase the pressure in order that Alagasco may be able to increase the pressure at which it delivers gas to one of its customers near the Tuscaloosa station. The proposed facilities would be used in conjunction with the existing orifice meter to ensure the accurate and efficient measurement of gas delivered at pressures above the contract pressure.

The proposed facilities are estimated to cost $47,500, to be reimbursed by Alagasco.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 12, 1981, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hering is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-16247 Filed 5-29-81; 8:45 am]

BILLING CODE 6450-85-M

[Docket No. CP81-296-000]

Tennessee Gas Pipeline Co., a Division of Tenneco, Inc.; Application

May 26, 1981.

Take notice that on April 22, 1981, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Applicant), filed in Docket No. CP81-296 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain facilities and the transportation of natural gas for certain pipeline and distribution companies, all as more fully set forth in the application which is on file with the Commission and open to public inspection.
